Earth Knowledge Acquired by Middle School Students

(EarthKAM)

By Lydia K. , and Clowey S.

Expeditions Assigned

- ISS Expedition Duration: March 2001- March 2013

Expeditions Assigned: 2-34

What EarthKAM Is Used For.

- EarthKAM is used to help students study Earth from space.

- EarthKAM is a program that lets students photograph Earth from space.

More About EarthKAM

- Students are able to decide what pictures of Earth they want. The representatives help by receiving requests and transmitting requests to the ISS. Then they send them to the digital camera and take the pictures that are requested.

Making the Pictures Available On the Internet

- They then send them back to the computer making the photographs available on the internet. That makes them easily accessible to participating schools.

EarthKam Rocks!!!!

- EarthKAM is an awesome way for kids to get pictures of Earth from SPACE!!!!!!

What We Learned

- We learned that EarthKAM helps students study and examine Earth from space. Students are also able to decide what pictures of Earth that they want. The most important thing that we learned is that astronauts do interesting experiments on the ISS.
