Space Shuttle Launches

KSC Historical Report No. 1B (KHR-1B)

Kennedy Space Center
1981 - 2009
Total Space Shuttle Program Launches - 126

Space shuttles are launched from NASA facilities at the Kennedy Space Center (KSC) in Florida. Landings have occurred at KSC and Edwards Air Force Base (EAFB) in California, the two prime end-of-mission landing sites; and one at Space Harbor (SH), formerly known as Northrup Strip, White Sands, N.Mex. All liftoff and landing dates are determined using Eastern Standard and Eastern Daylight Times. For more detailed information on space shuttle missions and payloads, refer to Space Shuttle Mission Chronology 1981-1998, KSC Release No. 12-92, Revised February 1999, or Space Shuttle Mission Chronology 2000-2003, Vol. 2. See PMS-031, Major NASA Launches, for information on missions and payloads using other launch vehicles. Challenger was destroyed Jan. 28, 1986, during launch. Columbia was destroyed Feb 1, 2003, while returning to KSC from research mission STS-107.

Columbia — OV-102 **Discovery — OV-103** **Atlantis — OV-104**
Endeavour — OV-105 **Challenger — OV-099**

Note: The numbers next to the orbiter names and crew names below indicate how many shuttle launches each has flown, including that flight. No number indicates first shuttle mission for that crew member.

Space Shuttle Missions

Mission Name	Crew	Launch Date/ Landing Date	Orbiter	Primary Payload	Launch Pad/ Runway Landing
Operational Test Flights					
STS-1	Young, Crippen	04/12/81 04/14/81	Columbia[1]	—	39A 23 EAFB
STS-2	Engle, Truly	11/12/81 11/14/81	Columbia[2]	OSTA-1	39A 23 EAFB
STS-3	Lousma, Fullerton	03/22/82 03/30/82	Columbia[3]	OSS-1	39A 17 S, Whitesands, NM
STS-4	Mattingly, Hartsfield	06/27/82 07/04/82	Columbia[4]	DOD	39A 22 EAFB

LEGEND:

a - Entered unplanned orbit; recovered on STS 51-A and returned to Earth on November 16, 1984.

b - Failed to activate after deployment; was successfully repaired during STS 51-I and later entered normal service.

c - The Long Duration Exposure Facility (LDEF) was deployed on STS 41-C on April 7, 1984, and retrieved from space during STS-32 on January 12, 1990. It was returned to KSC on January 26, 1990, where the experiment trays were removed.

d - NASA's Space Shuttle liftoff, routine space operations and orbiter landing were successful. The Department of Defense (DoD) does not discuss the success of its payloads or experiments on classified missions.

e - Most or all payloads on these DoD missions are unclassified.

f - When deployed on April 7, 1991, the 35,000-pound spacecraft was called the Gamma Ray Observatory (GRO). NASA announced on September 23, 1991, that it was renaming the satellite the Arthur Holly Compton Gamma Ray Observatory or Compton Observatory in honor of the late Nobel Prize-winning physicist.

g - INTELSAT VI (F3) was launched into space aboard a Titan launch vehicle in March 1990. The Titan's second stage failed to separate from the satellite's perigee kick motor; without the extra boost from the kick motor, the INTELSAT satellite remained in an unusable low orbit. The STS-49 crew retrieved the satellite in the final of three space walks, and redeployed it with a new kick motor.

h - LAGEOS 1 was launched in 1976 on a Delta expendable vehicle.

i - The European Retrievable Carrier, or EURECA, was deployed on August 2, 1992, during STS-46. The free-flying platform with 15 scientific instruments was retrieved during Mission STS-57, on June 24, 1993.

Atop a column of fire, space shuttle Discovery hurtles into a clear blue sky over Central Florida on its STS-124 mission to the International Space Station. Launch was on time at 5:02 p.m. EDT May 31, 2008. During the 14-day mission, the shuttle crew installed the Japan Aerospace Exploration Agency's Kibo Japanese Pressurized Module and its remote manipulator system, or RMS.
