

# Findings Across Panels

---

- ◆ **Lots of good data being generated by HAT and ISECG; desire to see more of the data shared outside those communities**
  - ◆ **Our plans for the future shouldn't abandon a capability along the way; we need to consider/plan transition to others, such as commercial, to continue advancing or using a capability when the focus of human exploration moves on to the next destination.**
  - ◆ **Affordability needs to be a driver for any and all future planning activities**
  - ◆ **Early alignment with scientific community objectives is important to any path forward**
-
