Project

Information:

The documentation of the Motor Vessels *Liberty Star* and *Freedom Star* was conducted in 2012 for NASA's Lyndon B. Johnson Space Center (JSC) by Archaeological Consultants, Inc. (ACI), under contract to Earth Resources Technology, Inc. (ERT). It was based upon research originated in 2006 as part of a nationwide assessment of NASA's Space Shuttle Program assets, conducted by ACI, and between 2009 and 2011 incident to the preparation of HAER Level II documentation of NASA's Space Transportation System (STS). The project team consisted of architectural historian, Patricia Slovinac and project manager, Joan Deming (both with ACI). Assistance was provided by Sandra J. Tetley, JSC Historic

Preservation Officer and Real Property Officer. The written narrative was prepared by Ms. Slovinac and Ms. Deming; it was edited by Ms. Tetley and Art Morales, formerly of the Office of the Director, Shuttle-ARES Transition Office. The 4x5 negatives were taken by the JSC Photo Operations Group, under the direction of Maura White, JSC Photographer.

The Scope of Services for the project specifies a documentation effort following HAER Level III Standards. Information for the written narrative was primarily gathered through informal interviews with NASA and contractor personnel, research materials housed at the KSC Archives, and oral histories provided by Dr. Jennifer Ross-Nazzal, JSC Historian. Dr. Ross-Nazzal also provided research materials from the KSC Archives, with the assistance of archivist Elaine Liston.
