Summary

- **Proposal to Defer the Production and Delivery of Two External Tanks (ET-94 and ET-95)Until After the Production of the First Four SLWTs (ET-96 Thru ET-99)**
  - Enhances the Probability of SLWT Program Success by Allowing More Schedule Time to Implement Tool Modifications, Perform Process Development and ALTA Fabrication
  - Does not Impact the SLWT Program or 5th Production Buy Contract Period of Performance
  - Fully Supports any Requirement to Revert to LWT Production in the event of Program Contingency Prior to July 1996
  - Fully Supports FAWG Flight Manifests, Dated May 5, 1994 & July 28, 1994 (7 Flts. in 96/97/98) more conservative
  - Allows Flexibility for Decision as Late as 8/1/95 to Reinsert ET-94 and ET-95 Back Into Production Ahead of SLWT-1 (ET-96) to Support Alternate Launch Schedules in the Event that First Space Station Launch is Deferred beyond 12/1/97
  - Avoids Severe Manpower Staffing and Training Requirement for Short Duration
  - Responds to Mission Success Review Team (Odom) Recommendations

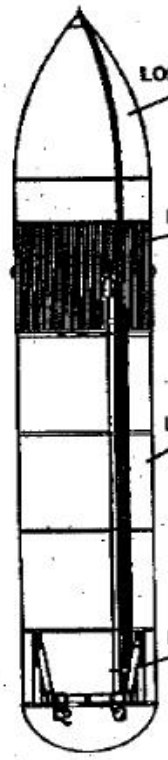
ET Subcontract Hardware Status



LO2
Committed thru ET 120
Delivered Complete Thru ET 87
ET 88 thru ET 95 completion date 4/12/95
Fabrication Lead Time 5 - 6 Months

Procurement of LWT Hardware can support return to LWT build if necessary.

I/T
Committed thru ET 120
Delivered Complete Thru ET 84
ET 85 thru ET 95 completion date 9/1/95
Fabrication Lead Time 6 - 7 Months

LH2
Committed thru ET 120
Delivered Complete Thru ET 88
ET 89 thru ET 95 completion date 3/30/95
Fabrication Lead Time 9 - 10 Months

NOTE:

Raw Material
Casting & Forging
TPS Material
→ Committed Thru ET 100

ET 101 - 120 Orders Held to Mid 4th Qtr. '94 Pending Super Light Weight Decision On Material Change From 2219 to Aluminum Lithium

F/A
Committed thru ET 100
Delivered Complete Thru ET 75
ET 76 thru ET 95 completion date 7/15/96
Fabrication Lead Time 11 - 12 Months
