A. The purpose of this modification is to update the Statement of Work (SOW) 3.1.2, Inventory Management; add the Section J Table of Contents, and update Section J, Attachment J-9, Hardware List, to incoporate changes based on the transfer of hardware to Lockheed Martin; as a no cost change to the contract.

1. **Section C, Statement of Work,** is hereby revised to reflect the update to paragraph 3.1.2, Inventory Management, for the ground inventory, replacement page C-12 of the modified conformed contract is attached as page 3 of this modification.
2. **Section J, Table of Contents,** is hereby added to reflect the listing of attachments under Section J, replacement pages J-2 of the modified conformed contract is attached as page 4 of this modification.
3. **Attachment J-9, Hardware List,** is hereby revised in its entirety to reflect the addition and deletion of hardware being transferred to Lockheed Martin. As a result of this change, replacement pages J-A-9-1 through J-A9-28 of the modified conformed contract are attached as pages 5 through 32 of this modification.

B. This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of this agreed to modification, the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustment attributable to such facts or circumstances giving rise to these changes.

3.0 Hardware Sustaining

Hardware Sustaining responsibility will be designated as either Maintenance and Operations (M&O) or Sustaining Engineering (SE). The contractor shall have M&O responsibility for all hardware on this contract. For hardware identified as M&O only, NASA will retain overall SE responsibility. The hardware for which the contractor has SE responsibility, NASA will retain System Management oversight. Attachment J-9, Contractor Maintained and, or Sustained Hardware, defines the contractor's responsibility for each hardware item (SE or M&O only). The contractor shall provide SE and M&O for all Ground Support Equipment (GSE) on this contract.

3.1 Maintenance and Operations (M&O)

The contractor shall warehouse, acquire issue, track, maintain, and process all hardware identified in Attachment J-9, Contractor Maintained and, or Sustained Hardware, to ensure availability for flight and training requirements.

3.1.1 Storage

The contractor shall operate a total storage function, including controlled facilities, associated with this SOW. The contractor shall receive, verify, and issue flight and non-flight equipment into storage. The contractor shall segregate property in storage by flight or non-flight classification and as serviceable or non-serviceable. The contractor shall control perishable, shelf-life, and limited-life equipment.

3.1.2 Inventory Management

The contractor shall develop, implement, and maintain an automated inventory control system and workflow tool for all contractor-held Government property. The contractor shall define and maintain ground inventory levels required to support ISS flight and training requirements. For crew provisioning ground inventory, the contractor will utilize inputs from the OC/Crew Provisioning Team. To maintain inventories, the contractor shall acquire and, or fabricate parts, materials, and replacement units.

The contractor shall maintain a current inventory of all non-consumable FCE and stowage accommodations by location with location identified as "on ISS," "on a space transportation vehicle (and identify the transportation vehicle)," "disposed of," or "on the ground." For items identified as "on the ground" the contractor shall identify the location and status, e.g. "warehouse," "shipped to training facility," "under repair," "staged at launch site for contingency use."

A. The purpose of this Supplemental Agreement is to definitize the underlimit contract changes in accordance with Clause H.16 - Special Clause for Contract Changes and IDIQ Task Orders as follows:

Modification #	Mod Date	Description	Cost
16		Perform return assessments and develop and deliver Integrated Bag Level Hazard Assessments (IBLHAs) in accordance with DRD C-SA-05, Safety Analysis and Hazard Reports for all return/disposal cargo on Commercial Orbital Transportation Services (COTS) and Commercial Resupply Services (CRS) vehicles	(b) (4)

B. **Section C, Statement of Work (SOW),** is hereby updated in SOW Paragraph 4.4.11, Return Cargo Processing, to include ILBHAs for return/disposal cargo from COTS and CRS vehicles. As a result of this change, pages C-23 is hereby attached as page 3 of this modification.

C. **Attachment J-17 – Underlimit Pool Changes** is hereby updated to track all underlimit changes. As a result of this change, page J-A17-1 and J-A17-2 are hereby attached as pages 4 and 5 of this modification.

D. This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of this agreed to modification, the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustment attributable to such facts or circumstances giving rise to these changes.

4.4.9 As-Built Data Delivery to NLI

The contractor shall provide as-built data for cargo processed under this contract to the NLI during shipment to ensure accurate accounting for vehicle mass properties. This data includes as-built lists identifying bag type, bag-level mass properties, external identifier, Integrated Bag Level Hazards Assessment (IBLHA), constraints on bag co-location, ground handling requirements and orientation requirements.

The contractor shall provide as-packed bag weights to the Mission Integration Contract (MIC) for use in accounting for the launched mass of stowage provisions.

4.4.10 Hardware Shipment

The contractor shall ship packed cargo to the NLI and ship returned flight hardware to the hardware owners. The contractor shall ship loose hardware, including but not limited to non-manifested flight hardware, articles consigned to the U.S. Embassy in Russia and non-flight hardware when requested by the Government. The contractor shall pre-coordinate approval of International shipping, export and customs paperwork with receiving offices, and resolve issues with customs and handling agents to ensure timely cargo turnover. Translation services in the native language of the receiving country may be required to facilitate customs clearance.

4.4.11 Return Cargo Processing

For each Soyuz, COTS, CRS and CEV flight that returns cargo, the contractor shall receive, de-integrate, and disposition hardware (including waste or non-recoverable items) according to the flight specific RMDP. The contractor shall notify the hardware provider for any unplanned return hardware items and update the As-Flown RMDP accordingly to provide MIC with an official source for As-Flown Manifest updates. The contractor shall develop, update, and implement contingency procedures to disposition improperly labeled cargo, containers, and waste. For all return/disposal cargo on Commercial Orbital Transportation Services (COTS) and Commercial Resupply Services (CRS) vehicles, the contractor shall perform return assessments and develop and deliver Integrated Bag Level Hazard Assessments (IBLHAs) in accordance with DRD C-SA-05, Safety Analysis and Hazard Reports.

4.5 Decals, Placards and Graphics

The contractor shall provide flight and non-flight decals, placards, and graphics for NASA's ISS Program, and related research and development programs and spacecraft, including prototypes, mockups, trainers, and engineering mockups. This task includes scheduling, production, and technical and delivery coordination. The contractor shall provide inputs to JSC 27260, Data Process Document and Catalog, based on changing requirements, lessons learned, improved technology or revised processes.

B.2 TOTAL CONTRACT VALUE

The current cumulative contract value is $67,942,028 (including the Firm Fixed-Price (FFP) Phase-In and all Task Orders issued to date).

Task Order No. 001 was issued on July 12, 2011 that consisted a total price of $3,174,829 [redacted] (b) (4)

The minimum amount of IDIQ supplies and services ordered in total and paid for under this contract shall be $15,000.

The maximum not-to-exceed (NTE) value of IDIQ supplies and services ordered in total under this contract is $20 Million, which includes incidental materials and travel. The maximum NTE amount does not reflect an obligation of the Government. The Government's obligation hereunder shall be based on that specified in the task/delivery orders issued during the period of the contract.

B.3 NFS 1852.216-85 ESTIMATED COST AND AWARD FEE (SEP 1993)

The estimated cost of this contract is (b) (4) The maximum available award fee, excluding base fee, if any, is (b) (4) Total estimated cost, base fee, and maximum award fee is (b) (4)

(End of clause)

The contractor shall accept only task orders issued by the Contracting Officer. The total value of task orders issued under this clause shall not exceed $20,000,000 during the contract period of performance. Any work which falls under SOW 5.0 and would otherwise be ordered under the IDIQ provisions of this contract, but which is valued at less than $700,000, will be processed as an underlimit change pursuant to Clause H.16, Special Clause for Contract Changes and IDIQ Task Orders, in lieu of the task ordering procedures of this contract; these SOW 5.0 underlimit changes are excluded from the value of task orders issued, and are not subject to the IDIQ maximum value.

RATE TABLE FOR PRICING TASK ORDERS

The following labor and indirect rates shall be used in the establishment of the estimated cost of individual task orders. The labor rates are fully burdened composite team rates (prime and all subcontractors); but exclude prime fee. Fee will be negotiated as it is applied to each actual Task Order and will be paid based on the negotiated arrangement. Any negotiated fee will not exceed the max fee proposed by the contractor in the table below. The indirect rates are those that may be applied to non-labor resources costs, such as materials, travel and other. These indirect rates and the basis of application must be identified at the bottom of the table.
The parties agree that the fully burdened labor rates established below shall not be subject to any adjustment (upwards or downwards), regardless of actual rates incurred during contract performance.

(f) These requirements do not apply to contractor or subcontractor commercial contract related exports or exports pursuant to Technical Assistance Agreements or other license authorizations received by the contractor or its subcontractors and for which the contractor or its subcontractors will be the USPPI and/or "Exporter of Record."

(g) These requirements do not apply to exports for which there is "No License Required" (e.g. EAR99, 9A004 to Canadian International Partners on ISS, etc.)

(h) The contractor and its subcontractors shall report to the NASA JSC EST, in writing, any potential export issues (including those related to support of sustaining engineering and operations of ISS) that cannot be resolved by the contractor or its subcontractors, respectively. Such report and/or notification of issues and technical tasks should be reported to the NASA JSC EST at least three (3) months in advance of requested action.

(i) Upon discovery of unforeseen adverse export issues, the contractor shall immediately notify NASA JSC EST by telephone with a follow up e-mail or hardcopy letter of said issue and shall report to the NASA JSC EST, in writing, as the facts become known.

(j) This clause applies when the contractor or its subcontractors elect to export NASA owned Government Furnished Equipment and Property (GFE, GFP) (including data, software or hardware). In such instances, the contractor or
its subcontractors are the USPPI. They shall provide verifiable evidence that a valid export license, exemption or exception has been processed and approved (as applicable). They shall also provide this information for additional property that is not GFE or GFP that the contractor or its subcontractors elect to include with the GFE and GFP.

H.16 SPECIAL CLAUSE FOR CONTRACT CHANGES AND IDIQ TASK ORDERS

1. The parties agree that notwithstanding the provisions of Section I Clause 52.243-2 Changes—Cost Reimbursement, no change made pursuant to this clause shall give rise to an equitable adjustment in the estimated cost and applicable fees when such change causes, (i) contract cost increases(s) totaling less than $700,000, or (ii) contract cost decrease(s) totaling less than $700,000, or (iii) a combination of contract cost increases and decreases which in the aggregate total (i.e. the absolute value of which is) less than $700,000. Each such change shall be controlling in making this determination, and, for purposes of determining applicability of this clause, such change shall

B.4 NFS 1852.232-81 CONTRACT FUNDING (JUN 1990)

(a) For purposes of payment of cost, exclusive of fee, in accordance with the Limitation of Funds clause, the total amount allotted by the Government to this contract is (b) (4) This allotment is for cargo mission services and covers the following estimated period of performance: January 1, 2011 through December 6, 2012.

(b) An additional amount of (b) (4) is obligated under this contract for payment of fee.

(End of clause)

B.5 FUNDING FOR FIXED-PRICE ITEMS PHASE-IN

Fixed-Price (FP) Milestone Payments for Phase-In exist under a FP arrangement in this contract and therefore must be fully funded. FP Milestone Payments for Phase-In is fully funded at the time of contract award. Funds obligated under this clause are separate and distinct from those allotted under Clause B.3

The FP amount obligated and available for FP Milestone Payment for Phase-In is (b) (4)

The TOTAL FP amount obligated and available is (b) (4)

(End of clause)

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

A. The purpose of this Supplemental Agreement is to definitize the underlimit contract changes in accordance with Clause H.16 - Special Clause for Contract Changes and IDIQ Task Orders as follows:

Modification #	Mod Date	Description	Cost
37		Assess the feasibility of implementing a simplified Soft Capture System (SCS) for the NASA Docking System and develop a concept to a level of maturity that will enable NASA to determine technical and schedule risks associated with the alternate approach.	(b) (4)

B. **Section C, Statement of Work (SOW),** is hereby updated to add SOW paragraphs 5.7, Special Studies, and sub paragraph 5.7.1. As a result of this change, replacement page C-27 of the modified contract is attached as page 3 of this modification.

C. **Attachment J-16 – Deliverable Items List** is hereby added to track all deliverable items. As a result of this change, pages J-A16-2 and J-A16-3 are hereby attached as pages 4 and 5 of this modification.

D. **Attachment J-17 – Underlimit Pool Changes** is hereby updated to track all underlimit changes. As a result of this change, page J-A17-3 is hereby attached as pages 6 of this modification.

E. This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of this agreed to modification, the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustment attributable to such facts or circumstances giving rise to these changes.

5.3 Engineering Drawings/Data

Drawings shall be developed in accordance with ASME Y14.100, Engineering Drawing Practices; ASME Y14.24M, Types and Applications of Engineering Drawings; ASME Y14.34M Associated Lists; and ASME Y14.35M, Revision of Engineering Drawings and Associated Documents; and DRD C-MI-05, Engineering Drawings and Associated Lists. For all engineering drawings and associated engineering products that are delivered to NASA, or to NASA contractors, the contractor shall also transmit them to the Vehicle Master Database (VMDB) in accordance with DRD C-MI-04, ISS Vehicle Engineering Data.

5.4 CAD Models

The contractor shall deliver all CAD models developed under the Cargo Mission Contract (CMC) for new hardware or hardware modified on the CMC to the United States On-Orbit Segment (USOS) Acceptance and ISS Vehicle Sustaining contractor to maintain in a model library in accordance with DRD C-MI-03, Cargo Integration Cargo CAD Models for Launch, Return and On-orbit Configurations.

5.5 Safety and Reliability Assessments

The contractor shall perform and deliver safety assessments and FMEA/CIL worksheets in accordance with paragraph 2.5, respectively, for contractor developed hardware.

5.6 Development Schedules

The contractor shall prepare and deliver schedules for all hardware development projects to provide the Government with insight into overall project status in accordance with DRD C-PC-05, Cargo Mission Contract Program Schedules.

5.7 Special Studies

5.7.1 Simplified Docking System Feasibility Assessment

The contractor shall assess the feasibility of implementing a simplified soft capture system for the NASA Docking System and shall develop a concept to an appropriate level of maturity to allow NASA to determine technical and schedule risks associated with the alternate approach.

B.8 FIXED PRICE MILESTONE PAYMENTS – PHASE-IN

The following fixed-price amounts, identified in column C, will be paid for delivery of each of the milestones as shown in the table below on or before their associated due date in column B. Payment is dependent upon the contractor satisfactorily completing the milestones identified in their Attachment J-3, Phase-In Plan. When the milestone is not completed on or before the due date (column B) the fixed-price payment (column C) will be reduced by 2% per work day until the milestone is satisfactorily completed. These milestone payments only apply to milestone deliveries in the "phase-in period" identified in the contractor's Attachment J-3, Phase-In Plan.

A. The purpose of this Supplemental Agreement is to definitize the underlimit contract changes in accordance with Clause H.16 - Special Clause for Contract Changes and IDIQ Task Orders as follows:

Modification #	Mod Date	Description	Cost
43		Procure shipping containers and provide services required to transport manifested ISS cargo to the International Partners' launch facilities for flights Automated Transfer Vehicle (ATV) 4, ATV5, H-II Transfer Vehicle (HTV) 4, and HTV5.	(b) (4)

B. **Section C, Statement of Work (SOW),** is hereby updated to add contract requirements to SOW paragraph 4.2.1, Cargo Integration Planning. As a result of this change, replacement pages C-17 and C-18 of the modified contract are attached as page 3 and 4 of this modification.

C. **Attachment J-17 – Underlimit Pool Changes** is hereby updated to track all underlimit changes. As a result of this change, page J-A17-3 is hereby attached as pages 5 of this modification.

D. This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of this agreed to modification, the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustment attributable to such facts or circumstances giving rise to these changes.

The contractor shall develop, maintain, and deliver to the Cargo Integration Lead a single, multi-flight integrated schedule in accordance with DRD C-PC-05, Cargo Mission Contract Program Schedules. The purpose of the integrated schedule is to assess major mission milestones related to cargo processing and turnover to the NLI for all active missions to provide the Government with insight into overall cargo processing resource loading.

The contractor shall book coordinate, as defined in Attachment J-1: Dictionary, the following program process and requirements documents:

- SSP 50007, Space Station Inventory Management System Label Specification,
- SSP 50200-03, Station Program Implementation Plan (SPIP), Volume 3: Cargo Analytical Integration,
- SSP 50200-06, Station Program Implementation Plan (SPIP), Volume 6: Cargo Physical Processing,
- SSP 50465, Return Manifest Disposition Plan (RMDP) Blank Book, including flight specific appendices (i.e., Appendix D (team rosters), Appendix E (RMDP flight appendix), Appendix F (As-Flown RMDP) and Appendix G (Excess Integration and Unplanned Hardware) to be delivered using the Mission Integration Database Application System (MIDAS) RMDP application.

4.2 Cargo Coordination

The contractor shall perform the cargo coordination function as described in SSP 50200-03, Station Program Implementation Plan Volume 3: Cargo Analytical Integration, and SSP 50200-06, Station Program Implementation Plan Volume 6: Cargo Physical Processing. The contractor shall use the approved Manifest and approved Manifest Request (MR) reports from the MIDAS system as the flight specific source for cargo to be processed under this contract to ensure work is performed using a Government approved list. . In addition, the following documents define the MIDAS data interface for the HTV and ATV vehicles:

- SSP 50849, MIDAS to JAXA HTV Cargo Integration System ICD,
- SSP 50647, Mission Integration Database Applications System (MIDAS) to CIDMT ICD for ATV.

4.2.1 Cargo Integration Planning

The contractor shall establish and implement a flight specific Hardware Audit (HA) process for each manifested hardware item to collect ground handling and packing requirements, assess certification and export control status (when applicable), verify manifest data, and confirm delivery dates in accordance with SSP 50200-03, Station Program Implementation Plan, Volume 3: Cargo Analytical Integration, and SSP 50200-06, Station Program Implementation Plan, Volume 6: Cargo Physical Processing. The contractor shall perform as the facilitator for

identification and resolution of issues related to schedules and deliverables, including but not limited to export control status and, if required, the procurement of specialized shipping containers/transportation services to meet Department of Transportation standards, to ensure on-time delivery of manifested cargo to the NLI. The contractor shall update MIDAS to ensure completeness and accuracy of the Hardware Accountability Matrix Report (HAMR). Issues that cannot be resolved shall be reported to the LPM, NASA Cargo Integration Lead, and Daily Space Station Review (DSSR) Board to ensure Government awareness of cargo integration activities. The contractor shall deliver a Packing Data Report for cargo planned to be packed for launch on Progress and Soyuz flights.

4.2.2 Cargo De-Integration Planning

The contractor shall coordinate de-integration and hardware return plans with the Soyuz, COTS, CRS and CEV return vehicle providers, on-site NASA representatives (where applicable), and hardware owners to ensure returned hardware is delivered to the owner within the required time constraints. The contractor shall develop and maintain the requirements in the flight specific RMDP Appendices (SSP 50465-XXX, where XXX is flight specific). The contractor shall provide a hardware return summary to the Mission Integration and Operations Control Board (MIOCB) following the completion of return hardware disposition to identify impacts to future manifest plans, on-orbit inventory, and on-orbit stowage volume.

4.2.3 Inventory Management System (IMS) Bar Code Tracking

The contractor shall collect hardware to barcode relationships, including any encoded and associated Radio Frequency Identification (RFID) data, and maintain the relationship in MIDAS to ensure the accuracy of the on-orbit IMS database. The contractor shall maintain the content of the Barcode Inventory Tracking System (BITS) website with flight-specific MIDAS Inventory Tracking Reports (MITR) to support IMS bar code function. The contractor shall review and process barcode label requests JSC Form 733, Decal Design and Production Facility (DDPF) Support Request, and JF 1364, BITS Label Request [Supplement to DDPF]) in accordance with JSC 27260, Decal Process Document and Catalog. The contractor shall review and concur on, and process barcode label exemption requests to the NASA Cargo Integration Lead for approval in accordance with JF 1345, ISS Inventory Management System Bar Code Label Request for Exemption.

4.2.4 IMS Containment Data

The contractor shall document As-Built packing data in the MIDAS database system for hardware packed within the scope of this SOW for upload to the on-orbit IMS to ensure a full accounting of hardware containment within each packed bag or locker. As-Built packing data is defined per SSP 50200-06, Station Program Implementation Plan, Volume 6: Cargo Physical Processing. The contractor shall provide a capability for electronic upload of As-Built data in to

B.4 NFS 1852.232-81 CONTRACT FUNDING (JUN 1990)

(a) For purposes of payment of cost, exclusive of fee, in accordance with the Limitation of Funds clause, the total amount allotted by the Government to this contract is (b) (4) This allotment is for cargo mission services and covers the following estimated period of performance: January 1, 2011 through December 12, 2012.

(b) An additional amount of (b) (4) is obligated under this contract for payment of fee.

(End of clause)

B.5 FUNDING FOR FIXED-PRICE ITEMS PHASE-IN

Fixed-Price (FP) Milestone Payments for Phase-In exist under a FP arrangement in this contract and therefore must be fully funded. FP Milestone Payments for Phase-In is fully funded at the time of contract award. Funds obligated under this clause are separate and distinct from those allotted under Clause B.3

The FP amount obligated and available for FP Milestone Payment for Phase-In is (b) (4)

The TOTAL FP amount obligated and available is (b) (4)

(End of clause)

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

(End of clause)

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

The contractor's on-going business analysis shall support the ISS Program business process.

1.2.1 Contract Financial System

The contractor shall utilize a contract financial system which discretely tracks resources by fund source, contract Work Breakdown Structure (WBS), and elements of cost including labor, overhead, other direct costs (i.e. travel and subcontracts), and indirect costs. The contractor shall provide financial planning to the Government budget process (i.e. Program Planning, Budgeting, and Execution [PPBE] budget calls), and special requests for budget impacts. The contractor shall provide financial reporting in accordance with DRD C-PC-01, NF533 Monthly Cost Reporting. The contractor shall include financial reporting requirements in any subcontracts for all tiers of subcontracts with annual expenditures of $1 million or more.

1.2.2 Contract Work Breakdown Structure

The contractor shall develop, provide, and maintain a contract Work Breakdown Structure (WBS) Dictionary, in accordance with DRD C-PC-04, Work Breakdown Structure (WBS) and Dictionary. The contract WBS shall serve as the framework for contract planning, budgeting, cost reporting, schedule resource loading, and schedule status reporting to the ISS Program. The WBS map shall show mapping of the contractor WBS to SSP 50659, ISS Program WBS, at the lowest level of the ISS Program WBS. Elements of work provided by subcontractors with a total value of $1M or more shall be identified in the contract WBS.

1.2.3 Workforce Reports

The contractor shall produce Workforce Reports in accordance with DRD C-PC-03, Workforce Reports, to show organization, geographical breakdown and off-site versus on site workforce data.

1.3 Configuration and Data Management and Integration

The contractor shall develop, implement and administer configuration management operations in accordance with SSP 41170, ISS Program Configuration Management Requirements; SSP 50010, Standards for ISS Program Documentation; SSP 50123, Configuration Management Handbook; and SSP 50172, Data Management Handbook. The contractor shall develop and maintain a Configuration Management Plan in accordance with DRD C-CM-01, Configuration Management Plan.

1.4 Program Information Technology (IT)

The contractor shall provide the IT necessary to meet the ISS Program IT requirements in accordance with SSP 50013, Information Systems Plan. The contractor is responsible for training of CMC personnel in use of standard and unique IT skills. The contractor shall develop and implement RDR C-IT-02, IT Management Plan for reportable IT. The contractor shall report all IT delivered implementing an IT Capital Investment Plan and associated reports in

accordance with SSP 50222, ISS Capital Investment Planning document. The contractor shall develop and implement an IT Security Plan in accordance with DRD C-IT-01. The contractor shall implement an architecture that enables bi-directional digital data sharing and web-based access to CMC tools, information and data products with authorized users of the JSC network domain with Government representatives including transmission of information across firewalls and the required security access defined requirements. The contractor shall adhere to JSC IT website policies including NASA JSC Web Policy, JSC Policy on the Registration of Websites, and Section 508 of the Rehabilitation Act of 1974.

1.4.1 Launch/Return/On-orbit Data Set (LRODS) Software Application

The contractor shall implement a software application for the collection and management of active LRODS data. The contractor shall collect and prioritize application requirements on LRODS data collection from the International Space Station Program (ISSP), identify NASA databases that contain hardware information applicable to LRODS and evaluate the data and define approaches to extract data electronically. The contractor shall evaluate available ISS technologies for implementation.

1.5 Certification of Flight Readiness

The contractor shall develop, maintain, and implement a Certification of Flight Readiness (CoFR) Plan in accordance with DRD C-MI-01, Certification of Flight Readiness (CoFR) Plan, and SSP 50108, Certification of Flight Readiness Process Document. The contractor shall develop and implement an auditable approach to verify and ensure that flight preparation responsibilities and requirements are met and all problems dispositioned in accordance with SSP 50108.

1.6 Export Control

The contractor shall provide export control functions for all hardware, software and data requiring export in the execution of contract responsibilities.The contractor shall establish export control procedures that are compliant with regulations, and perform self-audits of their established export control procedures per DRD C-II-01, Export Control Plan (ECP), and SSP 50223 and deliver results of the Export Control Audits per DRD C-II-02, Export Control Audit Results.

The contractor shall identify contacts at Department of Homeland Security/Transportation Security Administration to aid cargo transport through US airports and expedite issue resolution.

A. The purpose of this Supplemental Agreement is to definitize the underlimit contract change in accordance with Clause H.16 - Special Clause for Contract Changes and IDIQ Task Orders as follows:

Modification #	Mod Date	Description	Cost
51		Design and develop an International Space Station (ISS) Food Warmer Mod Kit, and perform a Feasibility Study related to the Future Food Warmer and ISS Galley Table Capabilities	(b) (4)

B. **Section C, Statement of Work (SOW),** is hereby updated to add SOW subsection paragraph 5.7.2, Food Warmer and ISS Galley Feasibility Study. As a result of this change, replacement pages are attached.

C. **Attachment J-16 – Deliverable Items List** is hereby added to track all deliverable items. As a result of this change, J-16 is attached.

D. **Attachment J-17 – Underlimit Pool Changes** is hereby updated to track all underlimit changes. As a result of this change, J-17 is attached.

E. This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of this agreed to modification, the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustment attributable to such facts or circumstances giving rise to these changes.

5.3 Engineering Drawings/Data

Drawings shall be developed in accordance with ASME Y14.100, Engineering Drawing Practices; ASME Y14.24M, Types and Applications of Engineering Drawings; ASME Y14.34M Associated Lists; and ASME Y14.35M, Revision of Engineering Drawings and Associated Documents; and DRD C-MI-05, Engineering Drawings and Associated Lists. For all engineering drawings and associated engineering products that are delivered to NASA, or to NASA contractors, the contractor shall also transmit them to the Vehicle Master Database (VMDB) in accordance with DRD C-MI-04, ISS Vehicle Engineering Data.

5.4 CAD Models

The contractor shall deliver all CAD models developed under the Cargo Mission Contract (CMC) for new hardware or hardware modified on the CMC to the United States On-Orbit Segment (USOS) Acceptance and ISS Vehicle Sustaining contractor to maintain in a model library in accordance with DRD C-MI-03, Cargo Integration Cargo CAD Models for Launch, Return and On-orbit Configurations.

5.5 Safety and Reliability Assessments

The contractor shall perform and deliver safety assessments and FMEA/CIL worksheets in accordance with paragraph 2.5, respectively, for contractor developed hardware.

5.6 Development Schedules

The contractor shall prepare and deliver schedules for all hardware development projects to provide the Government with insight into overall project status in accordance with DRD C-PC-05, Cargo Mission Contract Program Schedules.

5.7 Special Studies

5.7.1 Simplified Docking System Feasibility Assessment

The contractor shall assess the feasibility of implementing a simplified soft capture system for the NASA Docking System and shall develop a concept to an appropriate level of maturity to allow NASA to determine technical and schedule risks associated with the alternate approach.

5.7.2 Food Warmer and ISS Galley Feasibility Study

The contractor shall perform a Feasibility Study to identify concepts for development of a future-state ISS Food Warmer and Galley Table Sustaining Contractor in support of SSCN 13391Node 1 Galley study.

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

A. The purpose of this Supplemental Agreement is to definitize the underlimit contract change in accordance with Clause H.16 - Special Clause for Contract Changes and IDIQ Task Orders as follows:

Modification #	Mod Date	Description	Cost
56		Perform additional Request for Support (RFS) Work Scope.	(b) (4)

B. **Section C, Statement of Work (SOW),** is hereby updated to revise SOW subsection paragraph 3.1.3, Crew Provisioning and SOW subsection paragraph 4.4.7, Cargo Packing. As a result of this change, replacement pages are attached.

C. **Attachment J-17 – Underlimit Pool Changes** is hereby updated to track all underlimit changes. As a result of this change, J-17 is attached.

D. This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of this agreed to modification, the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustment attributable to such facts or circumstances giving rise to these changes.

3.1.3 Crew Provisioning

The contractor shall perform Crew Provisioning Fit Checks/Reviews and participate in the Crew Provisioning Working Group as defined in SSP 50409, Crew Provisioning Management Plan. These activities allow the Crew Provisioning Working Group to determine the type and quantity of crew clothing, hygiene, and personal items requirements to be flown and to specify the necessary Crew Preference apparel for ground training and public affairs events for ISS Increment Crews.

3.1.4 Maintenance and Repair

The contractor shall maintain, repair and test the hardware identified in Attachment J-9 to maintain the required inventory. The contractor shall update required technical documentation including ADPs to maintain a record of the hardware's history. The contractor shall certify repair facilities, personnel and processes in accordance with SSP 50276, Depot/Manufacturing Facility Certification Plan.

3.1.5 Processing of Hardware

The contractor shall perform processing required to make the hardware identified in Attachment J-9, Contractor Maintained and, or Sustained Hardware, ready for flight or training use when requested by the Government. The contractor shall update required technical documentation including acceptance data packages to maintain a record of the hardware's history.

3.1.6 M&O Schedules

The contractor shall prepare and deliver schedules for all maintenance, repair, and processing activities to provide the Government with insight into overall project status in accordance with DRD C-PC-05, Cargo Mission Contract Program Schedules.

3.2 Sustaining Engineering

3.2.1 Hardware Performance Analysis

The contractor shall monitor, analyze, and document hardware reliability and performance to determine actual versus expected performance, anomalous behavior, and required updates to repair, maintenance plans, check out plans, and operational procedures for hardware sustained on this contract. The contractor shall perform an analysis of the use, maintenance (Preventive and Corrective), replacement, and problems to be used in inventory management for all the equipment for which the contractor has accountability.

The contractor shall produce flight labels for all packed stowage configurations developed by this contractor. CTB labels shall be produced in accordance with drawing number SEG 32106109 (4 inch Contents Label) and installed in accordance with SSP 50005, Flight Crew Integration Standard (NASA-STD-3000/T).

4.4.5 Cargo Imagery

The contractor shall provide imagery of cargo items and integrated bags and assemblies (including labeling) prior to or during the cargo integration and de-integration processes in accordance with SSP 50200-06, Station Program Implementation Plan, Volume 6: Cargo Physical Processing, and SSP 50502, International Space Station Preflight Imagery Requirements. The contractor shall provide this imagery to the community with sufficient time, not less than 48 hours, for review and comment to support implementation of approved changes to the final configuration before shipping to the NLI.

4.4.6 Foam Cutting Services

The contractor shall provide foam-cutting services to manufacture packing provisions for all bags packed on this contract or for any NASA hardware to be launched on ISS visiting vehicles to meet hardware packing requirements. The contractor shall provide foam-cutting services to manufacture packing provisions or mockups for other contractors and IPs, when approved by the Government.

4.4.7 Cargo Packing

The contractor shall integrate the flight hardware and stowage provisions in accordance with stowage layouts, implementing all packing and labeling requirements defined from the Hardware Audit and any cargo layout review(s) and maintained in the HAMR. The contractor shall perform internal fit checks of pressurized cargo bags or assemblies to be integrated into launch vehicle racks or stowage volumes, using a fit check tool sized to the internal rack or stowage volume dimensions, prior to shipment to NLI to mitigate issues with vehicle integration at the launch site. The contractor shall provide flight certified stowage provisions to the ISS Community for manifested hardware to ensure items are delivered "Flight Ready" for packaging and delivery to NLI.

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

B.8 FIXED PRICE MILESTONE PAYMENTS – PHASE-IN

The following fixed-price amounts, identified in column C, will be paid for delivery of each of the milestones as shown in the table below on or before their associated due date in column B. Payment is dependent upon the contractor satisfactorily completing the milestones identified in their Attachment J-3, Phase-In Plan. When the milestone is not completed on or before the due date (column B) the fixed-price payment (column C) will be reduced by 2% per work day until the milestone is satisfactorily completed. These milestone payments only apply to milestone deliveries in the "phase-in period" identified in the contractor's Attachment J-3, Phase-In Plan.

ALL OCCUPATIONS LISTED ABOVE RECEIVE THE FOLLOWING BENEFITS:

HEALTH AND WELFARE: Life, accident, and health insurance plans, sick leave, pension plans, civic and personal leave, severance pay, and savings and thrift plans. Minimum employer

contributions costing an average of $3.35 per hour computed on the basis of all hours worked by service employees employed on the contract.

VACATION: 2 weeks paid vacation after 1 year of service with a contractor or successor; 3 weeks after 5 years, and 4 weeks after 15 years. Length of service includes the whole span of continuous service with the present contractor or successor, wherever employed, and with the predecessor contractors in the performance of similar work at the same Federal facility. (Reg. 29 CFR 4.173)

HOLIDAYS: A minimum of ten paid holidays per year, New Year's Day, Martin Luther King Jr's Birthday, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day. (A contractor may substitute for any of the named holidays another day off with pay in accordance with a plan communicated to the employees involved.) (See 29 CFR 4174)

THE OCCUPATIONS WHICH HAVE NUMBERED FOOTNOTES IN PARENTHESES RECEIVE THE FOLLOWING:

1) COMPUTER EMPLOYEES: Under the SCA at section 8(b), this wage determination does not apply to any employee who individually qualifies as a bona fide executive, administrative, or professional employee as defined in 29 C.F.R. Part 541. Because most Computer System Analysts and Computer Programmers who are compensated at a rate not less than $27.63 (or on a salary or fee basis at a rate not less than $455 per week) an hour would likely qualify as exempt computer professionals, (29 C.F.R. 541.400) wage rates may not be listed on this wage determination for all occupations within those job families. In addition, because this wage determination may not list a wage rate for some or all occupations within those job families if the survey data indicates that the prevailing wage rate for the occupation equals or exceeds $27.63 per hour conformances may be necessary for certain nonexempt employees. For example, if an individual employee is nonexempt but nevertheless performs duties within the scope of one of the Computer Systems Analyst or Computer Programmer occupations for which this wage determination does not specify an SCA wage rate, then the wage rate for that employee must be conformed in accordance with the conformance procedures described in the conformance note included on this wage determination.

Additionally, because job titles vary widely and change quickly in the computer industry, job titles are not determinative of the application of the computer professional exemption. Therefore, the exemption applies only to computer employees who satisfy the compensation requirements and whose primary duty consists of:

(1) The application of systems analysis techniques and procedures, including consulting with users, to determine hardware, software or system functional specifications;
(2) The design, development, documentation, analysis, creation, testing or modification of computer systems or programs, including prototypes, based on and related to user or system design specifications;

(3) The design, documentation, testing, creation or modification of computer programs related to machine operating systems; or
(4) A combination of the aforementioned duties, the performance of which requires the same level of skills. (29 C.F.R. 541.400).

2) AIR TRAFFIC CONTROLLERS AND WEATHER OBSERVERS - NIGHT PAY AND SUNDAY PAY: If you work at night as part of a regular tour of duty, you will earn a night differential and receive an additional 10% of basic pay for any hours worked between 6pm and 6am. If you are a full-time employed (40 hours a week) and Sunday is part of your regularly scheduled workweek, you are paid at your rate of basic pay plus a Sunday premium of 25% of your basic rate for each hour of Sunday work which is not overtime (i.e. occasional work on Sunday outside the normal tour of duty is considered overtime work).

HAZARDOUS PAY DIFFERENTIAL: An 8 percent differential is applicable to employees employed in a position that represents a high degree of hazard when working with or in close proximity to ordinance, explosives, and incendiary materials. This includes work such as screening, blending, dying, mixing, and pressing of sensitive ordnance, explosives, and pyrotechnic compositions such as lead azide, black powder and photoflash powder. All dry-house activities involving propellants or explosives. Demilitarization, modification, renovation, demolition, and maintenance operations on sensitive ordnance, explosives and incendiary materials. All operations involving regarding and cleaning of artillery ranges.

A 4 percent differential is applicable to employees employed in a position that represents a low degree of hazard when working with, or in close proximity to ordnance, (or employees possibly adjacent to) explosives and incendiary materials which involves potential injury such as laceration of hands, face, or arms of the employee engaged in the operation, irritation of the skin, minor burns and the like; minimal damage to immediate or adjacent work area or equipment being used. All operations involving, unloading, storage, and hauling of ordnance, explosive, and incendiary ordnance material other than small arms ammunition. These differentials are only applicable to work that has been specifically designated by the agency for ordnance, explosives, and incendiary material differential pay.

** UNIFORM ALLOWANCE **

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsibility of the employee, all

contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of $3.35 per week (or $.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations," Fifth Edition, April 2006, unless otherwise indicated. Copies of the Directory are available on the Internet. A links to the Directory may be found on the Wage and Hour Division (WHD) home page at http://www.dol.gov/esa/whd/ or through the Wage Determinations On-Line (WDOL) Web site at http://wdol.gov/.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE {Standard Form 1444 (SF 1444)}

Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined. Such conforming process shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees. The conformed classification, wage rate, and/or fringe benefits shall be retroactive to the commencement date of the contract. {See Section 4.6 (C)(vi)} When multiple wage determinations are included in a contract, a separate SF 1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

1) When preparing the bid, the contractor identifies the need for a conformed occupation(s) and computes a proposed rate(s).

2) After contract award, the contractor prepares a written report listing in order proposed classification title(s), a Federal Grade Equivalency (FGE) for each proposed classification(s), job description(s), and rationale for proposed wage rate(s), including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where

there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.

3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, for review. (See section 4.6(b)(2) of Regulations 29 CFR Part 4).

4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.

5) The contracting officer transmits the Wage and Hour decision to the contractor.

6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF 1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to insure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage.

B.8 FIXED PRICE MILESTONE PAYMENTS – PHASE-IN

The following fixed-price amounts, identified in column C, will be paid for delivery of each of the milestones as shown in the table below on or before their associated due date in column B. Payment is dependent upon the contractor satisfactorily completing the milestones identified in their Attachment J-3, Phase-In Plan. When the milestone is not completed on or before the due date (column B) the fixed-price payment (column C) will be reduced by 2% per work day until the milestone is satisfactorily completed. These milestone payments only apply to milestone deliveries in the "phase-in period" identified in the contractor's Attachment J-3, Phase-In Plan.

(f) These requirements do not apply to contractor or subcontractor commercial contract related exports or exports pursuant to Technical Assistance Agreements or other license authorizations received by the contractor or its subcontractors and for which the contractor or its subcontractors will be the USPPI and/or "Exporter of Record."

(g) These requirements do not apply to exports for which there is "No License Required" (e.g. EAR99, 9A004 to Canadian International Partners on ISS, etc.)

(h) The contractor and its subcontractors shall report to the NASA JSC EST, in writing, any potential export issues (including those related to support of sustaining engineering and operations of ISS) that cannot be resolved by the contractor or its subcontractors, respectively. Such report and/or notification of issues and technical tasks should be reported to the NASA JSC EST at least three (3) months in advance of requested action.

(i) Upon discovery of unforeseen adverse export issues, the contractor shall immediately notify NASA JSC EST by telephone with a follow up e-mail or hardcopy letter of said issue and shall report to the NASA JSC EST, in writing, as the facts become known.

(j) This clause applies when the contractor or its subcontractors elect to export NASA owned Government Furnished Equipment and Property (GFE, GFP) (including data, software or hardware). In such instances, the contractor or its subcontractors are the USPPI. They shall provide verifiable evidence that a valid export license, exemption or exception has been processed and approved (as applicable). They shall also provide this information for additional property that is not GFE or GFP that the contractor or its subcontractors elect to include with the GFE and GFP.

(End of clause)

H.16 SPECIAL CLAUSE FOR CONTRACT CHANGES AND IDIQ TASK ORDERS

1. The parties agree that notwithstanding the provisions of Section I Clause 52.243-2 Changes—Cost Reimbursement, no change made pursuant to this clause shall give rise to an equitable adjustment in the estimated cost and applicable fees when such change causes, (i) contract cost increases(s) totaling less than $700,000, or (ii) contract cost decrease(s) totaling less than $700,000, or (iii) a combination of contract cost increases and decreases which in the aggregate total (i.e. the absolute value of which is) less than $700,000. Each such change shall be controlling in making this determination, and, for purposes of determining applicability of this clause, such change shall

not be added to any other change nor shall any change be split into sub elements. The parties recognize that several changes may be grouped together in a bilateral contract modification for administrative purposes. Further, the parties agree that a Task Order will not be used pursuant to clause B.6, IDIQ Ordering Procedures, unless the value of said Task Order exceeds $700,000.

2. This clause applies to all contract changes authorized and issued pursuant to clause 52.243-Changes-Cost Reimbursement and all orders issued under B.6 IDIQ Orders and shall continue to apply to all such changes issued and authorized through the contract period of performance.

3. The UL pool for the first contract year, April 1, 2011 through March 31, 2012, is [redacted] (b) (4)

4. Establishing the Annual Underlimit (UL) Pool:
   a. The annual UL pool is based on the preceding year's definitized UL changes, from February 1 through January 31.
   b. The contractor shall submit the UL proposal by the third Friday of February each year.
   c. The contractor shall submit a proposal utilizing the previous year's definitized UL changes, including the negotiated basis of estimates priced using current/forward pricing rates for cost by labor, travel, materials, indirect, overhead, G&A, fee, and the total cost.
   d. UL modifications will be issued for all UL changes under $700,000; therefore, no TO's or NTEs will be needed for UL contract modifications.

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

The contractor shall perform the following tasks by July 31, 2013 to certify the RRM ROTC Assembly foam clamshell launch configuration for HTV4, supporting launch date currently scheduled for August 3, 2013:

a) Identify foam clamshell requirements including closure mechanism.
b) Identify loads and dynamics requirements.
c) Assess a reduced set of requirements in line with previous clamshell cushions flown as stowage provisions (similar to Progress Stowage Integration Platform (PSIP)/ Integrated Communications Unit (ICU)).
d) Perform analysis to certify foam clamshell designed to protect and restrain the RRM ROTCC Assembly.
e) Perform the clamshell/strap strength and fracture analysis and report.
f) Create the Mass Properties Report.
g) Generate a stowage layout and cushion fabrication layout drawings.
h) Perform a safety assessment for the new hardware configuration (similar to an Integrated Bag Level Hazard Analysis (IBLHA)).

1. The purpose of this modification is to make administrative updates to the contract. This modification constitutes a full and complete equitable adjustment for the parties for the changes identified in paragraphs 2 through 7 below.

2. Section B, Supplies or Services and Price/Costs, Clause B.2, Total Contract Value, is revised for clarification purposes to add the word "Remaining" on the IDIQ (NTE) lines of each table, as follows (changes noted by italics):

B.2 TOTAL CONTRACT VALUE

The current cumulative contract value is $76,294,172 (including the Firm Fixed-Price (FFP) Phase-In, all Task Orders issued to date and Underlimit Pool for Contract Year 2).

Task Order (TO) No. 001 was issued on July 12, 2011 that consisted a total price of $3,174,829 [redacted] (b) (4) Task Order No. 001, Revision 01 was issued on June 8, 2012 with a total increase in price of $410,094 [redacted] (b) (4) The total revised price for TO 001 is $3,584,923 [redacted] (b) (4)

The minimum amount of IDIQ supplies and services ordered in total and paid for under this contract shall be $15,000.

The maximum not-to-exceed (NTE) value of IDIQ supplies and services ordered in total under this contract is $20 Million, which includes incidental materials and travel. The maximum NTE amount does not reflect an obligation of the Government. The Government's obligation hereunder shall be based on that specified in the task/delivery orders issued during the period of the contract.

ALL OCCUPATIONS LISTED ABOVE RECEIVE THE FOLLOWING BENEFITS:

HEALTH & WELFARE: Life, accident, and health insurance plans, sick leave, pension plans, civic and personal leave, severance pay, and savings and thrift plans. Minimum employer

contributions costing an average of $3.71 average computed on the basis of all hours worked by service employees employed on the contract.

VACATION: 2 weeks paid vacation after 1 year of service with a contractor or successor; 3 weeks after 5 years, and 4 weeks after 15 years. Length of service includes the whole span of continuous service with the present contractor or successor, wherever employed, and with the predecessor contractors in the performance of similar work at the same Federal facility. (Reg. 29 CFR 4.173)

HOLIDAYS: A minimum of ten paid holidays per year, New Year's Day, Martin Luther King Jr's Birthday, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day. (A contractor may substitute for any of the named holidays another day off with pay in accordance with a plan communicated to the employees involved.) (See 29 CFR 4174)

THE OCCUPATIONS WHICH HAVE NUMBERED FOOTNOTES IN PARENTHESES RECEIVE THE FOLLOWING:

1) COMPUTER EMPLOYEES: Under the SCA at section 8(b), this wage determination does not apply to any employee who individually qualifies as a bona fide executive, administrative, or professional employee as defined in 29 C.F.R. Part 541. Because most Computer System Analysts and Computer Programmers who are compensated at a rate not less than $27.63 (or on a salary or fee basis at a rate not less than $455 per week) an hour would likely qualify as exempt computer professionals, (29 C.F.R. 541.400) wage rates may not be listed on this wage determination for all occupations within those job families. In addition, because this wage determination may not list a wage rate for some or all occupations within those job families if the survey data indicates that the prevailing wage rate for the occupation equals or exceeds $27.63 per hour conformances may be necessary for certain nonexempt employees. For example, if an individual employee is nonexempt but nevertheless performs duties within the scope of one of the Computer Systems Analyst or Computer Programmer occupations for which this wage determination does not specify an SCA wage rate, then the wage rate for that employee must be conformed in accordance with the conformance procedures described in the conformance note included on this wage determination.

Additionally, because job titles vary widely and change quickly in the computer industry, job titles are not determinative of the application of the computer professional exemption. Therefore, the exemption applies only to computer employees who satisfy the compensation requirements and whose primary duty consists of:

(1) The application of systems analysis techniques and procedures, including consulting with users, to determine hardware, software or system functional specifications;

(2) The design, development, documentation, analysis, creation, testing or modification of computer systems or programs, including prototypes, based on and related to user or system design specifications;

(3) The design, documentation, testing, creation or modification of computer programs related to machine operating systems; or

(4) A combination of the aforementioned duties, the performance of which requires the same level of skills. (29 C.F.R. 541.400).

2) AIR TRAFFIC CONTROLLERS AND WEATHER OBSERVERS - NIGHT PAY & SUNDAY PAY: If you work at night as part of a regular tour of duty, you will earn a night differential and receive an additional 10% of basic pay for any hours worked between 6pm and 6am. If you are a full-time employed (40 hours a week) and Sunday is part of your regularly scheduled workweek, you are paid at your rate of basic pay plus a Sunday premium of 25% of your basic rate for each hour of Sunday work which is not overtime (i.e. occasional work on Sunday outside the normal tour of duty is considered overtime work).

HAZARDOUS PAY DIFFERENTIAL: An 8 percent differential is applicable to employees employed in a position that represents a high degree of hazard when working with or in close proximity to ordinance, explosives, and incendiary materials. This includes work such as screening, blending, dying, mixing, and pressing of sensitive ordance, explosives, and pyrotechnic compositions such as lead azide, black powder and photoflash powder. All dry-house activities involving propellants or explosives. Demilitarization, modification, renovation, demolition, and maintenance operations on sensitive ordnance, explosives and incendiary materials. All operations involving regrading and cleaning of artillery ranges.

A 4 percent differential is applicable to employees employed in a position that represents a low degree of hazard when working with, or in close proximity to ordance, (or employees possibly adjacent to) explosives and incendiary materials which involves potential injury such as laceration of hands, face, or arms of the employee engaged in the operation, irritation of the skin, minor burns and the like; minimal damage to immediate or adjacent work area or equipment being used. All operations involving, unloading, storage, and hauling of ordance, explosive, and incendiary ordnance material other than small arms ammunition. These differentials are only applicable to work that has been specifically designated by the agency for ordance, explosives, and incendiary material differential pay.

** UNIFORM ALLOWANCE **

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition,

where uniform cleaning and maintenance is made the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of $3.35 per week (or $.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations", Fifth Edition, April 2006, unless otherwise indicated. Copies of the Directory are available on the Internet. A links to the Directory may be found on the WHD home page at http://www.dol.gov/esa/whd/ or through the Wage Determinations On-Line (WDOL) Web site at http://wdol.gov/.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE {Standard Form 1444 (SF 1444)}

Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined. Such conforming process shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees. The conformed classification, wage rate, and/or fringe benefits shall be retroactive to the commencement date of the contract. {See Section 4.6 (C)(vi)} When multiple wage determinations are included in a contract, a separate SF 1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

1) When preparing the bid, the contractor identifies the need for a conformed occupation(s) and computes a proposed rate(s).

2) After contract award, the contractor prepares a written report listing in order proposed classification title(s), a Federal grade equivalency (FGE) for each proposed classification(s), job description(s), and rationale for proposed wage rate(s), including information regarding the

agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.

3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, for review. (See section 4.6(b)(2) of Regulations 29 CFR Part 4).

4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.

5) The contracting officer transmits the Wage and Hour decision to the contractor.

6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF 1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to insure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination.
