UNITED promotes awareness of NASA space exploration and diversity and inclusion culture, and provides opportunities for BIPOC youth ages 12-17 to see themselves represented in STEM, highlighting the inspirational achievements and contributions of Black, Indigenous, and People of Color (BIPOC) figures at NASA. An original, feature-length fulldome planetarium show comes with a companion educator guide, an online microsite with a suite of thematically-related online digital educational resources, and strategies for in-museum visitors to access the online materials as they are exploring space exploration-themed physical

exhibits. A variety of learning modes allow youth to experience the content from anywhere.

## List of Partners:
