

**SPACE ACT AGREEMENT AMENDMENT ONE
BETWEEN
NATIONAL AERONAUTICS AND SPACE ADMINISTRATION
AND
THE BOEING COMPANY
FOR
COMMERCIAL CREW DEVELOPMENT (CCDev)**

PURPOSE AND AGENCY COMMITMENT

The purpose of this Amendment is to modify Space Act Agreement NNJ10TA05S to update the Appendix 2: Performance Milestones and Success Criteria and implement such other adjustments to timing and performance as agreed-to by NASA and Boeing.

NASA shall provide or identify all related ARRA guidance applicable to this Agreement as provided under ARTICLE 3. RESPONSIBILITIES, paragraph A.(3), no later than the date of NASA's acceptance of Milestone B1 of APPENDIX 2, as modified herein.

The last sentence of ARTICLE 5. FINANCIAL OBLIGATIONS, paragraph B.(1) is modified to read:

NASA and Boeing agree that time is of the essence for the payment of milestones hereunder and each will make best efforts to ensure that milestones are accepted (if appropriate) and invoiced prior to December 31, 2010.

APPENDIX 2 is removed and replaced in its entirety with the following:

APPENDIX 2: Performance Milestones and Success Criteria

CCDev The Boeing Company Project Milestones

SDR Related Milestones

<p>Milestone A1: Delta System Requirements Review</p> <p>Based on completed Interim Design Review-1, Boeing shall conduct a CCTS delta SRR to identify system requirements changes from their previous COTS cargo return vehicle and incorporate changes associated with CCTS mission objectives. Emphasis will be placed on vehicle, launch, and ground systems requirements, commercial customer requirements (Bigelow), and baselining a human rating strategy for the integrated flight vehicle and associated ground systems. This review will be conducted in accordance with the SRR definition specified in Appendix 2.a, Table 2.a.</p> <p>Success Criteria: Provided copy of IDR-1 presentation to NASA. Completion of CCTS Delta SRR with RIDs dispositioned and closure plans defined for major issues as described above.</p>	<p>Amount: \$3.0M</p> <p>Date: March 2010</p>
<p>Milestone A2: LAS Down Select</p> <p>As part of a Trade Analysis Cycle (TAC), Boeing shall conduct a trade study between the pusher-type and tractor-style Launch Abort Systems to define a configuration that meets requirements for the CCTS LAS. The trade study results shall be presented to the Configuration Control Board (CCB).</p> <p>Success Criteria: Completion of trade study described above and submittal to NASA of LAS trade study results with recommended configuration for CCTS.</p>	<p>Amount: \$1M</p> <p>Date: May 2010</p>

Milestone A3: Long Lead Procurement Plan

Boeing shall identify long lead procurement needs driving the development and delivery schedules for CCTS and define recommended purchase order release dates to reduce schedule impacts.

Success Criteria: Submittal to NASA of long lead procurements list with required purchase order release dates.

Amount: \$2.8M

Date: May 2010

Milestone A4: System Definition Review

Following the completion of trade studies, requirements analysis, design reviews, manufacturability assessments, and technology maturation demonstrations, Boeing shall prepare and conduct an SDR to review and define a preliminary system design for CCTS that is compliant with requirements baselined at the delta SRR. This review will be conducted in accordance with the SDR definition specified in Appendix 2.b, Table 2.b.

Success Criteria: Completion of the System Definition Review per above description with RIDs dispositioned and closure plans defined for major issues.

Amount: \$3M

Date: October 2010

Abort System Hardware Demonstration

<p>Milestone B1: Project Plan</p> <p>Boeing shall prepare, deliver, and provide a briefing to NASA of the project plan for the Abort System Hardware Demonstration, defining objectives, requirements, implementation plans, and a milestone schedule.</p> <p>Success Criteria: Briefing conducted and project plan submitted to NASA.</p>	<p>Amount: \$400K</p> <p>Date: February 2010</p>
<p>Milestone B2: Demo Engine Long Lead Procurement Plan</p> <p>Boeing shall identify long lead procurement needs driving the development and delivery schedule for demo engine test and define recommended purchase order release dates.</p> <p>Success Criteria: Submittal to NASA of long lead procurements list with required purchase order release dates.</p>	<p>Amount: \$500K</p> <p>Date: April 2010</p>
<p>Milestone B3: Demo Engine Assembly Complete</p> <p>Boeing shall fabricate and assemble the demo engine assembly to be used in the Abort System Hardware Demonstration test.</p> <p>Success Criteria: Completion of demo engine assembly for the Abort System Hardware Demonstration test.</p>	<p>Amount: \$500K</p> <p>Date: September 2010</p>

<p>Milestone B4: Demonstration Complete</p> <p>Boeing shall prepare and deliver a preliminary report for the Abort System Hardware Demonstration test, including a summary of test results, post-test analysis, and assessment of design performance toward test requirements and intended objectives.</p> <p>Success Criteria: Completion of the Abort System Hardware Demonstration test as described above and submission of the preliminary report to NASA.</p>	<p>Amount: \$1M</p> <p>Date: October 2010</p>
--	---

Base Heat Shield Fabrication Demonstration

<p>Milestone C1: Project Plan</p> <p>Boeing shall prepare, deliver and provide a briefing to NASA of the project plan for the Base Heat Shield Fabrication Demonstration, defining objectives, requirements, implementation plans, and a milestone schedule.</p> <p>Success Criteria: Briefing conducted and project plan submitted to NASA.</p>	<p>Amount: \$100K</p> <p>Date: February 2010</p>
<p>Milestone C2: Tool Fabrication Complete</p> <p>Boeing shall design, procure, and fabricate tooling to construct the carrier structure for the Base Heat Shield Fabrication Demonstration article.</p> <p>Success Criteria: Completion of Base Heat Shield Fabrication Demonstration tool fabrication as described above.</p>	<p>Amount: \$200K</p> <p>Date: April 2010</p>

<p>Milestone C3: Carrier Structure Fabrication Complete</p> <p>Boeing shall design and fabricate the carrier structure for the Base Heat Shield Fabrication Demonstration article.</p> <p>Success Criteria: Completion of Base Heat Shield Fabrication Demonstration carrier structure as described above.</p>	<p>Amount: \$150K</p> <p>Date: June 2010</p>
<p>Milestone C4: Fabrication Complete</p> <p>Boeing shall prepare and deliver a preliminary report for the Base Heat Shield Fabrication Demonstration, including a summary of the effectiveness of procedures developed for fabrication, NDE, handling, and installation, and an assessment of fabrication performance toward requirements and intended objectives.</p> <p>Success Criteria: Completion of the Base Heat Shield Fabrication Demonstration as described above and submission of preliminary report to NASA.</p>	<p>Amount: \$300K</p> <p>Date: October 2010</p>

Avionics Systems Integration Facility (ASIF) Demonstration

<p>Milestone D1: Project Plan</p> <p>Boeing shall prepare and deliver a briefing to NASA of the project plan for the CCV ASIF Demonstration, defining objectives, requirements, implementation plans, and a milestone schedule.</p> <p>Success Criteria: Briefing conducted and project plan submitted to NASA.</p>	<p>Amount: \$100K</p> <p>Date: February 2010</p>
--	--

<p>Milestone D2: Model Development Complete</p> <p>Boeing shall develop flight simulation models of various CCV avionics hardware and software components to support integrated simulation assessments in the ASIF.</p> <p>Success Criteria: Completion of flight simulation models as described above.</p>	<p>Amount: \$200K</p> <p>Date: June 2010</p>
<p>Milestone D3: Model Integration Complete</p> <p>Boeing shall integrate simulation models of various CCV avionics hardware and software components into the ASIF simulation environment to support integrated avionics performance assessments.</p> <p>Success Criteria: Notification to NASA of CCV model integration complete.</p>	<p>Amount: \$250K</p> <p>Date: September 2010</p>
<p>Milestone D4: Demonstration Complete</p> <p>Boeing shall prepare and deliver a preliminary report for the CCV ASIF Demonstration, including a summary of test results, post-test analysis, and assessment of design performance toward test requirements and intended objectives.</p> <p>Success Criteria: Completion of the CCV ASIF Demonstration as described above and submission of the preliminary report to NASA.</p>	<p>Amount: \$350K</p> <p>Date: October 2010</p>

CM Pressure Shell Fabrication Demonstration

<p>Milestone E1: Project Plan</p> <p>Boeing shall prepare, deliver, and provide a briefing to NASA of the project plan for the CM Pressure Shell Fabrication Demonstration, defining objectives, requirements, implementation plans, and a mile-stone schedule.</p> <p>Success Criteria: Briefing conducted and project plan submitted to NASA.</p>	<p>Amount: \$300K</p> <p>Date: February 2010</p>
<p>Milestone E2: Tooling Received</p> <p>Tooling has been procured and received at the supplier machine shop to begin fabrication of the CM pressure shell.</p> <p>Success Criteria: CCM pressure shell tooling delivered to supplier machine shop.</p>	<p>Amount: \$450K</p> <p>Date: March 2010</p>
<p>Milestone E3: Test Requirements Complete</p> <p>Boeing shall prepare and deliver test requirements for the CM Pressure Shell Fabrication Demonstration, defining requirements for proof pressure testing and leak testing of the full-scale demonstration vessel to verify finite element model correlation and fabrication processes.</p> <p>Success Criteria: Test requirements submitted to NASA.</p>	<p>Amount: \$450K</p> <p>Date: May 2010</p>

<p>Milestone E4: Demonstration Complete</p> <p>Boeing shall prepare and deliver a preliminary report for the CM Pressure Shell Fabrication Demonstration, including a summary of test results, post-test analysis, and assessment of design performance toward test requirements and intended objectives.</p> <p>Success Criteria: Completion of the CM Pressure Shell Fabrication Demonstration as described above and submission of the preliminary report to NASA.</p>	<p>Amount: \$570K</p> <p>Date: October 2010</p>
--	---

Landing System Demonstration

<p>Milestone F1: Project Plan</p> <p>Boeing shall prepare, deliver, and provide briefing of the project plan for the Landing System Demonstration, defining drop test and water up-righting test objectives, requirements, implementation plans, and a milestone schedule.</p> <p>Success Criteria: Briefing conducted and project plan submitted to NASA.</p>	<p>Amount: \$150K</p> <p>Date: February 2010</p>
<p>Milestone F2: Test Article Structural Design Complete</p> <p>Boeing shall design and prepare structural design drawings/models of the Landing System Boilerplate drop test article defining the structural design and assembly, including the integration of landing airbags, up-righting bags, and stroking crew seat benches to execute defined test objectives.</p> <p>Success Criteria: Completion of the Landing System Boilerplate drop test article structural design drawings/models as described above.</p>	<p>Amount: \$250K</p> <p>Date: March 2010</p>

<p>Milestone F3: Test Article Assembly Complete</p> <p>Boeing shall fabricate and assemble the Landing System Boilerplate test article in preparation for defined testing.</p> <p>Success Criteria: Completion of test article assembly as described above.</p>	<p>Amount: \$300K</p> <p>Date: July 2010</p>
<p>Milestone F4: Demonstration Complete</p> <p>Boeing shall prepare and deliver a preliminary report for the Landing System Demonstration, including a summary of drop test and water up-righting test results, post-test analysis, and assessment of design performance toward test requirements and intended objectives.</p> <p>Success Criteria: Completion of the Landing System Demonstration test as described above and submission of the preliminary report to NASA.</p>	<p>Amount: \$400K</p> <p>Date: October 2010</p>

Life Support Demonstration

<p>Milestone G1: Project Plan</p> <p>Boeing shall prepare, deliver, and provide a briefing of the project plan for the Life Support Air Revitalization Demonstration, defining objectives, requirements, implementation plans, and a milestone schedule.</p> <p>Success Criteria: Briefing conducted and project plan submitted to NASA.</p>	<p>Amount: \$70K</p> <p>Date: February 2010</p>
---	---

<p>Milestone G2: Test Plan Complete</p> <p>Boeing shall prepare and deliver a test plan for the Life Support Air Revitalization Demonstration, defining test objectives, test cases, evaluation criteria, and a test schedule.</p> <p>Success Criteria: Test plan submitted to NASA.</p>	<p>Amount: \$70K</p> <p>Date April 2010</p>
<p>Milestone G3: Test Complete</p> <p>Boeing shall conduct demonstration testing consistent with plans and notify NASA upon completion of planned testing.</p> <p>Success Criteria: Completion of the Life Support Air Revitalization Demonstration testing as described above.</p>	<p>Amount: \$100K</p> <p>Date: July 2010</p>
<p>Milestone G4: Demonstration Complete</p> <p>Boeing shall prepare and deliver a preliminary report for the Life Support Air Revitalization Demonstration, including a summary of test results, post-test analysis, and assessment of design performance toward test requirements and intended objectives.</p> <p>Success Criteria: Completion of Life Support Air Revitalization Demonstration testing as described above and submission of a preliminary report to NASA.</p>	<p>Amount: \$130K</p> <p>Date: October 2010</p>

Autonomous Rendezvous and Docking (AR&D)

Integrated Guidance, Navigation, and Control (GNC) Demonstration

<p>Milestone H1: Project Plan</p> <p>Boeing shall prepare, deliver and provide a briefing to NASA of the project plan for the AR&D Integrated GNC Demonstration, defining objectives, requirements, implementation plans, and a milestone schedule.</p> <p>Success Criteria: Briefing conducted and project plan submitted to NASA.</p>	<p>Amount: \$60K</p> <p>Date: February 2010</p>
<p>Milestone H2: ASIF/ASL Design Review</p> <p>Boeing shall conduct a design review for an AR&D demonstration jointly performed using the Houston ASIF and Huntington Beach Autonomous Systems Laboratory (ASL). The review will address simulation and facility architecture, required simulation modes, hardware/software design, and cross-facility integration. The review will permit evaluation of system design readiness toward achieving test objectives.</p> <p>Success Criteria: Completion of the AR&D Demonstration Design Review as described above.</p>	<p>Amount: \$60K</p> <p>Date: May 2010</p>

<p>Milestone H3: ASIF/ASL Facility Integration Complete</p> <p>Boeing shall design and integrate an avionics simulation environment that operates interactively between the ASIF and ASL. The joint facility shall support demonstration of hardware/software technologies for CCV AR&D with the ISS. NASA will be notified when cross-facility integration is complete, in preparation for the demonstration, itself.</p> <p>Success Criteria: Completion of the ASIF and ASL cross-facility integration as described above.</p>	<p>Amount: \$100K</p> <p>Date: August 2010</p>
<p>Milestone H4: AR&D Demonstration Complete</p> <p>Boeing shall conduct an AR&D hardware/software demonstration using the joint ASIF/ASL facility. Boeing shall prepare and deliver a re-port describing ASIF/ASL capabilities, maturity, performance, and demonstration results.</p> <p>Success Criteria: Completion of the AR&D Demonstration as described above and submission of the preliminary report to NASA.</p>	<p>Amount: \$120K</p> <p>Date: October 2010</p>

Crew Module Mockup Demonstration

<p>Milestone I1: Project Plan</p> <p>Boeing shall prepare, deliver, and provide a briefing to NASA of the project plan for the Crew Module Mockup Demonstration, defining objectives, requirements, implementation plans, and a milestone schedule.</p> <p>Success Criteria: Briefing conducted and project plan submitted to NASA.</p>	<p>Amount: \$100K</p> <p>Date: February 2010</p>
--	--

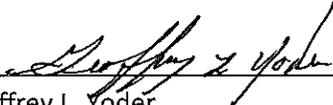

<p>Milestone I2: Mockup Design Configuration Complete</p> <p>Boeing shall design and prepare structural design drawings/models of the Crew Module Mockup Demonstration unit defining the structural design and assembly to execute defined test objectives.</p> <p>Success Criteria: Completion of Crew Module Mockup structural design drawings/models as described above.</p>	<p>Amount: \$100K</p> <p>Date: February 2010</p>
<p>Milestone I3: Mockup Primary Structure Assembly Complete</p> <p>Boeing shall fabricate and assemble the primary structure of the Crew Module Mockup Demonstration unit (to inner & outer mold lines) in preparation for defined utilization assessment tests.</p> <p>Success Criteria: Completion of mockup primary structure assembly (to inner & outer mold lines) as described above.</p>	<p>Amount: \$150K</p> <p>Date: April 2010</p>
<p>Milestone I4: Demonstration Complete</p> <p>Boeing shall prepare and deliver a preliminary report for the Crew Module Mockup Demonstration, including a summary of utilization test results, and assessment of design performance toward test requirements and intended objectives.</p> <p>Success Criteria: Completion of Crew Module Mockup Demonstration as described above and submission of a preliminary report to NASA.</p>	<p>Amount: \$220K</p> <p>Date: September 2010</p>
