

Clayton Anderson Radio PSA - Transcript

Never give up on your dream. Hi. My name's Clay Anderson, Nebraska's first astronaut. Watching astronauts walk on the moon made me want to give up my paper route and bailing hay for the chance to walk in space. I worked hard in school and after college landed a job with NASA. I applied to be an astronaut 15 times. That's right, 15. Any my dream was realized when NASA chose me to fly in space. So work hard in school and never give up. America needs you to be the innovators and explorers of tomorrow.
