NGO Education Efforts

July 19th

Nancy Conrad
What happens when...
High School students + Creativity = 170 products
Conrad Foundation challenges high school students to create products to solve real-world problems. Student teams are mentored by industry experts as they create a design, business plan and marketing materials. Winning teams receive cash awards.
Creating electricity using motionless thermo-acoustic generators to tap energy from deep-sea hydrothermal vents.
Talia
Age: 17
From: Los Angeles, CA

Created sun-glasses for space travelers that non-invasively monitor the body’s vital signs.
The EVROV
Eddie, Trigger, Bianca
Phoenix, AZ

The X-suit
Aaron, Madison, Nathan
Los Angeles, CA

Piezo-electric paper
Dan, Allison, Judy
Alexandria, VA
Our students find out-of-the-box solutions because they don’t know there is a box … and we don’t tell them.
Working With NASA

- Access to resources
- Centers vs Headquarters
- Challenges for new ventures
