Purpose

The purpose of this system level procedure (SLP) is to establish a clear understanding and consistent application of human capital management related activities that contribute to the NASA IV&V Program delivering high quality products and services.

Scope

This SLP applies to all NASA IV&V Program civil service employees. The competency, performance management, and training of our contractor workforce are beyond the scope of this SLP.

Definitions and Acronyms

Official NASA IV&V Program roles and terms are defined in the Quality Manual. Specialized definitions identified in this SLP are defined below.

• Administrative Officer (AO)
  • The AO is a NASA IV&V Program civil service employee who manages human capital activities for the NASA IV&V Program. The position description nomenclature for this position is "Program Specialist."

• Employee Performance Communication System (EPCS)
EPCS is NASA’s performance management system for all employees other than Senior Executive Service, Senior Scientific and Technical, and Senior Level employees. The EPCS establishes a systematic process for planning, monitoring, developing, assessing, and rewarding employee performance that contributes to achieving the Agency’s Vision, mission, and goals in accordance with applicable laws and regulations. The EPCS creates a strategically linked set of performance expectations for all employees, promotes a performance culture that focuses on two-way communication and accountability for results, and clearly differentiates between high and low performers.

Goddard Space Flight Center (GSFC) Human Resources Office (HRO)
- GSFC HRO is a NASA organization located in Greenbelt, Maryland. The GSFC HRO provides leadership and consultation on human capital strategy, solutions and helps coordinate services with the NASA Shared Services Center (NSSC).

Hiring Manager
- An organizational supervisor who carries out and/or coordinates the actions associated with filing a vacant civil servant position through the hiring of new employee.

Human Capital Management
- Human Capital Management is a strategic approach to people management that focuses on the knowledge, skills, abilities, and capacity to develop and innovate possessed by people in an organization.

Individual Development Plan (IDP)
- The IDP offers a deliberate planning process that provides a framework for development discussions between employees and supervisors, encouraging the supervisor to provide ongoing support for training and development, as well as encouraging the employee to actively seek out and participate in training and development activities. It also provides supervisors with a valuable tool for refocusing the workforce to meet future organizational requirements. The Standard Performance Appraisal Communications Environment Tool contains the electronic IDP records.

Performance Plan
- A Performance Plan consists of all the written or otherwise recorded performance elements that describe what the employee is expected to accomplish during the performance period (one-year period from May 1 through April 30) and the standards against which the employee’s performance shall be appraised.

Position Description (PD)
- A PD is a document that describes the principal duties, responsibilities and supervisory relationships of a position. It is the official record of the major duties and responsibilities of a position assigned by a supervisor or management official. An employee’s PD shall have a direct correlation to his/her performance plan.

Standard Performance Appraisal Communication Environment (SPACE) Tool
- The SPACE tool is a record system used for storing performance documents such as ratings of records, performance plans, IDP, recommendations, input feedback, etc.

**Process Flow Diagram**

An overall process flow diagram does not apply to this SLP.

The NASA IV&V Program employs various means to ensure that personnel performing work affecting products and services remain engaged and possess and maintain the necessary skills, competencies, education, training, and experience. These means include workforce recruitment, performance management, development and recognition.

**Workforce Recruitment**

Specific needs and trends related to workforce positions are identified as part of recurring discussions within the NASA IV&V Program. When a workforce need is identified, the IV&V Program Director takes into consideration a variety of factors, requirements and constraints. The IV&V Program Director consults with GSFC management and HRO, as well as IV&V Program supervisors, Office Leads, and the AO to decide whether to fulfill the workforce need using internal resources or by obtaining external resources.
External Hiring

The IV&V Program’s Hiring Manager for each hiring action (normally one of the supervisors) will contact and work with GSFC HRO and NSSC to create an official request to advertise for a civil service position to meet a specific workforce need. The Hiring Manager, with support of the NASA IV&V Program supervisors, AO, and/or Office Lead(s), will identify (or modify) an appropriate Agency Standard PD to determine the appropriate grade level and specialized experience for the position in the electronic Position Description System (ePDS) at https://epds.nasa.gov/. (NOTE: Use Chrome browser and NASA Data Center password) Leveraging the PD, the Hiring Manager and the AO will work with NSSC to develop the advertisement for the position. In collaboration with the Hiring Manager, NSSC will initiate the release of the position advertisement. The position advertisement will appear on the Federal Government’s USAJOBS website, which is located at https://www.usajobs.gov/

Subsequent to the position advertisement closing, NSSC will review and assess application data for all applicants. NSSC will then develop a certification listing of qualified applicants based upon its assessment. This certification listing serves as the initial assessment of an applicant’s competency for the position. The AO and Hiring Manager will utilize this certification listing as a basis to initiate and coordinate interviews for the advertised position.

The Hiring Manager, with input from the supervisors, will establish an interview panel to support the interview process in selection of a candidate(s). Based on the interviews, the panel will discuss and ultimately make recommendations regarding the candidates. The IV&V Program Director or Hiring Manager, will review the recommendations, consult with the other supervisors, and the interview panel if necessary, and make the final selection. With the support of the AO, the Hiring Manager will record the results of the interview process (who was interviewed and who was not) as well as the selected candidate on the certificate listing and electronically send the listing to NSSC through the NASA Human Resources Portal, as explained at: https://hr.nasa.gov/hiring-staffing. (NOTE: Paste this address into the browser.)

Subsequently, the Hiring Manager and the AO will work with NSSC to complete any remaining actions to facilitate the selection of the candidate.

Prior to the new hire’s arrival, the AO will work with the supervisors to identify and assign a supervisor for the new employee. The new employee will follow GSFC’s new employee orientation process found at https://employeeorientation.nasa.gov/. The AO and the assigned supervisor will initiate on-boarding actions to ensure that the new employee has applicable and appropriate resources, acquires relevant workplace knowledge (see IVV 03, Gaining Physical And Electronic Access to NASA IV&V Resources), and completes the required training upon or shortly after his/her arrival. During this timeframe, the assigned supervisor will establish a performance plan for the new employee (as described later in this process).

Internal Hiring

The processes and activities for an internal hire are similar to those of an external hire as noted above, with a few exceptions. Specifically, the need to assign a supervisor may not be necessary, and on-boarding actions may be not applicable. Civil service employees who apply for a NASA IV&V Program position are subject to procedures and requirements of the NASA Competitive Placement Plan (CPP). The NASA CPP is in NPR 3335.1, Merit Promotion and Placement, and is located at: https://nodis3.gsfc.nasa.gov/lib_docs.cfm?range=3. The applicant’s supervisor will notify the applicant of the disposition of his/her application and interview results (if applicable). Applicants are encouraged to request a debriefing of the results of internal hiring activities. The IV&V Program Director, or designee, applicable supervisor(s) and members from the interview panel (as applicable) will provide the employee with the debriefing.

Internal Reassignment
The IV&V Program supervisors, with assistance from the applicable Office Leads, will determine duty assignments of individual employees/positions and of the position structure of the NASA IV&V Program. Specifically, this determination includes the type of work appropriate grade level of the tasks associated with the work, skills and experience, education, and training necessary for the assignment. Leveraging this data, supervisors, with assistance from the Office Lead(s), will identify candidate employees capable of performing the duties of the assignment.

Supervisors and/or Office Lead(s) will discuss the reassignment opportunity with identified candidates to ascertain interest. Based upon various factors, the supervisors, with input from GSFC HRO and the Office Lead(s), will select a qualified employee to perform the assignment. The supervisor and applicable Office Lead will notify the selected employee and provide relevant details about the reassignment, including start date, nature of the assignment, required training, expectations regarding the transition of any existing duties and responsibilities, etc. Supervisors will also notify and explain to employees not selected for the reassignment opportunity the reason(s) for their non-selection. When applicable, the supervisor will update the employee’s performance plan, and when appropriate move the employee to another PD, to reflect the new assignment and current assignments (as described later in this process).

**Workforce Performance Management**

Agency level requirements detailed in NPR 3430.1; *NASA Employee Performance Communication System (EPCS)* guide the NASA IV&V Program’s workforce performance management efforts. The following activities are consistent with these requirements.

Supervisors will establish a performance plan for each employee on an annual basis, within 30 days of arrival for new employees, or within 30 days of an employee’s reassignment of new duties. As necessary, supervisors will coordinate the development of performance plans with applicable Office Leads. Supervisors will develop each performance plan by leveraging the employee’s position description, specific roles and/or assignments, existing competencies, and grade level.

Supervisors and employees will discuss the performance plan and the employee’s role in contributing to NASA IV&V Program goals and objectives, ultimately establishing an awareness of and common understanding of its contents and expectations. The supervisor and employee will sign the performance plan, acknowledging the discussion.

Throughout the performance period, supervisors will monitor employee performance. As applicable, supervisors may obtain data from Office Leads/groups leads, customers, and other relevant parties regarding employee performance. Employees are also encouraged to provide their supervisors with data that characterizes their performance for the applicable performance period.

Periodically, but no less than twice a year, throughout the performance period, supervisors will hold formal discussions with each employee regarding his/her performance. During these meetings, the supervisor will characterize the nature of the employee’s performance, recognize employee contributions and accomplishments, and identify any necessary actions and/or adjustments that the employee needs to make regarding their performance. During these discussions, the supervisor will identify development actions that are necessary to address any shortcomings regarding employee performance and/or enhance employee performance and capabilities. As part of routine performance discussions with their employees, supervisors will assess the effectiveness of any previously identified actions and/or training. If necessary, supervisors may initiate specific performance improvement plans for employees if identified actions and/or training do not produce the desired outcomes regarding employee performance, or if the employee’s overall performance does not meet expectations.

**Workforce Development**
Agency requirements and IV&V Program customers' needs may change over time. As such, the NASA IV&V Program must continually ascertain workforce needs to ensure workforce skills/competencies, experience, education, and training are relevant and applicable to meet emergent needs and requirements. Workforce needs may represent a shortcoming in existing performance and/or gaps in emergent capabilities. To address these situations, the IV&V Program employs various means to develop the workforce including, but not limited to, formal training, individual development plans, mentoring, on-the-job-training, academic programs, and details to other organizations to gain necessary knowledge. The amount, frequency, and availability of these activities will vary based on Agency/IV&V Program direction, requirements, funding and workforce needs.

Training

The NASA IV&V Program maintains a training program for its employees. The training program consists of internal and external training related requirements, resources, and processes.

The Agency and GSFC HRO identify the training required for every civil service employee. The AO and supervisors are responsible for ensuring that employees are cognizant of these training requirements. Employees are responsible for completing the required training within the identified time requirements.

The NASA IV&V Program utilizes training for improving existing and/or acquiring new skills/competencies. Training needs can be identified formally or informally, by various entities including the employee, supervisors, and Office Leads.

Formal notification includes workforce performance discussions between the supervisor and employee and through training data calls by the AO. As a minimum annually, the AO will initiate a training data call to identify the training needs of the organization. The training data call will capture training needs at multiple levels, including the employee, the offices, and the organization. Employees should discuss their identified training needs with their supervisors and Office Leads (where applicable) to ensure awareness of and gain supervisory and Office Lead support/agreement. The AO will facilitate a discussion with the supervisors on this organization-wide listing of training needs resulting from the training data call. Taking into consideration various factors, supervisors will review and disposition each training request. Supervisors will notify employees of the disposition of each training request.

Informally, employees, Office Leads and/or supervisors can identify an emergent out of the cycle training need and/or opportunity whereby the NASA IV&V Program becomes aware of a potentially beneficial training event for the employee and/or the organization. Each employee is encouraged to work with his/her supervisor and/or Office Lead to ensure awareness and to gain support/agreement. Similar to the formal methods outlined above, Supervisors will discuss these types of training requests during their recurring IV&V Program supervisors meetings. Supervisors will review and disposition the training requests and notify employees of the disposition of each request.

The NASA IV&V Program will fulfill training needs using formal and/or informal training events and methods. Employees will utilize System for Administration, Training, and Educational Resources for NASA (SATERN): https://saterninfo.nasa.gov/, to request and/or register for all internal and external training opportunities, and to complete Agency mandated training and other online learning modules of interest. For additional information on available training, refer to https://ohcm.gsfc.nasa.gov/

Individual Development Plans (IDP)

The NASA IV&V Program supports the development of employees via IDPs. Employees may identify an IDP as a means to gain new or improve existing skills, capabilities, and experience. Supervisors and
employees will discuss the objective(s) of the IDP to increase the employee’s understanding of it and to obtain supervisory agreement. After an IDP’s initiation, the employee and supervisor will maintain regular discussions to ensure that the employee is meeting objectives in the IDP.

**Mentoring**

In conjunction with GSFC HRO, the NASA IV&V Program supports a mentoring program for employees. Supervisors and/or an employee may identify mentoring as an applicable means to enhance employee skills, capabilities, and experience. Supervisors and employees should discuss the mentoring opportunity to increase their understanding of it and to obtain supervisory agreement on the mentoring opportunity. As a minimum, these discussions should address the type of mentoring arrangement (formal or informal), the objective(s) of the mentoring opportunity, and any associated costs.

Once initiated, the employee and supervisor should maintain regular discussions to ensure that the employee is meeting the objectives of the mentoring arrangement. For additional information, refer to [http:s://ohcm.gsfc.nasa.gov/content/mentoring](http:s://ohcm.gsfc.nasa.gov/content/mentoring)

**On-the-Job Training (OJT)**

The NASA IV&V Program supports the development of employees via OJT. Supervisors, Office Leads and/or employees may identify a desire or need to develop and/or enhance employee’s proficiency skills via OJT. OJT will consist of planned, organized, hands-on training conducted at the employee’s worksite while the employee is doing the actual job for which s/he is training.

**Academic Programs**

In conjunction with GSFC HRO, the NASA IV&V Program supports academic based advancement for employees, specifically via the Academic Investment for Mission Success (AIMS) Program. Supervisors and/or employees may identify a desire or need to enhance employee education, skills, experience, and capabilities via the AIMS Program. Employees and supervisors will discuss the employee’s desire to apply, to increase his/her understanding of it, and if appropriate, to obtain supervisory support/agreement. Employees are responsible for submitting the appropriate application and/or data for consideration to the AIMS Program office.

If selected into the AIMS Program, the employee and supervisor will maintain regular discussions to ensure that the employee understands the objectives and any associated requirements pertaining to AIMS Program participation. For additional information on the AIMS Program, refer to the website located at [https://ohcm.gsfc.nasa.gov/content/academic-investment-mission-success-aims](https://ohcm.gsfc.nasa.gov/content/academic-investment-mission-success-aims)

**Details**

On a limited basis and consistent with GSFC HRO policies and procedures, the NASA IV&V Program may support details for employees.

Supervisors and/or employees may identify a desire or need to enhance employee skills, experience, and capabilities via a detail. Employees and supervisors will discuss the potential detail to increase their understanding of it, including the objective, potential options, likelihood, appropriateness, associated costs, impact to the organization, and supervisory support. Subsequently, during an IV&V Program Supervisor meeting, the supervisor will bring forth the employee’s request for a detail for review and consideration. The IV&V Program Director will review the request, consult with the other supervisors and Office Leads if necessary, and make the final decision about the request for a detail. After a decision is made, the supervisor will notify the employee the outcome of his/her request and if applicable, any rationale to understand the decision.
If selected for a detail, the employee and supervisor will maintain regular discussions to ensure that the employee has an awareness and understanding of assigned work and work performance, and the objectives of the detail.

**Workforce Recognition**

The NASA IV&V Program supports an awards program to recognize individuals, teams and organization performance achievements. Awards are divided into two categories: Incentive Awards and Other Awards.

Incentive Awards include: Job Performance, Special Act (Individual and/or Group Achievement), Quality Step Increase, and Time-off Awards.

Other Awards may include: Agency Honor Awards, Center-wide Awards or NASA IV&V Program Awards.

Recognition can be honorary, non-monetary and/or monetary; written or verbal. The NASA IV&V Program shall ensure that it gives adequate recognition of employee performance achievements:

a.) in a fair and equitable manner and

b.) in a timely and appropriate manner.

**Metrics**

Any metrics associated with this SLP are established and tracked within the NASA IV&V Metrics Program.

**Records**

The following records will be generated and filed in accordance with this SLP and IVV 16, *Control of Records*, and in reference to NASA Procedural Requirements (NPR) 1441.1, *NASA Records Management Program Requirements*.
