Atmospheric Brown Clouds (a mixture of soot and other particles) are clearly visible looking south from a point near the crest of the Himalayas in Nepal. In contrast, the view to the North is relatively clear.

Looking South

Looking North (Mera Peak)

Inkhu Khola Valley, Solu-Khumbu, Nepal at ~4300m
Black carbon emission data (from Bond et al., 2007); Everest ice core black carbon (Kaspari et al., in prep.), and iron (used as a proxy for dust) (Kaspari et al., 2009).
Impurities (Black Carbon and Dust) Deposited on Mera Glacier, Nepal in the Himalayas
