

# ENERGY AT NASA

**In FY21, NASA used 7,432 billion btus – enough to power 96,395 homes for one year.**

**All that energy comes at a cost... In FY21, NASA spent \$98 million on energy**

**This energy supports every aspect of NASA's mission, including big energy uses like**

- office buildings
- research laboratories
- data centers
- wind tunnels
- spacecraft assembly facilities
- thermal vacuum chambers
- test stands
- launch pads
- antennas
