CARGO MISSION CONTRACT

6.0 Discrete Tasks

- 6.1 Certify Robotic Refueling Mission (RRM) On-Orbit Transfer Cage (ROTC) Assembly (Part Number 2158510) Foam Clamshell Launch Configuration for H-II Transfer Vehicle (HTV) 4 (SSCN 013788).

The contractor shall perform the following tasks by July 31, 2013 to certify the RRM ROTC Assembly foam clamshell launch configuration for HTV4, supporting launch date currently scheduled for August 3, 2013:

- a) Identify foam clamshell requirements including closure mechanism.
- b) Identify loads and dynamics requirements.
- c) Assess a reduced set of requirements in line with previous clamshell cushions flown as stowage provisions (similar to Progress Stowage Integration Platform (PSIP)/ Integrated Communications Unit (ICU)).
- d) Perform analysis to certify foam clamshell designed to protect and restrain the RRM ROTCC Assembly.
- e) Perform the clamshell/strap strength and fracture analysis and report.
- f) Create the Mass Properties Report.
- g) Generate a stowage layout and cushion fabrication layout drawings.
- h) Perform a safety assessment for the new hardware configuration (similar to an Integrated Bag Level Hazard Analysis (IBLHA)).
- i) Perform all Certification of Flight Readiness (CoFR) activities pertaining to the RRM Clamshell for launch on the HTV4.

- 6.2 Certify ISS Cargo Bags for SpaceX Interface Definition Document Launch/Return Environments (SSCN 13794)

The contractor shall certify the following bags for the SpaceX Interface Definition Document (IDD) launch and return environments per SSP 50835, ISS Pressurized Volume Hardware Common Interface Requirements Document, by September 30, 2013, assuming receipt of SpaceX loads data by July 19, 2013 and SpaceX strapping data by August 13, 2013:

CARGO MISSION CONTRACT

B.4 NFS 1852.232-81 CONTRACT FUNDING (JUN 1990)

- (a) For purposes of payment of cost, exclusive of fee, in accordance with the Limitation of Funds clause, the total amount allotted by the Government to this contract is (b)(4). This allotment is for cargo mission services and covers the following estimated period of performance: January 1, 2011 through February 12, 2014.
- (b) An additional amount of (b)(4) is obligated under this contract for payment of fee.

(End of clause)

B.5 FUNDING FOR FIXED-PRICE ITEMS PHASE-IN

Fixed-Price (FP) Milestone Payments for Phase-In exist under a FP arrangement in this contract and therefore must be fully funded. FP Milestone Payments for Phase-In is fully funded at the time of contract award. Funds obligated under this clause are separate and distinct from those allotted under Clause B.3.

The FP amount obligated and available for FP Milestone Payment for Phase-In is (b)(4).

The TOTAL FP amount obligated and available is (b)(4).

(End of clause)

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

B.4 NFS 1852.232-81 CONTRACT FUNDING (JUN 1990)

(a) For purposes of payment of cost, exclusive of fee, in accordance with the Limitation of Funds clause, the total amount allotted by the Government to this contract is (b) (4). This allotment is for cargo mission services and covers the following estimated period of performance: January 1, 2011 through February 19, 2014.

(b) An additional amount of (b) (4) is obligated under this contract for payment of fee.

(End of clause)

B.5 FUNDING FOR FIXED-PRICE ITEMS PHASE-IN

Fixed-Price (FP) Milestone Payments for Phase-In exist under a FP arrangement in this contract and therefore must be fully funded. FP Milestone Payments for Phase-In is fully funded at the time of contract award. Funds obligated under this clause are separate and distinct from those allotted under Clause B.3

The FP amount obligated and available for FP Milestone Payment for Phase-In is (b) (4)

The TOTAL FP amount obligated and available is (b) (4)

(End of clause)

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

- A. The purpose of this Supplemental Agreement is to definitize the underlimit contract change in accordance with Clause H.16 - Special Clause for Contract Changes and IDIQ Task Orders as follows:

Modification #	Mod Date	Description	Cost
83		Certify Stowage Clamshells to Protect Large Hardware Items for Launch/Return	(b) (4)

- B. **Section C – Statement of Work, Table of Contents**, is hereby updated to add the following:

Appendix A ISS Program Stowage Provision Labeling Guidelines

- C. **Section C – Statement of Work**, Section 4.4.4 is hereby updated to add the following (changes noted by underline):

4.4.4 Labeling

If hardware is not pre-labeled or is labeled incorrectly and the hardware provider cannot add or replace the label prior to the start of bag packing, the contractor shall apply contingency labels on the hardware according to the directions of the hardware provider to complete labeling requirements. If the coordination and application of contingency labeling cannot be completed prior to the required NLI need date, the contractor shall inform the Government.

The contractor shall produce flight labels for all packed stowage configurations developed by this contractor. CTB labels shall be produced in accordance with drawing number SEG 32106109 (4 inch Contents Label) and installed in accordance with SSP 50005, Flight Crew Integration Standard (NASA-STD-3000/T). The contractor shall label stowage provisions in accordance with Appendix A, ISS Program Stowage Provision Labeling Guidelines.

- D. **Section C – Statement of Work**, Section 4.4.12 is hereby added as follows:

4.4.12 Certify Foam Clamshells for large hardware items to be flown on logistics flights (SSCN 13902)

The contractor shall provide foam clamshells for launching large hardware items on logistics flights. The contractor shall define requirements, build and certify the clamshells, and provide CoFR of the clamshells in the launch configuration.

- E. **Section C – Statement of Work**, Appendix A is hereby added. Appendix A is attached in its entirety.

- F. **Attachment J-17 – Underlimit Pool Changes**, is hereby updated to include the following:

Modification #	Mod Date	Description	Cost
83		Certify Stowage Clamshells to Protect Large Hardware Items for Launch/Return	(b) (4)

- G. This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of this agreed to modification, the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustment attributable to such facts or circumstances giving rise to these changes.

1. INTRODUCTION

- 1.1. This appendix identifies the ISS Program stowage provision labeling guidelines for all NASA or IP ISS cargo packed by the contractor for launch. When labeling the stowage all text should be applied using sentence case with the exception of acronyms, which should be in all caps (example, For Smith, For TVIS, Trash after installation). Unless otherwise specified labels should be applied to the outward facing surface such that the crew will view the label as they face the rack or open the rack/bag/container.

2. GENERIC STOWAGE PROVISIONS LABELING GUIDELINES

2.1. Operational Nomenclature (OpNom) Labeling

- 2.1.1. Label the provision with the hardware OpNom in the largest font. If OpNom not required (in Midas) use part name.
- 2.1.2. If only two items inside the stowage provision, the OpNom for both items should be labeled on the outside of the stowage provision.
- 2.1.3. For stowage provisions containing more than two items, label the outside of the stowage provisions with the title if defined at the drawing review. This circumvents 2.1.2. and 2.3.

2.2. Toxicology (Tox) Labeling

- 2.2.1. For hardware with a toxicology rating (0,1,2,3,4), label the outside surface of the stowage provisions containing the hardware in the lower left corner.
- 2.2.2. Tox labeling is only required on opaque stowage provisions.
- 2.2.3. Hardware which is exempt from tox labeling does require provision label.

2.3. Part number

- 2.3.1. The part number (P/N) of the hardware contained within the stowage provision should be labeled on the crew-facing surface below the OpNom with the "P/N" preface.
- 2.3.2. List the quantity (Qty) next to the OpNom with the "Qty" preface.

2.4. Special Handling Requirements

- 2.4.1. For hardware that is electrostatic discharge (ESD) sensitive; ESD-sensitivity should be indicated on the outside of the stowage provision that contains the hardware. "ESD-Sensitive" should be labeled in the lower left corner of the crew facing surface.
- 2.4.2. For pressure vessels, pressure vessel contained should be indicated on the stowage provisions in the lower left corner of the crew facing surface. Label "Contents Under Pressure."

2.5. Custom Notes

- 2.5.1. Custom inputs to the labeling may be provided during the Drawing Review or Packing Readiness Review. Notes should be applied below the OpNom and part number and enclosed in parenthesis and sentence case (example; For Smith, For TVIS).
- 2.6. If a single item is in two (2) stowage provisions (ex: double bubble) labeling required on outer bag only.

3. UNIQUE GUIDELINES FOR FOAM LABELING

3.1. Foam Part Number and Qty

- 3.1.1. The part number and piece count "X of X pieces" of the foam should be labeled on the external surface of non-FJB or FJT part numbered foam on a non-crew facing surface (foam part number nomenclature: F = Foam, J=Johnson Space Center, B = Block, and T = Triangle).
- 3.1.2. The part number of the foam should be labeled on all FJB and FJT filler foam on the non-crew facing surface.

3.2. Foam Type

- 3.2.1. Foam type should be written on the external surface of the foam under the existing foam P/N label in same size font as foam part number label.
- 3.2.2. Non-Covered Minicel foam must be labeled "Foam must be stowed in a non-flammable stowage bag or locker".

3.3. Foam Disposal Status

- 3.3.1. Disposal status should be written on the inside of the foam container so the crew sees what to do with the foam once the hardware is removed.
- 3.3.2. The Disposal status should be defined as one of:
- 3.3.2.1. "Trash": For foam that is known that it should be discarded at any time.
 - 3.3.2.2. "Keep": For foam that is known that it should be kept.
 - 3.3.2.3. "Trash after installation": For foam that is known that it should be discarded after the hardware is installed.
 - 3.3.2.4. Leave Blank: for foam that it is unknown if it can be trashed or kept (better to say nothing than to say the wrong thing).
 - 3.3.2.5. Custom: Denoting an above status with additional notes.
- 3.3.3. For filler cushions inside cargo transfer bags and M bags, the disposal status should be on the crew facing surface of the foam that the crew will see as they face the open rack/bag/container.
- 3.3.4. For identified foam caps that transfer to the ISS with Orbital Replacement Units (ORUs), highlight in yellow the words "Transfer foam cap with XXX ORU" specifying the ORU

OpNom. Foam caps will be identified through the LRODS and Pressurized Cargo Integration Analysis process.

3.4. Launch Locations for M-bag cushions

3.4.1. For all M-Bag foam cushion, label the foam with the bag serial number (S/N) as "Bag S/N ###" in the lower right corner of the crew facing cushion surface as they face the open M-bag

3.5. Special Handling Requirements

3.5.1. For foam containing hardware with keep out zones, add a note stating "Caution: Hardware has Keep out Zones Labeled" on the outside of foam in the lower left corner of the crew facing cushion surface in addition identify sensitive or keep out zones on the foam.

3.5.2. Arrows/various colors should be marked on foam to simplify re-assembly for the on-orbit crew when cushion boxes are complex if identified at drawing review.

3.6. Bag Filler foam

3.6.1. For bags containing multiple pieces of filler foam, apply Velcro to the foam to assist the crew with restraining the foam during packing and unpacking.

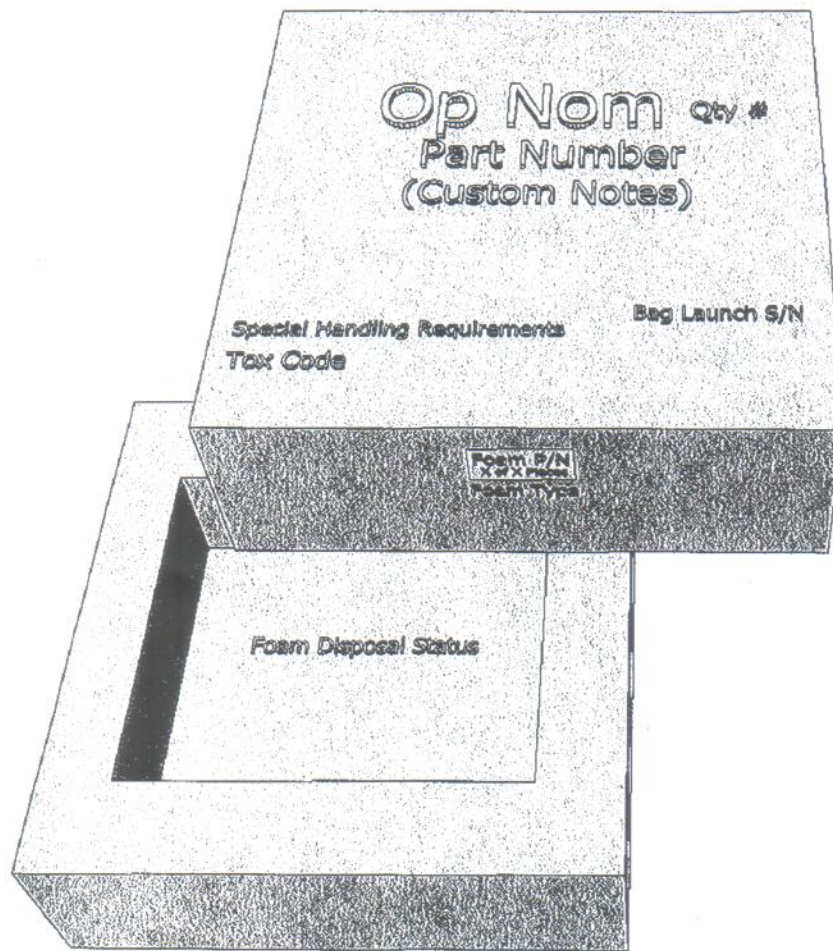

FIGURE 1: FOAM LABELING EXAMPLE

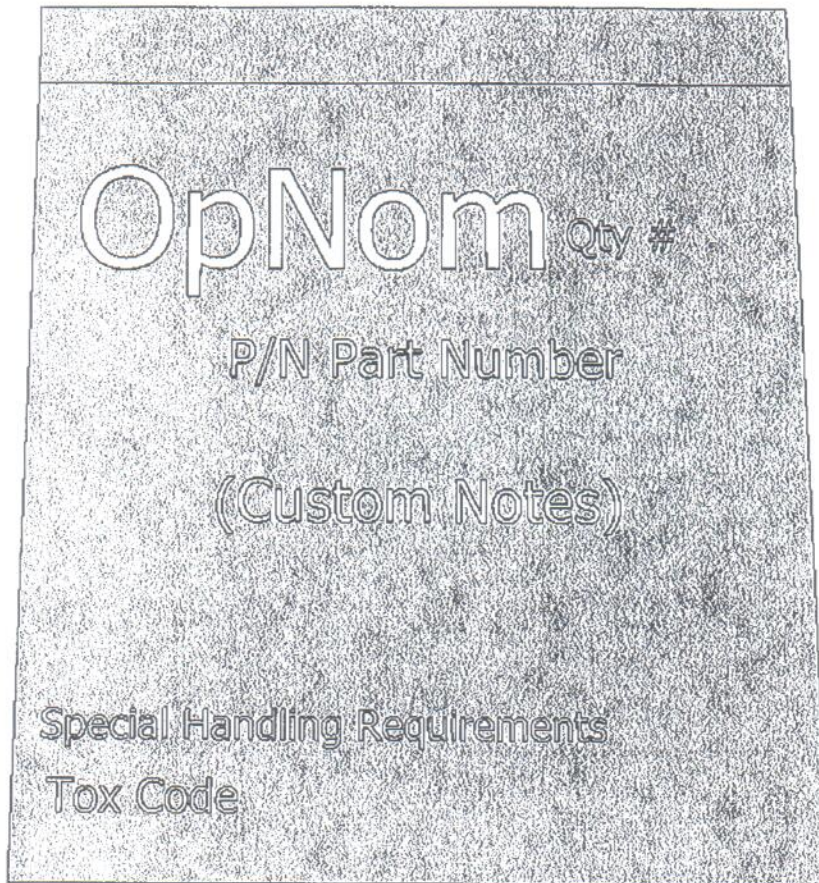

FIGURE 2: ZIPLOCK AND BUBBLEWRAP LABELING EXAMPLE

4. CARGO TRANSFER BAG (CTB) TITLE AND CONTENTS LABEL GUIDELINES

- 4.1. Bag Title and Contents Labels are controlled by the four (4) Inch Label engineering drawing P/N SEG32106109. Reference the document on Engineering Drawing Control Center (EDCC).
- 4.2. Custom inputs to the Bag Title and/or Content Label drawing may be provided during the Drawing Review or Packing Readiness Review.

5. RUSSIAN VEHICLE CARGO UNIQUE GUIDELINES

- 5.1. Teflon does not need to be labeled as a stowage provision (contents), if all sub-pack item labels are clearly visible. If sub-pack item labels are obstructed, top level Teflon must have a summary of all sub-pack contents.
- 5.2. Bag Contents Labels will include hardware part numbers per Russian requirements.
- 5.3. Barcodes will be applied to the lower right corner of the outermost layer of containment (i.e. Teflon bags, kynar bags). Reference Figure 3.
- 5.4. Stowage provision foam not contained in a CTB or other type of containment will have a barcode applied to lower right corner of the outward facing surface.

- A. The purpose of this Supplemental Agreement is to definitize the underlimit contract change in accordance with Clause H.16 - Special Clause for Contract Changes and IDIQ Task Orders as follows:

Modification #	Mod Date	Description	Cost
95		Authorize Cargo Mission Contract (CMC) to provide engineering support to High School Students United with NASA to Create Hardware (HUNCH) Program to design, fabricate, and certify a new International Space Station (ISS) Galley Table	

- B. **Section C – Statement of Work, Table of Contents**, is hereby updated to add the following:

6.6 Provide Engineering support to High School Students United with NASA to Create Hardware (HUNCH) Program to design, fabricate, and certify a new ISS Galley Table (SSCN 13994)

- C. **Section C – Statement of Work**, Section 6.6 is hereby added as follows:

6.6 Provide Engineering support to High School Students United with NASA to Create Hardware (HUNCH) Program to design, fabricate, and certify a new ISS Galley Table (SSCN 13994)

The contractor shall perform the following tasks to support the HUNCH Program's design, fabrication and certification of a new International Space Station (ISS) Galley Table to be delivered in October 2014.

- Develop Galley Table requirements and perform a System Requirements Review (SRR). Final requirements shall be provided to HUNCH by April 11, 2014.
- Provide engineering consultation to HUNCH and review concepts, models and drawings to identify issues, concerns, and solutions (as required) with the design, fabrication and certification of a new ISS Galley Table
- Provide engineering input in the disposition of manufacturing non-conformances
- Develop Flight Safety Data Package (FSDP) and present to the Safety Review Panel (SRP)
- Develop Failure Modes and Effects Analysis (FMEAs) and Critical Items List (CILs)
- Develop required Material Identification and Usage Lists (MIULS) and Material Usage Agreement (MUAs)
- Develop Mass Properties and Volume Report
- Develop verification closures for structural, human factors and electrical grounding
- Develop ground handling requirements and constraints

These tasks shall be complete no later than October 17, 2014, based on a delivery of flight tested hardware to CMC from HUNCH by September 1, 2014.

- D. **Section J – List of Attachment, Table of Contents**, is hereby updated to add the following:

J-18	Government Furnished Data
------	---------------------------

- E. **Attachment J-9, Hardware List**, is hereby updated to include the following:

CARGO MISSION CONTRACT

B.4 NFS 1852.232-81 CONTRACT FUNDING (JUN 1990)

- (a) For purposes of payment of cost, exclusive of fee, in accordance with the Limitation of Funds clause, the total amount allotted by the Government to this contract is [REDACTED]. This allotment is for cargo mission services and covers the following estimated period of performance: January 1, 2011 through August 20, 2014.
- (b) An additional amount of [REDACTED] is obligated under this contract for payment of fee.

(End of clause)

B.5 FUNDING FOR FIXED-PRICE ITEMS PHASE-IN

Fixed-Price (FP) Milestone Payments for Phase-In exist under a FP arrangement in this contract and therefore must be fully funded. FP Milestone Payments for Phase-In is fully funded at the time of contract award. Funds obligated under this clause are separate and distinct from those allotted under Clause B.3

The FP amount obligated and available for FP Milestone Payment for Phase-In is (b)(4)

The TOTAL FP amount obligated and available is (b)(4)

(End of clause)

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

CARGO MISSION CONTRACT

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

The contractor shall accept only task orders issued by the Contracting Officer. The total value of task orders issued under this clause shall not exceed \$20,000,000 during the contract period of performance. Any work which falls under SOW 5.0 and would otherwise be ordered under the IDIQ provisions of this contract, but which is valued at less than \$700,000, will be processed as an underlimit change pursuant to Clause H.16, Special Clause for Contract Changes and IDIQ Task Orders, in lieu of the task ordering procedures of this contract; these SOW 5.0 underlimit changes are excluded from the value of task orders issued, and are not subject to the IDIQ maximum value.

RATE TABLE FOR PRICING TASK ORDERS

The following labor and indirect rates shall be used in the establishment of the estimated cost of individual task orders. The labor rates are fully burdened composite team rates (prime and all subcontractors); but exclude prime fee. Fee will be negotiated as it is applied to each actual Task Order and will be paid based on the negotiated arrangement. Any negotiated fee will not exceed the max fee proposed by the contractor in the table below. The indirect rates are those that may be applied to non-labor resources costs, such as materials, travel and other. These indirect rates and the basis of application must be identified at the bottom of the table.

The parties agree that the fully burdened labor rates established below shall not be subject to any adjustment (upwards or downwards), regardless of actual rates incurred during contract performance.

- 2) **Clause B.2, Total Contract Value** is hereby revised to reflect the increase from [REDACTED] by \$ [REDACTED] to [REDACTED] in cumulative base contract value. As a result of this change, replacement page B-1, B-2, and B-3 are hereby attached.
- 3) **Clause B.3, NFS 1852.216-85 Estimated Cost and Award Fee** is hereby revised to reflect the increase from \$ [REDACTED] and the award fee increased from \$ [REDACTED] by \$ [REDACTED] to \$ [REDACTED]. As a result of this change, replacement page B-3 is attached.
- 4) **Clause B.7 Award Fee** is hereby revised to reflect the increase of the Option 1 fee total from \$2,128,074 by [REDACTED] the increase of the Option 2 fee total from \$ [REDACTED] and the increase of the Option 3 fee total from \$ [REDACTED] by [REDACTED]. As a result of this change, replacement pages B-5 and B-6 are attached.
- 5) Section C, Statement of Work, is hereby revised to add 6.7 as follows:

6.7 Perform early destow activities, provide air transportation for early return hardware, and loading and offloading services for early return hardware for SpaceX-3 through SpaceX-12 flights (SSCN 13912 – Mod 104)

The contractor shall perform the early destow activities for SpaceX-3 through SpaceX-12 flights in accordance with SSP 50465, Return Manifest Disposition Plan (RMDP) flight specific appendices.

more CMC L.C.

The contractor shall provide the air transportation and loading and offloading services for early return hardware from the port of return to Houston with a single aircraft. Aircraft requirements include:

1. The aircraft shall accommodate up to a total of 6500 pounds (lbs.) of cargo, Ground Support Equipment (GSE), flight hardware and support equipment from port of return to Houston.
2. The aircraft shall transport a minimum of three passengers.
3. Hardware shall be transported based on provided temperature constraints and aircraft cabin shall be maintained for passenger comfort nominally at 75°F +/- 10°F.
4. The aircraft cargo door shall be at least 34 inches wide for loading and offloading of equipment.
5. The aircraft shall provide 4.4 kilowatts (kW) of power at 115 volts alternating current (VAC) to power GSE while the aircraft is on the ground and 3.8 kW at 115 VAC during flight.
6. The aircraft shall accommodate a Dry Ice Pelican Case with up to 100 lbs. of dry ice and ventilation of the Dry Ice Pelican Case.
7. The aircraft shall allow in-flight accessibility for monitoring of hardware.

The contractor shall return the cargo (nominal plan) within 12 hours from turnover at port of return to landing in Houston.

The contractor shall transport the GSE from Houston to the port of return.

- 6) This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of the modification agreed to herein as complete equitable adjustments for the changes identified in the signed change directive 13912 "Add Early Destow Operations to Cargo Mission Contract (CMC) for SpaceX-3 and subs through FY 2016," the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustments attributable to such facts or circumstances giving rise to these changes.

CARGO MISSION CONTRACT

engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

The contractor shall accept only task orders issued by the Contracting Officer. The total value of task orders issued under this clause shall not exceed \$20,000,000 during the contract period of performance. Any work which falls under SOW 5.0 and would otherwise be ordered under the IDIQ provisions of this contract, but which is valued at less than \$700,000, will be processed as an underlimit change pursuant to Clause H.16, Special Clause for Contract Changes and IDIQ Task Orders, in lieu of the task ordering procedures of this contract; these SOW 5.0 underlimit changes are excluded from the value of task orders issued, and are not subject to the IDIQ maximum value.

RATE TABLE FOR PRICING TASK ORDERS

The following labor and indirect rates shall be used in the establishment of the estimated cost of individual task orders. The labor rates are fully burdened composite team rates (prime and all subcontractors); but exclude prime fee. Fee will be negotiated as it is applied to each actual Task Order and will be paid based on the negotiated arrangement. Any negotiated fee will not exceed the max fee proposed by the contractor in the table below. The indirect rates are those that may be applied to non-labor resources costs, such as materials, travel and other. These indirect rates and the basis of application must be identified at the bottom of the table.

The parties agree that the fully burdened labor rates established below shall not be subject to any adjustment (upwards or downwards), regardless of actual rates incurred during contract performance.

B.3 NFS 1852.216-85 ESTIMATED COST AND AWARD FEE (SEP 1993)

The estimated cost of this contract is (b) (4). The maximum available award fee, excluding base fee, if any, is \$ (b) (4). Total estimated cost, base fee, and maximum award fee is \$171,292,257.

(End of clause)

B.4 NFS 1852.232-81 CONTRACT FUNDING (JUN 1990)

(a) For purposes of payment of cost, exclusive of fee, in accordance with the Limitation of Funds clause, the total amount allotted by the Government to this contract is (b) (4). This allotment is for cargo mission services and covers the following estimated period of performance: January 1, 2011 through January 17, 2015.

(b) An additional amount of (b) (4) is obligated under this contract for payment of fee.

(End of clause)

B.5 FUNDING FOR FIXED-PRICE ITEMS PHASE-IN

Fixed-Price (FP) Milestone Payments for Phase-In exist under a FP arrangement in this contract and therefore must be fully funded. FP Milestone Payments for Phase-In is fully funded at the time of contract award. Funds obligated under this clause are separate and distinct from those allotted under Clause B.3

The FP amount obligated and available for FP Milestone Payment for Phase-In is (b) (4)

The TOTAL FP amount obligated and available is (b) (4)

(End of clause)

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide

CARGO MISSION CONTRACT

engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

The contractor shall accept only task orders issued by the Contracting Officer. The total value of task orders issued under this clause shall not exceed \$20,000,000 during the contract period of performance. Any work which falls under SOW 5.0 and would otherwise be ordered under the IDIQ provisions of this contract, but which is valued at less than \$700,000, will be processed as an underlimit change pursuant to Clause H.16, Special Clause for Contract Changes and IDIQ Task Orders, in lieu of the task ordering procedures of this contract; these SOW 5.0 underlimit changes are excluded from the value of task orders issued, and are not subject to the IDIQ maximum value.

RATE TABLE FOR PRICING TASK ORDERS

The following labor and indirect rates shall be used in the establishment of the estimated cost of individual task orders. The labor rates are fully burdened composite team rates (prime and all subcontractors); but exclude prime fee. Fee will be negotiated as it is applied to each actual Task Order and will be paid based on the negotiated arrangement. Any negotiated fee will not exceed the max fee proposed by the contractor in the table below. The indirect rates are those that may be applied to non-labor resources costs, such as materials, travel and other. These indirect rates and the basis of application must be identified at the bottom of the table.

The parties agree that the fully burdened labor rates established below shall not be subject to any adjustment (upwards or downwards), regardless of actual rates incurred during contract performance.

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

Modification #	Mod Date	Description	Cost
116		COTS: Procure and Certify RED® Dragon Camera System for International Space Station (ISS) Operations & Utilization and Baseline the Associated Applicable Requirements Matrix for Commercial-off-the Shelf (COTS) Hardware Certification	

- B. **Section C, Statement of Work, Table of Contents**, is hereby updated to add the following:

6.12 Certification support and flight processing of the RED® Dragon Camera System to support International Space Station (ISS) Operations & Utilization (SSCN 014308)

- C. **Section C, Statement of Work**, is hereby updated to add the following:

6.12 Certification support and flight processing of the RED® Dragon Camera System to support International Space Station (ISS) Operations & Utilization (SSCN 014308).

The contractor shall perform the following tasks by October 31, 2014:

- Develop drawings (quantity four (4)) for the RED® Dragon Camera System.
- Procure and apply flight labels to flight hardware.
- Configure hardware for flight.
- Develop and execute Pre-flight Functional test with NASA Photo/TV Group input.
- Assemble hardware for flight per RED® Dragon Pre-assembly Procedures.
- Provide a quantity of one (1) Camcorder Rail Adapter, Part Number SEG33113205-301, from inventory for integration to the RED® Camera.

The contractor shall complete the following tasks to support hardware certification by November 7, 2014:

- Release drawings (quantity four (4)) for the RED® Dragon Camera System into the Engineering Drawing Control Center (EDCC).
- Provide thermal analysis for touch temperature verification.
- Provide Pre-flight Functional test report.

These tasks shall be completed based on a delivery of the RED® Dragon Camera System hardware from the NASA Avionics and Software Office by 10/06/2014.

The contractor shall deliver (via DD1149) the RED® Dragon Camera System hardware to the Government sixty (60) days following hardware return from the ISS.

- A. The purpose of this Supplemental Agreement is to definitize the underlimit contract change in accordance with Clause H.16 - Special Clause for Contract Changes and IDIQ Task Orders as follows:

Modification #	Mod Date	Description	Cost
117		Assess simplification for a number of hardware items sustained on the Cargo Mission Contract (CMC)	

- B. **Section C, Statement of Work, Table of Contents**, is hereby updated to add the following:

6.13 Sustained Hardware COTS Assessments, Packed WTB Launch Certification and AED Life Extension (SSCN 014116)

- C. **Section C, Statement of Work**, is hereby updated to add the following:

6.13 Sustained Hardware COTS Assessments, Packed WTB Launch Certification and AED Life Extension (SSCN 014116)

The contractor shall perform the following:

- 1) Identify Commercial Off The Shelf (COTS) alternatives for the following by 1/9/2015:
 - a. Jettison Stowage Bags (JSBs) (P/N SEB13100134-306);
 - b. Redesigned Cargo Transfer Bags (RCTBs) (P/Ns SEG33122042-301, SEG33122043-301, SEG33122044-301, SEG33122045-301);
 - c. M-Bags (P/Ns SEG33117683-301, SEG33111805-301, SEG33111806-301).
- 2) Identify changes to the current JSB and RCTBs (all models) designs to decrease their cost per unit. Task includes creation of prototype re-designed bag drawings by 2/27/2015.
- 3) Certify the Waste Transfer Bags (WTBs) (P/Ns SEG33124207-301, SEG33124208-301) for launch in a packed configuration (re-certification to include assessments for launch and landing on SpaceX and launch on ATV, HTV, and Cygnus) by 2/27/2015.
- 4) Identify lower cost than current hardware COTS options for mechanical pencils (P/Ns SED33102093-309 & -310), fanny packs (P/Ns SED12100665-301 & -302), tethers (P/N 528-20144-3) and helmet stowage bags (P/N SKD13101494-305) used by the crew and dry material collection using the Direct Current (DC) vacuum (P/N SEG39123308-302) by 1/16/2015.
- 5) Perform a feasibility study to determine how long the life of the current Auxiliary External Defibrillator (AED) units (P/N SEG52101600-301) can be extended by 2/27/2015.
- 6) Present results at the Vehicle Control Board (VCB) and Space Station Control Board (SSPCB) by 3/27/2015.

- D. This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of the modification agreed to herein as complete equitable adjustments for the changes identified in the signed Change Directive 14116, "Assess simplification for a number of hardware items sustained on the Cargo Mission Contract (CMC)," the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustments attributable to such facts or circumstances giving rise to these changes.

CARGO MISSION CONTRACT

B.4 NFS 1852.232-81 CONTRACT FUNDING (JUN 1990)

- (a) For purposes of payment of cost, exclusive of fee, in accordance with the Limitation of Funds clause, the total amount allotted by the Government to this contract is (b) (4). This allotment is for cargo mission services and covers the following estimated period of performance: January 1, 2011 through February 9, 2015.
- (b) An additional amount of (b) (4) is obligated under this contract for payment of fee.

(End of clause)

B.5 FUNDING FOR FIXED-PRICE ITEMS PHASE-IN

Fixed-Price (FP) Milestone Payments for Phase-In exist under a FP arrangement in this contract and therefore must be fully funded. FP Milestone Payments for Phase-In is fully funded at the time of contract award. Funds obligated under this clause are separate and distinct from those allotted under Clause B.3

The FP amount obligated and available for FP Milestone Payment for Phase-In is (b) (4)

The TOTAL FP amount obligated and available is (b) (4)

(End of clause)

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

- C. **Section C, Statement of Work**, is hereby updated to add the following:

6.18 Develop and implement an electronic Labeling Process (SSCN 14198)

The contractor shall develop (by October 28, 2015) and sustain a single web based application to streamline the hardware labeling process and encompass all phases of the process including:

- Human Factors Implementation Team (HFIT) requirement pre-coordination;
- Flight Crew Integration (FCI)/ISS Payload Label Approval Team (IPLAT) label approval process;
- Operations Nomenclature approval process;
- Inventory Management System (IMS)/Barcode Inventory Tracking System (BITS);
- Toxicology code accessibility;
- Label order to Decal Design and Production Facility (DDPF);
- Shipment to hardware providers

The application shall at a minimum:

- Maintain historical records;
- Provide a work flow system for approval through all required organizations;
- Provide a single dashboard for all decal and label needs;
- Provide single entry capability for the same data (i.e., automatic data population);
- Provide the International Partners/Participants access to generate label requests;
- Lead and facilitate non-frequent or first time users through the label request process

- D. This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of the modification agreed to herein as complete equitable adjustments for the changes identified in the signed Change Directive 14198, "Develop and implement an electronic Labeling Process," the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustments attributable to such facts or circumstances giving rise to these changes.

CARGO MISSION CONTRACT

B.4 NFS 1852.232-81 CONTRACT FUNDING (JUN 1990)

- (a) For purposes of payment of cost, exclusive of fee, in accordance with the Limitation of Funds clause, the total amount allotted by the Government to this contract is [REDACTED]. This allotment is for cargo mission services and covers the following estimated period of performance: January 1, 2011 through September 11, 2015 September 15, 2015.
- (b) An additional amount of [REDACTED] is obligated under this contract for payment of fee.

(End of clause)

B.5 FUNDING FOR FIXED-PRICE ITEMS PHASE-IN

Fixed-Price (FP) Milestone Payments for Phase-In exist under a FP arrangement in this contract and therefore must be fully funded. FP Milestone Payments for Phase-In is fully funded at the time of contract award. Funds obligated under this clause are separate and distinct from those allotted under Clause B.3

The FP amount obligated and available for FP Milestone Payment for Phase-In is [REDACTED]

The TOTAL FP amount obligated and available is [REDACTED]

(End of clause)

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

- A. The purpose of this Supplemental Agreement is to definitize the underlimit contract change in accordance with Clause H.16 - Special Clause for Contract Changes and IDIQ Task Orders as follows:

Modification #	Mod Date	Description	Cost
14281		Contract change to add Government-Industry Data Exchange Program (GIDEP) and NASA Advisory Problem Data Sharing and Utilization Program to Cargo Mission Contract	

- B. **Section C, Statement of Work, Table of Contents**, is hereby updated to add the following:

2.6.1 GIDEP and NASA Advisory Problem Data Sharing and Utilization Program Documentation and Reporting (SSCN 14281).

- C. **Section C, Statement of Work**, is hereby updated to add the following:

2.6.1 GIDEP and NASA Advisory Problem Data Sharing and Utilization Program Documentation and Reporting (SSCN 14281).

The contractor shall be a member of and participate in the Government-Industry Data Exchange Program (GIDEP) in accordance with the requirements of the GIDEP S0300-BT-PRO-010 and S0300-BU-GYD-010, available from the GIDEP Operations Center, PO Box 8000, Corona, California 91718-8000, per DRD C-SA-09. The contractor shall review all GIDEP ALERTS, GIDEP SAFE-ALERTS, GIDEP Problem Advisories, GIDEP Agency Action Notices, and NASA Advisories to determine if they affect the contractors products/services provided to NASA. For those that affect the ISS Program, the contractor shall take action to eliminate or mitigate any negative effect to an acceptable level. The contractor shall generate the required failure experience data report(s) (GIDEP ALERT, GIDEP SAFE-ALERT, GIDEP Problem Advisory) and enter into the JSC NASA Advisory/GIDEP Documents Status Tracking System, jarts-sma.jsc.nasa.gov, in accordance with NPG 8735.1, whenever failed or nonconforming items, available to other buyers, are discovered during the course of the contract.

- D. This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of the modification agreed to herein as complete equitable adjustments for the changes identified in the signed Change Directive 14468, "Contract change to add Government-Industry Data Exchange Program (GIDEP) and NASA Advisory Problem Data Sharing and Utilization Program to Cargo Mission Contract" the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustments attributable to such facts or circumstances giving rise to these changes.

- 1) The purpose of this Supplemental Agreement is to incorporate the cost and fee amounts for Space Station Change Notice (SSCN) 14141. The contractor shall be authorized to perform all activities required to provide NASA technical concurrence and approval for the Cargo Mission Contract (CMC) to certify the Iodine Compatible Water Container (ICWC), part number SEG33120607-303, to launch full of potable water on Cygnus and Dragon.
- 2) **Clause B.2, Total Contract Value** is hereby revised to reflect the increase from \$128,752,492 by \$1,409,760 to \$130,162,252 in current cumulative contract value; an increase from (b) (4) for Option 2; and an increase from (b) (4) for Option 3. As a result of this change, replacement pages B-1, B-2, and B-3 are hereby attached.
- 3) **Clause B.3, NFS 1852.216-85 Estimated Cost and Award Fee** is hereby revised to reflect the cost increase from (b) (4) and the award fee increased from (b) (4) to (b) (4). As a result of this change, replacement page B-3 is attached.
- 4) **Clause B.7 Award Fee** is hereby revised to reflect the increase of the Option 2 fee total from (b) (4) by (b) (4); and the increase of the Option 3 fee total from \$ (b) (4). As a result of this change, replacement page B-6 is attached.
- 5) **Section C, Statement of Work, Table of Contents, is hereby updated to add the following:**

6.17 Design, Certify and Fabricate Iodine Compatible Water Container (ICWC) Flight Support Equipment (FSE) to launch filled on Cygnus and Dragon (SSCN 014141)
- 6) **Section C, Statement of Work, is hereby revised to add 6.17 as follows:**

6.17 Design, Certify and Fabricate Iodine Compatible Water Container (ICWC) Flight Support Equipment (FSE) to launch filled on Cygnus and Dragon (SSCN 014141)

The contractor shall perform the following tasks:

1. Develop a three-bag FSE concept by 9/8/14. Develop a single-bag concept by 12/15/14.
- 2) Certify the integrated ICWC/FSE three-bag configuration for launch on Dragon and Cygnus in accordance with SSP 50835, Common Interface Requirements Document by 2/10/15 and the single-bag configuration by 3/16/15.
- 3) Build and deliver the FSE quantities required to launch 125 ICWCs per the contract Deliverable Items List.
- 4) Develop and maintain an Interface Requirements Document (IRD) between the ICWC and the Commercial Orbital Transportation Services (COTS) vehicles (Cygnus and Dragon). Release the IRD containing the three-bag configuration by 10/3/14.
- 5) Develop process for filling ICWCs with iodinated water utilizing an EMU water certified facility, including a wet run to demonstrate process.
- 6) Deliver 125 integrated ICWC/FSE assemblies, which include water filled ICWCs integrated into FSE, per flight manifest requirements.

7) **Section J, Attachment J-16, Deliverable Items List, is hereby revised to add the following items:**

97	14141	TBD	TBD	CMC0469	ICWC FSE, three-bag concept	9*	Each	02/10/2015
98	14141	TBD	TBD	CMC0491	ICWC FSE, single-bag concept	22	Each	03/02/2015***

The TOTAL FP amount obligated and available is (b) (4)

(End of clause)

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses,

and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

The contractor shall accept only task orders issued by the Contracting Officer. The total value of task orders issued under this clause shall not exceed \$20,000,000 during the contract period of performance. Any work which falls under SOW 5.0 and would otherwise be ordered under the IDIQ provisions of this contract, but which is valued at less than \$700,000, will be processed as an underlimit change pursuant to Clause H.16, Special Clause for Contract Changes and IDIQ Task Orders, in lieu of the task ordering procedures of this contract; these SOW 5.0 underlimit changes are excluded from the value of task orders issued, and are not subject to the IDIQ maximum value.

RATE TABLE FOR PRICING TASK ORDERS

The following labor and indirect rates shall be used in the establishment of the estimated cost of individual task orders. The labor rates are fully burdened composite team rates (prime and all subcontractors); but exclude prime fee. Fee will be negotiated as it is applied to each actual Task Order and will be paid based on the negotiated arrangement. Any negotiated fee will not exceed the max fee proposed by the contractor in the table below. The indirect rates are those that may be applied to non-labor resources costs, such as materials, travel and other. These indirect rates and the basis of application must be identified at the bottom of the table.

The parties agree that the fully burdened labor rates established below shall not be subject to any adjustment (upwards or downwards), regardless of actual rates incurred during contract performance.

- 1) The purpose of this Supplemental Agreement is to incorporate the cost and fee amounts for Contract Year 5 (CY5) Underlimit (UL) Pool changes, pursuant to clause H.16: Special Clause for Contract Changes and IDIQ Task Orders. For the period of April 1, 2015 through March 31, 2016, UL Pool changes that have an absolute value less than \$700,000 are executed through the above contract provision.
- 2) **Clause B.2, Total Contract Value** is hereby revised to reflect the increase from \$130,162,252 by \$715,641 to \$130,877,893 in cumulative base contract value; an increase from (b) (4) by (b) (4) for Option 2. As a result of this change, replacement page B-1, B-2, and B-3 are hereby attached.
- 3) **Clause B.3, NFS 1852.216-85 Estimated Cost and Award Fee** is hereby revised to reflect the increase from (b) (4) 5 and the award fee increased from (b) (4). As a result of this change, replacement page B-3 is attached.
- 4) **Clause B.7, Award Fee**, is hereby revised to reflect the increase in the amount of available and earned fee, by evaluation period, provided in Table B-5.
- 5) This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of the modification agreed to herein as complete equitable adjustments for the Contractor's Contract Year 5 Underlimit Pool Proposal, the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustments attributable to such facts or circumstances giving rise to these changes.

- A. The purpose of this Supplemental Agreement is to definitize the underlimit contract change in accordance with Clause H.16 - Special Clause for Contract Changes and IDIQ Task Orders as follows:

Modification #	Mod Date	Description	Cost
150		Procure and certify next generation ISS Tablet PC for International Space Station (ISS) and baseline the associated Applicable Requirements Matrix for Commercial-Off-the-Shelf (COTS) hardware certification	

- B. **Section C, Statement of Work, Table of Contents**, is hereby updated to add the following:

6.30 Procure and certify next generation ISS Tablet PC for International Space Station (ISS) and baseline the associated Applicable Requirements Matrix for Commercial-Off-the-Shelf (COTS) hardware certification (SSCN 14269).

- C. **Section C, Statement of Work**, is hereby updated to add the following:

6.30 Procure and certify next-generation ISS Tablet PC for International Space Station (ISS) and baseline the associated Applicable Requirements Matrix for Commercial-Off-the-Shelf (COTS) hardware certification (SSCN 14269).

The contractor shall:

1. Procure a quantity of 53 iPad Air 2 devices.
2. Provide a quantity of 9 Class III iPad Air 2 to NASA (via DD1149) by 9/14/2015 for battery testing.
3. Provide a quantity of 12 Class III iPad Air 2 to NASA (via DD1149) by 10/13/2015 for training.
4. Provide a quantity of 6 Class III iPad Air 2 to NASA (via DD1149) by 9/21/2015 for software load development.
5. Maintain 2 devices in inventory for evaluation and battery qualification purposes.

- D. **Section J, Attachment J-9, Hardware List**, is hereby updated to add the following:

CARGO MISSION CONTRACT

B.4 NFS 1852.232-81 CONTRACT FUNDING (JUN 1990)

(a) For purposes of payment of cost, exclusive of fee, in accordance with the Limitation of Funds clause, the total amount allotted by the Government to this contract is (b) (4). This allotment is for cargo mission services and covers the following estimated period of performance: January 1, 2011 through ~~September 15, 2015~~ **December 27, 2015.**

(b) An additional amount of (b) (4) is obligated under this contract for payment of fee.

(End of clause)

B.5 FUNDING FOR FIXED-PRICE ITEMS PHASE-IN

Fixed-Price (FP) Milestone Payments for Phase-In exist under a FP arrangement in this contract and therefore must be fully funded. FP Milestone Payments for Phase-In is fully funded at the time of contract award. Funds obligated under this clause are separate and distinct from those allotted under Clause B.3

The FP amount obligated and available for FP Milestone Payment for Phase-In is (b) (4)

The TOTAL FP amount obligated and available is (b) (4)

(End of clause)

B.6 INDEFINITE DELIVERY/INDEFINITE QUANTITY (IDIQ) ORDERS

The Government may order Indefinite Delivery/Indefinite Quantity (IDIQ) work at any time after contract start in accordance with the procedures set forth in Clause H.3 and SOW section 5.0 of this contract. The contractor shall provide engineering and technical skills in support of Government-led studies, analyses, and unforeseen hardware requirements such as hardware builds and modifications. The tasks may be dynamic in nature and may be performed in a teaming arrangement with the Government or other contractors.

IDIQ work will be ordered by the Government on a cost-reimbursement basis. The Government will issue a cost-reimbursement task order authorizing the contractor to perform all effort, or, alternatively, to define the overall requirements, performance standards, and specifications associated with the work. The Government will utilize the defined requirements, performance standards, and specifications delivered by the contractor to request a proposal for completion of the work. The negotiated proposal will form the basis for the Government to issue a cost reimbursement task order for this work.

- C. **Clause B.3, NFS 1852.216-85 Estimated Cost and Award Fee** is hereby revised to reflect the increase in estimated cost from \$ (b) (4) and the award fee increased from (b) (4) for a total increase to estimated cost and fee from (b) (4). As a result of this change, replacement page B-3 is attached.
- D. **Clause B.7, Award Fee**, is hereby revised to reflect the increase in the amount of available and earned fee, by evaluation period, provided in Table B-5.
- E. **Section C, Statement of Work, Table of Contents**, is hereby updated to add the following:
- 6.32 Multiple User System for Earth Sensing (MUSES) Mass Simulator (MMS) to Replace MUSES payload on HTV5 (SSCN 015023).
- F. **Section C, Statement of Work, Table of Contents**, is hereby updated to add the following:
- 6.33 Build Third Generation (3rd Gen) Cargo Transfer Bags (CTBs), Jettison Stowage Bags (JSBs), and M-bags for International Partners (IPs) and Commercial Vehicle Flights to satisfy NASA's logistics needs through FY2020 based on current usage rates and traffic models. This includes the addition of the Cygnus standoff bags and the new 8 Cargo Transfer Bag Equivalent (CTBE) M-bags. (SSCN 15051).
- G. **Section C, Statement of Work**, is hereby revised to reflect the following changes (*Changes are noted in bold and italics*):

6.17 Design, Certify and Fabricate Iodine Compatible Water Container (ICWC) Flight Support Equipment (FSE) to launch filled on Cygnus and Dragon (SSCN 014141)

The contractor shall perform the following tasks:

1. Develop a three-bag FSE concept by 9/8/14. Develop a single-bag concept by 12/15/14.
2. Certify the integrated ICWC/FSE three-bag configuration for launch on Dragon and Cygnus in accordance with SSP 50835, Common Interface Requirements Document by 2/10/15 and the single-bag configuration by 3/16/15.
3. Build and deliver the FSE quantities required to launch ~~425~~ **118** ICWCs per the contract Deliverable Items List.
4. Develop and maintain an Interface Requirements Document (IRD) between the ICWC and the Commercial Orbital Transportation Services (COTS) vehicles (Cygnus and Dragon). Release the IRD containing the three-bag configuration by 10/3/14.

- 5) Develop process for filling ICWCs with iodinated water utilizing an EMU water certified facility, including a wet run to demonstrate process.
- 6) Deliver ~~425~~ **118** integrated ICWC/FSE assemblies, which include water filled ICWCs integrated into FSE, per flight manifest requirements.

H. **Section C, Statement of Work**, is hereby updated to add the following:

6.32 Multiple User System for Earth Sensing (MUSES) Mass Simulator (MMS) to Replace MUSES payload on HTV5 (SSCN 015023).

The Contractor shall:

1. Ship the Integrated MMS on a SAPA via DD1149 to JAXA on April 12, 2015.
2. Deliver to NASA:
 - Inputs for the Carrier Integration Plan (CIP)/User Integration Agreement (UIA) on April 7, 2015.
 - Inputs for the Interface Control Document (ICD) on April 7, 2015.
 - Tip over analysis of the MUSES to Small Adapter Plate Assembly (SAPA) Integration shipping container delivered by April 12, 2015.
 - Detail manufacturing drawings of the MMS by April 17, 2015.
 - Assembly drawing of the MMS by April 17.
 - Ground Safety Data Package(GSDP) draft by April 17, 2015.
 - Flight Safety Data presentation (FSDP) to the Safety Review Panel (SRP) by April 17, 2015.
 - Draft Structural Data (DSD) Package by May 1, 2015.
 - Thermal assessment presentation to the Passive Thermal Control System (PTCS) forum by May 1, 2015.
 - Material Information Usage List (MIUL) by April 21, 2015.
 - Draft requirements matrix by May 1, 2015.
 - Deliver a reduced Craig Bampton model by May 1, 2015.
 - Deliver a Full Dynamic and Stress model by May 1, 2015.

I. **Section C, Statement of Work**, is hereby updated to add the following:

6.33 Build Third Generation (3rd Gen) Cargo Transfer Bags (CTBs), Jettison Stowage Bags (JSBs), and M-bags for International Partners (IPs) and Commercial Vehicle Flights to satisfy NASA's logistics needs through FY2020 based on current usage rates and traffic models. This includes the addition of the Cygnus standoff bags and the new 8 Cargo Transfer Bag Equivalent (CTBE) M-bags. (SSCN 15051).

The Contractor shall:

- Build and deliver the Cygnus standoff bags.
- Design, certify, build and deliver the new 8 CTBE M-bags, and the 3rd Gen CTBs, JSBs and M-bags.
- Create drawings for the new 8 CTBE M-bag, and the 3rd Gen CTBs, JSBs and M-bags.

- A. The purpose of this Supplemental Agreement is to definitize the underlimit contract change in accordance with Clause H.16 - Special Clause for Contract Changes and IDIQ Task Orders as follows:

Modification #	Mod Date	Description	Cost
155		Perform Integrated Bag Level Hazard Assessment for Cargo returning from ISS on Commercial Resupply Services (CRS) and Commercial Crew Program (CCP) Vehicles	(b) (4)

- B. **Section C, Statement of Work, Table of Contents**, is hereby updated to add the following:

6.31 Integrated Bag Level Hazard Assessment for Cargo returning from ISS on Commercial Resupply Services (CRS) and Commercial Crew Program (CCP) Vehicles (SSCN 15054).

- C. **Section C, Statement of Work**, is hereby updated to add the following:

6.31 Integrated Bag Level Hazard Assessment for Cargo returning from ISS on Commercial Resupply Services (CRS) and Commercial Crew Program (CCP) Vehicles (SSCN 15054).

The contractor shall perform the following:

1. Ensure that hardware packed together in a bag does not create any new hazards (i.e., material incompatibility).
2. Ensure that all hazards are controlled within the bag (i.e., sharp edges/pinch points, frangible materials, fluid containment). This is performed as a stand-alone task for packed bags being returned/disposed on a return vehicle.

- D. This modification constitutes full and complete equitable adjustment for the changes set forth herein. In consideration of the modification agreed to herein as complete equitable adjustments for the changes identified in the signed Change Directive 15054, "Integrated Bag Level Hazard Assessment for Cargo returning from ISS on Commercial Resupply Services (CRS) and Commercial Crew Program (CCP) Vehicles," the Contractor hereby releases the Government from any and all liability under this contract for further equitable adjustments attributable to such facts or circumstances giving rise to these changes.

- 1) The purpose of this Supplemental Agreement is to incorporate the cost and fee amounts for Space Station Change Notice (SSCN) 14509. The contractor shall procure and certify a new laptop hardware system to replace the T61p in support of International Space Station (ISS) Operations, Payloads & Utilization and Baseline the Associated Applicable Requirements Matrix for Commercial-off-the Shelf (COTS) Hardware Certification.
- 2) **Clause B.2, Total Contract Value** is hereby revised to reflect the increase from \$131,399,061 by \$819,370 to \$132,218,431 in cumulative base contract value; an increase from \$25,755,228 by \$819,370 to \$26,574,598 for Option 2; an increase from \$24,110,097 by \$298,105 to \$24,408,202 for Option 3. As a result of this change, replacement page B-1, B-2, and B-3 are hereby attached.
- 3) **Clause B.3, NFS 1852.216-85 Estimated Cost and Award Fee** is hereby revised to reflect the increase from (b) (4) and the award fee increased from (b) (4). As a result of this change, replacement page B-3 is attached.
- 4) **Clause B.7, Award Fee**, is hereby revised to reflect the increase in the amount of available and earned fee, by evaluation period, provided in Table B-5.
- 5) **Section C, Statement of Work, Table of Contents, is hereby updated to add the following:**

6.29 Support Certification and Deliver New Laptop Hardware System to Replace the T61p in Support of International Space Station (ISS) Operations, Payloads & Utilization and Baseline the Associated Applicable Requirements Matrix for Commercial-off-the Shelf (COTS) Hardware Certification (SSCN 014509)
- 6) **Section C, Statement of Work, is hereby revised to add the following:**

6.29 Support Certification and Deliver New Laptop Hardware System to Replace the T61p in Support of International Space Station (ISS) Operations, Payloads & Utilization and Baseline the Associated Applicable Requirements Matrix for Commercial-off-the Shelf (COTS) Hardware Certification (SSCN 014509)

The contractor shall:

 1. Have downgrade authority of any Class I COTS laptop and accessories to Class III and provide logistical support for distribution of the Class III units to satisfy requests submitted through the my CMC portal Request for Support (RFS) tool.
 2. Complete laptop battery certification testing by 2/25/2016 per JSC 66548, Requirements for Flight Certification and Acceptance of Commercial Off the Shelf (COTS) Lithium-Ion (Li-Ion) Batteries, Revision A as levied by JSC 20793.
 3. Complete laptop battery acceptance testing by 6/06/16 per JSC 66548, Requirements for Flight Certification and Acceptance of Commercial Off the Shelf (COTS) Lithium-Ion (Li-Ion) Batteries, Revision A as levied by JSC 20793.
 4. Provide a quantity of 1 Class I ZBook 15 laptop (including accessories) to NASA (via DD1149) by 1/15/2016 for EMI testing.
 5. Provide a quantity of 1 Class I ZBook 15 laptop (including accessories) to NASA (via DD1149) by 1/15/2016 for 16V power quality testing.
 6. Provide a quantity of 1 Class I ZBook 15 laptop (including accessories) to NASA (via DD1149) by 1/15/2016 for power inverter testing.

7. Provide a quantity of 1 Class I ZBook 15 laptop (including accessories) to NASA (via DD1149) by 1/15/2016 for radiation testing.
8. Provide a quantity of 1 Class I ZBook 15 laptop (including accessories) to NASA (via DD1149) by 1/15/2016 for flammability and offgas testing.
9. Perform thermal analysis and testing for safety hazard verification by 2/01/16 of the new laptop system for verification of laptop thermal performance and touch temperature validation.
10. Perform Remote Terminal (RT) validation testing with USB 1553 adapter by 5/08/16.
11. Perform Gaussian testing (DC Magnetic Fields) of the new laptop system by 1/29/16.
12. Perform flight unit acceptance testing (Pre-Delivery Acceptance (PDA)/Pre-Installation Acceptance (PIA)) and analysis for all the new flight laptop system hardware items by 9/01/2016.
13. Procure and sustain (including updating the drawings with alternate Vendor Part Numbers if current vendor parts are unavailable) a minimum quantity of media cards to support on-orbit computer resources operations and utilization for the following part numbers:
 - i. SEG33124214-301 64GB USB Flashdrive
 - ii. SEG33124213-301 32GB HDSC Card
