

NASA Glenn Visitor Center 40TH ANNIVERSARY OF APOLLO July 18, 2009, 10 a.m. to 3 p.m.

Free Third Saturday Event

On July 20, 1969, NASA took the first giant leap for mankind. Today, we're hard at work to return to the moon. Join us for a look back at the historic events as we celebrate the 40th anniversary of Apollo 11 and look at NASA's ongoing work to develop the new rockets and spacecraft that will enable humans to return to the moon and beyond.

11 a.m. - Honoring the Past

Rocket scientist Bryan Palaszewski discusses the Apollo missions.

10:30 a.m. to 2 p.m. - Tour Glenn's 10X10 Wind Tunnel and the Zero Gravity Research Facility

Tours begin every half hour. Tickets available 30 minutes before each tour. First come, first served.

1 p.m. - Creating the Future

Randy Humphries, acting director of space flight systems, describes the Constellation Program that will return humans to the moon.

Free kid's activities include a digital photograph from the "Picture Yourself in Space" photo booth, take-home crafts and viewing moon rock microscope slides.

- Access to the NASA Glenn Visitor Center is limited to U.S. citizens.
- The Visitor Center and tour stops are wheelchair accessible.
- All adult visitors are required to present government-issued photo identification.

FREE ADMISSION ALWAYS!

To register call (216) 433-9653
