

TITLE

1:20 Saturn IB

DESCRIPTION

The 1:20 Saturn IB is a scale replica of the vehicle used for research and development flights in the 1960's that paved the way for manned flights to the moon. Later, it launched all three Skylab crews, and the Apollo spacecraft for the Apollo-Soyuz Test Project.

This model is only suitable for indoor display.

TYPE OF EXHIBIT

Animation:

NONE

Electrical Requirements:

NONE

Scale:

1:20

Dimensions:

3' diameter base; 12' high

Crate Specifications:
