This Environmental Baseline Survey (EBS) has been prepared in accordance with Air Force Instruction 32-7066 and Air National Guard (ANG) guidance. An EBS is a study of the environmental conditions of real property prior to a real estate transaction; these conditions are identified through a records search, site inspection, interviews (Phase I), and, if necessary, sampling (Phase II). The 129th Rescue Wing (129 RQW) of the California Air National Guard (CANG) is proposing to relocate its operations from Moffett Federal Airfield, California. This EBS involves the property disposal of a 141-acre area which is currently used as the CANG 129 RQW installation. The EBS process has been initiated by ANG to satisfy U.S. Air Force (USAF) requirements prior to land disposal.

The proposed lease disposal at Moffett Federal Airfield (owned by the National Aeronautics and Space Administration [NASA] and the U.S. Army Corps of Engineers [USACE]) is located at the southern end of San Francisco Bay, 32 miles south of San Francisco and 10 miles north of San Jose. The 2,354-acre facility, located in Santa Clara County, abuts the City of Sunnyvale to the east and the City of Mountain View to the west and south. The 129 RQW occupies seven parcels at Moffett Federal Airfield, with most operations occurring on five parcels comprising 141 acres on the east side of the installation. One of the seven parcels is owned by the USACE.

The proposed lease disposal property is classified as a Category 5 Property (Remedial or Other Action Underway), as there are four Environmental Restoration Program (ERP) sites currently undergoing investigation or remediation activities near buildings currently leased by the 129 RQW. In addition, Moffett Federal Airfield is listed on the final National Priorities List under the Comprehensive Environmental Response, Compensation, and Liability Act Superfund program. Remediation of existing ERP sites remains the responsibility of the U.S. Department of the Navy, even though custody of the installation has been transferred to NASA and USACE and portions leased to the 129 RQW.

Based upon a review of past and current activities at the proposed lease disposal property, no active noncompliance issues were identified in comparison with Federal regulations that govern environmental protection and restoration.

With the exception of ongoing ERP remediation activities and the presence of asbestos and lead-based paint within existing structures, no other issues of potential concern have been identified as a result of document reviews, interviews, and visual surveys conducted for this EBS.

1. INTRODUCTION

1.1 PURPOSE OF THE ENVIRONMENTAL BASELINE SURVEY

This Environmental Baseline Survey (EBS) has been prepared by the Air National Guard (ANG) in accordance with Air Force Instruction (AFI) 32-7066, *Environmental Baseline Surveys in Real Estate Transactions*, and the commercial guidelines of the American Society for Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM Designation E 1527-00). Property category codes used the preparation of this EBS are consistent with U.S. Air Force (USAF) use of EBS property categorization codes (USAF 1999).

An EBS is a study of the environmental conditions of real property as obtained through a records review, site visit, interviews (Phase I), and if necessary, sampling (Phase II). A site-specific EBS is used for the following purposes:

- to acquire information for a transaction on a specific parcel of real property;
- to obtain site-specific information regarding possible contamination of the parcel;
- to acquire additional information to reduce the risk of unknown factors; and
- to fulfill regulatory requirements.

The EBS must also define potential environmental contamination liabilities associated with the subject property and, if necessary, try to determine possible effects on property value from contamination located on, or adjacent to, the subject property. Specific ANG guidance for preparation of the EBS is described in Section 2, Survey Methodology. Section 3 presents the findings of the EBS for the subject property, while Section 4 presents findings for adjacent properties. Section 5 discusses applicable regulatory compliance issues, and Sections 6 and 7 provide the conclusions and recommendations of the EBS, respectively. Certification of the EBS is included in Section 8.

Appendix A contains the glossary of terms used in this document and their definitions. Appendix B lists the references that were used in preparing this report. Appendix C includes historical aerial photographs and a photographic record of the site survey. The Federal and State environmental database search information and a copy of the Chain-of-Title Report for the subject property are provided in Appendix D. The interview forms and building surveys are included in Appendix E and Appendix F, respectively. Appendix G lists the preparers of this document.
1.2 **Scope of the Environmental Baseline Survey**

The scope of this EBS consists of the following:

- A site visit and data collection effort. The site visit included:
  
  (a) a thorough walk-through of the proposed lease disposal area,
  
  (b) interviews with California Air National Guard (CANG) and National Aeronautics and Space Administration (NASA) representatives,
  
  (c) a review of aerial photographs,
  
  (d) a review of historical and current maps, and
  
  (e) telephone contacts with relevant State and local agencies.

- A comprehensive records review, including site photographs, site-specific databases of hazardous waste activities, underground storage tanks (USTs) and piping, polychlorinated biphenyls (PCBs), reported spills, notices of violation, sites regulated by the U.S. Environmental Protection Agency (USEPA), and other similar records. Databases reviewed in this search included: the National Priorities List (NPL); Resource Conservation and Recovery Information System (RCRIS); and Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS).

- An evaluation of the environmental condition of the subject property and development of recommendations for ANG.

1.3 **Proposed Use of Property**

Moffett Federal Airfield is located at the southern end of San Francisco Bay, 32 miles south of San Francisco and 10 miles north of San Jose (Figure 1-1). The 2,354-acre facility, located in Santa Clara County, abuts the City of Sunnyvale to the south and the City of Mountain View to the west. The 129 RQW occupies seven parcels at Moffett Federal Airfield, with most operations occurring on five parcels comprising 141 acres on the east side of the installation (Figure 1-2). One of the seven parcels is owned by the U.S. Army Corps of Engineers (USACE).

NASA currently assumes authority of Moffett Federal Airfield and is one of the agencies with which the CANG would dispose of its lease and license of the property currently used by the 129th Rescue Wing (129 RQW). The other agency is the USACE, who is the owner of Moffett Community Housing, which includes property on which Building 685 (Medical Squadron) is located.

Figure 1-3
129 RQW Proposed Properties for Lease Disposal at Moffett Federal Airfield
1.4 BOUNDARIES OF THE PROPERTY AND SURVEY AREA

The 141-acre area proposed for lease disposal is divided into five sites for legal purposes. The legal descriptions for the proposed lease disposal properties are as follows:

- **Site 1:** Beginning at the Point of Beginning, southeasterly corner of the Moffett Federal Air Field, Thence North 00°57’05” East along the Easterly property line of Moffett Federal Air Field, 953.92 feet; Thence North 89°02’55” West, said bearing being at right angles with the Easterly boundary of Moffett Federal Air Field, 125.34 feet to the True Point of Beginning. Thence North 89°56’22” West 357.92 feet; Thence North 21°20’47” West 3,689.51 feet; Thence North 68°41’58” East 1,634.27 feet; Thence North 15°52’20” East 148.60 feet; Thence North 19°55’28” East 20.04 feet; Thence South 67°40’58” East 30.91 feet; Thence South 21°01’36” East 345.49 feet, Thence through a curve to the right having a radius 550.00 feet, length 210.62 feet, through a central angle of 21°56’28”, Thence South 00°54’52” West 3,652.35 feet to the True Point of Beginning, containing approximately 96.93 acres.

- **Site 2:** Beginning at Point of Beginning, the Southeasterly corner of the Moffett Federal Air Field, Thence North 00°57’05” East along the Easterly property line of Moffett Federal Air Field, 6,274.58 feet; Thence continuing along the Easterly property line of Moffett Federal Air Field North 16°16’55” East 1,622.82 feet; Thence North 73°43’05” West, said bearing being at right angles with the Easterly boundary of Moffett Federal Air Field, 2,869.65 feet to the True Point of Beginning. Thence North 55°20’06” West 46.00 feet; Thence through a nontangential curve to the left with a radial bearing of North 57°45’03” West having radius 181.00 feet, length 142.98 feet, through a central angle of 45°15’38”; Thence South 76°19’11” West 196.93 feet; Thence North 58°33’37” West 167.20 feet; Thence North 13°59’18” West 214.25 feet; Thence North 34°49’28” East 111.67 feet; Thence North 76°07’55” East 728.67 feet; Thence South 57°39’13” East 148.81 feet; Thence South 13°54’57” East 152.28 feet; Thence South 18°41’52” West 175.66 feet; thence South 76°08’58” West 435.74 feet; Thence through a nontangential curve to the right with a radial bearing of South 78°49’46” West having radius of 338.00 feet, length 97.06 feet, through a central angle of 16°27’13”; Thence North 86°35’17” West 14.75 feet; Thence through a curve to the left, having radius 12.00 feet, length of 16.75 feet, through a central angle of 79°59’43”; Thence through a curve to the right having radius 250.00 feet, length of 82.30 feet, through a central angle of 18°51’45” to the True Point of Beginning, containing approximately 8.27 acres.

- **Site 2A:** Beginning at the Point of Beginning, the Southeasterly corner of the Moffett Federal Air Field, Thence North 00°5705 East along the Easterly property line of Moffett Federal Air Field, 6,274.58 feet; Thence North 16°16’55” East 543.57 feet; Thence North
73°43’05” West, said bearing being at right angles with the Easterly boundary of Moffett Federal Air Field, 1,114.90 feet to the True Point of Beginning. Thence North 70°18’07” West 107.46 feet; Thence North 60°34’38” West 402.85 feet; Thence North 36°25’57” West 274.06 feet; Thence North 17°48’20” East 88.36 feet; Thence South 76°18’29” East 92.82 feet; Thence North 50°45’56” East 827.99 feet; Thence South 72°53’37” East 154.78 feet; Thence South 16°20’16” West 1,036.81 feet to the True Point of Beginning, containing approximately 10.57 acres.

- **Site 5:** Beginning at the Point of Beginning, the Northwest corner of the Ellis Street Right of Way, Thence North 50°34’17” West 1703 feet to the True Point of Beginning. Thence South 39°25’43” West 89.57 feet; Thence North 73°39’58” West 310.38 feet; Thence North 32°19’14” West 60.29 feet; Thence North 73°34’47” West 115.16 feet; Thence North 16°01’36” East 50.96 feet; Thence North 73°58’24” West 205.49 feet; Thence through a nontangential curve to the right with a radial bearing of North 86°47’39” East, having radius 840.00 feet, length 296.58 feet, through a central angle of 20°13’46”; Thence North 67°38’43” East 111.57 feet; Thence through a curve to the right having radius 532.00 feet, length 410.84 feet, through a central angle of 44°14’50”; Thence through a curve to the right having radius 160.00 feet, length 82.20 feet, through a central angle of 29°26’14”; Thence South 38°40’13” East 133.72 feet; Thence South 43°14’28” East 47.23 feet; Thence South 14°17’19” West 248.90 feet; Thence South 42°53’27” East 91.14 feet; Thence South 39°25’43” West 63.45 feet to the True Point of Beginning, containing approximately 7.70 acres.

- **Site 8:** Beginning at Point of Beginning, the Southeasterly corner of the Moffett Federal Air Field, Thence North 00°57’05” East along the Easterly property line of Moffett Federal Air Field, 5,923.78 feet; Thence North 89°02’55” West, said bearing being at right angles with the Easterly boundary of Moffett Federal Air Field, 1,238.95 feet to the True Point of Beginning. Thence South 68°38’54” West 504.22 feet; Thence North 21°2106 West 631.35 feet; Thence South 68°39’31” West 607.05 feet; Thence North 21°19’26” West 500.80 feet; Thence North 68°41’44” East 188.99 feet; Thence North 21°21’20” West 447.58 feet; Thence South 83°43’57” East 194.27 feet; Thence through a nontangential curve to the left with a radial bearing of North 10°01’32” East, having radius 252.00 feet, length 108.07 feet, through a central angle of 24°34’13”; Thence South 21°08’11” East 322.67 feet; Thence North 68°41’44” East 434.87 feet; Thence South 21°03’40” East 769.14 feet; Thence North 68°38’54” East 119.84 feet; Thence South 21°21’06” East 362.39 feet to the True Point of Beginning, containing approximately 17.79 acres.

2. SURVEY METHODOLOGY

2.1 OVERVIEW OF THE SURVEY PROCESS

Property category codes used in the preparation of this EBS are consistent with USAF use of EBS property categorization codes (USAF 1999). The EBS achieves the following:

- Determines the condition of real property to be acquired, transferred, leased, sold, or otherwise conveyed under the provisions of USAF Real Estate Instructions AFI 32-9001, Disposal of Real Property; AFI 32-9003, Acquisition of Real Property; AFI 32-9004, Granting Temporary Use of Real Property; or other authority.

- Documents the nature, magnitude, and extent of any environmental contamination of property considered for acquisition or transfer, lease, sale, or any other disposition (sufficient information must be developed to assess health and safety risks to ensure adequate protection of human health and the environment, as well as possible effects on property value from contamination discovered on site).

- Defines potential environmental contamination liabilities associated with the subject property and satisfies the requirement for environmental due diligence under the Innocent Land Owners Defense clause of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). To qualify for the Innocent Land Owners Defense, the party to the real estate transaction must provide proof of due diligence.

- Provides a basis for a notice of the type, quantity, and time frame of any storage, release, or disposal of a hazardous substance on the property under Section 120(h)(1) of CERCLA.

2.2 APPLICABLE REGULATORY REQUIREMENTS

ANG must comply with all provisions of Federal, State, and local laws and regulations applicable to the proposed transaction. In addition, all U.S. Department of Defense (DoD), USAF, and ANG regulations, instructions, and policies must be met. Federal and State environmental laws and regulations that apply to the EBS process are described in Table 2-1. This table contains a brief description of what are generally considered to be the most important of the modern Federal and State of California environmental statutes.
### Table 2-1. Regulatory Requirements Applicable to Environmental Baseline Surveys

<table>
<thead>
<tr>
<th>Law/Regulation</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)</strong></td>
<td>Federal. Series of programs to document and prevent releases of contaminants into the environment. Section 120 of CERCLA addresses past, present, and threatened releases of hazardous substances, pollutants, and contaminants which “may pose an imminent and substantial threat to the public health or welfare,” as well as notification and response procedures for these releases. The Superfund Amendment Reauthorization Act (SARA), 1996 funded the reauthorization of CERCLA, and gave the U.S. Environmental Protection Agency (USEPA) the authority to seek out responsible parties to any release of hazardous waste and assure their cooperation in cleanup. SARA provides a framework for emergency planning and requires hazardous materials inventories to be provided to the public.</td>
</tr>
<tr>
<td><strong>Community Environmental Response Facilitation Act (CERFA) of 1992</strong></td>
<td>Federal. The CERFA of (Pub. L. 102-426, October 19, 1992) amended CERCLA provisions dealing with Federal activities on any real property owned by the government. It requires the Federal government to identify those parts of that real property where no hazardous substance had been stored, released, or disposed of. This identification expedites the sale of excess property, allowing uncontaminated property to be sold before cleanup of the whole facility is completed. The prompt identification of property that will not require environmental remediation is intended to facilitate the transfer of such property for economic redevelopment purposes. Section 4 of CERFA amends Section 120(h)(3) of CERCLA to clarify the extent of remedial action necessary to protect human health and the environment on property where hazardous substances were stored, disposed of, or released. Remedial action necessary to protect human health and the environment is deemed to have been taken if the construction and installation of an approved remedial design has been completed and the remedy has been demonstrated to be USEPA to be operating properly and successfully.</td>
</tr>
<tr>
<td><strong>Resource Conservation and Recovery Act (RCRA)</strong></td>
<td>Federal. Establishes a framework for managing solid wastes, including procedures for responding to releases of hazardous wastes or hazardous constituents in all media. Subtitle C of RCRA establishes a cradle-to-grave management system to regulate hazardous waste from moment of generation to disposal. Subtitle D of RCRA establishes non-hazardous solid waste management practices to promote sound disposal methods and reuse of recoverable resources, and Subtitle I of RCRA regulates underground storage tanks that contain petroleum products and substances defined as hazardous by CERCLA. The California equivalent of RCRA can be found in the California Code of Regulations, Title 22.</td>
</tr>
<tr>
<td><strong>Toxic Substances Control Act (TSCA)</strong></td>
<td>Federal. TSCA was enacted to test, regulate, and screen all chemicals produced or imported into the U.S. It establishes specific regulatory standards for existing and new chemical substances and mixtures, which include polychlorinated biphenyls (PCBs) and asbestos (as well as the disposal of toxic substances such as PCBs and asbestos).</td>
</tr>
<tr>
<td><strong>Clean Water Act (CWA)</strong></td>
<td>Federal. The CWA regulates point source and non-point source discharge into surface waters and establishes criteria and standards to protect water quality and national performance standards. The 1977 amendments established the National Pollution Discharge Elimination System. This act was updated in 1990 to include Storm Water Pollution Prevention Plans for new construction sites over 5 acres and for industrial sites whose activities may cause contamination to runoff the site into stormwater collection systems. In California, the Porter Cologne Act established the Water Resources Control Board and the Regional Water Quality Control Board to oversee use and to prevent misuse of the “waters of the State.” This act targets pollution sources and permits discharge to the ocean or discharge of pollutants that may pose a threat to the marine environment.</td>
</tr>
<tr>
<td><strong>Safe Drinking Water Act (SDWA)</strong></td>
<td>Federal. The SDWA requires the USEPA to establish regulations to protect human health from contaminants in drinking water through health-based (primary) and aesthetic quality (secondary) standards. The act also established guidelines for protecting groundwater. The California version of SDWA was adopted as Proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986, which applies to any manufacturer that distributes goods to California. The act requires business to post a clear and reasonable warning prior to knowingly and intentionally exposing a person to a listed chemical within 12 months of listing, with exemptions. The act also strives to eliminate knowing discharges of any listed chemical to a potential source of drinking water within 20 months of listing, with exemptions.</td>
</tr>
<tr>
<td><strong>National Environmental Policy Act (NEPA)</strong></td>
<td>Federal. Requires Federal agencies to consider the potential environmental consequences of proposed actions in their decision-making process. The intent of NEPA is to protect, restore, or enhance the environment through well-informed planning at the national level. The Council on Environmental Quality (CEQ) was established under NEPA to implement and oversee Federal policy in this process. The CEQ subsequently issued the Regulations for Implementing the Procedural Provisions of NEPA (40 Code of Federal Regulations [CFR] §§ 1500-1508) (CEQ 1978). The California equivalent of NEPA is CEQA.</td>
</tr>
<tr>
<td><strong>Clean Air Act (CAA)</strong></td>
<td>Federal. Establishes Federal policy to protect and enhance the quality of the nation’s air resources to protect human health and the environment. The CAA requires that adequate steps be taken to control the release of air pollutants and prevent significant deterioration in air quality. The 1990 amendments to the CAA require Federal agencies to determine the conformity of proposed actions with respect to State Implementation Plans for attainment of air quality goals.</td>
</tr>
<tr>
<td><strong>Endangered Species Act (ESA)</strong></td>
<td>Federal. The ESA provides a program for the conservation of threatened and endangered plants and animals and the habitats in which they are found. The U.S. Fish and Wildlife Service maintains the endangered species list. The law prohibits any action that results in a “taking” of a listed species or adversely affects habitat, and prohibits the import, export, interstate and foreign commerce of listed species.</td>
</tr>
<tr>
<td><strong>Federal Insecticide Fungicide and Rodenticide Act (FIFRA)</strong></td>
<td>Federal. The primary focus of FIFRA was to provide Federal control of pesticide distribution, sale, and use. FIFRA gave the USEPA authority to study the consequences of pesticide use. All pesticides used in the U.S. must be registered by the USEPA, which dictates that pesticides will be properly labeled and will not cause unreasonable harm to the environment.</td>
</tr>
</tbody>
</table>
2.3 **APPROACH AND RATIONALE**

The EBS team used the following approach to survey the proposed lease disposal site:

- reviewed readily available documents from Federal, State, and local sources;
- conducted a visual review of the site and accessible adjacent properties; and
- interviewed persons knowledgeable about the property, including the owner/operator and Federal, State, and local authorities.

2.4 **DOCUMENTS REVIEWED**

The EBS team examined the available documents from Moffett Federal Airfield that contained information on the environmental condition of the property. These included previous basewide EBSs, Environmental Restoration Program (ERP) documents, Reuse Planning Documents, and National Environmental Policy Act (NEPA) documentation. A complete list of the documents used to prepare this survey is provided in Appendix B.

Documents from Federal, State, and local regulatory agencies also were examined to gather background information on the property and surrounding areas. Historical aerial photographs reviewed are listed in Table 2-2, and copies of the aerial photographs are provided in Appendix C. In addition, Federal and State environmental databases (e.g., leaking underground storage tank [LUST] lists, emergency spill response reports, and hazardous waste generation files) were searched to determine which sites in the surrounding area have the potential to affect the proposed lease disposal property. A list of the Federal and State environmental databases searched is provided in the Environmental Data Resources, Inc. (EDR) Radius Map with GeoCheck for Moffett Federal Airfield in Appendix D.

2.5 PROPERTY INSPECTIONS

The proposed lease disposal site was visually inspected on December 2-3, 2002 to identify visible evidence of potential environmental contamination. The lease disposal area is a mix of open airfield space, occupied administrative facilities, aircraft maintenance facilities, and airfield support areas. Specifically, the EBS team looked for evidence of previous contamination such as:

- stained surface soils or distressed vegetation;
- disturbed surface soils or reclaimed areas;
- pools of liquid, residues, discarded containers;
- electrical equipment such as transformers and capacitors;
- USTs, aboveground storage tanks (ASTs), piping, sumps, or other types of impoundment structures;
- abandoned structures and associated utilities; and
- drainage structures and direction of stormwater runoff on the proposed lease site and adjacent areas.

The survey involved visually inspecting the 129 RQW structures proposed for disposal. Personnel from the 129 RQW led the EBS team through each building determined to have the potential for hazardous materials storage or use. These individuals provided information on building history, hazardous substance storage, and previous releases. The building inspection notes for these buildings are provided in Appendix F.
Adjacent properties were also visually inspected on the same dates. In addition, properties within a one-mile radius of the installation that were listed in the Federal and State environmental databases were visually surveyed to determine their potential effect on the property. A complete set of site photographs is provided in Appendix C.

2.6 PERSONAL INTERVIEWS

The EBS team interviewed personnel from the 129 RQW and NASA regarding environmental issues at Moffett Federal Airfield (Table 2-3). The EBS team conducted detailed interviews with select personnel. Their individual responses to a questionnaire that was provided during the site inspection are included in Appendix E.

3. FINDINGS FOR THE SUBJECT PROPERTY

3.1 HISTORICAL AND CURRENT LAND USE

The site history for Naval Air Station Moffett Field was obtained through review of lease documents, environmental planning documents, and employee interviews.

In April 1955, the 129th Air Resupply Group was activated at Hayward Airport, California. Although the mission remained the same, the unit underwent three name changes and several aircraft conversions between its initial activation and April 1975. In April 1975, the 129th Air Resupply Group received a new mission, designation, and Air Force Command. Shortly afterward, the 129th Air Resupply Group also changed aircraft and its operating base. The 129th Air Resupply Group became the 129th Aerospace Rescue and Recovery Group and in 1984 completed its programmed move to Moffett Field, California. In October 1989, the 129th Aerospace Rescue and Recovery Group was designated as the 129th Air Rescue Group and began converting from the HH-3E “Jolly Green Giant” helicopter to the HH-60G “Pave Hawk” helicopter; the conversion was complete in 1991. In March 1992, the name was shortened to the 129th Rescue Group, and in June 1992 it became the 129th Rescue Wing. In July 1994, the Naval Air Station at Moffett Field was officially transferred from the U.S. Department of the Navy (U.S. Navy) to NASA, which is now the host organization at Moffett Federal Airfield.

Today the 129 RQW continues to conduct combat search and rescue (CSAR) operations on a global scale. The overall mission of the 129 RQW is to provide a trained and equipped rescue force able to respond to and sustain the State and Federal missions, described below.

- Federal Mission: 1) to provide manpower, material, and equipment resources to conduct CSAR operations on a worldwide basis; and 2) to provide manpower, material, and equipment to conduct and complete peacetime search operations.

- State Mission (CANG): to furnish trained personnel to respond to State emergencies, such as natural disasters, and to assist civil authorities in the enforcement of the law.

Moffett Federal Airfield currently consists of approximately 2,354 acres of land in Santa Clara County. The 141-acre area and buildings proposed for lease disposal are shown in Figure 1-3 and summarized in Table 3-1. Many of these structures are described in the building surveys (see Appendix F) and shown in site photographs included in Appendix C.

</table>
All land utilized by the 129 RQW at Moffett Federal Airfield is described in the *Permit for Use of Federal Real Property Between NASA and the USAF*, September 1997, and the *Memorandum of Agreement* to be signed between the U.S. Air Force and the USACE for occupation of Building 685 on U.S. Army property. Records were researched at the Santa Clara County Recorders and Assessors Office back to 1940. The current owner of the subject property is the United States of America. However, no conveyances of record were found conveying title to the property to the United States of America. Based on the Chain of Title research, it appears the United States of America acquired title to the property prior to 1940. A historical Chain-of-Title for the property is provided in Appendix D (EDR 2003a).

### 3.2 Environmental Setting

The following sections describe the environmental setting of Moffett Federal Airfield and include information on climate, topography, geology, soils, surface water, and groundwater.

#### 3.2.1 Climate

At an elevation just above sea level and adjacent to the moderating influence of San Francisco Bay and the nearby Pacific Ocean, the climate of Moffett Federal Airfield is characterized by warm dry summers and cool, moist winters. During the warmer months of the year (normally May through October) the airfield is subject to morning and evening low clouds and fog with primarily sunny conditions occurring during the day. The majority of the annual average of 13.5 inches of rainfall occurs between November and April. The annual average high and low temperatures at Moffett Federal Airfield are 68 degrees Fahrenheit (˚F) and 50˚F, respectively. Prevailing winds blow from the north-northwest in the region during daytime hours. Nocturnal winds and land breezes during the colder months of the year blow from the south.

#### 3.2.2 Topography

Moffett Federal Airfield is located on a relatively flat alluvial plain at the southwestern edge of San Francisco Bay. The site slopes from north to south at a rate of about one percent and lowers from an elevation of approximately 40 feet above sea level in the southern portion to sea level at the northern area of the airfield (CANG 1996). The major topographic features at the airfield are a series of flood control levees north of the base that provide marginal protection from tidal flooding of the Bay (CANG 2002).

#### 3.2.3 Geology and Soils

The majority of the Moffett Federal Airfield site consists of Sunnyvale silty clay to a depth between 11 and 18 inches. The Sunnyvale silty clay is characterized by a dark gray color, fine texture, poor drainage, high fertility, and moderate alkalinity. The Eastside/Airfield area consists of Alviso clay at the northern end; Alviso clay soils are typically dark gray and characterized by low fertility and poor drainage. Soils at the middle of the Eastside/Airfield area are Kitchen
middens. This soil is characteristically dark gray, calcareous or clay loam with materials such as stones, bones, or mixed-in shell fragments (NASA 2002).

### 3.2.4 Surface Water

Moffett Federal Airfield is located adjacent to the southern shoreline of San Francisco Bay. The stormwater drainage for the base flows into the Stevens Creek drainage basin, which in turn flows into the San Francisco Bay. No surface water features are located on base property. A series of flood control levees north of the base provide marginal protection from tidal flooding of the Bay (CANG 2002).

While the majority of 129 RQW facilities are located outside of the identified 100-year floodplain, the pararescue and munitions facilities are located within the 100-year floodplain. Several flood control drainages that are considered Waters of the U.S. are found within the northeastern region of Moffett Federal Airfield. All ultimately terminate within San Francisco Bay. Wetlands and vernal pools occurring within Moffett Federal Airfield were previously determined to be isolated and therefore would not be categorized as jurisdictional Waters of the U.S. (NASA 1995).

### 3.2.5 Groundwater

Groundwater elevations vary seasonally and with location throughout the 129 RQW but generally range between five and nine feet below ground surface (CANG 1996). A regional groundwater contamination plume exists beneath Moffett Federal Airfield and flows toward the San Francisco Bay (NASA 2002). The U.S. Navy and the Middlefield-Ellis-Whisman Companies are jointly conducting remediation of the groundwater contamination plume under USEPA and California Regional Water Quality Control Board (RWQCB) oversight.

### 3.3 Hazardous Substances

The EBS team conducted a walk-through of each building and the surrounding terrain to identify evidence of storage, disposal, or release of hazardous substances. The areas of concern within the 129 RQW lease disposal property at Moffett Federal Airfield are discussed in the following paragraphs.

#### 3.3.1 Hazardous Materials and Petroleum Products

Hazardous materials and petroleum products have been used throughout the maintenance and operations shops of the 129 RQW for various functions, including fuels testing; maintenance, testing, and repair of vehicles, aerospace ground equipment (AGE); aircraft, buildings and grounds maintenance; and structural repairs. These activities require the use of jet propellant fuel (JP-4 and JP-8), gasoline, diesel fuel, solvents, lubricants, cutting oils, greases, and some corrosive materials (acids and alkalines).
### 3.3.2 Hazardous and Petroleum Wastes

Hazardous and petroleum wastes have historically been generated throughout the 129 RQW installation during various operations, including fuels testing, maintenance, testing and repair of vehicles, AGE, and aircraft.

A hazardous waste generation point is the location where a waste is initially created or generated through some process. After generation, the hazardous waste must be transferred immediately to an initial (satellite) accumulation point. Waste cannot be accumulated or stored at the generation point unless the area has been designated as an approved accumulation point.

NASA is responsible for collecting hazardous waste generated at Moffett Federal Airfield. The 129 RQW operates 14 initial accumulation sites distributed throughout the various industrial shops in the Wing. The 129 RQW generated hazardous waste is turned over to NASA, who operates the 90-day accumulation site. At the accumulation point, the hazardous waste is collected for labeling, manifested, and transported off site for disposal. NASA and its tenants (including the 129 RQW) are considered large quantity generators of hazardous waste and operate under USEPA ID Number 1800005034.

Primary types of hazardous wastes generated by the 129 RQW include batteries, used fuel and oil, solvents, fluorescent bulbs, rags, fuel filters, and solvent-contaminated solids. The majority of hazardous waste is generated as a result of aircraft operations.

The Fuel Farm at Moffett Federal Airfield is operated by a Defense Fuel Supply Center contractor and provides storage and delivery of fuel for aircraft, vehicles, and other uses (e.g., emergency generators). Jet fuel is received by barge and is pumped to several larger storage tanks at the Fuel Farm. Fuel is then dispensed to aircraft via fuel trucks filled at the Fuel Farm. The Fuel Farm consists of four 567,000-gallon storage tanks and one 105,000-gallon tank in which fuel for immediate use is stored. Fuel use at Moffett Federal Airfield is approximately one million gallons of aviation fuel per month (CANG 1996).

The governing regulations for spill prevention are contained in the NASA Spill Prevention Plan which describes specific protocols for preventing and responding to releases, accidents, and spills involving oils and hazardous materials (CANG 1996). All tenants for 129 RQW operations are required to follow these procedures. The NASA Hazardous Waste Management Plan provides guidance for facilitating compliance with all Federal, State, and local regulations pertaining to hazardous waste. In addition, the Hazardous Waste Management Plan sets forth procedures to control and manage hazardous wastes from the point where they are generated until they are ultimately disposed.

The EBS team searched for evidence of the storage, disposal, or release of hazardous or petroleum wastes during the visual inspection. While no significant spills were reported to the EBS team by facility personnel, several of the 129 RQW aircraft maintenance activities involve the transfer of bulk fuels and, hence, have the potential for spills and releases to the environment.
The potential for spills and releases of oil or hazardous substances in these areas has reportedly been reduced through the construction of containment systems, an oil/water separator (OWS) (in the AGE area), the implementation of preventive measures (i.e., those specified in the Stormwater Pollution Prevention Plan), and the provision of training that emphasizes spill prevention and response (i.e., as specified in the Hazardous Waste Management Plan and Spill Prevention Plan).

3.3.3 Environmental Restoration Program Sites

The DoD created the ERP to investigate past hazardous and toxic materials storage and disposal activities at military installations as required by the Resource Conservation and Recovery Act (RCRA). The mission of the ERP is to identify and clean up contamination resulting from past DoD use and disposal practices for the protection of human health and the environment. Moffett Federal Airfield was added to the NPL in July 1987. Under the ERP, the U.S. Navy identified several locations with the presence of contamination. To date, 28 potentially contaminated sites have been identified at Moffett Federal Airfield as potential sites of hazardous waste disposal or spills, and all are under investigation for remediation under the U.S. Navy’s ERP Program (NASA 2002). These sites were contaminated by wastes from 60 years of military operations. The majority of these sites are along the western edge of the airfield and near Hangar 3, and all sites predate NASA’s administration of the property. There are several ERP sites located near areas occupied by the 129 RQW that are in various stages of investigation and remediation by the U.S. Navy (Table 3-2 and Figure 3-1). Remediation of hazardous waste remains the responsibility of the U.S. Navy, even though custody of the installation has been transferred to NASA and portions leased to the 129 RQW. In addition, a regional groundwater contamination plume exists beneath Moffett Federal Airfield and flows towards the San Francisco Bay (NASA 2002). The regional groundwater contamination plume stems from two main sources: a USEPA-designated Superfund site located outside of Moffett Federal Airfield across Highway 101 at sites owned by the Middlefield-Ellis-Whisman companies, and contamination stemming from past military operations during the U.S. Navy’s administration of the base. The U.S. Navy and the Middlefield-Ellis-Whisman companies are jointly conducting groundwater remediation under USEPA and California RWQCB oversight (NASA 2002) (see Figure 3-1).

3.3.4  **Storage Tanks and Pipelines**

Various storage tanks have previously been used at Moffett Federal Airfield to store fuels and to distribute various petroleum products or wastes. There were three former USTs located within the 129 RQW lease disposal area. In October 1998, the three USTs and associated piping were decommissioned, removed, and the site restored to original grade conditions (CANG 1999) (Table 3-3). No ASTs are known to have been located within the lease disposal area.

Source: CANG 1999.

3.3.5  **Oil/Water Separators**

OWSs are used to separate oils, fuels, sand, and grease from wastewater and to prevent contaminants from entering the sanitary sewer and stormwater drainage systems. The 129 RQW is responsible for one active OWS near the facilities proposed for lease disposal by the 129 RQW. This OWS is located outside the AGE building (Building 684). In addition, an OWS located near the vehicle maintenance facility (Building 146) was clogged with cement over 10 years ago and is no longer operational (CANG 2003). An active OWS also services the new composite maintenance hangar located at Building 662.

3.3.6  **Pesticides**

Much of Moffett Federal Airfield consists of open landscaped areas. Chemical treatment such as pesticides, herbicides, and fertilizers are known to be used for general grounds maintenance on the property. All materials are applied in accordance with regulations, and no spill incidents have been reported or noted. In addition, the extent and types of chemicals formerly used is unknown. Potential residual levels of pesticides, herbicides, and fertilizers in soils and groundwater may exist within the proposed lease disposal area from historically applied chemicals.
3.3.7 Medical/Biohazardous Waste

Medical and biohazardous wastes are generated at the 129 RQW installation for hospital, dental clinic, and pararescue operations (Buildings 685 and 686). Biohazardous waste is stored and disposed in accordance with Federal, State, and local regulations. There have been no documented cases of contamination associated with medical or biohazardous waste.

3.3.8 Ordnance

There are three munitions storage areas at Moffett Federal Airfield, all located in the northeast corner of the installation (see Figure 1-3). A compilation of safety quantity-distance arcs from individual buildings surrounds the three munitions storage areas, which encompass Buildings 70-74, 143, 147, 484, 486-492, 528, and 561.

3.3.9 Radioactive Waste

A limited number of radioactive materials are used within the lease disposal area. These materials are contained in source materials of instruments such as Chemical Agent Monitoring Systems which are stored in accordance with Federal, State, and local regulations. No radioactive materials or wastes are known to be generated on base, and no radioactive materials have been disposed of within the property (CANG 2003).

3.3.10 Solid Waste

The 129 RQW generates solid waste in the form of office trash, nonhazardous industrial wastes, and construction debris. Solid waste collection and disposal are handled by a private contractor. There are no active landfills at Moffett Federal Airfield. The EBS team searched for visible signs of solid waste disposal activities within the lease disposal area (i.e., trash piles or landfilling). Solid waste disposal areas were not found within the proposed lease disposal area.

3.3.11 Wastewater Treatment, Collection, and Discharge

The 129 RQW generates wastewater from sanitary, stormwater, and industrial processes, including vehicle, equipment, and aircraft washing; fuels and aircraft component testing; and vehicle, AGE, and aircraft maintenance. These wastewaters are discharged directly to the sanitary sewer system that flows into the Stevens Creek drainage basin, which in turn flows into the San Francisco Bay. NASA and its tenants (including the 129 RQW) operate under a National Pollution Discharge Elimination System permit for stormwater discharge at Moffett Federal Airfield.

3.4 Disclosure Items

Disclosure items are conditions that are not regulated under CERCLA but may affect use of the subject property. These conditions or substances include drinking water quality, asbestos, PCBs,
radon, lead-based paints, and historical and cultural resources. These substances do not pose specific risk or hazard to human health or safety if they are maintained and managed properly.

3.4.1 Drinking Water Quality

Historical overdrafts of the groundwater supply beneath Moffett Federal Airfield has caused a rapid decline in the water table, a deterioration of water quality, and ground subsidence in the Santa Clara Valley. The drinking water supply for Moffett Federal Airfield is supplied by the County of San Francisco Water District, which obtains water primarily from the Hetch Hetch Reservoir in the Sierra Nevada (NASA 1994). A regional groundwater contamination plume flows beneath Moffett Federal Airfield towards the San Francisco Bay (NASA 2002). The regional plume stems from two main sources: a USEPA-designated Superfund site outside Moffett Federal Airfield across Highway 101 at sites owned by the Middlefield-Ellis-Whisman companies, and contamination stemming from past military operations during the U.S. Navy’s administration of the base. The U.S. Navy and the Middlefield-Ellis-Whisman companies are jointly conducting remediation under USEPA and California RWQCB oversight (NASA 2002).

3.4.2 Asbestos

AFI 32-1052 (March 22, 1994) establishes requirements and assigns responsibilities to incorporate facility asbestos management principles and practices. Installations must remove asbestos-containing material (ACM) likely to release airborne asbestos fibers that cannot be reliably maintained, repaired, or isolated. All facilities must be monitored closely to ensure ACM does not become airborne. In addition, each installation must develop a written management and operating plan to carry out the objectives of facility asbestos management. Prior to property transfer, all available information on the existence, extent, and condition of ACM must be incorporated in the EBS and provided to the transferee.

Asbestos has been found in a number of buildings constructed before 1978 when use of asbestos in construction materials was common. Only a portion of the buildings occupied by the 129 RQW have been tested for ACM. Because ACM was commonly used prior to 1978, it is assumed that the majority of the buildings at Moffett Federal Airfield contain ACM. Existing asbestos surveys and a Notification of Asbestos Containing Construction Materials at Moffett Federal Airfield Buildings was completed by the U.S. Navy to ensure that the health and welfare of all base personnel are protected from potentially harmful effects of ACM; these documents have been provided to NASA and its tenants, including the 129 RQW. According to the U.S. Navy asbestos survey, ACM is present in many of the existing facilities occupied by the 129 RQW at Moffett Federal Airfield (Table 3-4).

Note: 1 Only a portion of the buildings occupied by the 129 RQW have been tested for asbestos-containing material. Therefore, this list is not comprehensive.

3.4.3 Polychlorinated Biphenyls

PCBs are used in electrical equipment, primarily capacitors and transformers, because they are electrically nonconductive and stable at high temperatures. PCBs present an environmental hazard because they persist in the environment, accumulate in living organisms, and concentrate in the food chain.

The disposal of these compounds is regulated under the Toxic Substances Control Act (TSCA), which bans the manufacture and distribution of PCBs. By Federal definition, PCB equipment contains 500 parts per million (ppm) or more of PCBs, whereas PCB-contaminated equipment contains PCB concentrations of more than 50 ppm but less than 500 ppm. The USEPA, under TSCA guidance, regulates the removal and disposal of all sources of PCBs containing 50 ppm or more.

There are no remaining PCB sites or transformers at the CANG lease disposal area. All PCB transformers were removed from the 129 RQW properties by a certified contractor by 2002 (CANG 2003).

3.4.4 Radon

Radon is a naturally occurring, colorless, and odorless radioactive gas that is produced by the radioactive decay of naturally occurring uranium. Uranium decays to radium and then radon. Radon that is present in soil can enter a building through small spaces and openings and can accumulate in enclosed areas such as basements.
The most recent DoD policy with regard to radon is described in the DoD memorandum *Asbestos, Lead-Based Paint and Radon Policies at BRAC Properties* (October 31, 1994). This memorandum states that, in accordance with 26 U.S. Code (USC) 2661 to 2671, DoD will conduct a study to determine radon levels in a representative sample of its buildings. DoD has applied USEPA guidelines for residential structures (i.e., an average radon concentration of 4 picocuries per liter [pCi/L]) with regard to remedial actions. Any available and relevant radon assessment data pertaining to property being transferred must be included in property transfer documents. DoD policy is not to perform radon assessment and mitigation prior to transfer unless otherwise required by applicable law.

In 1993, the U.S. Navy installed over 800 radon detectors in housing units at Moffett Federal Airfield. The results indicated that radon levels were all below USEPA guidelines. Information obtained from the USEPA National Radon Database indicates that Santa Clara County is located within a Zone 3 area (i.e., Moderate Potential Designation) with an indoor average radon level of 2 to 4 pCi/L (USEPA 2003).

### 3.4.5 Lead-based Paint

In 1973, the Consumer Products Safety Commission established a maximum lead content in paint of 0.5 percent by weight in a dry film of newly applied paint. In 1978, the Consumer Products Safety Commission lowered the allowable lead level in paint to 0.06 percent.

The most recent AF policy with regard to lead-based paint is described in the USAF memorandum *Air Force Policy and Guidance on Lead-Based Paint in Facilities* (May 24, 1993). The policy is referenced in Air Force Handbook 32-9007 (May 1, 1999) and requires USAF installations to identify, evaluate, control, and eliminate existing lead-based paint hazards and past lead-based paint hazards where potential lead-based paint debris may have accumulated in the area surrounding facilities. Priority is given to facilities or portions of facilities frequented by children. All installations must develop and implement a plan for identifying, evaluating, managing, and abating lead-based paint hazards. The guidance emphasizes the use of management policies and lead-based paint abatement as part of the normal facility renovation and upgrade programs when it is cost-effective.

Most of the property buildings are painted and the paint appears to be in good condition. A lead-based paint survey has not been conducted at Moffett Federal Airfield. However, buildings are tested for lead paint prior to demolition or renovation. Since many of the buildings at the 129 RQW installation were constructed prior to 1978, it is likely that a majority of these buildings contain lead-based paint. However, most major facilities which are occupied by internal and external customers have been recently renovated, abated, and repainted.

### 3.4.6 Historical and Cultural Resources

Historical structures, archaeological sites, and traditional cultural properties are afforded protection under the National Historic Preservation Act of 1966 as amended (16 USC 470).
Federal agencies are required to identify, assess, and protect historic structures, traditional cultural properties, and archaeological resources under their jurisdiction, control, or affected by the agencies’ actions. Cultural resources must be protected from any actions that may adversely affect them. AFI 32-7065, *Integrated Cultural Resources Management*, specifies procedures for compliance with cultural resources laws. Specifically, all installations are required to conduct an inventory of their resources and manage the resources in accordance with AFI 32-7065, NEPA, Native American Graves Protection and Repatriation Act, American Indian Religious Freedom Act, Archaeological Resource Protection Act, Archeological and Historic Preservation Act, and the Secretary of the Interior’s Standards and Guidelines for Archaeology and Historic Treatment. All installations are to consult with the State Historic Preservation Officer, Tribal Historic Preservation Officer, Native American governmental representatives, and other affected parties prior to implementation of an action that may adversely affect the resources.

There are 20 areas within the perimeter of Moffett Federal Airfield that have been designated as potential archaeologically sensitive areas; the largest of these sites is located south of the runway. Two of these sites are located at the southeastern section of Moffett Federal Airfield, inside the 129 RQW Main Campus (NASA 2002).

### 3.4.7 Natural Resources

Threatened and endangered species and their habitats are afforded protection under Section 7(a)(2) of the Endangered Species Act (ESA) of 1973 (Public Law 93-205, 16 USC 1531), which requires every Federal agency to ensure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any listed species or result in the destruction or adverse modification of critical habitat. Any plant or animal species, or its habitat, listed as threatened or endangered (50 Code of Federal Regulations [CFR] 424.02) must therefore be protected from any actions that may threaten their continued existence. DoD Instruction 4715.3, *Environmental Conservation Programs*, and AFI 32-7064, *Integrated Natural Resources Management*, specify procedures for compliance with the ESA. Specifically, all installations are required to conduct an inventory for threatened and endangered species and undertake no action that may affect such species or their habitat without consulting with either the U.S. Fish and Wildlife Service (USFWS) for terrestrial and fresh water species or with the National Marine Fisheries Service (NMFS) for marine species. Additionally, AFI 32-7064 requires installations to afford the same protection to State-listed threatened and endangered species as to Federal species, whenever practicable.

Moffett Federal Airfield is bordered to the south, east, and west by a substantial amount of urban development. Tidal flats exist to the north and contain the majority of habitat supportive of wildlife. Wildlife typically found in the vicinity of the 129 RQW facilities include those species that tolerate human activity and development. Common species observed at Moffett Federal Airfield include Pacific treefrog (*Hyla regilla*), American coot (*Fulica americana*), house finch (*Carpodacus mexicanus*), mallard (*Anas platyrhynchos*), mourning dove (*Zenaida macroura*), Northern mockingbird (*Mimus polyglottos*), Botta’s pocket gopher (*Thomomys bottae*), raccoon
(Procyon lotor), red fox (Vulpes vulpes), California ground squirrel (Spermophilus beecheyi), house mouse (Mus musculus), and western harvest mouse (Reithrodontomys megalotus) (NASA 1995).

Although a number of plant and animal special status species are known to occur or potentially occur in the vicinity of Moffett Federal Airfield (NASA 1995), due to the developed nature of the area, no special status species are known or expected to occur within or in the vicinity of the 129 RQW facilities.
4. FINDINGS FOR ADJACENT PROPERTIES

4.1 HISTORICAL AND CURRENT LAND USE

The site history for the adjacent properties was obtained through a visual site inspection, historical site photographs, existing documentation, and interviews. Based on review of available historical aerial photographs, the earliest known usage of the adjacent properties was agricultural (i.e., crops and pasture land).

Regional Setting

Moffett Federal Airfield is located in an unincorporated portion of Santa Clara County. The airfield is surrounded by the City of Mountain View to the west and the City of Sunnyvale to the south (see Figure 1-1). Land use in the vicinity of the 129 RQW facilities is highly urbanized as a result of rapid growth and intense private development from the boom in the semiconductor and computer industries. Land uses surrounding Moffett Federal Airfield include industrial, agricultural, residential, office, and public recreation.

Land to the north, northeast, and northwest of Moffett Federal Airfield is mostly open space or recreational. Land to the east, west, and south is generally industrial, with small pockets used for residential or open space/recreational purposes (NASA 1994). On the eastern border of the 129 RQW Main Campus is a large industrial and research facility: the Lockheed Martin Industrial Complex (Figure 4-1). This complex extends from the northern corner to the southeastern corner of Moffett Federal Airfield. The southern border of Moffett Federal Airfield is separated from nearby land uses by Interstate 101. Residential and light industrial development within the City of Sunnyvale is located in the southern boundary of Moffett Federal Airfield on the south side of Highway 101. The non-industrial areas surrounding Moffett Federal Airfield include Stevens Creek, its associated trail, and a 358-unit mobile home park to the west; the Sunnyvale Municipal Golf Course to the southeast; and military residential areas at the southwestern corner of Moffett Federal Airfield (CANG 1996, NASA 2002).

Moffett Federal Airfield

Moffett Federal Airfield encompasses approximately 2,354 acres of land. Land uses within Moffett Federal Airfield include airfield operations and support, administration and training, housing, recreation, medical support, and research and development facilities (CANG 1996).

Moffett Federal Airfield is divided into several regions. These areas include the CANG facilities, the Eastside/Airfield area, the NASA Research Park, Ames Campus, the San Francisco Bay View area, and a diked marsh and storm water retention pond (see Figure 4-1). With the exception of the CANG facilities, the remainder of Moffett Federal Airfield is in use by NASA.
Figure 4-1
Properties Adjacent to the 129 RQW Lease Disposal Area
4.2 Surveyed Properties

Section 7 of ASTM Standard E1527-00 requires that properties within a one-mile radius of the installation be investigated to determine their potential to affect the subject property. The sites listed in the Federal or State databases as being located within a one-mile radius of the proposed lease disposal properties are presented in Table 4-1. The environmental liabilities at the surrounding properties and their potential to affect the proposed lease disposal area are described in the following paragraphs.

Note: ¹The information shown in this table is supplied from the existing environmental databases and its accuracy has not been field verified (EDR 2003b).

4.2.1 Hazardous Materials and Petroleum Products

Hazardous materials and petroleum products have been stored and used in the operations conducted on the surrounding properties, including NASA operations. Other than Moffett Federal Airfield, no other surrounding properties were listed on the environmental database search report as using or storing reportable quantities of hazardous materials and petroleum products.

4.2.2 Hazardous and Petroleum Wastes

Wastes have been generated at Moffett Federal Airfield and adjoining properties. Wastes were reportedly disposed of in unlined landfills, drainage ditches and unpaved areas, and stored in unlined wastewater ponds. In addition, some USTs and sumps were found to have leaked PCBs and fuels. Chemicals of potential concern on properties adjacent to the 129 RQW facilities include waste oils and jet fuels, solvents and cleaners, washing compounds, gasoline, hydraulic fluids, asbestos, paints, pesticides, battery acid, and PCBs. Previous releases of hazardous and petroleum wastes on adjacent properties at and surrounding Moffett Federal Airfield have been investigated and are in various stages of remediation under the CERCLA Superfund program.

4.2.3 Environmental Restoration Program Sites

Moffett Federal Airfield and Onizuka AFB are the only DoD facilities located within a one-mile radius of the subject property that have been investigated under the ERP. Remediation and monitoring of remaining ERP sites is ongoing, and known contamination is contained and in various stages of remediation.
4.2.4 Storage Tanks and Pipelines

According to the environmental database files, several LUSTs were noted on the Federal and State database search results for properties located within one-mile of the 129 RQW properties. All LUSTs have been removed, and any soil contamination found during removal of the USTs was excavated and disposed of in accordance with Federal and State laws and regulations.

4.2.5 National Priority List Sites

There are three sites within approximately one-mile of the subject property that are listed on the NPL: Moffett Federal Airfield, National Semiconductor Company, and Raytheon Company. All sites are listed on the Final NPL (EDR 2003b). A Record of Decision document for each of the three NPL sites has been developed to provide a permanent remedy at the NPL sites and addresses remedial actions for groundwater contamination. Ongoing investigation and cleanup efforts are actively being performed under the CERCLA Superfund program.
5. **REGULATORY COMPLIANCE ISSUES**

5.1 **COMPLIANCE AND LIABILITY ISSUES**

In 1992, the Community Environmental Response Facilitation Act (CERFA) amended CERCLA and established new procedures for contamination assessment, cleanup, and related activities. CERFA supports other environmental laws to ensure that possible adverse effects of property transfers on human health and the environment are addressed and that property offering potential for reuse and redevelopment is identified in an expedient manner.

Based on a review of all Federal regulations that govern environmental restoration and based upon a review of past and current activities at the proposed lease disposal property, no active noncompliance issues were identified in comparison with Federal regulations that govern environmental protection and restoration.

With the exception of ongoing ERP remediation activities and the presence of asbestos and lead-based paint within existing structures, no other issues of potential concern have been identified as a result of document reviews, interviews, and visual surveys conducted for this EBS.

5.2 **CORRECTIVE ACTIONS**

Not all environmental liabilities require corrective actions. Most issues only require notification of the future users of the property of the potential environmental liability. All of Moffett Federal Airfield is a CERCLA NPL site, and the U.S. Navy has liability for cleanup in accordance with applicable Federal and State laws and regulations.
This page intentionally left blank
6. CONCLUSIONS

6.1 FACILITY MATRIX

The facility matrix of the proposed lease disposal property at Moffett Federal Airfield is shown in Table 6-1. This matrix includes summaries of the ACM, lead-based paint, storage tank, hazardous substance release, and ERP site status at each building.

6.2 PROPERTY CATEGORIES AND RESOURCES

In accordance with AFI 32-7066 and USAF use of EBS property categorization codes (USAF 1999), facilities or portions of the proposed lease disposal area should be classified into one of the seven categories shown in Table 6-2. These categories are based on the presence of hazardous substances or petroleum products or their derivatives. The proposed lease disposal area is classified as Category 5, Remedial or Other Action Underway, as there are four ERP sites in the vicinity of the 129 RQW buildings currently undergoing remediation activities.

### Table 6-2. General EBS Property Classification Categories

<table>
<thead>
<tr>
<th>Category</th>
<th>Summary</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>No Storage Occurred</td>
<td>No storage, release, or disposal of hazardous substances has occurred on the property. This applies to on-site issues as well as migration of hazardous substances from off site.</td>
</tr>
<tr>
<td>2</td>
<td>Only Storage Occurred</td>
<td>Hazardous substances or petroleum products (or derivatives) were stored on the property, but no release, disposal, or migration from adjacent areas has occurred.</td>
</tr>
<tr>
<td>3</td>
<td>Contamination Below Action Levels</td>
<td>Contamination is present but falls below established action levels. Conclusion can be based on characterization that includes sampling and laboratory analysis.</td>
</tr>
<tr>
<td>4</td>
<td>Remedial Action Required and Taken</td>
<td>Contamination above action levels existed, but all remedial actions necessary to protect health and the environment have been taken to meet the provisions of CERCLA 120 (h)(3).</td>
</tr>
<tr>
<td>5</td>
<td>Remedial or Other Action Underway</td>
<td>Remedial systems are partially or entirely in place but have not been fully demonstrated or completed.</td>
</tr>
<tr>
<td>6</td>
<td>Required Response Action Not Implemented</td>
<td>Contamination is present, but required remedial systems or other actions have not been selected or implemented.</td>
</tr>
<tr>
<td>7</td>
<td>Further Evaluation Required</td>
<td>Existence of contamination or potential for release of hazardous substances into the environment or structures has been indicated but not well characterized. Further evaluation must be conducted before a recommendation to proceed with transaction can be made.</td>
</tr>
</tbody>
</table>

This classification of environmental condition of property area types is consistent with CERCLA Section 120(h) requirements relating to the transfer of contaminated Federal real property (42 USC 9601 and following).

### 6.3 Data Gaps

As of the date of this document, there are no known data gaps that would affect the conclusions of this Phase I EBS. Consequently, no data gaps have been identified.
This page intentionally left blank
7. RECOMMENDATIONS

7.1 IDENTIFIED ISSUES

As indicated in Section 6, Conclusions, the proposed lease area falls under Category 5, *Remedial or Other Action Underway* (see Table 6-2). Regarding the site as a whole, other than the known ERP sites which are currently under investigation and remediation and are considered to be in stable, non-expansive condition, there is no information to indicate that further contamination or potential for release of hazardous substances into the environment exists. Consequently, no remedial actions other than the U.S. Navy’s ongoing CERCLA program cleanup requirements are recommended for the 129 RQW proposed lease disposal property.

7.2 RECOMMENDATIONS

Due to the comprehensive investigations and ongoing cleanup activities required under the CERCLA program, there is no further concern associated with the proposed lease disposal area; therefore, no further study is required or recommended.
8. CERTIFICATIONS

8.1 CERTIFICATION OF THE ENVIRONMENTAL BASELINE SURVEY

All appropriate records made available were reviewed and visual site inspections of the proposed lease properties were conducted following an analysis of information during the records search. The information contained within the survey report is based on records made available and is correct and current as of August 2004.

Certified by: Christine Davis
Project Manager
Date: August 4, 2004

Approved by: Angela Alexander
Lt.Col. Angela Alexander
129th Rescue Wing, California Air National Guard
Date: 4 Aug 2004

8.2 CERTIFICATION OF CONTAMINATION

The surveyed real property contains known hazardous substances as that term is defined in the CERCLA (42 USC 9601), as amended, or other contamination as specified by the RCRA of 1976, the implementation of USEPA regulations (40 CFR Parts 261, 262, 263, and 761), and the Federal Property Management Regulations (41 CFR Part 101-47). A complete search of agency files revealed that hazardous substances are known to have been released or disposed of on the surveyed real property. Hazardous substances have been released at the ERP sites listed in Table 3-2.

Approved by: Angela Alexander
Lt.Col. Angela Alexander
129th Rescue Wing, California Air National Guard
Date: 4 Aug 2004
8.3 CERTIFICATION OF POLYCHLORINATED BIPHENYLs CLEARANCE

X   a. This Real Property is in compliance with 40 CFR 761, as outlined below:

1. An inventory has been prepared and is being maintained of all PCB Real Property Installed Equipment and Real Property PCB Items per Section 761.45.

2. All in-service and stored serviceable PCB and PCB-contaminated Real Property Installed Equipment and Real Property PCB Items have been inspected, repaired, and are being maintained to prevent leakage and, therefore, can be distributed per Section 761.30.

3. PCB Real Property Installed Equipment and Real Property PCB Items have been stored, decontaminated, and labeled per Sections 761.42, 761.43, and 761.44.

4. There is no known PCB-contaminated soil, wastes, or unserviceable equipment remaining on the existing property.

   b. A records search and an onsite inspection indicate that this property has not been exposed to PCB materials or equipment.

### GLOSSARY OF TERMS

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Acquisition</td>
<td>Any authorized method of obtaining ANG control of, and responsibility for, real property or an interest in real property by purchase, condemnation, donation, exchange, leasing, licenses, permits, and/or recapture. An acquisition may be a temporary or permanent interest in real property and includes interagency transfers of real property accountability from other Federal Government agencies.</td>
</tr>
<tr>
<td>Adjacent Properties</td>
<td>Not only those properties contiguous to the boundaries of the subject property, but also those properties relatively nearby that could pose significant environmental concern and/or have a significant impact on the property.</td>
</tr>
<tr>
<td>ANG Proponent</td>
<td>ANG, major command, installation, field operating agency, or other component responsible for initiating or carrying out the proposed real property transaction.</td>
</tr>
<tr>
<td>Category 1 Parcel</td>
<td>Category 1 Parcel Areas where no storage, release, or disposal of hazardous substances has occurred on the property. This applies to on-site issues as well as migration of hazardous substances from off site.</td>
</tr>
<tr>
<td>Category 2 Parcel</td>
<td>Category 2 Parcel Areas where hazardous substances or petroleum products (or derivatives) were stored on the property, but no release, disposal or migration from adjacent areas has occurred.</td>
</tr>
<tr>
<td>Category 3 Parcel</td>
<td>Category 3 Parcel Area where contamination is present but falls below established action levels. Conclusion can be based on characterization that includes sampling and laboratory analysis.</td>
</tr>
<tr>
<td>Category 4 Parcel</td>
<td>Category 4 Parcel Area where contamination above action levels existed, but all remedial actions necessary to protect health and the environment have been taken to meet the provisions of CERCLA 120 (h)(3).</td>
</tr>
<tr>
<td>Category 5 Parcel</td>
<td>Category 5 Parcel Area where remedial systems are partially or entirely in place but have not been fully demonstrated or completed.</td>
</tr>
<tr>
<td>Category 6 Parcel</td>
<td>Category 6 Parcel Area where contamination is present, but required remedial systems or other action have not been selected or implemented.</td>
</tr>
<tr>
<td>Category 7 Parcel</td>
<td>Category 7 Parcel Area where existence of contamination or potential for release of hazardous substances into the environment or structures has been indicated but not well characterized. Further evaluation must be conducted before a recommendation to proceed with transaction can be made.</td>
</tr>
<tr>
<td>CERCLA</td>
<td>Comprehensive Environmental Response, Compensation, and Liability Act, as amended.</td>
</tr>
<tr>
<td>CERCLIS</td>
<td>Comprehensive Environmental Response, and Liability Information System. A list of sites by the USEPA that have been or are currently being investigated by USEPA for potential hazardous contamination, and for possible inclusion on the National Priorities List. CERCLIS was last updated in November 2001.</td>
</tr>
<tr>
<td>Disposal by Deed</td>
<td>A conveyance of fee or any easement interest in real property.</td>
</tr>
<tr>
<td>Due Diligence</td>
<td>The process of inquiring into the environmental characteristics conditions and history of a parcel of real estate, usually in connection with a real estate transaction. The degree and type of due diligence will vary for different properties and differing purposes.</td>
</tr>
<tr>
<td>Hazardous Substance</td>
<td>This term shall have the meaning provided in CERCLA, 42 USC 9601(14), except that for the purpose of this guidance, the term shall specifically include petroleum products, oil, and lubricant.</td>
</tr>
<tr>
<td>Hazardous Waste Contaminated Sites</td>
<td>Sites on which a release has occurred or is suspected to have occurred and that has been reported to a government entity. The release may be attributable to any hazardous substance, hazardous waste, or petroleum products.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>----------------------------------------------------------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Innocent Landowner</td>
<td>A defense to CERCLA liability provided in 42 USC, Sections Defense 9601(35) and 9607(1)(3). “All appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” by the involved party is one of the requirements that must be met to qualify for this defense.</td>
</tr>
<tr>
<td>LUST</td>
<td>The LUST is a database maintained by State Environmental Protection Division to inventory records of reported LUST incidents. The LUST was last updated in November 2001.</td>
</tr>
<tr>
<td>No Further Remedial Action Planned (NFRAP)</td>
<td>The NFRAP list contains sites removed from the CERCLIS database because, following an initial investigation, no contamination was found, the contamination was removed quickly, or the contamination was not serious enough to require NPL consideration.</td>
</tr>
<tr>
<td>National Priorities List (NPL)</td>
<td>The NPL is compiled by USEPA pursuant to CERCLA 42 USC, Section (a) (8) (b) is a listing of properties with the highest priority for cleanup based on the USEPA hazard ranking system. The NPL was last updated in October 2001.</td>
</tr>
<tr>
<td>Resource Conservation and Recovery Information System- Large Quantity Generators (RCRIS-LQG)</td>
<td>RCRIS-LQG is a database maintained by USEPA to track facilities that generate more than 1,000 kilograms (kg) of hazardous waste per month or meet other criteria. This database was last updated in June 2000.</td>
</tr>
<tr>
<td>Resource Conservation and Recovery Information System- Small Quantity Generators (RCRIS-SQG)</td>
<td>RCRIS-SQG is a database maintained by USEPA to track facilities that generate between 100 and 1,000 kg of hazardous waste per month or meet other criteria. This database was last updated in June 2000.</td>
</tr>
<tr>
<td>Resource Conservation and Recovery Information System- Treatment, Storage, and Disposal (RCRIS-TSD)</td>
<td>RCRIS-TSD Facilities is a database maintained by USEPA to track these types of facilities. This database was last updated in June 2000.</td>
</tr>
<tr>
<td>Real Property</td>
<td>Real property refers to land; present possessory interest in land; surface water and groundwater within boundaries of such land; structures, fixtures, and other improvements on land; or other interest or future interest in land.</td>
</tr>
<tr>
<td>Release</td>
<td>Any spilling, leaking, emitting, discharging, escaping, leaching, or disposing from a source area into groundwater, surface water, surface soils, or subsurface soils.</td>
</tr>
<tr>
<td>Remediate</td>
<td>Process of restoring contaminated soil and/or water resources to an established set of standards.</td>
</tr>
<tr>
<td>Solid Waste</td>
<td>General term for solid, non-hazardous waste materials.</td>
</tr>
<tr>
<td>Water Table</td>
<td>The surface between the zone of saturation and the zone of aeration; that surface of a body of unconfined groundwater at which the pressure is equal to that of the atmosphere.</td>
</tr>

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR’s search of available ("reasonably ascertainable") government records either on the target property or within the ASTM E 1527-00 search radius around the target property for the following databases:

**FEDERAL ASTM STANDARD**

- Proposed NPL: Proposed National Priority List Sites
- RCRIS-TSD: Resource Conservation and Recovery Information System
- RCRIS-SQG: Resource Conservation and Recovery Information System
- ERNS: Emergency Response Notification System

**STATE ASTM STANDARD**

- AWP: Annual Workplan Sites
- Notify 65: Proposition 65 Records
- WMUDS/SWAT: Waste Management Unit Database
- UST: List of Underground Storage Tank Facilities
- INDIAN UST: Underground Storage Tanks on Indian Land
- CA FID UST: Facility Inventory Database

**FEDERAL ASTM SUPPLEMENTAL**

- CONSENT: Superfund (CERCLA) Consent Decrees
- Delisted NPL: National Priority List Deletions
- HMIRS: Hazardous Materials Information Reporting System
- MLTS: Material Licensing Tracking System
- MINES: Mines Master Index File
- NPL Liens: Federal Superfund Liens
- PADS: PCB Activity Database System
- RAATS: RCRA Administrative Action Tracking System
- TRIS: Toxic Chemical Release Inventory System
- TSCA: Toxic Substances Control Act
- SSTS: Section 7 Tracking Systems

**STATE OR LOCAL ASTM SUPPLEMENTAL**

- AST: Aboveground Petroleum Storage Tank Facilities
- CLEANERS: Cleaner Facilities
- CA WDS: Waste Discharge System
- DEED: List of Deed Restrictions
- HAZNET: Hazardous Waste Information System
- SAN JOSE HAZMAT: Hazardous Material Facilities

**EDR PROPRIETARY HISTORICAL DATABASES**

See the EDR Proprietary Historical Database Section for details

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified.
Elevations have been determined from the USGS 1 degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. EDR’s definition of a site with an elevation equal to the target property includes a tolerance of +/- 10 feet. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property (by more than 10 feet). Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL ASTM STANDARD

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/24/2002 has revealed that there are 3 NPL sites within approximately 1 mile of the target property.

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 08/15/2002 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/29/2002 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

CHMIRS: The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

A review of the CHMIRS list, as provided by EDR, and dated 12/31/2001 has revealed that there are 7 CHMIRS sites within approximately 1 mile of the target property.

CORTESE: This database identifies public drinking water wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release and all solid waste disposal facilities from which there is known migration. The source is the California Environmental Protection Agency/Office of Emergency Information.

A review of the Cortese list, as provided by EDR, has revealed that there are 9 Cortese sites within approximately 1 mile of the target property.

### TOXIC PITS
The Toxic Pits Cleanup Act Sites database identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. The data come from the State Water Resources Control Board.

A review of the Toxic Pits list, as provided by EDR, has revealed that there is 1 Toxic Pits site within approximately 1 mile of the target property.

<table>

### SWF/LF
The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

### LUST
The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 07/11/2002 has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

### BEP
Bond Expenditure Plan comes from the Department of Health Services.

A review of the CA BOND EXP. PLAN list, as provided by EDR, has revealed that there are 2 CA BOND EXP. PLAN sites within approximately 1 mile of the target property.
VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC’s costs.

A review of the VCP list, as provided by EDR, and dated 10/10/2002 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

FEDERAL ASTM SUPPLEMENTAL

RODS: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, has revealed that there are 3 ROD sites within approximately 1 mile of the target property.

Leak Detection: Sensor Instrument, GW Monitoring Well

Site Description:
Moffett Field was continuously operated by the US military after it was commissioned in 1933 to support the West Coast Dirigibles of the lighter than air (LTA) program until 1994. In 1939, a permit was granted to Ames Aeronautical Laboratory to use part of the station. In 1942, the station was returned to Navy control and was named Naval Air Station Moffett Field. In late 1942, the heavier than air (HTA) program was initiated and began to take precedence over the LTA program. In 1945, the HTA program was moved and Moffett Field was used as a major overhaul and repair base. In 1949, the station became home to the Military Air Transport Service Squadron. By 1950, Moffett Field was the largest naval air transport base on the West Coast, and in 1953 it became home to all Navy fixed-wing land-based antisubmarine efforts. A weapons department was formed on the base in 1954, and in February 1966 the base activated its high speed refueling facilities. During the station reorganization in 1973, it became the headquarters of the Commander Patrol Wings, US Pacific Fleet. During the 1980s and early 1990s, the mission of Moffett Field was to support antisubmarine warfare training and patrol squadrons, and it became the largest P-3 Orion patrol aircraft base in the world with nearly 100 aircraft. No heavy manufacturing or major aircraft maintenance was conducted, but a significant amount of unit and intermediate level maintenance occurred. In April 1991, Moffett Field was designated for closure, and on July 1, 1994, control of the base was transferred to National Aeronautics and Space Administration (NASA). Wastes have been generated at Moffett Field through maintenance operations, fuel management, and fire training since the early 1930s. Chemicals of potential concern include waste oils and jet fuels; solvents and cleaners; washing compounds; and lesser amounts of gasoline, hydraulic fluids, asbestos, paints, pesticides, battery acid, and PCBs. Wastes were disposed of in unlined landfills, drained through drainage ditches and unpaved areas, and stored temporarily in unlined wastewater ponds. In addition, some underground storage tanks (USTs)
and sumps were found to have leaked petroleum hydrocarbons and fuels, and lesser amounts of waste oils and solvents. Environmental studies were initiated at Moffett Field in 1984. The Navy began conducting these environmental restoration activities as part of the Department of Defense Installation Restoration Program (IRP). The Navy conducted an initial assessment study (IAS) in 1984 to gather data on the past use and disposal of hazardous materials at the base. Nineteen sites were identified as potential sources of wastes, including nine sites identified in the IAS and 10 sites added during subsequent investigations. Five additional sites were identified during field investigation in the early 1990s. The Environmental Protection Agency (EPA) proposed placing Moffett Field on the National priorities List (NPL) in June 1986, and it was placed on the NPL in 1987. The Remedial Investigation and Feasibility Study (RI/FS) is coordinated through the August 1990 federal facilities agreement (FFA) with EPA and the California Environmental Protection Agency. The RI was implemented in two phases. The Phase I characterization was complete in August 1990. The Phase II investigations were initiated in 1990 to provide more detailed, site specific data. In October, 1992 EPA determined that the aquifers on the western side of Moffett Field were affected by a regional volatile organic compound (VOC) plume emanating from the Middlefield-Ellis-Whisman (MEW) Superfund site south of Moffett Field. EPA determined that these aquifers were subject to the 1989 Record of Decision (ROD) already written for the MEW site and would be remediated per the MEW ROD. Consequently, OU4 was deleted and OU5 was modified to include all aquifers not part of the regional plume. In May 1989, the Navy developed a community relations plan (CRP). The OU5 RI report was released in August 1993. The OU5 FS report was released in August 1995 Moffett Field. The proposed plan for remediation of OU5 was released to the public in October, 1995. A public comment period was held from October 27, 1995 through November 30, 1995 with a public meeting on November 16, 1995. Moffett Field has been continuously operated by the U.S. military since it was commissioned in 1933. In 1945, Moffett Field was used as a major overhaul and repair base. In 1954, a weapons department was formed at the base, and then during the 1980s and early 1990s, the mission of Moffett Field was to support antisubmarine warfare training and patrol squadrons. No heavy manufacturing or major aircraft maintenance was conducted at Moffett Field, but a significant amount of unit- and intermediate-level maintenance occurred. In April 1991, Moffett Field was designated for closure as an active military base under the Department of Defense Base Realignment and Closure (BRAC) program. After closure, control of the base was transferred to the National Aeronautics and Space Administration (NASA), however, the Navy will continue with environmental restoration activities and remain responsible for remediating Navy contaminant sources. Wastes have been generated at Moffett Field through maintenance operations, fuel management, and fire training since the early 1930s. Chemicals of potential concern include waste oils and jet fuels; solvents and cleaners; washing compounds; and lesser amounts of gasoline, hydraulic fluids, asbestos, paints, pesticides, battery acid, and polychlorinated biphenyls (PCBs). Wastes were disposed of in unlined landfills, drained through drainage ditches and unpaved areas, and stored temporarily in unlined wastewater ponds. In addition, some underground storage tanks and sumps (many of them now removed) were found to have leaked petroleum hydrocarbons and fuels, and
lesser amounts of waste oils and solvents. Environmental studies were initiated at Moffett Field in 1984 with an initial assessment of past use and disposal of hazardous materials. Nineteen sites were identified as potential waste sources. Remedial Investigation/Feasibility Study (RI/FS) work was coordinated through the August 1990 Federal Facilities Agreement with EPA and the State. The Phase I RI characterization was completed in August 1990. The more detailed Phase II investigations identified the need to separate the site into six Operable Units (OUs).

Moffett Federal Airfield is located near the southwestern edge of San Francisco Bay in Santa Clara County, California. Moffett Field is bounded by salt evaporation ponds to the north, Stevens Creek to the west, U.S. Highway 101 to the south, and Lockheed Missile and Space Company’s Lockheed Aerospace Center to the east. The cities of Sunnyvale and Mountain View are adjacent to the southern portion of Moffett Field. The National Aeronautics and Space Administration (NASA) Ames Research Center is located to the west and north of Moffett Field. Ground surface elevations at Moffett Field range from approximately 36 feet above mean sea level (msl) to 2 feet below msl. A sizable portion of Moffett Field is situated on previously submerged land or marshlands that have been filled to their existing elevations with backfill material. Wetlands located along the northern portion of Moffett Field are the only natural surface water features at the base. The wetlands on Moffett Field are approximately 80 acres in size; about half of this area is below sea level. The portion above sea level is a critical habitat for a variety of mammals and birds. Approximately 1 mile beyond the northern boundary of Moffett Field is the San Francisco Bay, which is California’s largest estuary. There are no streams on Moffett Field, although several streams are present to the east and west. Coyote Creek and Guadalupe Slough drain into San Francisco Bay to the east of Moffett Field, and Stevens Creek drains into the San Francisco Bay to the west. The large area to the north and northeast of Moffett Field was diked and is now used as commercial salt evaporation ponds. Diked stormwater retention pools also are present north and northwest of the station. No other surface water features are present at Moffett Field, with the exceptions of several small ponds maintained on the Moffett Field golf course as water hazards, stormwater drainage ditches, standing water after floodings or rainfall, and the wetlands described above. The northern Santa Clara Valley groundwater basin is part of the down-dropped structural trough lying between the San Andreas and Hayward Faults. The erosion of the uplifted Santa Cruz Mountains has contributed sediment that has been transported by northward-flowing streams. Moffett Field lies on the San Jose alluvial plain near the toe of alluvial fans emanating from the Santa Cruz Mountains. On a regional scale, the overall sediment grain size becomes finer northward away from the mountains. On a local scale, alluvial processes have juxtaposed clay, silt, sand, and gravel in adjacent depositional environments. The subsurface sediments below Moffett Field are classified as the A, B, and C aquifers. Aquifer materials within Operable Unit 5 (OU5) are composed mainly of interbedded silt, silty clay, and silty sand with some sand and gravel channels of limited extent. The A aquifer is divided into two aquifer zones: a shallow 5 to 35 foot deep zone referred to as the A1-aquifer zone, and a deeper 35-50 foot deep zone referred to as the A2-aquifer zone. The Moffett Field storm drainage system has an effect on the flow direction and velocity of the A1 aquifer zone.
groundwater at OU 5. In the vicinity of OU5, the system includes the
runway subdrains, Marriage Road, Patrol Road, and Navy ditches, and
the Building 191 lift station. The Navy ditch penetrates deepest into
the A1 aquifer zone and, therefore, probably has the greatest effect
on the A1-aquifer groundwater. Continuing operation of the storm
drainage system not only affects the A1-aquifer groundwater but also
is important to control surface runoff and minimize surface flooding
in the OU5 area. A confining layer (A/B aquitard) separates the
permeable deposits of the B aquifer from the channels of the A
aquifer. The lithologies of the B aquifer sediments are similar in
kind and distribution to the lithologies found in the A aquifer. At
OU5, the A a
quifer is generally semiconfined to confined and the B aquifer is
confined. The C aquifer is confined under a laterally extensive clay
aquitard (B/C aquitard) that is present beneath Moffett Field between
depths of 130 and 160 feet below land surface. The B/C aquitard is a
thick, laterally continuous aquitard and the vertical hydraulic
gradient is directed upward between the C aquifer and overlying
aquifers. The A and B aquifers are not presently used. The C
aquifer, however, is used as a source of municipal drinking water for
the nearby communities of Mountain View and Sunnyvale, and for
irrigation purposes. None of the active municipal water supply or
agricultural supply wells are located at Moffett Field. The
groundwater flow direction in the A and B aquifers is generally
northward toward San Francisco Bay, which is similar to the
topographic surface. In the C aquifer, the flow direction is
northeast. With the exception of the northern portion of the A
aquifer, the aquifers at Moffett Field (A, B, and C) meet the State
Water Resources Control Board criteria for sources of drinking water.
Therefore, the southern portion of the A, B, and C aquifers at Moffett
Field are considered potential drinking water sources. Moffett Field
was divided into six operable units (OUs) to expedite the
remedial investigation/feasibility study (RI/FS) process: OU-1 Soils
at Sites 1 and 2 landfills; OU-2 Soils at Sites 3 through 11,13,14,
and 16 through 19; OU-3 Soils at Sites 12 and 15; OU-4 Aquifers on
the western side of Moffett field; OU-5 Aquifers on the eastern side
of Moffett field; and OU-6 Wetland areas. EPA determined that the
aquifers in OU-4 were not contaminated by the Moffett Field Site and
were subsequently deleted. OU-5 was modified to include all aquifers
not part of the regional volatile organic compounds (VOC) plume. OU-2
was separated into OU-2 West (Sites 8,16,17,18) and the western portion
of Site 10, which overlie the regional VOC plu
me) and OU-2 East, the focus of this Record of Decision (ROD) (Sites
3,4,6,7,11,13, and the eastern portion of Site 10, which do not
overlie the regional VOC plume. Site 3, the Marriage Road Ditch
extends for approximately 2,000 feet along the east stem side of
Marriage Road and is 5 to 6 feet below mean sea level (msl). The
ditch discharges to the Navy Channel. Portions of the ditch are lined
with concrete. An estimated 150,000 to 750,000 gallons of mixed
wastes containing waste oils, solvents, fuels, detergents, paints,
paint strippers, and hydraulic fluids were discharged into the storm
drains from the 1940s to the 1970s. Site 4, the Former Wastewater
Holding Pond, was removed, closed, and replaced by the existing
holding ponds. The former pond was unlined and received
approximately 15 million gallons of wastewater from 1968 to 1978. As
much as 35,000 gallons of waste materials, including toluene, methyl
ethyl ketone (MEK), dry cleaning solvents, paint sludge, paint

Corrective Action: CA725YE - Current Human Exposures Under Control, Yes, Current Human Exposures Under Control has been verified

The CORRACTS database contains 10 additional records for this site. Please contact your EDR Account Executive for more information.

RCRIS Corrective Action Summary:
Event: Current Human Exposures under Control, Yes. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.
Event Date: 12/28/2000

Event: Migration of Contaminated Groundwater under Control, Yes. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.
Event Date: 12/28/2000

Event: Stabilization Measures Evaluation, This facility is not amenable to stabilization activity at the present time for reasons other than 1) it appears to be technically infeasible or inappropriate (NF) or 2) there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.
Event Date: 09/29/1997

Event: Current Human Exposures under Control, Yes. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.
Event Date: 09/29/1997
LOCKHEED MISSILES & SPACE COMPANY INC. (Continued)

Event: CA Prioritization, Facility or area was assigned a high corrective action priority.
Event Date: 08/09/1994

Event: Stabilization Measures Evaluation, This facility is not amenable to stabilization activity because of a lack of technical data. An evaluation has been completed, but further data is necessary to determine stabilization measures, feasibility or appropriateness. This status should be changed when data becomes available.
Event Date: 08/09/1994

Event: Ignition of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.
Event Date: 02/28/1993

Event: Stabilization Construction Completed
Event Date: 12/31/1991

Event: CA Prioritization, Facility or area was assigned a high corrective action priority.
Event Date: 03/19/1991

Event: CMS Approved
Event Date: 09/11/1990

Event: RFI Approved
Event Date: 04/30/1990

Event: RFI Workplan Approved
Event Date: 07/31/1989

Event: Stabilization Measures Implemented, Primary measure is source removal and/or treatment (e.g., soil or waste excavation, in-situ soil treatment, off-site treatment).
Event Date: 02/28/1989

Event: RFI Imposition
Event Date: 01/20/1988

Event: CMS Workplan Approved
Event Date: 01/20/1988

### EPA Waste Codes Addendum

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>D001</td>
<td>IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.</td>
</tr>
<tr>
<td>D002</td>
<td>A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.</td>
</tr>
<tr>
<td>D003</td>
<td>A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.</td>

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Elapsed ASTM days:** Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

**FEDERAL ASTM STANDARD RECORDS**

**NPL:** National Priority List

Source: EPA

Telephone: N/A

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

- Date of Government Version: 10/24/02
- Date Made Active at EDR: 12/09/02
- Database Release Frequency: Semi-Annually
- Date of Data Arrival at EDR: 11/04/02
- Elapsed ASTM days: 35
- Date of Last EDR Contact: 11/04/02

- Date of Last EDR Contact: 11/04/02

**CERCLIS:** Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-413-0223

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

- Date of Government Version: 08/15/02
- Date Made Active at EDR: 10/28/02
- Database Release Frequency: Quarterly
- Date of Data Arrival at EDR: 09/23/02
- Elapsed ASTM days: 35
- Date of Last EDR Contact: 12/26/02

**CERCLIS-NFRAP:** CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-413-0223

As of February 1995, CERCLIS sites designated “No Further Remedial Action Planned” (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA’s Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.
CORRACTS: Corrective Action Report
Source: EPA
Telephone: 800-424-9346
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

RCRIS: Resource Conservation and Recovery Information System
Source: EPA/NTIS
Telephone: 800-424-9346
Resource Conservation and Recovery Information System. RCRIS includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

ERNS: Emergency Response Notification System
Source: EPA/NTIS
Telephone: 202-260-2342
Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

FEDERAL ASTM SUPPLEMENTAL RECORDS

BRS: Biennial Reporting System
Source: EPA/NTIS
Telephone: 800-424-9346
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

CONSENT: Superfund (CERCLA) Consent Decrees
Source: EPA Regional Offices
Telephone: Varies
Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

ROD: Records Of Decision
Source: EPA
Telephone: 703-416-0223
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.
DELISTED NPL: National Priority List Deletions
Source: EPA
Telephone: N/A
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

FINDS: Facility Index System/Facility Identification Initiative Program Summary Report
Source: EPA
Telephone: N/A
Facility Index System. FINDS contains both facility information and ‘pointers’ to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

HMIRS: Hazardous Materials Information Reporting System
Source: U.S. Department of Transportation
Telephone: 202-366-4555
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

MLTS: Material Licensing Tracking System
Source: Nuclear Regulatory Commission
Telephone: 301-415-7169
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

MINES: Mines Master Index File
Source: Department of Labor, Mine Safety and Health Administration
Telephone: 303-231-5959

NPL LIENS: Federal Superfund Liens
Source: EPA
Telephone: 205-564-4267
Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.
PADS: PCB Activity Database System
Source: EPA
Telephone: 202-564-3887
PCB Activity Database. PADS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB’s who are required to notify the EPA of such activities.

RAATS: RCRA Administrative Action Tracking System
Source: EPA
Telephone: 202-564-4104
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

TRIS: Toxic Chemical Release Inventory System
Source: EPA
Telephone: 202-260-1531
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

TSCA: Toxic Substances Control Act
Source: EPA
Telephone: 202-260-5521
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

FTTS INSPI: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA
Telephone: 202-564-2501

SSTS: Section 7 Tracking Systems
Source: EPA
Telephone: 202-564-5008
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.
FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Telephone: 202-564-2501
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

- Date of Government Version: 10/24/02
- Database Release Frequency: Quarterly
- Date of Last EDR Contact: 12/26/02
- Date of Next Scheduled EDR Contact: 03/24/03

### STATE OF CALIFORNIA ASTM STANDARD RECORDS

**AWP:** Annual Workplan Sites
Source: California Environmental Protection Agency
Telephone: 916-323-3400
Known Hazardous Waste Sites. California DTSC’s Annual Workplan (AWP), formerly BEP, identifies known hazardous substance sites targeted for cleanup.

- Date of Government Version: 10/04/02
- Date Made Active at EDR: 10/23/02
- Database Release Frequency: Annually
- Elapsed ASTM days: 16
- Date of Data Arrival at EDR: 10/07/02
- Date of Last EDR Contact: 01/06/03

**CAL-SITES:** CalSites Database
Source: Department of Toxic Substance Control
Telephone: 916-323-3400
The CalSites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the CalSites database.

- Date of Government Version: 11/21/02
- Date Made Active at EDR: 01/15/03
- Database Release Frequency: Quarterly
- Elapsed ASTM days: 37
- Date of Data Arrival at EDR: 12/09/02
- Date of Last EDR Contact: 12/09/02

**CHMIRS:** California Hazardous Material Incident Report System
Source: Office of Emergency Services
Telephone: 916-845-8400
California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

- Date of Government Version: 12/31/01
- Date Made Active at EDR: 01/15/03
- Database Release Frequency: No Update Planned
- Elapsed ASTM days: 44
- Date of Data Arrival at EDR: 12/02/02
- Date of Last EDR Contact: 11/25/02

**CORTESE:** "Cortese" Hazardous Waste & Substances Sites List
Source: CAL EPA/Office of Emergency Information
Telephone: 916-323-9100
The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

- Date of Government Version: 04/01/01
- Date Made Active at EDR: 07/26/01
- Database Release Frequency: Varies
- Date of Data Arrival at EDR: 05/29/01
- Elapsed ASTM days: 58
- Date of Last EDR Contact: 10/28/02

**NOTIFY 65:** Proposition 65 Records
Source: State Water Resources Control Board
Telephone: 916-445-3846
Proposition 65 Notification Records. NOTIFY 65 contains facility notifications about any release which could impact drinking water and thereby expose the public to a potential health risk.
TOXIC PITS: Toxic Pits Cleanup Act Sites
Source: State Water Resources Control Board
Telephone: 916-227-4364

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/95
Date Made Active at EDR: 09/26/95
Database Release Frequency: No Update Planned

SWF/LF (SWIS): Solid Waste Information System
Source: Integrated Waste Management Board
Telephone: 916-341-6320

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 12/16/02
Date Made Active at EDR: 01/15/03
Database Release Frequency: Quarterly

WMUDS/SWAT: Waste Management Unit Database
Source: State Water Resources Control Board
Telephone: 916-227-4448

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

Date of Government Version: 04/01/00
Date Made Active at EDR: 05/10/00
Database Release Frequency: Quarterly

LUST: Leaking Underground Storage Tank Information System
Source: State Water Resources Control Board
Telephone: 916-341-5740

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 07/11/02
Date Made Active at EDR: 09/03/02
Database Release Frequency: Quarterly

CA BOND EXP. PLAN: Bond Expenditure Plan
Source: Department of Health Services
Telephone: 916-255-2118

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/89
Date Made Active at EDR: 08/02/94
Database Release Frequency: No Update Planned
CA UST:

UST: Active UST Facilities
Source: SWRCB
Telephone: 916-341-5700
Active UST facilities gathered from the local regulatory agencies

Date of Government Version: 01/17/02
Date Made Active at EDR: 02/12/02
Database Release Frequency: Semi-Annually

Date of Data Arrival at EDR: 01/21/02
Elapsed ASTM days: 22
Date of Last EDR Contact: 01/08/03

VCP: Voluntary Cleanup Program Properties
Source: Department of Toxic Substances Control
Telephone: 916-323-3400
Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC’s costs.

Date of Government Version: 10/10/02
Date Made Active at EDR: 10/23/02
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 10/14/02
Elapsed ASTM days: 9
Date of Last EDR Contact: 01/06/03

INDIAN UST: Underground Storage Tanks on Indian Land
Source: EPA Region 9
Telephone: 415-972-3368

Date of Government Version: N/A
Date Made Active at EDR: N/A
Database Release Frequency: Varies

Date of Data Arrival at EDR: N/A
Elapsed ASTM days: 0
Date of Last EDR Contact: N/A

CA FID UST: Facility Inventory Database
Source: California Environmental Protection Agency
Telephone: 916-445-6532
The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/94
Date Made Active at EDR: 09/29/95
Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 09/05/95
Elapsed ASTM days: 24
Date of Last EDR Contact: 12/28/98

HIST UST: Hazardous Substance Storage Container Database
Source: State Water Resources Control Board
Telephone: 916-341-5700
The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/90
Date Made Active at EDR: 02/12/91
Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 01/25/91
Elapsed ASTM days: 18
Date of Last EDR Contact: 07/26/01

STATE OF CALIFORNIA ASTM SUPPLEMENTAL RECORDS

AST: Aboveground Petroleum Storage Tank Facilities
Source: State Water Resources Control Board
Telephone: 916-227-4382
Registered Aboveground Storage Tanks.

Date of Government Version: 11/20/02
Database Release Frequency: Quarterly

Date of Last EDR Contact: 11/04/02
Date of Next Scheduled EDR Contact: 02/03/03
CLEANERS: Cleaner Facilities
Source: Department of Toxic Substance Control
Telephone: 916-225-0873
A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes:
- power laundries, family and commercial; garment pressing and cleaner’s agents; linen supply; coin-operated laundries
- and cleaning; drycleaning plants, except rugs; carpet and upholster cleaning; industrial launderers; laundry and
garment services.

Date of Government Version: 03/18/02
Database Release Frequency: Annually
Date of Last EDR Contact: 01/10/03
Date of Next Scheduled EDR Contact: 04/07/03

CA WDS: Waste Discharge System
Source: State Water Resources Control Board
Telephone: 916-657-1571
Sites which have been issued waste discharge requirements.

Date of Government Version: 09/16/02
Database Release Frequency: Quarterly
Date of Last EDR Contact: 12/26/02
Date of Next Scheduled EDR Contact: 03/24/03

DEED: List of Deed Restrictions
Source: Department of Toxic Substances Control
Telephone: 916-323-3400
The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe
exposures to hazardous substances and wastes.

Date of Government Version: 10/04/02
Database Release Frequency: Semi-Annually
Date of Last EDR Contact: 01/06/03
Date of Next Scheduled EDR Contact: 04/07/03

HAZNET: Hazardous Waste Information System
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year
by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately
350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain
some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Government Version: 12/31/00
Database Release Frequency: Annually
Date of Last EDR Contact: 11/12/02
Date of Next Scheduled EDR Contact: 02/10/03

EDR PROPERITY HISTORICAL DATABASES

EDR Historical Gas Station and Dry Cleaners: EDR has searched select national collections of business directories and has collected listings of potential dry cleaner and gas station/filling station/service station sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include dry cleaning and gas station/filling station/service station establishments. The categories reviewed included, but were not limited to: gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, dry cleaner, cleaners, laundry, laundromat, cleaning/laundry, wash & dry, etc.

This information is meant to assist and complement environmental professionals in their conduct of environmental site assessments, and is not meant to be a substitute for a full historical investigation as defined in ASTM E1527. The information provided in this proprietary database may or may not be complete; i.e., the absence of a dry cleaner or gas station/filling station/service station site does not necessarily mean that such a site did not exist in the area covered by this report.

(A note on "dry cleaning" sites: it is not possible for EDR to differentiate between establishments that use PERC on-site as a cleaning solvent and sites that function simply as drop-off and pick-up locations or that are traditional wet cleaning/laundry facilities. Therefore, it is essential for environmental professionals to incorporate professional judgment in the evaluation of each site.)

Former Manufactured Gas (Coal Gas) Sites: The existence and location of Coal Gas sites is provided exclusively to EDR by Real Property Scan, Inc. ©Copyright 1993 Real Property Scan, Inc. For a technical description of the types of hazards which may be found at such sites, contact your EDR customer service representative.

Disclaimer Provided by Real Property Scan, Inc.

The information contained in this report has predominantly been obtained from publicly available sources produced by entities other than Real Property Scan. While reasonable steps have been taken to insure the accuracy of this report, Real Property Scan does not guarantee the accuracy of this report. Any liability on the part of Real Property Scan is strictly limited to a refund of the amount paid. No claim is made for the actual existence of toxins at any site. This report does not constitute a legal opinion.
OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines/Electrical Transmission Lines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines and electrical transmission lines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

EDR's GeoCheck Physical Setting Source Addendum has been developed to assist the environmental professional with the collection of physical setting source information in accordance with ASTM 1527-00, Section 7.2.3. Section 7.2.3 requires that a current USGS 7.5 Minute Topographic Map (or equivalent, such as the USGS Digital Elevation Model) be reviewed. It also requires that one or more additional physical setting sources be sought when (1) conditions have been identified in which hazardous substances or petroleum products are likely to migrate to or from the property, and (2) more information than is provided in the current USGS 7.5 Minute Topographic Map (or equivalent) is generally obtained, pursuant to local good commercial or customary practice, to assess the impact of migration of recognized environmental conditions in connection with the property. Such additional physical setting sources generally include information about the topographic, hydrologic, hydrogeologic, and geologic characteristics of a site, and wells in the area.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata. EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.
GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION
Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

USGS TOPOGRAPHIC MAP ASSOCIATED WITH THIS SITE
Target Property: 2437122-D1 MOUNTAIN VIEW, CA
Source: USGS 7.5 min quad index

GENERAL TOPOGRAPHIC GRADIENT AT TARGET PROPERTY
Target Property: General North
Source: General Topographic Gradient has been determined from the USGS 1 Degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION
Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION
Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.
The following information is based on Soil Conservation Service STATSGO data. In a landscape, soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information. DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

GROUNDWATER FLOW VELOCITY INFORMATION
Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY
Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY
The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.
Soil Component Name: REYES

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: mucky - clay
                  silty clay loam
                  loam
                  silt loam
                  clay loam

Surficial Soil Types: mucky - clay
                      silty clay loam
                      loam
                      silt loam
                      clay loam

Shallow Soil Types: clay

Deeper Soil Types: mucky - clay
ADDITIONAL ENVIRONMENTAL RECORD SOURCES

According to ASTM E 1527-00, Section 7.2.2, "one or more additional state or local sources of environmental records may be checked, in the discretion of the environmental professional, to enhance and supplement federal and state sources... Factors to consider in determining which local or additional state records, if any, should be checked include (1) whether they are reasonably ascertainable, (2) whether they are sufficiently useful, accurate, and complete in light of the objective of the records review (see 7.1.1), and (3) whether they are obtained, pursuant to local, good commercial or customary practice." One of the record sources listed in Section 7.2.2 is water well information. Water well information can be used to assist the environmental professional in assessing sources that may impact groundwater flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the national Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

ADDITIONAL ENVIRONMENTAL RECORD SOURCES

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-4099
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-4099

USGS Water Wells: In November 1971 the United States Geological Survey (USGS) implemented a national water resource information tracking system. This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on more than 900,000 wells, springs, and other sources of groundwater.
STATE RECORDS

California Drinking Water Quality Database
Source: Department of Health Services
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations for District 2, 3, 5 and 6
Source: Department of Conservation
Telephone: 916-323-1779

RADON

Area Radon Information
Source: USGS
Telephone: 303-202-4210
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 202-564-9370
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR’s Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California’s Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
Preliminary Sanborn® Map Report

Ship to: Chris E. Davis
The Environmental Company, Inc
1525 State Street
Santa Barbara, CA 93101

Order Date: 1/14/2003 Completion Date: 01/15/2003
Inquiry #: 911071.5S
P.O. #: -
Site Name: 129th Rescue Wing Bldg 683
Address: CA Air Nat. Guard 129th Rescue Wing
City/State: Moffett Field Nas, CA 94035
Cross Streets: 911071.5S

This document reports that EDR's collection of Sanborn® fire insurance maps has been reviewed, and based on client-supplied information, Sanborn® fire insurance maps depicting the target property at the specified location were not identified.

NO COVERAGE

A final Sanborn® Map Report is provided when the Sanborn® Map Search/Print Report is ordered.

February 25, 2003

NETR-Real Estate Research & Information hereby submits the following ASTM historical chain-of-title to the land described below, subject to the leases/miscellaneous shown in Section 2. Title to the estate or interest covered by this report appears to be vested in:

UNITED STATES OF AMERICA

The following is the current property legal description:

Site 1: Beginning at the Point of Beginning, southeasterly corner of the Moffett Federal Air Field, Thence North 00°57'05” East along the Easterly property line of Moffett Federal Air Field, 953.92 feet; Thence North 89°02’55” West, said bearing being at right angles with the Easterly boundary of Moffett Federal Air Field, 125.34 feet to the True Point of Beginning. Thence North 89°56’22” West 357.92 feet; Thence North 21°20’47” West 3,689.51 feet; Thence (continued)
North 68°41’58” East 1,634.27 feet; Thence North 15°52’20” East 148.60 feet; Thence North 19°55’28” East 20.04 feet; Thence South 67°40’58” East 30.91 feet; Thence South 21°01’36” East 345.49 feet, Thence through a curve to the right having a radius 550.00 feet, length 210.62 feet, through a central angle of 21°56’28”, Thence South 00°54’52” West 3,652.35 feet to the True Point of Beginning, containing approximately 96.93 acres.

Site 2: Beginning at Point of Beginning, the Southeasterly corner of the Moffett Federal Air field, Thence North 00°57’05” East along the Easterly property line of Moffett Federal Air Field, 6,274.58 feet; Thence continuing along the Easterly property line of Moffett Federal Air Field North 16°16’55” East 1,622.82 feet; Thence North 73°43’05” West, said bearing being at right angles with the Easterly boundary of Moffett Federal Air Field, 2,869.65 feet to the True Point of Beginning. Thence North 550206 West 46.00 feet; Thence through a nontangential curve to the left with a radial bearing of North 57°45’03” West having radius 181.00 feet, length 142.98 feet, through a central angle of 45°15’38”; Thence South 76°19’11” West 196.93 feet; Thence North 58°33’37” West 167.20 feet; Thence North 13°59’18” West 214.25 feet; Thence North 34°49’28” East 111.67 feet; Thence North 76°07’55” East 728.67 feet; Thence South 57°39’13” East 148.81 feet; Thence South 13°54’57” East 152.28 feet; Thence South 18°41’52” West 175.66 feet; Thence South 76°08’58” West 435.74 feet; Thence through a nontangential curve to the right with a radial bearing of South 78°49’46” West having radius of 338.00 feet, length 97.06 feet, through a central angle of 16°27’13”; Thence North 86°35’17” West 14.75 feet; Thence through a curve to the left, having radius 12.00 feet, length of 16.75 feet, through a central angle of 79°59’43”; Thence through a curve to the right having radius 250.00 feet, length of 82.30 feet, through a central angle of 18°51’45” to the True Point of Beginning, containing approximately 8.27 acres.

Site 2A: Beginning at the Point of Beginning, the Southeasterly corner of the Moffett Federal Air Field, Thence North 00°57’05” East along the Easterly property line of Moffett Federal Air Field, 6,274.58 feet; Thence continuing along the Easterly property line of Moffett Federal Air Field North 16°16’55” East 1,622.82 feet; Thence North 73°43’05” West, said bearing being at right angles with the Easterly boundary of Moffett Federal Air Field, 1,114.90 feet to the True Point of Beginning. Thence North 70°18’07” West 107.46 feet; Thence North 60°34’38” West 402.85 feet; Thence North 36°25’57” West 274.06 feet; Thence North 17°48’20” East 88.36 feet; Thence South 76°18’29” East 92.82 feet; Thence North 50°45’56” East 827.99 feet; Thence South 72°53’37” East 154.78 feet; Thence South 16°20’16” West 1,036.81 feet to the True Point of Beginning, containing approximately 10.57 acres.

Site 5: Beginning at the Point of Beginning, the Northwest corner of the Ellis Street Right of Way, Thence North 50°34’17” West 1703 feet to the True Point of Beginning. Thence South 39°25’43” West 89.57 feet; Thence North 73°39’58” West 310.38 feet; Thence North 32°19’14” West 60.29 feet; Thence North 73°34’47” West 115.16 feet; Thence North 16°01’36” East 50.96 feet; Thence North 73°58’24” West 205.49 feet; Thence through a nontangential curve to the right with a radial bearing of North 86°47’39” East, having radius 840.00 feet, length 296.58 feet, through a central angle of 20°13’46”; Thence South 67°38’43” East 111.57 feet; Thence through a curve to the right having radius 532.00 feet, length 410.84 feet, through a central angle (continued)
of 44°14′50″; Thence through a curve to the right having radius 160.00 feet, length 82.20 feet, through a central angle of 29°26′14″; Thence South 38°40′13″ East 133.72 feet; Thence South 43°14′28″ East 47.23 feet; Thence South 14°17′19″ West 248.90 feet; Thence South 42°53′27″ East 91.14 feet; Thence South 39°25′43″ West 63.45 feet to the True Point of Beginning, containing approximately 7.70 acres.

Site 8: Beginning at Point of Beginning, the Southeasterly corner of the Moffett Federal Air Field, Thence North 00°57′05″ East along the Easterly property line of Moffett Federal Air Field, 5,923.78 feet; Thence North 89°02′55″ West, said bearing being at right angles with the Easterly boundary of Moffett Federal Air Field, 1,238.95 feet to the True Point of Beginning. Thence South 68°38′54″ West 504.22 feet; Thence North 21°21′06 West 631.35 feet; Thence South 68°39′31″ West 607.05 feet; Thence North 21°19′26″ West 500.80 feet; Thence North 68°41′44″ East 188.99 feet; Thence North 21°21′00″ West 447.58 feet; Thence South 83°43′57″ East 194.27 feet; Thence through a nontangential curve to the left with a radial bearing of North 10°01′32″ East, having radius 252.00 feet, length 108.07 feet, through a central angle of 24°34′13″, Thence South 21°08′11″ East 322.67 feet; Thence North 68°41′44″ East 434.87 feet; Thence South 21°03′40″ East 769.14 feet; Thence North 68°38′54″ East 119.84 feet; Thence South 21°21′06″ East 362.39 feet to the True Point of Beginning, containing approximately 17.79 acres.
1. HISTORICAL CHAIN OF TITLE

Records were researched at the Santa Clara County Recorders’ and Assessors’ Office back to 1940. The current owner of the subject property is the United States of America. However, no conveyances of record were found conveying title to the property to the United States of America. Based on our research, it appears the United States of America acquired title to the property prior to 1940.
2. LEASES AND MISCELLANEOUS

1. No leases were found of record.
3. LIMITATION

This report was prepared for the use of Environmental Data Resources, Inc., and The Environmental Company, Inc., exclusively. This report is neither a guarantee of title, a commitment to insure, or a policy of title insurance. NETR-Real Estate Research & Information does not guarantee nor include any warranty of any kind whether expressed or implied, about the validity of all information included in this report since this information is retrieved as it is recorded from the various agencies that make it available. The total liability is limited to the fee paid for this report.
Appendix E

Interview Forms
INTERVIEWS

As part of the data collection effort associated with this EBS, the following individuals were interviewed:

- Lt. Col Angela Alexander – 129 RQW CANG, Base Civil Engineer
- Major Reuben Sendejas – 129 RQW CANG, Environmental Manager
- CMSgt Charles Brown – 129 RQW CANG, Environmental Technician

The following responses to the EBS questionnaire were developed by the CANG at Moffett Federal Airfield.

**Question:** To the best of your knowledge have any of the following documents been issued relative to the property?

- **Environmental audit reports**- Answer: Unknown.

- **Environmental permits (e.g., solid waste disposal permits, hazardous waste disposal permits, wastewater permits, or NPDES permits)** - Answer: These types of permits, including an EPA I.D. #, are acquired and maintained by NASA as the facility host.

- **Registrations for ASTs and USTs**- **ASTs and USTs are listed in the EBS.** Answer: Previously used USTs were permitted. All USTs were removed in October 1998.

- **Material Safety Data Sheets (MSDSs)**- Answer: MSDS files are maintained by each using shop/function.

- **Community Right-to-Know Plan**- Answer: Emergency Planning and Community Right-to-Know Act (EPCRA) Weapons System Assessment is on file in the 129 RQW Environmental Management Office (RQW/EMO).

- **Safety Plans; preparedness and prevention plans; spill prevention control and countermeasure (SPCC) and control plans**- Answer: Subject plans are published by NASA as the facility host and are maintained for the ANG by RQW/EMO.

- **Reports defining hydrogeologic conditions on the property or surrounding area**- Answer: These issues addressed in the Final Environmental Assessment, Moffett Field Comprehensive Use Plan, August 1994.

- **Geotechnical studies**- Answer: These issues addressed in the Final Environmental Assessment, Moffett Field Comprehensive Use Plan, August 1994.

- **Hazardous waste generator notices, reports, or manifests**- Answer: HW reports and manifests are produced by NASA Environmental as the holder of the EPA I.D. number and maintained on file for ANG by RQW/EMO.
• Notices or other correspondence from any government agency relating to current or past violations of environmental laws relative to the property or relating to environmental liens encumbering the property- Answer: NOVs (administrative findings).

• Pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property- Answer: None known.

• Pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property- Answer: None known.

• Notices from any government entity regarding possible violations of environmental laws or possible liability relating to hazardous substances or petroleum products- Answer: Environmental Restoration Program (ERP) sites exist on Moffett Federal Airfield. The United States Navy retains the responsibility for remediation of these sites as a condition of their transfer of stewardship for Moffett to NASA in 1994.

**Interview Questions:**

1. **Is the subject property or any adjoining property used for industrial purposes?** Answer: Bldg 47: Acft Maint; Bldg 146: Veh Maint; Bldg 682: HAZMAT Storage; Bldg 683: BCE Shops; Bldg 684: AGE Maint; Facility 1000: Acft Parking Ramps; Bldg 650: Acft Maint/Logistics; Bldg 662: Composite Maint Hangar; Bldg 484: Munitions Maint.

2. **Is there any record or knowledge of the property or any adjoining property being used for industrial uses in the past?** Answer: Bldg 651: Battery Storage (Navy); Bldg 669: Engine/Propeller Maint/Trng (Navy).

3. **Based on consultation with the local fire department or a review of fire insurance maps, are any buildings or other improvements on the subject property or adjacent properties identified as having been used for industrial purposes that could lead to contamination of the property?** Answer: Various ERP sites on base – Navy retains responsibility for remediation.

4. **Do any of the following uses or similar activities currently take place on the property or any adjoining property: dry cleaners; photo developing lab; commercial printing facility; gasoline stations; motor repair facility; junkyard; landfill; waste treatment/storage/disposal/processing/recycling facility?** Answer: Bldg 47: Acft Maint; Bldg 146: Veh Maint; Bldg 682: HAZMAT Storage; Bldg 683: BCE Shops; Bldg 684: AGE Maint; Facility 1000: Acft Parking Ramps; Bldg 650: Acft Maint/Logistics; Bldg 662: Composite Maint Hangar; Bldg 484: Munitions Maint.

5. **Have any of these activities taken place on the property or any adjoining property in the past?** Answer: Gasoline station in Bldg 146 compound.

6. **Are there currently, or have there previously been any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals of more than 5 gallons per container, or a total volume or more than 50 gallons in multiple containers stored or used at the property or facility?** Answer: Yes, storage/use. Maintenance activities at previously noted buildings.
7. Are there currently, or have there previously been any industrial drums (55 gallon) or sacks of chemicals located on the property? Answer: See Question 6.

8. Is there currently, or has there previously been any stained or discolored soil on the subject property? Answer: Soil under new aircraft maintenance hangar apron.

9. Are there currently, or have there ever been any registered or unregistered ASTs on the property? Answer: None known.

10. Are there currently, or have there previously been any vent pipes, fill pipes, or access ports indicating possible fill pipe locations adjacent to any structures or located on the subject property? Answer: USTs previously existed at Bldgs 680, 681, & 683. Tanks removed in October 1998.

11. Are there currently, or have there been any drains, walls, or flooring located within structures located on the property that are stained by substances other than water and/or emitting foul odors? Answer: None Known.

12. Is the property served by a private or non-public water system? Answer: No.

13. Have contaminants been identified in the well or system that exceed guidelines applicable to the system? Answer: Legionella discovered and remediated in 2002, principally on the NASA side of the base. The high levels of Legionella were found inside the building piping in several facilities; high levels were not found in the distribution system.

14. Has the well been designated as contaminated by any government environmental or health agency? Answer: N/A.

15. Are there any environmental liens or governmental notifications relating to past or current violations of environmental laws with respect to property or structures located on the property? Answer: No.

16. Has any previous environmental site assessment of the property indicated the presence of hazardous substances or petroleum products on the property, or contamination of the property? Answer: ERP sites on base – Navy responsible for cleanup.

17. Were recommendations made for further assessment of the property? Answer: Unknown.

18. Are there any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property? Answer: No.

19. Other than storm water discharging to a sanitary sewer system, is wastewater discharged onto or adjacent to the subject property? Answer: No.

20. Have any hazardous substances or petroleum products, automotive or industrial batteries, tires, or any other known waste materials been dumped, buried or burned on the subject property or adjacent properties? Answer: No.
21. Are there, or have there ever been any electrical transformers, capacitors, or hydraulic equipment located on the property or adjacent properties for which there are any records indicating the presence of PCBs? Answer: Yes – removed by contractor in 2002.

22. Is there known groundwater contamination at the property? Answer: TCE plume on base from civilian industry outside the property, not from ANG activities.

23. Are there any Environmental Restoration Program Sites identified at the property? Answer: Sites identified on Moffett; Navy responsibility. None known on current ANG property.

24. Have oil/water separators been located at the subject property in the Past or Present? Answer: Yes.

25. Has there been medical waste known in the past or present to have been used, stored, or disposed of at the property? Answer: Yes, at Bldgs 685 (Medical Squadron) and Bldg 686 (Pararescue).

26. Has there been ordnance known in the past or present to have been used, stored, or disposed of at the property? Answer: Yes – Stored.

27. Has there been radioactive waste known in the past or present to have been used, stored, or disposed of at the property? Answer: Unknown.

28. Are there buildings known to contain asbestos and/or lead-based paint. Is there an asbestos or lead based paint inventory or survey report available? Answer: Yes. Available data has been turned over to TEC.

29. Is there a National Pollutant Discharge Elimination System (NPDES) permit in existence for the property? Answer: Acquired and managed by NASA as facility host.

Environmental Baseline Survey
129 RQW California Air National Guard
Proposed Relocation to Castle Airport, Atwater, CA

Visual Site Inspection Form

Location: Moffett Federal Airfield

Date: December 3-4, 2002

Inspector: Christine Davis, Peer Amble, Ryan Pingree

Escort(s): Major Reuben Sendejas, CMSgt Charles Brown

Facility No.: 47  Facility Name: Hangar 3

Year Constructed:  Square Footage: 87,388

Current Use: Hangar

Does facility currently store or generate hazardous materials/waste: Flammable materials cabinets (i.e., paints, gun cleaners, oils). Paint shop contains 4 flammable cabinets and is a satellite accumulation point.

Accumulation Point: Yes  No

Types: Not Applicable

Housekeeping in and around facility: No concerns noted.

Other conditions of concern: AERPlane wash is discharged to an oil water separator which is the responsibility of NASA. NDI lab X-ray component.

Interviews: The 129 RQW only occupies the ¼ of the building at the north east corner. The Maintenance area functions will eventually move to the new hangar.

Additional comments: All storage for administrative support functions. Storage boxes, office furniture. Some of the buildings appear empty. Fuels system shop will also move to the new hangar.
### Visual Site Inspection Form

**Location:** Moffett Federal Airfield  
**Date:** December 3-4, 2002  
**Inspector:** Christine Davis, Peer Amble, Ryan Pingree  
**Escort(s):** Major Reuben Sendejas, CMSgt Charles Brown  
**Facility No.:** 146  
**Facility Name:** Vehicle Maintenance  
**Year Constructed:** 1982  
**Square Footage:** 17,515 SF (refueler bay and vehicle maintenance)  
**Current Use:** Vehicle maintenance and refueler vehicle maintenance bay.  
**Does facility currently store or generate hazardous materials/waste:** No  

---  

**Accumulation Point:**  
- Yes  
- No  
**Types:** Not Applicable  
**Housekeeping in and around facility:** No concerns noted.  
**Other conditions of concern:** Former Oil Water Separator located in the paved parking area outside building 146 was clogged with cement over 10 years ago and no longer operational.  
**Interviews:** Army Reserves occupy the eastern half of the building (Building 958)  

---  

**Additional comments:**  
- Vehicle maintenance and refueler bay. No PCB containing equipment.  
- Building 992 (warehouse D) is located near 146 and is used for miscellaneous storage. Building 111 is also located near building 146 and is used for Navy and Marine Corps Storage.

List of Preparers
LIST OF PREPARERS

This EBS was prepared for, and under the direction of ANG/CEVP. Members of The Environmental Company’s professional staff are listed below:

Project Management
William Halperin, Project Director
  Ph.D., Geography
Christine Davis, Project Manager
  M.S., Environmental Management

Quality Assurance
Karyn Palma
  B.A., Environmental Studies
Ellen Graap Loth
  B.S., Natural Resources

Technical Analysts
Peer Amble
  B.S., Geography
Yasmin Cronin
  M.S., Environmental Science and Management
Ryan Pingree
  M.S., Environmental Science and Management

Graphic Design
Deirdre Stites
  A.A., Geology
