Regulatory Tracking Summary

14 January 2011

This report summarizes regulatory items reviewed by the NASA RRAC PC. Items that appeared to have limited interest to the NASA community, or are provided for information only, are shown in light gray text. Notes and comments by the RRAC PC are shown in bold, blue text under "Description." Related documents and citations, such as "76 FR 51967," are linked to the appropriate document for quick access. Suggested follow-up actions are noted with significant items; users are advised that other follow-up actions may be appropriate for their program or facility. Previous issues of this regulatory summary are archived on the RRAC PC website at <http://www.nasa.gov/offices/rrac/home/>. Comments, questions, suggestions, and requests for further information should be directed to the RRAC PC Manager, Sharon Scroggins at 256-544-7932 (sharon.scroggins@nasa.gov).

FED01142011-4	Natural Resources Conservation Practices	01/11/2011	76 FR 1595	Notice	Natural Resources Conservation Service Notice of Proposed Changes to the National Handbook of Conservation Practices for the Natural Resources Conservation Service Notice of intent to issue a series of revised conservation practice standards in the National Handbook of Conservation Practices . These standards include the following: <ul style="list-style-type: none"> ▪ Aquatic Organism Passage (Code 396) ▪ Bivalve Aquaculture Waste Control (Code 400) ▪ Cross Wind Trap Strips (Code 589c) ▪ Irrigation Field Ditch (Code 388) ▪ Nutrient Management (Code 590) ▪ Waste Facility Closure (Code 360) Comments due 02/25/2011.	
FED01142011-5	Natural Resources NEPA-EIS	01/14/2011	76 FR 2681	Notice	U.S. Environmental Protection Agency Amended Environmental Impact Statement Filing System Guidance for Implementing 40 CFR 1506.9 and 1506.10 of the Council on Environmental Quality's Regulations Implementing the National Environmental Policy Act Updates guidance to Federal agencies on filing EISs, including draft, final, and supplemental EISs. Modifies the number and format of the EISs to be filed, and provides specific guidelines for EIS filing during Continuity of Operations Plan events. Solicits input on a series of questions that will be used to make further modifications to the EIS filing process in the future. Comments due 02/28/2011.	
FED01142011-6	Species National Wetland Plant List	01/06/2011	76 FR 777	Notice	Department of the Army, U.S. Army Corps of Engineers National Wetland Plant List Announces the availability of the draft National Wetland Plant List . The List is used to delineate wetlands and for wetland restoration, establishment, and enhancement projects. Solicits comments on the wetland indicator status ratings of the plants, species nomenclature changes, and revisions to the definition of indicator status ratings contained in the list. Comments due 03/07/2010.	
FED01142011-7	Species Red Knot	01/04/2011	76 FR 304	Notice	U.S. Fish and Wildlife Service; Department of the Interior Endangered and Threatened Wildlife and Plants; 90-Day Finding on a Petition To List the Red Knot Subspecies <i>Calidris canutus roselaari</i> as Endangered [50 CFR Part 17] Announces a 90-day finding on a petition to list the roselaari subspecies of red knot as endangered. Finding is that the petition does not present substantial information indicating that listing this subspecies may be warranted.	
FED01142011-8	Toxic Substances	01/07/2011	76 FR 1067	Final Rule	U.S. Environmental Protection Agency Testing of Certain High Production Volume Chemicals; Second Group of Chemicals [40 CFR Parts 9 and 799] Requires manufacturers, importers, and processors of certain high production volume chemical substances to conduct testing to obtain screening level data for health and environmental effects and chemical fate. Effective 02/07/2011. [RIN 2070-AD16]

FED01142011-9	Toxic Substances Dioxins	01/06/2011	76 FR 787	Notice	U.S. Environmental Protection Agency Notice of Availability of the Recommended Toxicity Equivalence Factors for Human Health Risk Assessments of 2,3,7,8-Tetrachlorodibenzo-p-dioxin and Dioxin-Like Compounds Announces the availability of the final " TEFs for Human Health Risk Assessments of 2,3,7,8-Tetrachlorodibenzo-p-dioxin and Dioxin-Like Compounds ." Purpose of this document is to assist scientists in using the toxicity equivalence methodology to assess health risks from dioxins and dioxin-like compounds, as well as to inform about this methodology. Document summarizes the toxicity equivalence methodology, provides background information and assumptions about how the methodology has evolved, and recommends an approach for health risk assessors to use in applying the methodology.	
FED01142011-10	Water Drinking Water	01/13/2011	76 FR 2383	Notice	Office of the Secretary, Department of Health and Human Services. Proposed Health and Human Services Recommendation for Fluoride Concentration in Drinking Water for Prevention of Dental Caries Seeks public comment on proposed new guidance related to recommendations for fluoride concentrations in drinking water. The previous recommendations for optimal fluoride concentrations were based on ambient air temperatures of geographic areas and ranged from 0.7 to 1.2 mg/L. Proposes that community water systems adjust the amount of fluoride to 0.7 mg/L to achieve an optimal fluoride level. For the purpose of this guidance, the optimal concentration of fluoride in drinking water is that concentration that provides the best balance of protection from dental caries while limiting the risk of dental fluorosis. Comments due 02/14/2011.	

1.2 Other News and Developments

1.2.1 EPA Releases e-GGRT Tutorials

EPA has released six new tutorials to guide users through the [Electronic Greenhouse Gas Reporting Tool](#) (e-GGRT) registration module. The web-based tool is being developed to support EPA's [Greenhouse Gas Reporting Program](#) under [40 CFR Part 98](#). The e-GGRT tutorials are available on the e-GGRT [website](#) and are made available as the user selects various options for registering as an individual or as a facility. The tutorials for individuals are customized depending on whether a person is a Designated Representative or Alternate in the [Clean Air Market Division Business System](#) (CBS) and if a person has an [EPA Central Data Exchange](#) (CDX) account.

Upon completion of the user registration process, e-GGRT allows the registration of facilities and suppliers and accepts submissions of Certificates of Representation (CoRs) to EPA. For the 2010 reporting year, CoRs are due to EPA by 30 January 2011 and annual GHG reports are due by 31 March 2011.

1.2.2 FEMP Training on Implementing Energy Efficient Technologies

Throughout 2011, the DOE's Federal Energy Management Program (FEMP) will provide training, live webinars, and other resources to help federal employees understand ways to implement energy efficient practices. Upcoming session topics include Utility Energy Service Contracts (UESCs), Energy Savings Performance Contracts (ESPCs), and Federal Fleet Management.

Topics and dates of upcoming trainings and webinars are as follows:

- *Introduction to UESC Webinar*: 28 January, 22 February, and 23 March 2011
- *ESPC Comprehensive Workshop*: 1 to 3 February 2011
- *Federal Fleet Management Webinar*: 3 February 2011
- *ESPC Webinar*: 3 March 2011

More information regarding FEMP training activities in 2011 can be found on the FEMP [website](#).

1.2.3 Guidance for Monitoring of Hexavalent Chromium in Water

On 11 January 2011, EPA issued [guidance](#) outlining how public water systems can enhance monitoring and sampling programs for hexavalent chromium, also known as CrVI or chromium-6. The new guidance provides recommendations about where and how often samples should be collected and what analytical methods should be used for laboratory testing. It is intended to help public water systems better evaluate the presence of chromium-6, to determine whether other forms of chromium are transformed chemically into chromium-6, and to assess the degree to which existing treatments affect the levels of chromium-6 in drinking water.

EPA currently has a drinking water standard of 0.1 mg/L for total chromium and requires water systems to test for it. The latest EPA data show that no public water systems are in violation of the standard. Because the science behind chromium-6 is evolving, the agency has already begun a rigorous and comprehensive review of its health effects. EPA released a [scientific review](#) for public comment in September 2010 and will finalize the human health assessment in 2011. EPA carefully will review the conclusions and consider the relevant information to determine if a new standard needs to be set.

The guidance and more information regarding chromium-6 in drinking water is available on the EPA [website](#).

1.2.4 Federal Facilities Now Responsible for Storm Water Cleanup

On 4 January 2011, President Barack Obama signed a bill into law that clarifies federal responsibility associated with storm water pollution under the Clean Water Act. The law, [P.L. 111-378](#), amends Section 313 of the Water Pollution Control Act to clarify that federal facilities must pay local government fees associated with treating stormwater that leaves federal property. The law more clearly defines payment obligations and service charges as they apply to federal facilities.

More information regarding storm water and related regulations can be found on the EPA [website](#).

1.2.5 AP-42 Section Revised

EPA has posted revisions to section [13.2.1 Paved Roads](#) in the Fugitive Dust portion of its publication, [AP-42, Compilation of Air Pollutant Emission Factors](#). AP-42 contains emission factors and process information for more than 200 air pollution source categories.

The revised section includes updates to the equation used to predict PM emissions, an extension of the applicable range of speeds down to 1 mph from the previous 10 mph, and the incorporation of a mobile monitoring methodology to dynamically characterize the silt loading or PM emissions from a roadway system.

The background report and response to comments for the revised section will be posted to the EPA [website](#) in mid-January 2011.

1.2.6 CEQ Releases Guidance on Mitigation and Monitoring Under NEPA

On 14 January 2011, the White House CEQ released the guidance, [Appropriate Use of Mitigation and Monitoring and Clarifying the Appropriate Use of Mitigated Findings of No Significant Impact](#), under NEPA. The guidance emphasizes that when a federal agency bases its environmental analysis on commitments to mitigate environmental impacts of a proposed action, the agency should adhere to those commitments and monitor the implementation and effectiveness of the mitigation. The guidance indicates that an agency should make this information available to the public. Additionally, the guidance approves the use of adaptive management, which enables an agency to take alternate steps if initial mitigation plans fail to achieve the planned environmental outcomes.

This guidance is part of CEQ's effort to modernize NEPA on the 40th anniversary of its becoming law. More information regarding the new guidance can be found on the CEQ NEPA [page](#) and, specifically, on the rulemaking [website](#).

1.3 NASA Regulatory Communication Working Group Updates

Regulatory Communication Working Group calls in 2011 are scheduled for the following Wednesdays at 12 p.m. CT:

- 16 February
- 16 March
- 20 April
- 18 May
- 15 June
- 20 July
- 17 August
- 21 September
- 19 October
- 16 November

2.0 State Regulatory Reviews

The following sections provide details about the regulatory actions reviewed for selected states in which NASA facilities and related operations are located.

2.1 Alabama State Regulatory Review

This summary includes items that were reviewed for potential impacts to NASA Centers and related operations in Alabama.
