

# Demonstration of Autonomous Rendezvous Technology (DART)

Case Study Transcript

Your Role

Here are some challenge-points to start you thinking about the DART case study.

The overarching themes are:

- risk management,
- systems engineering,
- engineering management, and – in particular, design verification for a complex space system.

.....be thinking about how you might react to - or attempt to manage events as they unfold.

Time to get started - Let's meet the DART team then listen to an introductory overview from the first DART project manager Chris Calfee.
