ERNST STUHLINGER

1. The Specific Ionization of Cosmic Rays. Tuebingen, 1936.

2. Determination of the Specific Ionization of Cosmic Rays by Means of a Proportional Counter. Zs. f. Ph., 1937.

3. The Emission of Slow Neutrons from Beryllium and Lithium Under the Action of Alpha Rays. Zs. f. Ph., 1938.

4. The Emission of Slow Neutrons from Boron Under the Action of Alpha Rays. Zs. f. Ph., 1938 (with O. Haxel).

5. Recoil Electrons Produced by Energetic Cosmic Rays. Zs. f. Ph., 1939.

6. Angular Distribution of Rays in Showers Produced by Energetic Cosmic Rays. Zs. f. Ph., 1939.

7. Magnitude and Energy Distribution of Cosmic Ray Showers from Aluminum and Lead. Zs. f. Ph., 1940 (with E. Spanidis).

8. Isomeric Nuclei. Die Naturwissenschaften, 1940.

9. Nuclear Transmutations of Beryllium Under the Action of Neutrons, Alpha and Gamma Rays. Institute of Technology, Berlin, 1941.

10. The Absorption of Thermal Neutrons in B, Na, K, Ca, and U. Berlin, 1941.

11. The Characteristic Path Length for the Slow-Down of Fast Neutrons in Water. Berlin, 1941.

12. Characteristic Path Length for the Slow-Down of Fast Neutrons in Beryllium. Berlin, 1941.

13. Absorption of Fast and Thermal Neutrons in Beryllium. Berlin, 1941

14. Resonance Absorption and Scattering of Neutrons in Uranium. Berlin, 1941.

15. Application of a Time Correction to Improve the Accuracy of a Guided Missile in Connection with an Accelerometer and Integrator. Peenemuende, Germany, 1943.

16. Design and Operation of an Integrating Accelerometer. Peenemuende, Germany, 1944.

17. Dispersion of Missile Trajectories as a Function of the Pitch Angle in Connection with an Inertial Guidance System. Peenemuende, Germany, 1944.

18. Interferometric Density Meter. Fort Bliss, Texas, October 1946.

19. Attenuation of Electromagnetic Waves in Flame Gases of Rockets. Fort Bliss, Texas, 1947.

20. Oscillatory Circuit Incorporating a Choke with Rectangular Magnetization Curve. Redstone Arsenal, TR-70, 1952 (with Theodore Buchhold).

21. Ionization and Possible Biologic Effects of Heavy Cosmic Nuclei. Redstone Arsenal, 1952.

22. Determination of the Moment of Apex of a Satellite Booster. Technical Paper, Redstone Arsenal, October 1954.

23. Possibilities of Electric Space Ship Propulsion. V. International Astronautical Congress, Innsbruck, Austria, 1954.

24. A Magnetic Expanded Scale Voltmeter. Technical Report and Patent Application, May 1955 (with R. L. Smith).

25. Transistor-Magnetic Servo Amplifier. Technical Report, 1955 (with D. L. Anderson and J. C. Taylor).

26. Attitude Control and Power Supply Problems of an Instrumented Satellite. Technical Paper presented at the IRE, 1955.

27. Electrical Propulsion System for Space Ships with Nuclear Power Source. Astronautics, 1955.

28. Tracking and Observation of Initial Phase of Artificial Satellite (SECRET). May 20, 1955 (with C. A. Lundquist).

29. Azimuth Setting of Inertially Guided Missiles. Army Ballistic Missile Agency, Huntsville, Alabama, Rpt. No. 6M69, 25 July 1955.

30. Adjustment of a Reflecting Prism Mounted on a Gyro-Stabilized Platform. Supplement to Rpt. 6M69, ABMA, 21 September 1955.

31. Control and Power Supply Problems of Instrumented Satellites. Jet Propulsion Journal, May 1956.

32. Instrumentation Problems of Unmanned Satellites. Presentation to the American Rocket Society Meeting, Cleveland, Ohio, June 18-20, 1956.

33. Apex Determination for Missile #27 (SECRET). Army Ballistic Missile Agency Technical Memorandum, RPO-D-TM-4, 31 August 1956.

34. The Flight Path of an Electrically Propelled Space Ship. Jet Propulsion Journal, September 1956.

35. Proposal to Measure Electron Densities at High Altitudes by Combined Optical and Doppler Observations. Army Ballistic Missile Agency, Technical Memorandum, RPO-D-TM-1, June 1956.

36. Magnetic Damping of a Spinning Satellite. ABMA Tech Memo #3, August 1956.

37. Potential Contribution to the Earth Satellite Project by ABMA and JPL. Presentation at Army Science Symposium, West Point, 28 June 1957.

38. Space Travel as a Long-Range Development Project. Presentation to members of the Joint Chiefs of Staff, Washington, D. C., September 1957.

39. Design and Performance Data of Space Ships with Ionic Propulsion Systems. VIII IAF Congress, Barcelona, Spain, October 1957.

40. The International Geophysical Year. A Lecture, Huntsville, Alabama, 1957.

41. Propulsion Systems for Space Ships. Vistas in Astronautics, Pergamon Press, London, 1958.

42. Advanced Propulsion Systems for Space Vehicles. IX IAF Congress, Amsterdam, Holland, August 1958.

43. Current Status of Explorer IV Project (SECRET-RD). Presentation to Secretary of the Army Brucker, 13 August 1958.

44. Rockets and Satellites in the Service of Geophysics. Presentation in Wiesbaden, Germany, 1958.

45. U. S. Space Capability (SECRET). ARS Symposium, New York, November 1958.

46. ABMA Presentation to the NASA. Report D-TN-1-59, 15 December 1958 (with W. von Braun and H. H. Koelle).

47. Some Problems in Ionic Propulsion Systems. IRE Transactions on Military Electronics, 1 February 1959 (with Robert Seitz).

48. Instrumentation for Space Research. Technical Report, March 1959.

49. Propulsion in Outer Space. Ninth Tripartite AXP Conference, Quebec, Canada, 20 April - 1 May 1959.

50. Ion Propulsion — The State of the Art — 1959. Astronautics, Vol. 4, No. 11, November 1959.

51. Army Participation in the National Satellite and Space Program. Semiannual ARS Meeting, 9 June 1959.

52. Rocket Propulsion with Photons. Astronautics, October 1959.

53. A Lunar Ferry with Electrical Propulsion. Japanese Rocket Society, Tokyo, Japan, May 1959.

54. Space Missions for Ion Propulsion Systems. Sixth Annual Meeting of the AAS, New York, January 1960.

55. Electric Propulsion, Section IVE2. Handbook of Astronautical Engineering (H. H. Koelle, editor), McGraw-Hill Book Company, Inc., New York.

56. Progress in Electric Propulsion Systems. XI International Astronautical Congress, Stockholm, Sweden, August 1960.

57. Flight Testing of Ion Engines. NASA Research Advisory Committee on Electrical Energy Systems, Santa Monica, California, September 1960.

58. Long-Range Space Power Requirements. ARS Space Power Conference, Los Angeles, California, September 27, 1960.

59. Electrostatic Propulsion Systems for Space Vehicles. Advances in Space Science, Vol. 2, Academic Press, 1960.

60. Current Status of the Beam Neutralization Problem. Progress in the Space Sciences, Vol. 5, Academic Press, New York. Presented at ARS Electrostatic Propulsion Conference, Monterey, California, November 3-4, 1960 (with R. Shelton and R. Seitz).

61. The U. S. Ion Propulsion Program. Astronautics, Vol. 6, No. 1, January 1961, p. 30 (with R. Hayes and R. Seitz).

62. Commercial and Economic Aspects of Space Flight, Panel Session, National Missile and Space Conference, Washington, D. C., March 15-16, 1961.

63. Space Projects of the Next Ten Years. Naval School of Aviation Medicine, Pensacola, Florida, March 22, 1961.

64. Development and Flight Testing of Electric Propulsion Systems. Joint USAF-NASA Meeting on Electrostatic Propulsion, Space Technology Labs, Los Angeles, California, April 25, 1961.

65. Electric Propulsion Development Program. ARS Space-Nuclear Conference, Gatlinburg, Tennessee, May 3-5, 1961.

66. Systems Analysis of Electrostatic Propulsion. X458 DE, Advances in Space Propulsion, UCLA Short Course (Simkin-Szego), July 14, 1961.

67. Lunar and Planetary Surface Exploration. XII International Astronautical Congress, Washington, D. C., October 2-6, 1961.

68. Low Acceleration Space Trajectories. Presentation at the Air Force Academy, Colorado Springs, Colorado, December 7, 1961.

69. Electric Propulsion – A Status Report. Astronautics, December 1961.

70. Concept for a Manned Mars Expedition with Electrically Propelled Vehicles. ARS Electric Propulsion Specialists Conference, Berkeley, California, March 1962 (with J. C. King and R. A. Potter).

71. The Effect of Velocity Distributions on Power-Limited Propulsion System. ARS Electric Propulsion Specialists Conference, Berkeley, California, March 14-16, 1962 (with R. D. Shelton, R. A. Potter, and L. Lacy).

72. Electric Propulsion — A New Technology. Fiftieth Birthday Volume for Dr. W. von Braun, March 23, 1962 (with G. B. Heller, R. N. Seitz, and G. C. Bucher).

73. Electronics in Planning Space Flights. Anniversary Issue of Proceedings of the IRE, May 1962.

74. Progress Report on Electric Propulsion. Subcommittee for Electric Propulsion, AIEE Summer General Meeting, Denver, Colo., June 1962.

75. Electric Propulsion 1962 — State-of-the-Art Survey. Astronautics, November 1962.

76. Laser Projects at the NASA-Marshall Space Flight Center. Optical Communications and Tracking Symposium, Goddard Space Flight Center, NASA, Greenbelt, Maryland, February 5-6, 1963.

77. Ion Propulsion for Space Flight. McGraw-Hill Book Co., Inc., 1963.

78. Electric Propulsion Specialists Conference — A Review. ARS, Colorado Springs, Colorado, March 11-13, 1963.

79. Research Problems in Space Flight. III European Space Flight Congress, Stuttgart, Germany, May 22-25, 1963.

80. Performance Comparison Between Variable Thrust and Constant Thrust Electric Propulsion Systems for Mars Flyby and Earth Escape Missions. Manned Planetary Mission Technology Conference, Lewis Research Center, May 21-23, 1963 (with J. A. Downey and S. A. Fields).

81. The Moon's History. Symposium on Physics of the Moon, MSFC, September 11, 1963.

82. Der Saturn Meteoriten Satellit. DGRR Journal, Germany, April 1964.

83. Electric Propulsion in 1964. A review presented at the First Annual Meeting of the AIAA, Washington, D. C., May 1964.

84. Electric Propulsion. Summer Course at Auburn University, June 1964 (with L. H. Wood).

85. Probleme und Ergebnisse der Weltraum-Physik. Presentation at Düsseldorf, Germany, October 5, 1964.

86. AGARD-Short Course on Advanced Propulsion Systems, Brussels, Belgium, October 1964.

87. Electric Power for Outer Space. AIAA Philadelphia, Pa., September 3, 1964.

88. Probleme der Mondphysik. Physikalische Blätter, 6, Germany, 1964.

89. Results of Project Pegasus. Presentation at Manned Spacecraft Center, Houston, Texas, June 28, 1965.

90. Meteoroid Measurements with Project Pegasus. Northeast Electronics Research and Engineering Meeting, Boston, Mass., November 1965.

91. Electric Space Propulsion. Third SES Meeting at Davis Campus California, November 1965.

92. Electric Propulsion in 1965. Astronautics and Aeronautics, November 20, 1965.

93. Physics of the Sun. Presentation to IEEE, Huntsville, Ala., 1966.

94. Study of a NERVA-Electric Manned Mars Vehicle. AIAA-AAS Meeting, Baltimore, Maryland, March 28-29, 1966.

95. Meteoriten-Messungen mit Projekt Pegasus. Astronautik, 4, July 1966.

96. Manned Mars Flight with Electric Propulsion System. Briefing to the Astronauts, MSFC, May 26, 1966.

97. Proposal for a Payload System Observing Electromagnetic Radiations from Earth Orbit. Presentation at MSC, Houston, Texas, December 1966.

98. Management of Research. Presentation to Commerce Science and Technology Fellows, Cape Kennedy, Florida, February 1, 1967.

99. Proposal of Conceptual Payload Design for Astronomical Experiments (EMR). OSSA Astronomy Subcommittee Meeting, February 1967.

100. Electric Propulsion for Manned Mars Mission. Panel discussion, AIAA, Washington, D. C., July 21, 1967.

101. Solar Influences Upon the Earth. Presentation to Office of Antarctic Research, Skyland, Shenandoah, Virginia, September 19, 1967.

102. Electric Space Propulsion Systems. Space Science Reviews, Utrecht, December 1967.

103. Electric Space Propulsion - Undated.

104. "Deutschland in der Weltraumforschung," in: Die Bundesrepublik Deutschland, G. Stalling Verlag, 1968.

105. The Human Touch in Space Flight, Address at 19th Annual Convention of Alabama State Chapter P. E. O. Sisterhood, Huntsville, Alabama, April 25, 1968.

106. Dinner Speech, Huntsville Civic Symphony Association, September 5, 1968.

107. "Raumflug zum Mars," in: Naturwissenschaft und Medizin, Boehringer, Mannheim, Nr. 25, 1968.

108. Antarctic Research, A Prelude to Space Research, Skyland, Va., September 18, 1968.

109. Apollo: A Pattern for Problem Solving, Bulletin of the Atomic Scientists, 1969.

110. A Prelude to Space Research, Antarctic Journal of the U. S., January-February 1969.

111. Antarctica - A Prelude to Space Research, Bulletin of the Atomic Scientists, March 1969.

112. The Versatility of Electrically Propelled Spacecraft for Planetary Missions, AIAA 7th Electric Propulsion Conference, Williamsburg, Va., March 3-5, 1969 (with D. P. Hale, C. C. Dailey, L. Katz).

113. A New Look At Our Old Earth, Texas Surgical Society Dinner, Galveston, Texas, April 14, 1969.

114. Physics of Light, Lecture in a Course on Astronomy, G. C. Marshall Space Flight Center and Rocket City Astronomical Association, April 1969.

115. Electric Propulsion - Ready for Application, May 1, 1969 (with C. C. Dailey).

116. Address at Graduation Exercises of Randolph School, May 30, 1969.

117. Electric Space Propulsion, Science Journal, United Kingdom, July 1969.

118. Applications of Space Program, Speech to Young Democrats of the South, Huntsville, Ala., August 8, 1969.

119. Physics of the Planet Mars, Presentation at G. C. Marshall Space Flight Center, September 1969.

120. Results of Lunar Exploration, Presentation to Antarctic Research Program Office, Skyland, Va., September 1969.

121. Electric Propulsion Systems for Long-Term Space Station Operation, IAA Symposium, Cloudcroft, New Mexico, September 29-October 2, 1969.

122. Advanced Propulsion Systems for Space Flight, IAF Congress, Mar del Plata, Argentina, October 6, 1969.

123. Space Astronomy, Panel Discussion at 6th Annual AIAA Meeting, Anaheim, Calif., October 21, 1969.

124. Versatility of Electrically Propelled Spacecraft for Planetary Missions, Journal of Spacecraft and Rockets, Volume 6, October 1969 (E. Stuhlinger, D. Hale, C. Dailey, L. Katz).

125. Scientific Challenge of The Space Program, Eastern Colleges Science Conference, Wilkes College, Wilkes-Barre, Pennsylvania, April 18, 1970.

126. Astronomical Observations from Satellites, Rocket City Astronomical Association, 1970.

127. Was Our Earth Visited by Astronauts from Outer Space? (Comments on E. von Daeniken's books), April 1970.

128. Ergebnisse der Mondforschung (Physikalische Blaetter, April 1970).

129. Experiment Modules for the Orbiting Manned Space Station, NASA, Ames Research Center, September 1970.

130. Invited Comments, AIAA Electric Propulsion Conference, Stanford, August 31, 1970.

131. Planetenforschung in den Naechsten Fuenfzehn Jahren, September, 1970.

132. Roentgen-Astronomie Roentgen-Jubilaeum, Remscheid, October 10, 1970.

133. Planetary Exploration with Electrically Propelled Vehicles, New York Academy of Sciences, October 29, 1970.

134. Power Without Pollution - A Dream That Must Come True, January 1971. Foreword for special issue of Journal of Microwave Power.

135. Exploration in the Solar System With Electric Spacecraft, 12th Colloquium of International Astronomical Union, Tucson, Arizona, March 10, 1971.

136. The Concept of A General-Purpose Laboratory in Space (with J. Downey), AIAA Space Systems Meeting, Denver, Colorado, July 19-20, 1971.

137. High Energy Radiations from Space (with C. C. Dailey), Paper for New York Academy of Sciences.

138. Why Should We Explore Space?, Speech given for Huntsville Association of Technical Societies (HATS), Alabama Space and Rocket Center, May 19, 1971.

139. A Spaceman's View on Arctic Exploration, Symposium on Arctic Logistics Support Technology, Hershey, PA, November 2, 1971.
