

NASA's Michoud Assembly Facility

Resident Agencies

NASA's Michoud Assembly Facility is one of the largest employers in New Orleans, with more than 4,200 federal, state, academic and technology-based industry employees on-site. The unique facility serves as home to several government entities, universities and private sector companies. Its tenants include:

National Aeronautics and Space Administration

Michoud Assembly Facility

The facility is responsible for the manufacture and assembly of large aerospace systems and structures supporting the space shuttle external tank and NASA exploration programs and projects. A component of NASA's Marshall Space Flight Center in Huntsville, Ala., Michoud includes one of the world's largest manufacturing plants, with 43 acres under one roof, and a port with deep-water access, permitting transportation of large space systems and hardware.

Department of Agriculture

U.S. Department of Agriculture National Finance Center

The National Finance Center serves the U.S. Department of Agriculture and other federal customers, providing reliable, cost-effective, employee-centric systems and services. The center is designated as a Federal Shared Services/ePayroll provider and supports more than 170 federal organizations with payroll and human resources management applications and related services. In addition, the center provides financial systems and services, including accounting, financial statements and administrative payments, to the USDA.

Lockheed Martin Corporation

Lockheed Martin Michoud Space Systems

Lockheed Martin is NASA's prime contractor for the manufacture and assembly of the space shuttle external tank at the Michoud Assembly Facility. Lockheed Martin also will build spaceflight hardware for the Orion crew exploration vehicle, the successor to the space shuttle, and play an active role in NASA's Commercial Orbital Transportation Services (COTS) project.

University of New Orleans

National Center for Advanced Manufacturing

The center is a partnership between NASA, the state of Louisiana and the University of New Orleans, providing research, advanced manufacturing technology and material evaluation techniques for use in aerospace and commercial markets. As part of the University of New Orleans' College of Engineering, the center also offers advanced educational courses and distance learning to senior and graduate students and members of the aerospace industry.
