

MONTANA

NASA Overall State Impact⁽¹⁾

- Jobs Supported: 152
- Economic Output: \$24,289,000
- State Tax Revenue: \$686,000

Moon to Mars Campaign State Impacts

- Jobs Supported: 19
- Economic Output: \$2,536,000
- State Tax Revenue: \$81,000

Investments in Climate Change Research & Technology State Impacts

- Jobs Supported: 57
- Economic Output: \$9,064,000
- State Tax Revenue: \$257,000

FY21 State Procurement Investments ⁽²⁾ \$9.7 M

Sample Obligations ⁽³⁾

Business	\$1,159,592
• Other Than Small Business	\$0
• Small Business	\$1,159,592
– 8(A) Program	\$0
– Economically Disadvantaged Women Owned Small Business	\$0
– Historically Underutilized Business (HUBZone)	\$47,630
– Service Disabled Veteran Owned Small Business	\$0
– Small Business Innovative Research	\$816,435
– Small Disadvantaged Business	\$12,072
– Veteran Owned Small Business	\$47,630
– Woman Owned Small Business	\$0
– Small Business Only	\$283,455
Educational	\$9,373,417
Government	\$0
Non-profit Institutions	\$0

Leading State-based NASA Business Contractors

Anasphere, Inc.	\$450,007
Resonon, Inc.	\$234,928
Resilient Computing, LLC	\$141,500
AdvR, Inc.	\$141,375
Altos Photonics, Inc.	\$88,843

Leading State-based NASA Education Funding

Montana State University	\$7,310,913
University of Montana	\$2,067,142

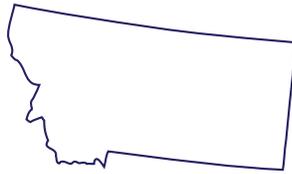

Space Grant Consortium

Montana State University	\$1,175,352
--------------------------	-------------

MONTANA

152

**NASA Jobs
Supported**

There are 2 NASA Federal jobs and 102* contractors in the state of Montana.

For every NASA federal job located in Montana, an additional 75** jobs are supported in the state economy. For every million dollars' worth of economic output generated by NASA federal jobs, an additional \$29** million worth of output is sustained throughout the state economy.

* Indirect effects are the purchases of goods and services by government agencies and private sector contractors, as well as by the industries that supply them.

** Multiplier based on IMPLAN Input Output (I-O) model. To learn more, please visit: <https://blog.implan.com/understanding-implan-multipliers>

A microbe found in Yellowstone National Park during NASA-funded research is now the basis of a fungal protein which will produce meat-alternative breakfast patties and non-dairy cream cheese. The protein is also growing on the International Space Station as potential astronaut food, which could one day help ensure sustainable nutrition globally.

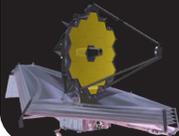

Two Montana suppliers contributed to NASA's Artemis program. An example of the state's contributions is the design, fabrication, testing, and delivering of the landing and recovery crew egress stand to recover Orion from the Pacific Ocean.
