Attachment: Task Order Statement of Work (SOW)
Multi-Purpose Crew Vehicle Program Integration Contract (MPIC)
Contract Number: NNJ13TA03B
Order Number: NNJ13TA10T
Program Management/Program Planning and Control (PP&C)

Technical Management Representative (TMR): Rodney Young

Period of Performance: April 1, 2013 to September 30, 2013

Scope of Work:

The Contractor shall perform the work necessary to provide the products and services identified below for an eighteen (18) month period of performance. Note that an eighteen month period of performance spans contract year 1 (April 2013 through September 2013) and contract year 2 (October 2013 through September 2014).

SOW	SOW Paragraphs	Title: Program Management	Projected Quantity	DRD

Note 1: Identification and documentation of interdependencies shall include the work product, initial documentation 30 days after task order start, annual updates on or before end of the Government fiscal year. Monthly Process Improvement and Affordability Panel (PIAP) sessions incur no cost to the Government.

Note 2: Program Integration Team Charter shall be initially documented within 30 of task order start with annual updates on or before the end of the Government fiscal year. The Program Integration Team also serves as the single point of contact for authoritative data and information about the vehicle and program for use in external communications (SOW 1.11), internal planning and analysis, including facilitation of data mining (SOW 1.1.2.2.C).

Note 3: The contractor shall use the existing Planning Data Set and provide updates of existing data products and new data products as per DRD MPIC-PC-01 specifications

Note 4: Document Review, Internal Audit, and Management Review completed by September 30, 2013. The Government will take corrective action for audit findings. QMS Management Review will be conducted as an agenda item on a regularly scheduled PP&C management forum, such as the Monthly Orion Program Performance Review (MOPPR). The contractor will provide training to required MPCV personnel in preparation for JSC QMS audits, as applicable. The contractor will control records (SOW 1.1.2.1.E.4). Records inventory is updated approximately three (3) times per year. The center records audit occurs once every 2 years, last one completed Feb. 2012.

Note 5: The contractor shall report findings and recommendations for process improvement and certification not later than 120 days following contract award, then per DRD MPIC-PC-01, and DRD MPIC-PC-02, and DRD MPIC-PC-05 specifications.

Note 6: The contractor shall use the existing Performance Data Set and provide updates of existing data products and new data products as per DRD MPIC-PC-02, DRD MPIC-PC-03, and DRD MPIC-PC-04 specifications

Note 7: Configuration Management Services processes approximately fifteen (15) Change Requests (CRs) per month and two (2) Management Directives per year.

Note 8: Minutes are assigned actions, decisions made, directions provided by chair or lead, and bullets of discussions. Minutes are not required to be verbatim wording and are only required at MPCV Program Level Boards or major reviews (e.g. MPCB, VICB, JICB, JPCB, GEMCP, QPPR, SMCB). No recording of meetings is required. Assume eight (8) meetings/per work day, six (6) of which are set up and hand off to technical point of contact, two (2) requiring set up and meeting support.

Note 9: Data management requests are data integrations, structure, relationships, and reporting. Approximately five (5) requests per year which require IT and DM to analyze the problem, work with civil service technical representative on solutions, and implement approved solutions to automate PP&C processes. One example is the Change Request Look Ahead report.

Note 10: Approximately eight (8) SR's submitted into the ESD system per week.

Note 11: Approximately fifteen (15) updates per week on MPCV websites.

Note 12: Approximately three (3) walk ups per week.

Note 13: Manage twenty four (24) specific Orion software licenses with three hundred (300) licenses. Approximately five (5) requests per month.

Note 14: One hundred and fourteen (114) NASA tagged inventory items requiring a yearly audit with approximately ten (10) requests per year.

Note 15: The contractor shall perform the services as per the SOW and report user metrics as per DRD MPIC-PC-05 specifications and assume that one (1) additional security report will be required during the first twelve (12) months of the contract. Assume approximately three (3) security incidents per month which require resolution.

Note 16: Examples of products could include: Fact sheets, Orion Book, Traveling Exhibit Panels, Space Center Houston Exhibits, Patches/Logo designs, Interactive Content, Award Certificates, PowerPoint templates, internal motivational wall displays, Space Flight Awareness (SFA) support and coordination.

**Task Order Statement Of Work (SOW)
Multi-Purpose Crew Vehicle Program Integration Contract (MPIC)
Contract Number: NNJ13TA03B
Order Number: NNJ13TA11T
MPCV Systems Engineering and Integration (SE&I)**

Contracting Officer Representative: Rodney Young

Period of Performance: April 1, 2013 to September 30, 2013

Scope of Work:

The Contractor shall perform the work necessary to provide the products and services identified below for an eighteen (18) month period of performance. Note that an eighteen month period of performance spans contract year 1 (April 2013 through September 2013) and contract year 2 (October 2013 through September 2014).

SOW	Title: Program Integration (Vehicle Integration Office)	SOW Paragraphs	Projected Quantity	DRD
1.2.3	Perform integration of Design Analysis Cycle (DAC) work, schedules, and products. Support development of the CoFR process. This is a FY14 task only.	A.1	2 DAC cycles per year	

SOW	Title: Systems and Integrated Analysis (Vehicle Integration Office)	SOW Paragraphs	Projected Quantity	DRD
1.2.4	Lead integrated vehicle systems performance trade studies involving Guidance, Navigation, and Control (GN&C), mission analysis, aerosciences, and other integrated vehicle disciplines. Support requirements and design development of the ESA SM and integration with the Orion spacecraft. Track analysis, trade studies, and test and verification plans of major mission separation events. Track technical risks and top issues in support of the vehicle systems performance & analysis team.	A.1	1 document update / trade study per month	

SOW	Title: CSM Crew Cabin and Cockpit Layout Design Requirements (Vehicle Integration Office)	SOW Paragraphs	Project and Quantity	DRD
1.2.5	<p>Development, prototype, simulation, and evaluation of crew displays and display concepts</p> <ul style="list-style-type: none"> • Create renderings of operational interactive cockpit displays in GL Studio® and IDATA® formats using concepts provided by NASA in Powerpoint, PDF, or other graphical formats. • Develop functional models of display renderings in C++, MATLAB®, Microsoft Visual Studio, or Practical Extraction and Reporting Language (PERL) formats. • Provide integration of Linux and Trick based simulation models provided by external sources with internally developed software models. • Prepare software scripts for Orion cockpit display format crew evaluations • Provide real-time support for Orion cockpit display format crew evaluations • Develop and support evaluations of displays for hand held iOS or Windows Tablet devices such as iPhones, iPads and Windows Surface Pro. • Coordinate with users and Orion Prime Contractor (and subs) to determine display capabilities within and outside of scope, identify spacecraft software and hardware interfaces and dependencies for each prototype display, and document prototype display capabilities and inputs/outputs in display format dictionaries 	A.1-A.5		
	Specific Deliverables:			
	Develop new Orion display formats required for the EM2 Design Reference Mission (DRM), including any changes resulting from configuration differences between the Service Module provided by the Prime		10	

	contractor and the new ESA Service module.			
	Prepare software scripts and provide support for Orion display format Crew Evaluations.		7	
1.2.5	<p>Development support of the Cockpit Rapid Prototype Lab</p> <ul style="list-style-type: none"> • Fabricate mockups of Orion Cockpit components. Mockups may range in complexity from non-functional foam core and plastic models to high fidelity functional engineering prototypes using flight-like materials. • Develop 3D CAD models of legacy components in Alibre Design™ format • Fabricate full-size models of legacy hardware components and new functional hardware concepts using 3D printer technology. • Fabricate, assemble and integrate full-size mockups of cockpit and crew display components using various materials and components including, but not limited to, plastic, metal, and various mechanical and electrical components. • Modify government provided legacy hardware and assemble and integrate with other components for use in cockpit mockup components • Manage procurement of government supplied materials, supplies, equipment, and software needed to perform this activity using NASA purchasing and property management processes • Provide Information technology (IT) support for any non-ACES crew and cockpit display computer software and hardware integration required by this activity • Provide integration support for incorporating the externally provided Socrates Windows emulator into simulation systems • Provide software distribution media for software products produced by this activity. Ensure products are 	A.1-A.5		

	labeled in compliance with export control and other applicable regulations <ul style="list-style-type: none"> • Provide local or phone support to end users for software installation issues involving distributed products 			
	Specific Deliverables:			
	Assemble and integrate two sets of flight-like hand controller simulators consisting of a rotational hand controller (RHC) and a translational hand controller (THC).		2	
	Construct an Orion three-display cockpit simulator.		1	
	Develop, fabricate, and assist in testing an Orion Cursor Control Device.		1	

SOW	Title: Flight and Ground Operations Integration (Vehicle Integration Office)	SOW Paragraphs	Projected Quantity	DRD
1.2.7	Lead the development of requirements and implementation for the interfaces between Orion and SLS. This includes development of IRDs and ICDs and the technical integration necessary to develop the technical content of these documents. Develop schedules for this work. This task will transition to NASA at the end of FY13 and is not applicable on this TO for FY14	A.1, A.2	1 formal update to IRD and ICD per 6 months Update schedules monthly	
1.2.7	Lead development and implementation of an integrated operational concept for landing and recovery for EFT-1, EM-1, AA-2, and EM-2. This includes: <ul style="list-style-type: none"> • Integration and development of technical agreements with GSDO, Department of Defense (DoD), and other internal and external partners involved in the development and implementation • Assessment of trades and designs in systems across the MPCV and GSDO programs that support the implementation of the landing and recovery con ops • Development and maintenance of schedules for this work. 	A.3, A.4	~2/year 1 trade study / month Monthly	
1.2.7	Coordinate and track master measurement	A.4	1 formal	

	list development, allocations and changes for developmental flight instrumentation (DFI) for EFT-1, EM-1 and AA-2. Evaluate sensor priority changes for technical impact to flight test objective owners. Support mapping of all DFI sensors to higher level module development in support of DFI hardware development for testing and flights. Develop schedules for this work.		release/ 6 months for each mission Monthly	
1.2.7	Provide Computer Aided Drawing (CAD) integration support. This includes: <ul style="list-style-type: none"> • Transferring CAD models back and forth between the MPCV prime contractor, the MPCV non-prime team, and the GSDO, and SLS programs • Transferring CAD models between NASA and the ESA design teams Translating CAD models between Pro/Engineer and CATIA formats. Develop schedules for this work.	A.4	2 releases / Design Analysis Cycle (DAC)

1.10.6 A	Office Data Management	5	Note 10	N/A

Note 1: The contractor shall prepare Crew and Service Module (CSM) risk charts and presentation material in support of CSM and Orion risk boards and management meetings (monthly). The contractor shall participate in the Orion Project Office Risk Management Working Group (monthly). The contractor shall coordinate the reporting and tracking of Prime Top Program and System risks with the MPCV Prime Contractor.

Note 2: The contractor shall support the development and maintenance of the Government Furnished Equipment (GFE) and In-line hardware and task database required for tracking and reporting (monthly).

Note 3: The contractor shall maintain the CSM Wiki and associated Wiki and Windchill folders (approximately 8 Wiki pages and dozens of Windchill folders). This includes performing regular updates, and managing team access and Prime Contractor access. In addition, this includes data migration back and forth from the Prime Contractor's internal Windchill to the NASA Windchill.

Note 4: The contractor shall provide support during the period of performance on development, integration, and testing of NASA avionics and software Integration and Testing (I&T) labs by providing technical expertise for hardware and software integration with focus on developing test rig configurations that support I&T activities. The contractor shall provide particular focus on Communications and Tracking (C&T) functionality, including C&T system emulation and interface with applicable hardware assets using established protocols.

Note 5: The contractor shall use the previous year's Program Planning Budget Execution (PPBE) database and update the plan based on the Program PPBE guidance, develop guidance for the office based on changes in the plan, issue office guidance to all the Centers and Programs that provide services to the office, collect and manage submits from the providers, briefs management on the revised PPBE plan, and documents the approved plan via the Internal Task Agreement (ITA) database.

Note 6: The contractor shall update and maintain the office top-level schedule and cost, schedule, and technical risk database. In addition, the contractor shall coordinate, collect inputs, and present to office management a Technical, Cost, and Schedule Review on a monthly basis.

Note 7: The contractor shall have knowledge in the area of environmental management and will assist the office/program National Environmental Policy Act (NEPA) Manager to ensure NEPA compliance as required to successfully execute the program plan.

Note 8: The contractor shall have knowledge and experience with the Automated Requirements Support System (ARSS) in order to assist the office Operations Manager interface with the ARSS Database and Requirements and Response Managers.

Note 9: The contractor shall have a working knowledge of the Universal Documentations System and how it is managed in the ARSS in order to assist the office Operations Manager in tracking the mission support requirements needed to successfully execute all operational phases of the mission. The contractor shall support the weekly Mission Support Working Group meetings.

Note 10: The contractor shall administer the office team data management process to include tracking configuration changes and loan requests, scheduling the configuration management team meetings, recording minutes and actions, and ensure all change requests are closed out.

Estimated Travel Requirements: All Travel from Houston, TX

Note 1: Identification and documentation of interdependencies shall include the work product, annual updates on or before end of the Government fiscal year. Monthly Process Improvement and Affordability Panel (PIAP) sessions incur no cost to the Government.

Note 2: Program Integration Team Charter shall be updated within 30 of task order start with annual updates on or before the end of the Government fiscal year. The Program Integration Team also serves as the single point of contact for authoritative data and information about the vehicle and program for use in external communications (SOW 1.11), internal planning and analysis, including facilitation of data mining (SOW 1.1.2.2.C).

Note 3: The contractor shall use the existing Planning Data Set and provide updates of existing data products and new data products as per DRD MPIC-PC-01 specifications

Note 4: Document Review, Internal Audit, and Management Review completed by September 30, 2015. The Government will take corrective action for audit findings. Quality Management System (QMS) Management Review will be conducted as an agenda item on a regularly scheduled PP&C management forum, such as the Monthly Orion Program Performance Review (MOPPR). The contractor will provide training to required MPCV personnel in preparation for JSC QMS audits, as applicable. The contractor will control records (SOW 1.1.2.1.E.4). Records inventory is updated approximately three (3) times per year. The center records audit occurs once every 2 years, last one completed in 2012.

Note 5: The contractor shall report findings and recommendations for process improvement and certification per DRD MPIC-PC-01, and DRD MPIC-PC-02, and DRD MPIC-PC-05 specifications.

Note 6: The contractor shall use the existing Performance Data Set and provide updates of existing data products and new data products as per DRD MPIC-PC-02, DRD MPIC-PC-03, and DRD MPIC-PC-04 specifications

Note 7: Configuration Management Services processes approximately fifteen (15) Change Requests (CRs) per month and two (2) Management Directives per year.

Note 8: Minutes are assigned actions, decisions made, directions provided by chair or lead, and bullets of discussions. Minutes are not required to be verbatim wording and are only required at MPCV Program Level Boards or major reviews (e.g. MPCV Control Board (MPCB), Vehicle Integration Control Board (VICB), Joint Integration Control Board (JICB), Joint Program Control Board (JPCB), Government Equipment and Materials Control Panel (GEMCP), Quarterly Program Performance Review (QPPR), Service Module Control Board (SMCB)). No recording of meetings is required.

Approximately eight (8) meetings/per work day, five (5) of which are set up and hand off to technical point of contact, three (3) requiring set up and meeting support.

Note 9: Data integration and management (DM) requests are data integrations, structure, relationships, and reporting. Approximately seven (7) requests per year which require Information Technology (IT) and DM to analyze the problem, work with civil service technical representative on solutions, and implement approved solutions to automate Program Planning and Control (PP&C) processes. One example is the Change Request (CR) Look Ahead report.

Note 10: Approximately ten (10) System Requests (SRs) submitted into the Enterprise Service Desk (ESD) system per week.

Note 11: Approximately fifteen (15) updates per week on MPCV websites.

Note 12: Approximately ten (10) walk ups per week.

Note 13: Manage twenty four (24) specific Orion software licenses with three hundred (300) licenses. Approximately one (1) request per month.

Note 14: One hundred and fourteen (114) NASA tagged inventory items requiring a yearly audit with approximately ten (10) requests per year.

Note 15: The contractor shall perform the services as per the Statement of Work (SOW) and report user metrics as per DRD MPIC-PC-05 specifications and assume that one (1) additional security report will be required during the task order period. Assume approximately three (3) security incidents per month which require resolution.

Note 16: Examples of products could include: Fact sheets, Orion Book, Traveling Exhibit Panels, Space Center Houston Exhibits, Patches/Logo designs, Interactive Content, Award Certificates, PowerPoint templates, internal motivational wall displays, Space Flight Awareness (SFA) support and coordination.

**MPCV Systems Engineering and Integration
TASK ORDER NNJ15TA02T, Basic**

The Contractor shall perform the work necessary to provide the products and services identified below for a twelve (12) month period of performance. Note that this twelve month period of performance aligns with Government Fiscal Year 15 and spans contract year 3 (October 2014 through September 2015).

SOW	Title: Program Integration (Vehicle Integration Office)	SOW Paragraphs	Projected Quantity	DRD
1.2.3	Perform integration of Design Analysis Cycle (DAC) work, schedules, and products. Support planning for and execution of (as applicable) major milestone reviews for MPCV, ESA, SLS, GSDO, and ESD. Support development of the CoFR process. Support the Cross-Program data interdependency and Bilateral Exchange Agreement process. Maintain the MPCV VIO schedule. Develop and maintain the MPCV Systems Engineering Plan (SEMP). Support development and review of MPCV Prime Contract changes associated with Design Analysis Cycle content, milestone planning, schedule changes, and deliverable products.	A.1, A.3, A.4, A.5	2 DAC cycles per year, 1 MPCV and 3 Cross-Program design reviews per year, 1 SEMP update	

SOW	Title: Systems and Integrated Analysis (Vehicle Integration Office)	SOW Paragraphs	Projected Quantity	DRD
1.2.4	Lead integrated vehicle systems performance trade studies involving Guidance, Navigation, and Control (GN&C), mission analysis, aerosciences, and other integrated vehicle disciplines. Support requirements and design development of the ESA SM and integration with the Orion spacecraft. Track analysis, trade studies, and test and verification plans of major mission separation events. Track technical risks and top issues in support of the vehicle systems performance & analysis team.	A.1	1 document update / trade study per month	

SOW	Title: CSM Crew Cabin and Cockpit Layout Design Requirements (Vehicle Integration Office)	SOW Paragraphs	Projected Quantity	DRD
1.2.5	Development, prototype, simulation, and evaluation of crew displays and display concepts <ul style="list-style-type: none"> • Create renderings of operational interactive cockpit displays in GL Studio® and IDATA® formats using concepts provided by NASA in Powerpoint, PDF, or other graphical formats. • Develop functional models of display renderings in C++, MATLAB®, Microsoft 	A.1-A.5		

	<p>Visual Studio, or Practical Extraction and Reporting Language (PERL) formats.</p> <ul style="list-style-type: none"> • Provide integration of Linux and Trick based simulation models provided by external sources with internally developed software models. • Prepare software scripts for Orion cockpit display format crew evaluations • Provide real-time support for Orion cockpit display format crew evaluations • Develop and support evaluations of displays for hand held iOS or Windows Tablet devices such as iPhones, iPads and Windows Surface Pro. • Coordinate with users and Orion Prime Contractor (and subs) to determine display capabilities within and outside of scope, identify spacecraft software and hardware interfaces and dependencies for each prototype display, and document prototype display capabilities and inputs/outputs in display format dictionaries 			
	Specific Deliverables:			
	Develop new Orion display formats required for the EM2 Design Reference Mission (DRM), including any changes resulting from configuration differences between the Service Module provided by the Prime contractor and the new ESA Service module.		11	
	Prepare software scripts and provide support for Orion display format Crew Evaluations.		8	
1.2.5	<p>Development support of the Cockpit Rapid Prototype Lab</p> <ul style="list-style-type: none"> • Fabricate mockups of Orion Cockpit components. Mockups may range in complexity from non-functional foam core and plastic models to high fidelity functional engineering prototypes using flight-like materials. • Develop 3D CAD models of legacy components in Alibre Design™ format • Fabricate full-size models of legacy hardware components and new functional hardware concepts using 3D printer technology. • Fabricate, assemble and integrate full-size mockups of cockpit and crew display components using various materials and 	A.1-A.5		

	<p>components including, but not limited to, plastic, metal, and various mechanical and electrical components.</p> <ul style="list-style-type: none"> • Modify government provided legacy hardware and assemble and integrate with other components for use in cockpit mockup components • Manage procurement of government supplied materials, supplies, equipment, and software needed to perform this activity using NASA purchasing and property management processes • Provide Information technology (IT) support for any non-ACES crew and cockpit display computer software and hardware integration required by this activity • Provide integration support for incorporating the externally provided Socrates Windows emulator into simulation systems • Provide software distribution media for software products produced by this activity. Ensure products are labeled in compliance with export control and other applicable regulations • Provide local or phone support to end users for software installation issues involving distributed products 			
	Specific Deliverables:			
	Assemble and integrate two sets of flight-like hand controller simulators consisting of a rotational hand controller (RHC) and a translational hand controller (THC).		2	
	Construct an Orion three-display cockpit simulator.		1	
	Develop, fabricate, and assist in testing an Orion Cursor Control Device.		1	

SOW	Title: Flight and Ground Operations Integration (Vehicle Integration Office)	SOW Paragraphs	Projected Quantity	DRD
1.2.7	<p>Lead development and implementation of an integrated operational concept for landing and recovery for EFT-1, EM-1, AA-2, and EM-2. This includes:</p> <ul style="list-style-type: none"> • Integration and development of technical agreements with GSDO, Department of Defense (DoD), and other internal and external partners involved in the development and implementation 	A.3, A.4	~2/year	

	<ul style="list-style-type: none"> Assessment of trades and designs in systems across the MPCV and GSDO programs that support the implementation of the landing and recovery con ops <p>Development and maintenance of schedules for this work.</p>		<p>1 trade study / month</p> <p>Monthly</p>	
1.2.7	<p>Coordinate and track master measurement list development, allocations and changes for developmental flight instrumentation (DFI) for EFT-1, EM-1 and AA-2. Evaluate sensor priority changes for technical impact to flight test objective owners. Support mapping of all DFI sensors to higher level module development in support of DFI hardware development for testing and flights.</p> <ul style="list-style-type: none"> Develop schedules for this work. 	A.4	<p>1 formal release/6 months for each mission</p> <p>Monthly</p>	
1.2.7	<p>Provide Computer Aided Drawing (CAD) integration support. This includes:</p> <ul style="list-style-type: none"> Transferring CAD models back and forth between the MPCV prime contractor, the MPCV non-prime team, and the GSDO, and SLS programs Transferring CAD models between NASA and the ESA design teams <p>Translating CAD models between Pro/Engineer and CATIA formats. Develop schedules for this work.</p>	A.4	<p>2 releases / Design Analysis Cycle (DAC)</p>	
1.2.7	<p>Lead the development of the integrated Orion-GSDO prelaunch operational concept. Lead the Orion-GSDO Interface Working Group to update the Orion-GSDO IRD and to develop the Orion-GSDO ICD. Support MPCV and GSDO major milestone reviews. Support regular interface discussions between GSDO and MPCV to identify and resolve cross-program issues. Support the cross program OMRS ITT. Support the cross program Ground Hardware Integration ITT. Support the cross program Logistics ITT. Develop an MPCV Logistics Plan in coordination with the MPCV Prime Contractor and CPIT. Develop schedules for this work. (This change is effective for GFY14 only)</p>	A.1 – A.4	<p>2 each IRD and ICD per year</p>	
1.2.7	<p>Lead the Mission and Performance Analysis group responsible for maintaining oversight of integrated vehicle performance analyses (power, thermal, trajectory, etc.), developing of concepts of operations, and supporting development of mission timelines. Provide NASA management with awareness of integrated vehicle level performance technical issues, modeling tools, schedules for</p>		<p>2 con ops release/ year, Review of timelines each DAC, Review of analysis</p>	

	analysis work, resource concerns, and integration of performance studies between NASA, ESA, and SLS.		products each DAC

1.10.2 A	<p>Support the development of the Master Verification Plan (MVP).</p> <p>Support the development of MVP Volume #2 post EFT-1 (i.e, EM-1+) Environmental Test Tolerances and Margins related to environmental qualification and acceptance test requirements for the MPCV Program.</p> <p>Support Vehicle Engineering Working Group (VEWG) and other Program working groups, panels, and boards as required in implementation of Verification requirements and assessments of risks related to deviations from verification requirements. Expertise in areas such as vibration, shock, thermal, climatic, and leak testing required.</p> <p>Provide coordination and data management for the MPCV Test and Verification (T&V) team, using the Windchill and Wiki tools within the ICE environment. Review cross program T&V documents in support of major milestone reviews.</p> <p>Provide expertise to the planning and execution of the EFT-1 mission Assembly, Integration, and Production (AI&P) testing, including test definition and anomaly resolution.</p>	A	1 MVP baseline doc review/development	N/A

SOW	Title: Test & Verification (T&V) (Avionics Power & Software)	SOW Paragraphs	Projected Quantity	DRD
1.10.4 A	Facilities	1, 2, 3, 4	Note 4	N/A

SOW	Title: Flight Test (Flight Test Management Office)	SOW Paragraphs	Projected Quantity	DRD
1.10.6 A	Flight Test Development, Integration, and Management			N/A
1.10.6 A	Program , Planning, Budget and Execution Management	1	Annually Note 5	N/A
1.10.6 A	Office Schedule and Risk Management	1	Monthly	N/A

			Note 6	
1.10.6 A	Program National Environmental Protection Act Assistant	2	Note 7	N/A
1.10.6 A	Automated Support Requirements System (ASRS) Coordinator	3	Note 8	N/A
1.10.6 A	Program Service and Support Requirements Management	4	Weekly Note 8	N/A
1.10.6 A	Office Data Management	5	Note 9	N/A

Note 1: The contractor shall prepare Crew and Service Module (CSM) risk charts and presentation material in support of CSM and Orion risk boards and management meetings (monthly). The contractor shall participate in the Orion Project Office Risk Management Working Group (monthly). The contractor shall coordinate the reporting and tracking of Prime Top Program and System risks with the MPCV Prime Contractor.

Note 2: The contractor shall support the development and maintenance of the Government Furnished Equipment (GFE) and In-line hardware and task database required for tracking and reporting (monthly).

Note 3: The contractor shall maintain the CSM Wiki and associated Wiki and Windchill folders (approximately 8 Wiki pages and dozens of Windchill folders). This includes performing regular updates, and managing team access and Prime Contractor access. In addition, this includes data migration back and forth from the Prime Contractor’s internal Windchill to the NASA Windchill.

Note 4: The contractor shall provide support during the period of performance on development, integration, and testing of NASA avionics and software Integration and Testing (I&T) labs by providing technical expertise for hardware and software integration with focus on planning, developing, and executing test rig configurations that support I&T activities. The contractor shall provide particular focus on Communications and Tracking (C&T) functionality, including C&T system emulation and interface with applicable hardware assets using established protocols.

Note 5: The contractor shall use the previous year’s Program Planning Budget Execution (PPBE) database and update the plan based on the Program PPBE guidance, develop guidance for the office based on changes in the plan, issue office guidance to all the Centers and Programs that provide services to the office, collect and manage submits from the providers, briefs management on the revised PPBE plan, and documents the approved plan.

Note 6: The contractor shall update and maintain the office top-level schedule and cost, schedule, and technical risk database. In addition, the contractor shall coordinate, collect inputs, and present to office management a Technical, Cost, and Schedule Review on a monthly basis.

Note 7: The contractor shall have knowledge in the area of environmental management and will assist the office/program National Environmental Policy Act (NEPA) Manager to ensure NEPA compliance as required to successfully execute the program plan.

Note 8: The contractor shall have a working knowledge of the Universal Documentations System and how it is managed in the Automated Support Requirements System (ASRS) in order to assist the office Operations Manager in tracking the mission support requirements needed to successfully

execute all operational phases of the mission. The contractor shall support the weekly Mission Support Working Group meetings.

Note 9: The contractor shall administer the office team data management process to include tracking configuration changes and loan requests, scheduling the configuration management team meetings, recording minutes and actions, and ensure all change requests are closed out.

Estimated Travel Requirements: All Travel from Houston, TX

Task Order Statement of Work (SOW)
 Contract Number: NNJ13TA03B
 Task Order: NNJ15TA04T
 Exploration Development Integration (EDI) Support

Contracting Officer Representative: Rodney Young

Period of Performance: October 1, 2013 to September 30, 2014

The Contractor shall perform the work necessary to provide the products and services identified below for a twelve (12) month period of performance. Note that this twelve month period of performance aligns with Government Fiscal Year 15 and spans contract year 3 (October 2014 through September 2015).

SOW	Title: Information Technology (IT) Management (Human Exploration Development Systems Office)	SOW Paragraphs	Projected Quantity	DRD
1.1.2.3.5	Provide support to HEDS in the following areas: <ul style="list-style-type: none"> • Development, management and maintenance of HEDS office website(s) • Provide IT assistance to assess end user issue and determine appropriate resolutions, such as reporting issues to the NASA IT contractor, and replacing or repairing user-maintained items • Manage and administer the NASA provided software available for employees use at home under NASA licensing agreements • Maintain HEDS organization's unique software • Serve as HEDS representative to the NASA Integrated Collaborative Environment (ICE) forum • Serve as the IT property custodian, maintaining the HEDS office IT inventory, the shared equipment pool, and tracking the shared hardware and software equipment pool • Provide IT support for any ESD level reviews (Design-To, Build-To Sync's) 	A - H	3 weekly IT mtgs. Bi-monthly ICE mtg.

Note 1: Identification and documentation of interdependencies shall include the work product, annual updates on or before end of the Government fiscal year. Monthly Process Improvement and Affordability Panel (PIAP) sessions incur no cost to the Government.

Note 2: Program Integration Team Charter shall be updated within 30 of task order start with annual updates on or before the end of the Government fiscal year. The Program Integration Team also serves as the single point of contact for authoritative data and information about the vehicle and program for use in external communications (SOW 1.11), internal planning and analysis, including facilitation of data mining (SOW 1.1.2.2.C).

Note 3: The contractor shall use the existing Planning Data Set and provide updates of existing data products and new data products as per DRD MPIC-PC-01 specifications

Note 4: Document Review, Internal Audit, and Management Review completed by September 30, 2015. The Government will take corrective action for audit findings. Quality Management System (QMS) Management Review will be conducted as an agenda item on a regularly scheduled PP&C management forum, such as the Monthly Orion Program Performance Review (MOPPR). The contractor will provide training to required MPCV personnel in preparation for JSC QMS audits, as applicable. The contractor will control records (SOW 1.1.2.1.E.4). Records inventory is updated approximately three (3) times per year. The center records audit occurs once every 2 years, last one completed in 2012.

Note 5: The contractor shall report findings and recommendations for process improvement and certification per DRD MPIC-PC-01, and DRD MPIC-PC-02, and DRD MPIC-PC-05 specifications.

Note 6: The contractor shall use the existing Performance Data Set and provide updates of existing data products

and new data products as per DRD MPIC-PC-02, DRD MPIC-PC-03, and DRD MPIC-PC-04 specifications

Note 7: Configuration Management Services processes approximately fifteen (15) Change Requests (CRs) per month and two (2) Management Directives per year.

Note 8: Minutes are assigned actions, decisions made, directions provided by chair or lead, and bullets of discussions. Minutes are not required to be verbatim wording and are only required at MPCV Program Level Boards or major reviews (e.g. MPCV Control Board (MPCB), Vehicle Integration Control Board (VICB), Joint Integration Control Board (JICB), Joint Program Control Board (JPCB), Government Equipment and Materials Control Panel (GEMCP), Quarterly Program Performance Review (QPPR), Service Module Control Board (SMCB)). No recording of meetings is required. Approximately eight (8) meetings/per work day, five (5) of which are set up and hand off to technical point of contact, three (3) requiring set up and meeting support.

Note 9: Data integration and management (DM) requests are data integrations, structure, relationships, and reporting. Approximately seven (7) requests per year which require Information Technology (IT) and DM to analyze the problem, work with civil service technical representative on solutions, and implement approved solutions to automate Program Planning and Control (PP&C) processes. One example is the Change Request (CR) Look Ahead report.

Note 10: Approximately ten (10) System Requests (SRs) submitted into the Enterprise Service Desk (ESD) system per week.

Note 11: Approximately fifteen (15) updates per week on MPCV websites.

Note 12: Approximately ten (10) walk ups per week.

Note 13: Manage twenty four (24) specific Orion software licenses with three hundred (300) licenses. Approximately one (1) request per month.

Note 14: One hundred and fourteen (114) NASA tagged inventory items requiring a yearly audit with approximately ten (10) requests per year.

Note 15: The contractor shall perform the services as per the Statement of Work (SOW) and report user metrics as per DRD MPIC-PC-05 specifications and assume that one (1) additional security report will be required during the task order period. Assume approximately three (3) security incidents per month which require resolution.

Note 16: Examples of products could include: Fact sheets, Orion Book, Traveling Exhibit Panels, Space Center Houston Exhibits, Patches/Logo designs, Interactive Content, Award Certificates, PowerPoint templates, internal motivational wall displays, Space Flight Awareness (SFA) support and coordination.

**Exploration Systems Engineering and Integration (SE&I)
TASK ORDER NNJ16TA02T**

The Contractor shall perform the work necessary to provide the products and services identified below for a twelve (12) month period of performance. Note that this twelve month period of performance aligns with Government Fiscal Year 16 (October 2015 through September 2016).

SOW	Title: Program Integration (Vehicle Integration Office)	SOW Paragraphs	Projected Quantity	DRD
1.2.3	Perform integration of Verification Analysis Cycle (VAC) work, schedules, and products. Support planning for and execution of (as applicable) major milestone reviews for MPCV, ESA, SLS, GSDO, and ESD. Support development of the CoFR process. Support the Cross-Program data interdependency and Bilateral Exchange Agreement process. Provide MPCV representation to the Data Integration ITT. Maintain the MPCV VIO schedule. Develop and maintain the MPCV Systems Engineering Plan (SEMP). Support development and review of MPCV Prime Contract changes associated with -Analysis Cycle content, milestone planning, schedule changes, and deliverable products. Provide SE&I support to the definition of interface requirements and implementation of these requirements into ICDs.	A.1, A.3, A.4, A.5	2 analysis cycles per year, 1 MPCV and 3 Cross-Program design reviews per year, 1 SEMP update	

SOW	Title: Systems and Integrated Analysis (Vehicle Integration Office)	SOW Paragraphs	Projected Quantity	DRD
1.2.4	Lead integrated vehicle systems performance trade studies involving Guidance, Navigation, and Control (GN&C), mission analysis, aerosciences, and other integrated vehicle disciplines. Support requirements and design development of the ESA SM and integration with the Orion spacecraft. Track analysis, trade studies, and test and verification plans of major mission separation events. Track technical risks and top issues in support of the vehicle systems performance & analysis team.	A.1	1 document update / trade study per month	

SOW	Title: CSM Crew Cabin and Cockpit Layout Design Requirements (Vehicle Integration Office)	SOW Paragraphs	Projected Quantity	DRD
1.2.5	Development, prototype, simulation, and evaluation of crew displays and display concepts <ul style="list-style-type: none"> • Create renderings of operational interactive cockpit displays in GLStudio® and IDATA® formats using concepts provided by NASA in Powerpoint, PDF, or other graphical formats. • Develop functional models of display renderings in C++, MATLAB®, Microsoft Visual Studio, or Practical Extraction and Reporting Language 	A.1-A.5		

	<p>(PERL) formats.</p> <ul style="list-style-type: none"> • Provide integration of Linux and Trick based simulation models provided by external sources with internally developed software models. • Prepare software scripts for Orion cockpit display format crew evaluations • Provide real-time support for Orion cockpit display format crew evaluations • Develop and support evaluations of displays for hand held iOS or Windows Tablet devices such as iPhones, iPads and Windows Surface Pro. • Coordinate with users and Orion Prime Contractor (and subs) to determine display capabilities within and outside of scope, identify spacecraft software and hardware interfaces and dependencies for each prototype display, and document prototype display capabilities and inputs/outputs in display format dictionaries 			
	Specific Deliverables:			
	Develop new Orion display formats required for the EM2 Design Reference Mission (DRM), including any changes resulting from configuration differences between the Service Module provided by the Prime contractor and the new ESA Service module.		11	
	Prepare software scripts and provide support for Orion display format Crew Evaluations.		8	
1.2.5	<p>Development support of the Cockpit Rapid Prototype Lab</p> <ul style="list-style-type: none"> • Manage procurement of government supplied materials, supplies, equipment, and software needed to perform this activity using NASA purchasing and property management processes • Provide Information technology (IT) support for any non-ACES crew and cockpit display computer software and hardware integration required by this activity • Provide integration support for incorporating the externally provided Socrates Windows emulator into simulation systems • Provide software distribution media for software products produced by this activity. Ensure products are labeled in compliance with export control and other applicable regulations • Provide local or phone support to end users for software installation issues involving distributed products • Assist in testing an Orion Cursor Control Device. 	A.1-A.5		

SOW	Title: Flight and Ground Operations Integration (Vehicle Integration Office)	SOW Paragraphs	Projected Quantity	DRD
1.2.7	<p>Lead development and implementation of an integrated operational concept for landing and recovery for EFT-1, EM-1, AA-2, and EM-2. This includes:</p> <ul style="list-style-type: none"> • Integration and development of technical agreements with GSDO, Department of Defense 	A.3, A.4	~2/year	

	<p>(DoD), and other internal and external partners involved in the development and implementation</p> <ul style="list-style-type: none"> Assessment of trades and designs in systems across the MPCV and GSDO programs that support the implementation of the landing and recovery con ops <p>Development and maintenance of schedules for this work.</p>		<p>1 trade study / month</p> <p>Monthly</p>	
1.2.7	<p>Coordinate and track master measurement list development, allocations and changes for developmental flight instrumentation (DFI) for EFT-1, EM-1 and AA-2. Evaluate sensor priority changes for technical impact to flight test objective owners. Support mapping of all DFI sensors to higher level module development in support of DFI hardware development for testing and flights.</p> <ul style="list-style-type: none"> Develop schedules for this work. 	A.4	<p>1 formal release/6 months for each mission</p> <p>Monthly</p>	
1.2.7	<p>Provide Computer Aided Drawing (CAD) integration support. This includes:</p> <ul style="list-style-type: none"> Transferring CAD models back and forth between the MPCV prime contractor, the MPCV non-prime team, and the GSDO, and SLS programs Transferring CAD models between NASA and the ESA design teams <p>Translating CAD models between Pro/Engineer and CATIA formats. Develop schedules for this work.</p>	A.4	<p>2 releases / Design Analysis Cycle (DAC)</p>	

SOW	Title: Crew and Service Module (CSM)	SOW Paragraphs	Projected Quantity	DRD
1.6.1.1 A	CSM Office Management and Administration	1, 5, 6, 7, 8	Notes 1, 2, 3, 3b	N/A
1.6.1.4.A	Government Furnished Equipment (GFE) Product Development and Integration	1, 2	Notes 1, 2, 3	N/A

SOW	Title: Integrated Spacecraft Testing and Verification Management	SOW Paragraphs	Projected Quantity	DRD
1.10.2 A	<p>Support the development of the Master Verification Plan (MVP).</p> <p>Support the development of MVP Volume #2 post EFT-1 (i.e, EM-1+) Environmental Test Tolerances and Margins related to environmental qualification and acceptance test requirements for the MPCV Program.</p> <p>Support Vehicle Engineering Working Group (VEWG) and other Program working groups, panels, and boards as required in implementation of Verification requirements and assessments of risks related to deviations from verification requirements. Expertise in areas such as vibration, shock, thermal, climatic, and leak testing required.</p> <p>Provide coordination and data management for the</p>	A	1 MVP baseline doc review/development	N/A

	MPCV Test and Verification (T&V) team, using the Windchill and Wiki tools within the ICE environment. Review cross program T&V documents in support of major milestone reviews.			
--	--	--	--	--

SOW	Title: Test & Verification (T&V) (Avionics Power & Software)	SOW Paragraphs	Projected Quantity	DRD
1.10.4 A	Facilities	1, 2, 3, 4	Note 4	N/A

SOW	Title: Flight Test (Flight Test Management Office)	SOW Paragraphs	Projected Quantity	DRD
1.10.6 A	Flight Test Development, Integration, and Management			N/A
1.10.6 A	Program, Planning, Budget and Execution Management	1	Annually Note 5	N/A
1.10.6 A	Office Schedule and Risk Management	1	Monthly Note 6	N/A
1.10.6 A	Program National Environmental Protection Act Assistant	2	Note 7	N/A
1.10.6 A	Program Service and Support Requirements Management	4	Weekly Note 8	N/A
1.10.6 A	Office Data Management	5	Note 9	N/A

Note 1: The contractor shall prepare Crew and Service Module (CSM) risk charts and presentation material in support of CSM and Orion risk boards and management meetings (monthly). The contractor shall participate in the Orion Project Office Risk Management Working Group (monthly). The contractor shall coordinate the reporting and tracking of Prime Top Program and System risks with the MPCV Prime Contractor.

Note 2: The contractor shall support the development and maintenance of the Government Furnished Equipment (GFE) and In-line hardware and task database required for tracking and reporting (monthly).

Note 3: The contractor shall maintain the CSM Wiki and associated Wiki and Windchill folders (approximately 8 Wiki pages and dozens of Windchill folders). This includes performing regular updates, and managing team access and Prime Contractor access. In addition, this includes data migration back and forth from the Prime Contractor's internal Windchill to the NASA Windchill /Wiki. Prime data includes engineering drawings, Qnotes/Praca data, and meeting/technical presentations. The contractor shall also facilitate CSM Non-Prime access/accounts to the Lockheed CSAR/Windchill system.

Note 3b: The contractor shall maintain the CSM Non-Prime In-line Task Database. This includes monthly coordination with the CSM System Managers for updates. It also includes creating monthly summary reports for the CSM iTCSR and Orion Quarterly reviews.

Note 4: The contractor shall provide support during the period of performance on development, integration, and testing of NASA avionics and software Integration and Testing (I&T) labs by providing technical expertise for hardware and software integration with focus on planning, developing, and executing test rig configurations that support I&T activities. The contractor shall provide particular focus on Communications and Tracking (C&T) functionality, including C&T system emulation and interface with applicable hardware assets using established protocols.

Note 5: The contractor shall use the previous year's Program Planning Budget Execution (PPBE) database and update the plan based on the Program PPBE guidance, develop guidance for the office based on changes in the

plan, issue office guidance to all the Centers and Programs that provide services to the office, collect and manage submits from the providers, briefs management on the revised PPBE plan, and documents the approved plan.

Note 6: The contractor shall update and maintain the office top-level schedule and cost, schedule, and technical risk database. In addition, the contractor shall coordinate, collect inputs, and present to office management a Technical, Cost, and Schedule Review on a monthly basis.

Note 7: The contractor shall have knowledge in the area of environmental management and will assist the office/program National Environmental Policy Act (NEPA) Manager to ensure NEPA compliance as required to successfully execute the program plan.

Note 8: The contractor shall have a working knowledge of the Universal Documentations System and how it is managed in the Automated Support Requirements System (ASRS) in order to assist the office Operations Manager in tracking the mission support requirements needed to successfully execute all operational phases of the mission. The contractor shall support the weekly Mission Support Working Group meetings.

Note 9: The contractor shall administer the office team data management process to include tracking configuration changes and loan requests, scheduling the configuration management team meetings, recording minutes and actions, and ensure all change requests are closed out.

Estimated Travel Requirements: All travel from Houston, TX
