

ENERGY AT NASA

In FY23, NASA used 7,434 billion btus – enough to power 96,423 homes for one year.

All that energy comes at a cost... In FY23, NASA spent \$127 million on energy

This energy supports every aspect of NASA's mission, including big energy uses like

- research laboratories
- data centers
- wind tunnels
- spacecraft assembly facilities
- thermal vacuum chambers
- test stands
- launch pads
- antennas
