Revision 1 documents the results of the SETMO Capability Portfolio Exclusion Exercise conducted by the SETCB. The exclusion exercise was performed in accordance with NPR 8600.1., NASA Capability Portfolio Management Requirements, Section 2.1.3. The result was the exclusion of a significant number of capability components from Tier 2.

Section	Page	From	To	Comment
1.2 Background	6		In December 2020, the SET Control Board concurred with the results from the CPM Policy (NPD/R 8600.1, Section 2.1.3) Exclusion Exercise which reduced the number of Tier 2 capability components.	Added the language in the “To” column in a new paragraph.
1.5 Scope, Products, and Services	8	The SETMO Tier 2 is the collection of those capability components approved by the Agency SMC in August 2005 that were not provided SCAP sustainment funding and those capability components added through the November 2015 MSC decision that created SETMO.	The SETMO Tier 2 is the collection of those capability components approved by the Agency SMC in August 2005 that were not provided SCAP sustainment funding and those capability components added through the November 2015 MSC decision that created SETMO that were not excluded per the December 2020 Exclusion Exercise.	Added the language at the end of the “From” statement.
