

A NASA+ ORIGINAL

COSMIC DAWN

THE UNTOLD STORY OF THE
JAMES WEBB SPACE TELESCOPE

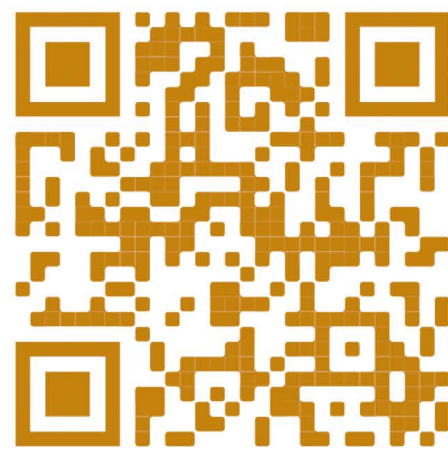

THIS TELESCOPE CHANGED EVERYTHING.

The James Webb Space Telescope is the world’s premier space science observatory. Webb is solving mysteries in our solar system, looking beyond to distant worlds around other stars, and probing the mysterious structures and

origin of our universe and our place in it. Webb is an international program led by NASA with its partners, ESA (European Space Agency) and CSA (Canadian Space Agency).

Curious about how NASA’s most ambitious mission came to be?

COSMIC DAWN

The world's top scientists and engineers came together to build the James Webb Space Telescope, a machine that unfolded in space and now orbits a million miles from Earth, revealing the origins of everything. Cosmic Dawn lets you experience the journey with never-before-seen footage from the Webb film crew, capturing the untold struggles, breathtaking risks, and sheer determination it took to make history.

Cosmic Dawn will be available on NASA+, the agency’s on-demand streaming service.

NASA+ is available to download on most major platforms via the NASA Apps on iOS and Android mobile devices, as well as streaming media players Roku and Apple TV.
