

## NASA-JSC Technology Transfer - About Us

Imagine what life would be like without the technologies that were developed as NASA sent men, women and automated vehicles into space. Think of all the smiles improved by LASIK eye surgery. Imagine all the people staying connected through cell phones. How many people do you know using a global positioning system? NASA technologies are in our daily lives. Learn more about NASA technologies on Earth by venturing through this Web site.

The NASA-Johnson Space Center (JSC) Technology Transfer Office, as part of NASA's statutory charter, facilitates the transfer and commercialization of NASA-sponsored research and technology, including the industrial use of unique NASA R&D capabilities and facilities.

The NASA-JSC Technology Transfer Office provides a means to advance internal technologies and innovations at NASA for both space-related endeavors and commercial applications. Internally, the office is a valuable internal resource at NASA as a pool for useful technology and innovations. Externally, the office provides strong assistance in helping entrepreneurs, companies and investors

bring useful technology to the marketplace.

The NASA Technology Transfer Office offers programs in the areas of technology development, technology transfer, commercialization and technology infusion. Through this program, businesses can take advantage of partnerships, R & D activities, and licensing agreements with NASA.

For more information on how to work with the NASA-JSC Tech Transfer office, contact the NASA-JSC Tech Transfer Office at [jsc-techtrance@mail.nasa.gov](mailto:jsc-techtrance@mail.nasa.gov).
