

NASA's CubeSat Launch Initiative (CSLI) provides launch opportunities to a variety of U.S. CubeSat developers. Their small satellite payloads fly as auxiliary payloads on previously planned launches or commercial missions to low Earth orbit and deep space destinations as well as International Space Station deployments.

Accomplishments

- 220+ CubeSat projects selected to date from 100+ organizations, including 40+ states and Puerto Rico
- 148 Initiative CubeSats launched on 43 ELaNa missions
- 35+ CubeSats launched in the past 28 months on 15 missions despite the pandemic

Opportunities

- Facilitating the launch of 18 CubeSats in the remainder of 2022
- Securing Launches of 20 unmanifested/uncontracted CSLI selected CubeSats

CSLI / ELaNA CubeSat Launch Initiative / Educational Launch of Nanosatellite

National Aeronautics and
Space Administration

Announcement of Partnership Opportunity

- Release Date: August 8, 2022
- Response Due Date: November 18, 2022 @ 4:30 p.m.
- Selection Date: February 2023
- Award Amount: Up to \$300k for launch and integration

NASA Space Operations Mission Directorate anticipates offering launch opportunities for a limited number of CubeSats on launches or deployments from the ISS currently planned for 2024-2027.

Applicant Eligibility

- Must be from a NASA Center, a U.S. non-profit organization or a U.S. accredited educational organization.
- Applicant is responsible for securing funding to support the development of the CubeSat payload and for all other costs incurred by applicant to support participation in the project.
