Scobee Education Center's 2021 CAAT Project Proposal

Richard S Varner
2/01/22 - 5/31/24

Safely observing the Sun with a solar telescope.
Credits: Scobee Education Center

Solar programming in advance of, and to prepare the local community for, the Annual and Total solar eclipses of 2023 and 2024. Pre-eclipse workshops will be held for STEM teachers and Boy/Girl Scouts leaders, to equip them to in turn reach a larger cohort of community members in underrepresented communities; informal educators of the Alamo STEM Ecosystem will also be connected with NASA eclipse resources. School districts, teachers and students will be engaged in a Solar Studies Week in advance of hands-on activities and workshops with the Education Center. Through engaging STEM educational opportunities and experiential learning, a new and diverse generation of students will be inspired to become part of a growing STEM workforce.

List of Partners:
- Southwest Independent School District
- Girl Scouts of Southwest Texas
- Intercultural Development Research Association
