Speakers Bureau

Need a captivating speaker?

Looking for someone to share the excitement of space exploration at NASA and capture the interest and excitement of your audiences?

Our speakers can address these topics and more.

Space Flight Programs

International Space Station

Space Shuttle

Constellation & Lunar Exploration

Engineering & Technical Fields

Space & Life Sciences

Technology

Medical Applications

Life-support Systems

Spacesuit Design

Spin-off Technology

Speaker requests are made online, preferably with a 6-8 week lead time for domestic requests and 90 days for international requests.

Make your request today! To learn more about our speakers and topics, visit www.nasa.gov/about/speakers

Education Outreach Program

Have no fear! Space program volunteers from Johnson Space Center can travel to education events within a 50-mile radius of JSC.

- Classroom guest presenters
- Science fair judges
- Tutors and mentors
- Host students for career shadowing
- Take part in student interviews

Note: NASA Johnson Space Center (JSC) speakers and exhibits are available primarily for requests in JSC's region of Colorado, Kansas, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, and Texas, as well as selected events across the nation and internationally.

Traveling Exhibits

For your next event, display state-of-the-art NASA exhibits.

Just as NASA is driven to explore, NASA Johnson Space Center can provide exciting space program exhibits to your event or facility.

- Spacecraft models
- Spacesuits
- Roll-up and pull-out displays
- Space artifacts
- Photo kiosks
- Exploration mini-trailer

NASA exhibits are loaned to organizations to use for educational purposes. NASA's exhibits cannot be loaned to individuals.

These exhibits are available on a first-come, first-serve basis for short- (1-29 days) and long-term (30-90 days) loans. In most instances, proof of insurance is necessary to secure exhibit reservation.

As a free service of NASA and the United States government, items can not be loaned to organizations charging for entry into an exhibition primarily to view NASA exhibits.

Exhibits can be requested at www.nasa.gov/centers/johnson/events/exhibits

Education Outreach

Let JSC's Office of Education enrich the education and career development efforts of your school or educational organization.

Digital Learning Network

Get connected to NASA's DLN and go back to the moon, on to Mars, and beyond! This free, interactive program allows students of all ages to learn more about Earth and journey into space.

- Video-conferencing and Web casts
- Speak with NASA scientists, engineers, astronauts, and education specialists
- Real-time demonstrations and interactions

Teaching from Space Program

Enter the new frontier of teaching about space...

- Speak live with crew members in space
- View the Earth through remote programming cameras from space

Aerospace Education Services Program

AESP can make science and math cool. The program is a professional development initiative that serves elementary and secondary educators by providing:

- Classroom demonstrations
- Distance learning events
- In-service training
- Pre-service training for university students
- An opportunity to pursue the NASA workforce pipeline

Educator Resource Center

ERCs provide expertise and facilities to help educators access and use science, math and technology instructional products aligned with national and state standards based on NASA's unique mission and results. The ERC provides in-service and pre-service training using NASA instructional products and demonstrations of educational technologies.
