

Table of Contents

Overview: Science Module	v
Rocket Principles	viii
Practical Rocketry	xii
Teacher Guide: Pop Rocket Variables	1
Student Activity: Pop Rocket Variables	6
Student Text: Variables and Operational Definitions	12
Teacher Guide: Pop Goes Newton	15
Student Activity: Pop Goes Newton	17
Student Text: Newton’s Laws of Motion and Rockets	21
Teacher Guide: The History of Rocketry	25
Teacher Guide: Launching Ares	27
Student Text: From Earth to the Moon and Beyond	34
Student Activity: Ground Challenge	43
Student Activity: Moon Challenge	47
Teacher Guide: Investigating Water Rockets: Abbreviated Approach	51
Teacher Guide: Investigating Water Rockets: Comprehensive Approach	55
Student Activity: Measuring Altitude	62
Student Activity: What a Drag!	65
Student Activity: Flying Straight	68
Student Activity: Investigating Fin Shape or Size	72
Student Activity: Investigating Fin Number and Placement	78
Student Activity: Fly Like an Eagle	81
Student Activity: Altitude vs. Water Volume	84
Student Activity: Altitude vs. Water Pressure	87
Student Activity: Weather or Not	90
Teacher Guide: Fly Me High	93
Student Activity: Fly Me High	97
Teacher Guide: You Get What You Pay For	103
Student Activity: You Get What You Pay For	105
Appendix A: Example of a Completed Concept Definition Map	108
Appendix B: Optional Activity	109
Appendix C: Possible Options for the Ground Challenge	110
Appendix D: Label Templates for Available Vehicles	112
Appendix E: Templates for Representing Equipment and Supplies	113

Appendix F: Building a Bottle Rocket	115
Appendix G: Water Bottle Rocket Launcher	116
Appendix H: Transcripts	119
Appendix I: NASA Altitude Tracker	123
Appendix J: Safety Rules	124
Appendix K: Safety Checklist	126
Appendix L: Nose Cone Pattern	127
Appendix M: Materials List	128
Bibliography	132
