On January 31, 2013, I, as the designated Source Selection Authority (SSA) for the subject acquisition, met with members of the Source Evaluation Panel (Panel) to discuss the reevaluation of proposals for the KISS III contract. Specifically, I requested the Panel to reevaluate the Past Performance factor for the selected offeror, Wichita Tribal Enterprises, LLC (Wichita) and the runner up, Unispec Enterprises, Inc. (Unispec), after I learned that my original selection was predicated on an error relating to Past Performance data on Unispec. Accordingly, I asked for a congress of the pertinent members of the Panel to discuss their appurtenant findings.

Those present were:

Donald Wood, Contracting Officer  
Lori Weller, Source Evaluation Panel Technical Evaluator  
Louis Patalano, Past Performance Evaluator  
Marco Pochy, Consultant  
Bradley Smith, Legal Consultant

**PROCUREMENT HISTORY**

The KISS III contract was awarded to Wichita Tribal Enterprises, LLC on January 2, 2013. Debriefings for the three offerors who made the competitive range, but were not selected for award, were conducted on January 7, 2013. During the course of debriefing Unispec a discrepancy was pointed out by the offeror with relation to the Past Performance factor, namely, that the SSA relied on an ostensibly erroneous data point. After the debriefing of the offeror, the Panel investigated the specifics of this discrepancy, including a review of the initial Past Performance evaluation. The Panel ascertained that the information received from a questionnaire of the prior contract in question (Department of Transportation Contract DTPH5608C000003) stated the number of employees accountable to be “9,” which was the data point presented to the SAA. However, information for this same contract in the offeror’s past performance volume stated the number of employees to be “55.” This discrepancy had not been detected during evaluations and indeed the erroneous data point had been presented to the SSA.

When the SSA was notified of these circumstances, he directed the Panel to perform a total reevaluation of the Past Performance factor for both Unispec and Wichita in accordance with the instructions contained in the RFP to ensure no additional discrepancies were present. It should be noted that during the pendency of this review, Unispec filed a protest with the Government
Accountability Office alleging, among other things, the improper evaluation of the Past Performance factor by the Panel.

**REEVALUATION PROCESS**

The evaluators examined information from three sources of data in accordance with Section 5.3.3. of the Request for Proposal (RFP) and the applicable FAR and NFS provisions: 1) the past performance volume provided as part of each offeror’s proposal, 2) questionnaires regarding performance on contracts identified by the offeror received from evaluators selected by the offeror, and 3) available data from the Past Performance Information Retrieval System (PPIRS). Where appropriate, individuals familiar with the contracts identified by the offerors were also contacted to verify or clarify disparate information from these three sources. Information obtained included contract value, number of employees, scope of work, and performance ratings for prior contracts. This information was compiled into an Excel spreadsheet where the information could be reviewed to determine an overall confidence rating of each offeror. This overall confidence rating consisted of two inputs: a relevancy determination (considering total contract value, number of employees, and comparable scope of work) and a performance assessment (based on an offeror’s reported performance on prior contracts). The rating scales for overall confidence rating and its two component parts (relevancy, performance assessment) follow:

An overall past performance confidence assessment was assigned by the Panel based on consideration of all findings using the following guidance:

- **Very High**: The Offeror’s relevant past performance is of exceptional merit and is very highly pertinent to this acquisition; indicating exemplary performance in a timely, efficient, and economical manner; very minor (if any) problems with no adverse effect on overall performance. Based on the Offeror’s performance record, there is a very high level of confidence that the Offeror will successfully perform the required effort.

- **High**: The Offeror’s relevant past performance is highly pertinent to this acquisition; demonstrating very effective performance that would be fully responsive to contract requirements with contract requirements accomplished in a timely, efficient, and economical manner for the most part with only minor problems with little identifiable effect on overall performance. Based on the Offeror’s performance record, there is a high level of confidence that the Offeror will successfully perform the required effort.

- **Moderate**: The Offeror’s relevant past performance is pertinent to this acquisition, and it demonstrates effective performance; fully responsive to contract requirements, reportable problems, but with little identifiable effect on overall performance. Based on the Offeror’s performance record, there is a moderate level of confidence that the Offeror will successfully perform the required effort.
- **Low:** The Offeror’s relevant past performance is at least somewhat pertinent to this acquisition, and it meets or slightly exceeds minimum acceptable standards; adequate results; reportable problems with identifiable, but not substantial, effects on overall performance. Based on the Offeror’s performance record, there is a low level of confidence that the Offeror will successfully perform the required effort. Changes to the Offeror’s existing processes may be necessary in order to achieve contract requirements.

- **Very Low:** The Offeror’s relevant past performance does not meet minimum acceptable standards in one or more areas; remedial action required in one or more areas; problems in one or more areas which adversely affect overall performance. Based on the Offeror’s performance record, there is a very low level of confidence that the Offeror will successfully perform the required effort.

- **Neutral:** In the case of an Offeror without a record of relevant past performance or for whom information on past performance is not available, the Offeror may not be evaluated favorably or unfavorably on past performance [see FAR 15.305(a) (2) (ii) and (iv)].

Performance assessment was rated as follows:

- **Excellent:** Of exceptional merit; exemplary performance in a timely, efficient, and economical manner; very minor (if any) deficiencies with no adverse effect on overall performance.

- **Very Good:** Very effective performance, fully responsive to contract requirements; contract requirements accomplished in a timely, efficient, and economical manner for the most part; only minor deficiencies.

- **Good:** Effective performance; fully responsive to contract requirements; reportable deficiencies, but with little identifiable effect on overall performance.

- **Fair:** Meets or only slightly exceeds minimum acceptable standards; adequate results; reportable deficiencies with identifiable, but not substantial, effects on overall performance.

- **Poor:** Does not meet minimum acceptable standards in one or more areas; remedial action required in one or more areas, deficiencies in one or more areas which adversely affect overall performance.

- **N/A:** Not applicable

Relevancy considers such things as service similarity and contract dollar value for the prime and major or critical subcontractors. The rating is based on data provided in offeror’s past performance volume, reference questionnaires, reference interviews, and other data independently obtained by the Panel from NASA and/or the Government agency past performance data bases. The Panel assessed the degree of relevancy of offeror’s cited prior contracts using the ratings/guidance listed below:
- **High**: Past/present performance effort involved essentially the same magnitude of effort and complexities this solicitation requires.
- **Moderate**: Past/present performance effort involved much of the magnitude of effort and complexities this solicitation requires.
- **Low**: Past/present performance effort involved some of the magnitude of effort and complexities this solicitation requires.
- **No**: Past/present performance effort did not involve any of the magnitude of effort and complexities this solicitation required.

**Unispec**

Of the three related contracts for past performance identified by Unispec, two received low relevancy determination ratings due to each contract containing only two (both the same) of the four tasks of the scope of KISS III as well as having low contract values and low numbers of employees. On the third contract Unispec received a medium relevancy determination rating due to it having an intermediate contract value and a moderate number of employees despite the contract containing only one of the four tasks of the scope of KISS III. The Panel assigned an overall relevance rating of Low.

For all three contracts, Unispec received Excellent performance assessments. Therefore, the overall Low relevancy combined with the across the board Excellent performance assessments, the Panel assigned Unispec an overall confidence rating of Moderate.

**Wichita Tribal**

Of the four related contracts for past performance identified by Wichita one received a low relevancy determination rating due to the contract containing only two of the four tasks of the scope of KISS III as well as having low contract value and low number of employees. Wichita received one medium relevancy determination rating due to the contract containing one (the same as on the first contract) of the four tasks of the scope of KISS III, despite having high contract value and a high number of employees. Wichita received a high relevancy determination rating on the third contract due to it containing three tasks of the scope of KISS III as well as having high contract value and an intermediate number of employees. Wichita received a second high relevancy determination rating on the forth contract due to it containing all four tasks of the scope of KISS III as well as having high contract value and a high number of employees. The Panel assigned an overall relevance rating of High.

For the contracts provided, Wichita received performance assessments ranging from Good to Excellent. Therefore, the overall High relevancy ratings (combined with the performance assessments, the Panel assigned Wichita an overall confidence rating of High.
SELECTION DECISION

I first note that of the three evaluation factors articulated in the RFP, I have directed the Panel to only reevaluate the Past Performance factor. As a result, only this factor was presented to me for consideration. I note that my original selection rationale as it relates to the Technical Capability factor is unaffected and remains in full force; thus, I utilize my initial technical conclusions and comparisons as well as the prior evaluated prices in making an appropriately holistic tradeoff analysis accordingly.

When comparing past performance between Wichita and Unispec, I first note that while Unispec has an excellent past performance record on their three related contracts, these contracts have included scope similar to only two of the four tasks to be performed on KISS III. I also note that the largest related contract with fifty five employees was for work that encompassed only one task similar to the four tasks on KISS III. This resulted in the assignment of a “low” overall relevancy rating across the combination of contracts, denoting that Unispec’s past/present contractual efforts involved only some of the diversity of effort and complexities that the KISS III contract will involve.

Wichita and/or their major subcontractor, meanwhile, have earned very good to excellent past performance ratings, including all excellent ratings on KISS I, which is inclusive of all the four tasks that will be performed under KISS III. Additionally, Wichita’s subcontractor has successfully managed contracts with 113 and 142 employees. This, in conjunction with other contracts managed by the Wichita team resulted in assignment of a “high” relevancy rating by the SEP, connoting that their past/present contractual efforts involved the same magnitude of effort and complexities that KISS III requires across the statement of work areas.

These relevancy assessments, when combined with performance ratings, led the Panel to rate Unispec as an overall Moderate level of confidence, while Wichita was rated at a high overall level of confidence. After careful consideration of this new information, I agree with the Panel’s assigned levels of confidence with respect to these two offerors. KISS III will involve management of a labor force an order of magnitude more complex than that reflected in Unispec’s experience terms of labor force size and diversity of tasks. The Wichita team’s past performance record demonstrates relevancy both as to labor force size, but more importantly, the diversity of tasks across the myriad labor classifications pertinent to the KISSIII statement of work. This difference in past performance again factors heavily as a discriminator in my ultimate determination that Wichita’s proposal represents the most advantageous offer to the Government.

After ascertaining the risks and benefits associated with each proposal, I believe Wichita Tribal Enterprises, LLC represents the proposal that is most advantageous to the Government. I do so
continuing to recognize Wichita’s qualitatively superior proposal in the Technical Capability factor for the reasons discussed in my initial source selection statement. I also have high confidence in Wichita’s ability to successfully perform across the entire statement of work given their past performance history. I consider this to be of benefit in reducing the risk of unsuccessful contract performance on KISS III, given the level and variety of effort that the Wichita team has successfully managed on past contracts. I consider these advantages of the Wichita proposal compared to Unispec to be more than sufficiently advantageous as to warrant the 1.5% additional potential cost. I determine that the superior aspects of the Wichita proposal will significantly enhance the Government’s confidence of highly successful contract performance and labor force stability, and will justify the marginal additional cost for a contract of the size, complexity and duration of KISS III.

Based on the foregoing analysis, I select Wichita Tribal Enterprises, LLC for award of the KISS III contract.

Marlo F. Krisberg
Source Selection Authority
NASA/ John F. Kennedy Space Center

Date 2-1-13
SELECTION OF CONTRACTOR FOR THE
KENNEDY SPACE CENTER INSTITUTIONAL SUPPORT SERVICES III (KISS III)
CONTRACT

On November 28, 2012, I, as the designated Source Selection Authority (SSA) for the subject acquisition, met with the Source Evaluation Panel (SEP) to discuss their evaluation of proposals for the KISS III contract.

Those present were:

Donald Wood, Contracting Officer
Lori Weller, Source Evaluation Panel Technical Evaluator
Mary Beth Hanson, Source Evaluation Panel Technical Evaluator
Lindsey Snead, Source Evaluation Panel Technical Evaluator
Louis Patalano, Past Performance Evaluator
Marco Pochy, Consultant
Bradley Smith, Legal Consultant

PROCUREMENT HISTORY

The objective of this procurement is to acquire a broad range of institutional support services for Kennedy Space Center. These services include but are not limited to clerical support, financial management support, personnel program activity, employee development, employee benefits, personnel action processing, procurement acquisition and contract administration, analyst support, business systems support and records and property management. The contract requires the contractor to provide all of the resources necessary to provide these services in support of current and future NASA programs and activities at KSC and other designated sites. This procurement will result in award of the KISS III contract. Previously, these services have been provided under the KISS I and KISS II contracts. KISS III will combine the scope of these two predecessor contracts into one all-encompassing support services contract.

The contract will be Indefinite-Delivery, Indefinite-Quantity with Fixed Price task orders. The performance period of the contract will be three years and seven months, as follows:

- Option 1: October 01, 2013 – September 30, 2014
- Option 2: October 01, 2014 – September 30, 2015

The contract includes a phase-in period to commence at award.

On December 12, 2011, a request for information (RFI) was posted. A synopsis of the procurement was posted with the pre-solicitation notice issued on March 02, 2012. A Draft Request for Proposal was issued April 20, 2012 and a Final Request for Proposal was issued May 18, 2012. The procurement was set aside for small businesses certified by the Small Business Administration for participation in the 8(a) program.

There were three amendments to the solicitation issued by the Contracting Officer. Amendment 1 was issued to provide answers to the written questions from industry and for other minor changes to the RFP. Amendment 2 was issued to revise the base period of performance from twelve months to nine months and incorporate revised Wage Determination, number 2005-117, Rev. 13. Amendment 3 was issued to
revise Attachment 4.6, Final Proposal Pricing Template (R2) to align that template with the revised base period of performance.

The RFP and amendments 1 and 2 were posted on the NASA Acquisition Internet Service (NAIS) web page and the offerors were able to download the RFP and any amendments from this service. Amendment 3 was issued via email to offerors within the competitive range on October 9, 2012.

Fifteen (15) offerors submitted timely proposals. One late proposal was received. The late proposal was not evaluated in accordance with FAR 52.212-1 and was returned to the sender on June 21, 2012.

The following offerors were evaluated:

1. AYA Associates, Inc.
2. Bara Infoware, Inc.
3. Brilliant Corporation
4. C&C International
5. The Crewestone Team
6. Florida Federal Contractors Group
7. GET-NSA, LLC
8. Hanks-Legacy IS Venture
9. Logical Innovations, Inc.
10. OSI Sienna, LLC
11. SDSE
12. Truba Group
13. Unispec Enterprises, Inc.
14. Wichita Tribal Enterprises, LLC
15. Wire2netllc

Upon initial review of the proposals, it was determined that one proposal from Wire2NetLLC exceeded the page limitations explicitly listed in article 5.2.2 of the RFP. The excess pages were removed from all copies and returned to the Offeror and not evaluated pursuant to instructions contained in the RFP.

Utilizing the evaluation process below, the SEP conducted an initial evaluation of the fifteen proposals deemed acceptable for evaluation. The resulting technical capability rating, past performance rating, and price evaluation of each offeror’s proposal was presented to the SSA and provided the basis for making a competitive range determination. Based on these findings the SSA was unable to make a selection.

Pursuant to FAR 15.306(c)(1), the Contracting Officer determined that the four highest rated offerors were within the competitive range:

1. Brilliant Corporation
2. The Crewestone Team
3. Unispec Enterprises, Inc.
4. Wichita Tribal Enterprises, LLC

Offerors not found to be within the competitive range were notified on August 23, 2012. Discussions were held with each offeror in the competitive range on September 6 and 7, 2012 with Final Proposal Revision 1 due on October 1, 2012. All Offerors in the competitive range submitted Final Proposal Revision 1. After completion of evaluations, discussions were reopened in order to resolve ambiguities in the RFP regarding the revised period of performance from the initial RFP (12 month base to a 9 month
base) and revise the pricing template model to reflect a nine month base to match the period of performance. This was done in accordance with NASA FAR Supplement 1815.307(b)(ii) via authorization by the Procurement Officer. To effectuate meaningful discussions, all offerors remaining in the competitive range were allowed to correct any weaknesses identified within the Final Proposal Revision 1. A second round of discussions was held with all four offerors on October 31, 2012, with Final Proposal Revision 2 due on November 13, 2012.

After this second round of discussions concluded, the offerors remaining in the competitive range all timely submitted their FPR2. Again using the below described evaluation process, the SEP conducted a final evaluation of each offeror’s FPR2, the results of which were presented to the SSA as discussed below.

**EVALUATION PROCESS**

The SEP reviewed all of the instructions to offerors in the solicitation, including the provisions related to the Government’s intention to award without discussions. In so doing, the SEP verified that the RFP stated that award would be made “to the responsible offeror whose offer ... will be most advantageous to the Government.” In addition, it was noted that this provision was consistent with Section (g) of Clause 52.212-1, Instructions to Offerors - Commercial Items, which states “The Government may accept other than the lowest offer.” Section (g) of Clause 52.212-1 also provided that “The Government intends to evaluate offers and award a contract without discussions with offerors.”

The evaluation criteria were stated in the solicitation, including three factors and the relative importance of each. The three evaluation factors are:

1. Technical Capability
2. Price
3. Past Performance

The RFP states, “Technical Capability is significantly more important than Past Performance,” and that “Technical Capability and Past Performance, when combined, are equal to price.”

**TECHNICAL CAPABILITY**

The RFP specified the following three subfactors under Technical Capability listed in descending order of importance:

1. Management Proposal (MP)
   - Overall Management Approach
   - Organizational Structure
   - Total Compensation Plan
   - Phase-in Plan
   - Organizational Conflict of Interest Mitigation Plan
   - Safety and Health Plan
2. Technical Approach (TA)
   - Overall Technical Approach
   - Staffing and Skill Mix
   - Incumbent Capture Plan
   - Key Personnel/Letters of Intent
3. Sample Scenario
The SEP evaluated the proposals, identified findings and categorized them utilizing the following definitions:

- **Significant Strength:** An aspect or combination of strengths that appreciably increases the confidence of successful contract performance. Significant strength ratings shall be annotated as “high” (SS_H), “low” (SS_L), or without annotation.
- **Strength:** An aspect in the proposal that increases the confidence of successful contract performance. Strength ratings shall be annotated as “high” (S_H), “low” (S_L), or without annotation.
- **Weakness:** A flaw in the proposal with a probability of lowering the level of performance, but not to the extent that successful contract performance is at risk.
- **Significant Weakness:** A flaw in the proposal that appreciably increases the risk of unsuccessful contract performance. Significant weakness ratings shall be annotated as “high” (SW_H), “low” (SW_L), or without annotation.
- **Deficiency:** A failure of a proposal to address a material aspect of the proposal instructions in Section 5.3 or a material failure of a proposal to meet a Government requirement, or a combination of significant weaknesses in a proposal, that increases the risk of unsuccessful contract performance to an unacceptable level.

Then, based upon the nature, number and the relative sub-factor importance of the findings, the SEP assigned an overall technical capability adjective rating utilizing the following definitions:

- **Excellent:** A comprehensive and thorough proposal of exceptional merit with one or more significant strengths. No deficiency or significant weakness exists.
- **Very Good:** A proposal having no deficiency and which demonstrates overall competence. One or more significant strengths or several strengths have been found, and strengths outweigh any weaknesses that exist.
- **Good:** A proposal having no deficiency and which shows a reasonably sound response. There may be strengths or weaknesses, or both. As a whole, weaknesses not off-set by strengths do not significantly detract from the offeror’s response.
- **Fair:** A proposal having no deficiency and which has one or more weaknesses. Weaknesses outweigh any strengths.
- **Poor:** A proposal that has one or more deficiencies or significant weaknesses that demonstrate a lack of overall competence or would require a major proposal revision to correct.

**PRICE**

The SEP evaluated price based on the offerors proposed costs and fees for the phase in period, base year period and the three option periods. The SEP assessed the validity, reasonableness, adequacy and realism of the proposed costs. The offerors fully loaded labor rates (including fee) were entered into the Independent Government Estimate (IGE) Staffing Plan and compared the results to the proposed costs.

**PAST PERFORMANCE**

The SEP evaluated past performance based on the performance from questionnaire evaluation results, review of information in the Past Performance Information Retrieval System (PPIRS), combined with relevancy of previous contracts compared to the scope of services and size of KISS III in order to determine an overall confidence rating for each offeror.
Questionnaire assessment was rated as follows:

- **Excellent**: Of exceptional merit; exemplary performance in a timely, efficient, and economical manner; very minor (if any) deficiencies with no adverse effect on overall performance.
- **Very Good**: Very effective performance, fully responsive to contract requirements; contract requirements accomplished in a timely, efficient, and economical manner for the most part; only minor deficiencies.
- **Good**: Effective performance; fully responsive to contract requirements; reportable deficiencies, but with little identifiable effect on overall performance.
- **Fair**: Meets or only slightly exceeds minimum acceptable standards; adequate results; reportable deficiencies with identifiable, but not substantial, effects on overall performance.
- **Poor**: Does not meet minimum acceptable standards in one or more areas; remedial action required in one or more areas, deficiencies in one or more areas which adversely affect overall performance.
- **N/A**: Not applicable

Relevancy considers such things as service similarity and contract dollar value for the prime and major or critical subcontractors. The rating is based on data provided in offeror’s past performance volume, reference questionnaires, reference interviews, and other data independently obtained by the SEP from NASA and/or the Government agency past performance data bases. The SEP assessed the degree of relevancy of offeror’s cited prior contracts using the ratings/guidance listed below.

- **High**: Past/present performance effort involved essentially the same magnitude of effort and complexities this solicitation requires.
- **Moderate**: Past/present performance effort involved much of the magnitude of effort and complexities this solicitation requires.
- **Low**: Past/present performance effort involved some of the magnitude of effort and complexities this solicitation requires.
- **No**: Past/present performance effort did not involve any of the magnitude of effort and complexities this solicitation required.

An overall past performance confidence assessment was assigned by the SEP based on consideration of all findings using the following guidance:

- **Very High**: The Offeror’s relevant past performance is of exceptional merit and is very highly pertinent to this acquisition; indicating exemplary performance in a timely, efficient, and economical manner; very minor (if any) problems with no adverse effect on overall performance. Based on the Offeror’s performance record, there is a very high level of confidence that the Offeror will successfully perform the required effort.
- **High**: The Offeror’s relevant past performance is highly pertinent to this acquisition; demonstrating very effective performance that would be fully responsive to contract requirements with contract requirements accomplished in a timely, efficient, and economical manner for the most part with only minor problems with little identifiable effect on overall performance. Based on the Offeror’s performance record, there is a high level of confidence that the Offeror will successfully perform the required effort.
- **Moderate**: The Offeror’s relevant past performance is pertinent to this acquisition, and it demonstrates effective performance; fully responsive to contract requirements; reportable problems, but with little identifiable effect on overall performance. Based on the Offeror’s performance record, there is a moderate level of confidence that the Offeror will successfully perform the required effort.
* Low: The Offeror’s relevant past performance is at least somewhat pertinent to this acquisition, and it meets or slightly exceeds minimum acceptable standards; adequate results; reportable problems with identifiable, but not substantial, effects on overall performance. Based on the Offeror’s performance record, there is a low level of confidence that the Offeror will successfully perform the required effort. Changes to the Offeror’s existing processes may be necessary in order to achieve contract requirements.
* Very Low: The Offeror’s relevant past performance does not meet minimum acceptable standards in one or more areas; remedial action required in one or more areas; problems in one or more areas which adversely affect overall performance. Based on the Offeror’s performance record, there is a very low level of confidence that the Offeror will successfully perform the required effort.
* Neutral: In the case of an Offeror without a record of relevant past performance or for whom information on past performance is not available, the Offeror may not be evaluated favorably or unfavorably on past performance [see FAR 15.305(a) (2) (ii) and (iv)].

Final Proposal Revision 2 Evaluation Findings:

Brilliant Corporation

Technical Capability

The SEP rated the Brilliant Corporation proposal “Excellent,” finding one strength and three significant strengths. The Offeror’s strength is:

* A qualified Program Manager with relevant program management experience (TA).

The Offeror’s significant strengths are:

* Detailed insight into how the Program Manager orchestrates the various levels of management into one sound, comprehensive and feasible management approach (MP),
* On-the-job training programs and company offered education programs to ensure employees have skills required for their position and to build skills for future positions (TA), and
* A highly effective process that outlines the organization chain of command, the relationship of the onsite program manager to the parent organization, and any decisions or approvals to be made outside the local organization (MP).

Past Performance

The SEP’s confidence rating of Brilliant Corporation’s past performance is “High.” This confidence rating is based upon review of received past performance questionnaires and information in the Past Performance Information Retrieval System (PPIRS) which, when combined, resulted in an overall performance rating of “Excellent” and a relevancy rating for previous contracts of “Medium” compared to the scope of KISS III.

The Crewestone Team

Technical Capability

The SEP rated The Crewestone Team’s proposal “Excellent,” finding two strengths and two significant strengths. The Offeror’s strengths are:
- Providing clear insight to discrete management tasks and responsibilities to be performed by each of the teaming partners relative to the SOW (MP), and
- Describes the technical challenges of the diverse skills mix and the broad-based functional areas (TA).

The Offeror’s significant strengths are:

- Describing highly effective management strategies, policies and procedures which display a thorough knowledge of the breadth and scope of the contract by providing a documented risk management process including root cause analysis and preventive action processes (MP), and
- A highly qualified Program Manager with specifically relevant experience managing a contract of the size and scope of KISS III (TA).

Past Performance

The SEP’s confidence rating of The Crewestone Team’s past performance is “High.” This confidence rating is based upon the review of received past performance questionnaires and information in the Past Performance Information Retrieval System (PPIRS) which, when combined revealed an overall performance rating of “Excellent” and a relevancy rating for previous contracts of “Medium” compared to the scope of KISS III.

Unispec Enterprises, Inc.

Technical Capability

The SEP rated the Unispec Enterprises, Inc. proposal “Excellent,” finding one strength, and three significant strengths. The Offeror’s strength is:

- Describing a highly-effective process for recruiting, selecting and training replacement and additional personnel necessary to maintain or accommodate fluctuating requirements (TA).

The Offeror’s significant strengths are:

- A management plan containing a system for identifying, assessing and mitigating risk that includes KSC in the process, to include the CO and COTR (MP),
- A quality control plan that incorporates NASA strategic goals and execution of a corporate quality review panel (MP), and
- A highly qualified Program Manager with specifically relevant experience managing a contract of the size and scope of KISS III (TA).

Past Performance

The SEP’s confidence rating of Unispec Enterprises, Inc.’s past performance is “Moderate.” This confidence rating is based upon the review of received past performance questionnaires and information in the Past Performance Information Retrieval System (PPIRS) which, when combined revealed an overall performance rating of “Excellent” and a relevancy rating for previous contracts of “Low” compared to the scope of KISS III.
Wichita Tribal Enterprises, LLC

Technical Capability

The SEP rated the Wichita Tribal Enterprises, LLC proposal “Excellent,” finding six significant strengths as follows:

- Providing a process for rapidly backfilling position as well as maintaining the staff’s required education, certifications, capabilities and training directly related to SOW requirements (MP),
- A highly competitive benefits package and incentives, and a commitment to offer wages no less than currently paid to incumbent KISS employees, demonstrating the ability to retain highly-qualified and exceptionally experienced personnel (MP),
- Provides details of how management through metrics allowed for the Offeror to calculate a skill mix balance that could be maintained through employee attrition or work reassignment rather than employee termination (TA),
- The Offeror's proposal to pay the existing salaries and benefits (or greater) which appreciably increases confidence in the Offeror’s proposed incumbent capture rate (TA),
- Provides details into their methods for understanding the customer’s requirements and translating them into comprehensive interviews and specific tests tailored to select the best candidates (TA), and
- A highly qualified Program Manager with specifically relevant experience managing a contract the size and scope of KISS III (TA).

Past Performance

The SEP’s confidence rating of Wichita Tribal Enterprises, LLC’s past performance is “High.” This confidence rating is based upon the review of received past performance questionnaires and information in the Past Performance Information Retrieval System (PPIRS) which, when combined revealed an overall performance rating of “Very Good” and a relevancy rating for previous contracts of “High” compared to the scope of KISS III.

Final Proposal Revision 2 Pricing

The SEP notes Brilliant’s proposed price was highest, followed by Crewestone. Crewestone’s price is higher than Wichita. Unispec has the lowest proposed price.

SELECTION DECISION

I first note that there are three evaluation factors specified in the RFP, namely, Technical Capability, Price, and Past Performance. Within Technical Capability, there were three subfactors: management proposal, technical approach, and a sample scenario. I also take note that the relative importance of these evaluation factors are that technical capability is significantly more important than past performance and that within the technical capability factor the management plan is more important that the technical approach, which is more important that the sample scenario. I note also that when technical capability and past performance are combined, they are equal to price. Utilizing these evaluation factors, the RFP also provides that the Government intends to award a contract to the responsible offeror whose offer will be most advantageous to the Government, price and other factors considered. I note that this allows me to make a selection based on other than the lowest price, in accordance with the trade-off process described in FAR 15.101-1.
At the conclusion of the SEP’s presentation of the above discussed findings, I solicited additional comments from the evaluators and advisers present. After careful deliberation, taking into account the SEP’s evaluation, I comparatively assessed the four proposals based upon the evaluation criteria stated in the RFP. After consideration of the SEP’s evaluation and appurtenant findings related thereto, I noted that the Brilliant Corporation (Brilliant) and The Crewestone Team (Crewestone) offered similar technical solutions with no meaningful technical discriminators to measurably distinguish them from those of Unispec Enterprises, Inc. (Unispec) or Wichita Tribal Enterprises, Inc., (Wichita). Brilliant and Crewestone both proposed measurably higher prices. I also noted that Wichita had a higher past performance relevancy rating than Brilliant and Crewestone, which I considered of significant advantage for successful performance. Given these circumstances, I eliminated Brilliant and Crewestone from further consideration and focused upon comparison of the two low priced proposals, Unispec and Wichita.

Although both Unispec and Wichita received an “Excellent” adjectival rating from the SEP for technical capability, I note that Wichita’s proposal garnered six significant strengths (two for the management plan and four for the technical approach) while Unispec’s proposal garnered three significant strengths (two for the management plan and one for the technical approach) and one strength for technical approach. However, my comparative analysis of these two proposals emphasized qualitative advantages more than merely a quantitative comparison. I requested that the SEP discuss additional comparison between the individual Technical Capability findings associated with Wichita and Unispec. This effort elucidated marked similarities between the two offerors approaches in the Management Proposal subfactor, namely, in their overall management approach, local autonomy and the quality of their organizational structure. I considered these aspects of each offeror’s proposal as beneficial, but ultimately nondiscriminatory given my appraisal of their similarly evaluated approaches. However, under the Management Proposal subfactor, although both proposals each received two significant strengths, I take particular note of Wichita’s significant strength for committing to provide wages and a benefits package that is commensurate with at least that which the incumbent workforce currently enjoys and is highly competitive for the level of skills and experience as expressed in the labor position descriptions. I am particularly confident in the validity of Wichita’s commitment because they relied upon specific incumbent employee historical data supplied by their major subcontractor (the current incumbent KISS contractor) and built these costs into their proposal. I note that Unispec did not make a similar commitment and received no strengths in this area. I consider this facet of Wichita’s proposal within this most important of the three subfactors as a great benefit to the Government, as it appreciably enhances labor force stability by reducing the risk of employee turnover, and assures the ability to attract qualified personnel when necessary. I considered Wichita’s commitment regarding employee wages and benefits package to be a key discriminator in my ultimate determination that Wichita’s proposal is most advantageous to the Government.

In the Technical Approach subfactor, I first took note that Wichita and Unispec both proposed the same three highly qualified key personnel and received the same significant strength ratings, rendering this facet nondiscriminatory. Within the Technical Approach subfactor Unispec also received a strength and Wichita received three additional significant strengths. Unispec’s strength and two of Wichita’s significant strengths dealt with the areas of recruiting, training, managing skill mix and accommodating fluctuating requirements. Wichita detailed a highly effective, thorough, and comprehensive approach that addresses recruiting, selecting, and training personnel, including the tailoring of these processes to the KISS III specific requirements; describes proven policies, procedures, and metrics that allow for Wichita to calculate a skill mix balance that could be maintained through employee attrition or work assignment rather than termination; proposes a synergistic approach for continuous education that combines mentoring, cross-training, reduction of single point failures through redundancy when needed, and creation of a monthly forum for knowledge sharing across administrative secretarial staff. These aspects of Wichita’s proposal are of great benefit to the Government, significantly increasing the likelihood of
successful accomplishment of KISS III requirements. Unispec also describes effective processes for the recruitment and selection of staff for the contract requirements, including necessary approach differentiation in staffing to accommodate fluctuating contract requirements. However, the SEP’s evaluation notes that Unispec’s plan is generic in nature, whereas Wichita’s has been uniquely applied to KISS III specific contract requirements. I believe that while both approaches are likely to succeed from a technical perspective, Wichita’s represents a qualitatively superior approach by being specifically tailored to the KISS III scope of work from the first day of contract performance. Wichita’s superior treatment of this facet of the Technical Approach subfactor is another discriminator in my ultimate determination that Wichita’s proposal is most advantageous to the Government.

In the Technical Approach Subfactor I take note that both Unispec and Wichita proposed 100% capture rates. Wichita’s proposal clearly substantiated the basis for their proposed 100% capture rate by specifically committing to offer each incumbent no less than their current salaries and wages and a benefits package commensurate with their current benefits. Wichita states that their commitment is based upon incumbent employee historical data, resulting in a high degree of confidence that Wichita can achieve their proposed 100% capture rate. While Unispec proposed a 100% capture rate, their proposal indicated they would offer prevailing total compensation based upon market research rather than the specific incumbents, and did not commit to assuring incumbents would be offered no less than their current total compensation. Unispec’s proposal does not provide adequate evidence to support confidence that they have sufficiently specific information about the current salaries, wages and benefits of the current KISS labor force to assure their proposed 100% capture rate. Wichita’s approach and attendant higher probability of likely success in achieving their proposed capture rate ensures complete continuity in skills across the labor force and is another key discriminator in my ultimate determination that Wichita’s proposal is most advantageous to the Government.

When comparing past performance between Wichita and Unispec, I first noted that while Unispec has an excellent past performance record on their past administrative contracts, the largest contract that they have ever managed had a total of only nine employees, resulting in a “low” relevancy rating. Wichita earned a very good past performance rating, but, most significantly, was rated as having the highest relevant experience, including partnering with a major subcontractor who is the very successful incumbent for the current KISS contract. The SEP assigned an overall past performance confidence assessment for Unispec of “moderate.” However, I disagree with this assessment and consider Unispec’s most related contract of only nine personnel, compared to the larger (129 personnel) and very diverse (53 labor categories) KISS III contract, to be only marginally pertinent and barely meeting acceptable standards, and deserving of only a “low” overall past performance confidence assessment. KISS III will involve the management of a significant number of highly diverse labor categories and a workforce size an order of magnitude more complicated and demanding than Unispec has previously managed. This difference in relevant experience factored heavily in my ultimate determination that Wichita’s proposal is most advantageous to the Government.

After ascertaining the risks and benefits associated with each proposal, I believe Wichita Tribal Enterprises, LLC represents the proposal that is most advantageous to the Government. I do so considering Wichita’s Technical Capability to be qualitatively superior; namely, Wichita’s informed commitment to offer Total Compensation no less than each incumbent’s current total compensation, thorough and specifically tailored treatment of the areas of recruiting, training, managing skill mix and accommodating fluctuating requirements, and confidence in Wichita’s proposed 100% Incumbent Capture Rate I also find Wichita’s highest possible rating on relevant past performance compared to a low rating for Unispec of particularly significant benefit. I consider the value of the superior aspects of the Wichita proposal compared to Unispec to be more than sufficiently advantageous as to warrant the 1.5% additional potential cost. I determine that the superior aspects of the Wichita proposal will significantly
enhance confidence of highly successful contract performance and labor force stability, and will justify the marginal additional cost for a contract of the size, complexity and duration of KISS III.

Based on the foregoing analysis, I select Wichita Tribal Enterprises, LLC for award of the KISS III contract.
