

Remaining Space Shuttle Missions

Below are the approved target dates for the launches remaining in NASA's Space Shuttle Program.

STS-134

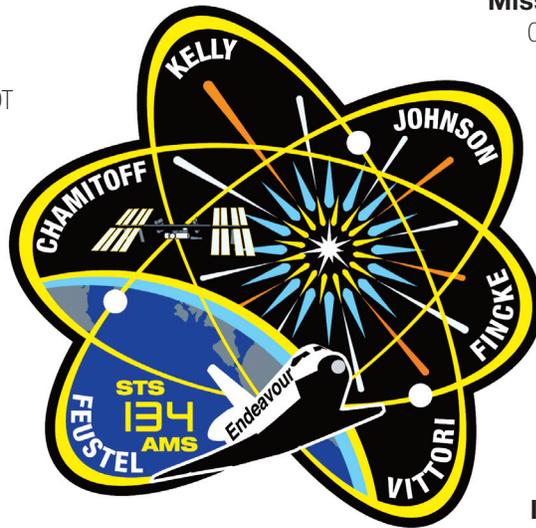

Launch: Targeted for
April 19, 7:48 p.m. EDT

Shuttle: Endeavour

Launch Window:
10 minutes

Duration: 14 days

Crew:
Commander Mark Kelly
Pilot Greg H. Johnson
Mission Specialists Michael
Fincke, Greg Chamitoff,
Andrew Feustel and European
Space Agency astronaut Roberto Vittori

Mission: Deliver Express Logistics Carrier 3 and the Alpha Magnetic Spectrometer, spare parts, a high-pressure gas tank, additional spare parts for Dextre and micrometeoroid debris shields to the International Space Station.

Spacewalks: Four

**Inclination/
Altitude:**
51.6 degrees/122 nautical
miles

Info: This will be the 36th shuttle mission to the station and the 134th shuttle flight.

STS-135

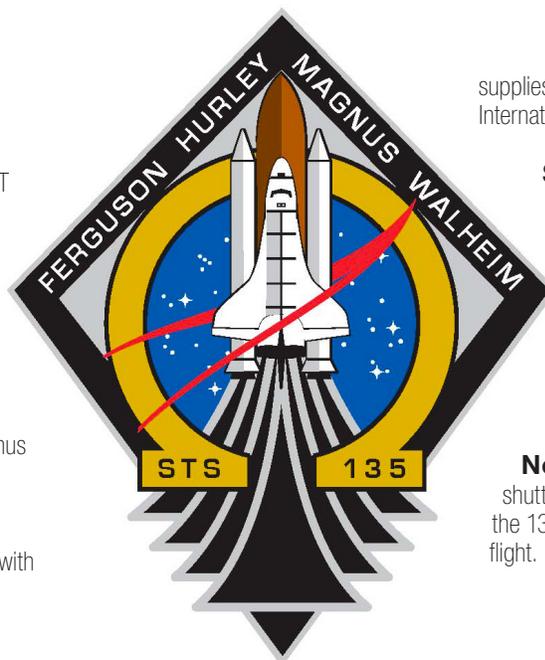

Launch: Targeted for
June 28, 3:36 p.m. EDT

Shuttle: Atlantis

Duration: 12 days

Crew:
Commander Chris Ferguson
Pilot Doug Hurley
Mission Specialists Sandy Magnus
and Rex Walheim

Mission: Carry the Raffaello multi-purpose logistics module with

supplies, logistics and spare parts to the International Space Station.

Spacewalks: One
(conducted by ISS crew members)

Info: The mission also will fly a system to investigate the potential for robotically refueling existing spacecraft.

Note: This will be the 37th shuttle mission to the station and the 135th and final scheduled shuttle flight.
