

Astronaut Recruitment PSA #2

"I helped invent a device that detects breast cancer at an earlier stage."

"I was a test pilot in the Air Force."

"I was a high school science teacher."

"My interests include snowboarding, photography and physics."

"I received three patents for my research in optics."

"Actually, I am a rocket scientist."

They all applied to be NASA Astronauts and they made it. America needs you at the frontiers of space and technology.
