

Cryogenic Propellant Storage and Transfer (CPST) Technology Workshop with Industry

**NASA Glenn Research Center (GRC) Briefing Center
July 25, 2013**

Purpose

To share, in detail, the results of our technology maturation activities with interested industry.

Focused Area

Propellant Gauging and Transfer Technologies

Event Schedule

- 7:30 a.m. Event sign-in at the Briefing Center
Liquid Acquisition Device Outflow
- 11 a.m. Tour of the Small Multi-Purpose Research Facility (SMiRF)
Line Chilldown
Propellant Gauging
- 4:30 p.m. Concluding remarks and feedback from attendees

Logistics

- Advanced registration is required (U.S. citizens only).
- No fee for workshop.
- WebEx to be made available for those who are unable to travel.
- Submit your name, company affiliation, e-mail address, and whether you will be attending in person to Ms. Debra Clevenger at Debra.K.Clevenger@nasa.gov
- Badges needed for admission to GRC will be available at the GRC Main Gate Security Office. Park in the lot immediately before the security gate and enter the building to retrieve your badge.
- Workshop package, including area maps and lunch order form, will be distributed via e-mail upon your registration.
