Whether your destination is the Marketplace, the Moon, or Mars, we want to help you get there with up to $1.15 million in funding in your first three years.

**STEP 1: Get to know NASA SBIR/STTR**

What is the NASA SBIR/STTR program? We are a diverse community of pioneers who are researching and developing technologies to change the world. Your journey starts with a Phase I, but the ultimate goal is to reach Phase III where you get infused into a NASA mission and/or commercialize.

Do these steps early so that there are no delays with your application.

**STEP 2: PREPARE AND SUBMIT A PROPOSAL**

Yes, we made some exciting changes in response to previous proposers' feedback. If you've applied before, you may notice three things:

- Our Phase I funding increased by 20% to $150K (+ Phase II funding is slated to increase to $1M)
- SBIR and STTR are split into two separate documents
- Phase II requirements were removed (awardees will get that info. later on)

Register your company here first: sbir.gov/registration

Receive your unique SBC ID after registration

Then register your company here: sam.gov/SAM

What's the difference between SBIR & STTR?

All applicants are required to submit proposals in the NASA Electronic Handbook (EHB) proposal submission system. You must use your SBC ID to create a login for the EHB.

You may refer to the Learning & Support resources on the login page.

Double-check before you submit

SUBMIT
