

National Aeronautics and Space Administration

Meeting Objectives and Instructions for Synthesis Sessions

Michele Gates

September 30, 2013

Meeting Objectives

- **The purpose of this workshop is to further examine and foster a broad discussion on these newest ideas and help inform NASA's planning activities.**
- **We will listen, discuss, debate, and synthesize 96 of the RFI responses.**
- **Sessions are consistent with the RFI format**
 - Monday pm: Asteroid Observation, Asteroid Redirection Systems
 - Tuesday am: Asteroid Deflection Demonstrations
 - Tuesday pm: Partnerships & Participatory Engagement, Asteroid Capture Systems, Asteroid Crew Systems
- **Also two sessions on the Grand Challenge**
 - Tuesday am: Crowd Sourcing and Citizen Science
 - Wednesday pm: Next Generation Engagement
- **NASA personnel will serve as leads in our discussions. We ask for your active participation - virtual participants too!**
- **Each session of the workshop will be streamed online, and virtual participants are encouraged to join the chat rooms and send questions to the session leads via Twitter.**

Instructions for Synthesis Sessions

- **Session leads designed agendas to encourage questions, ideas, discussion. They will describe their plans in the session introductions.**
- **Seating is auditorium style for capacity reasons - the desire is two-way communication. We want to know what you think! We/ NASA have already read and discussed the RFIs.**
- **Session leads will capture major discussion topics and a set of findings to brief out on Wednesday morning in closing plenary.**
- **Mission and Grand Challenge planning will use the findings.**
 - **Mission concept development studies**
 - **Robotic mission and system concept integration**
 - **Grand challenge implementation planning**

Outline for Session Briefings Wednesday am

- 1. Session Purpose**
- 2. RFI Selection Process**
- 3. Agenda**
- 4. Key Topics Discussed**
- 5. Findings for Asteroid Redirect Mission Planning***
 - Summary of the most promising ideas, including their innovativeness and potential for improving mission/system performance and affordability.
 - Any technology development needed to mature the ideas to the point where they can be incorporated into system designs.
 - Relationships or linkages between the ideas that could help with mission/system concept integration.
 - Further studies or next steps
- 6. Findings for Grand Challenge Planning***
 - Summary of the promising ideas
 - Identification of overlap and synergy between the presented ideas
 - Prioritization of immediate actions

* Some can be combined, if appropriate
