SNOW AND ICE REMOVAL

Priorities for removing snow and ice from MSFC area.

Priority 1

1. Buildings 4200, 4201, 4202, 4203, 4346, 4600 and parking lots.
2. Building 4249 (Medical Center), 4207, and 4663.
3. Apollo Road.
4. Digney Road.
5. Mercury Road.
6. Dodd Road within Test Area to 4566 and 4666.
7. Access roads to MSFC gas stations.
8. Assist Redstone Garrison, if required, in cleaning their designated MSFC areas.
9. Highway 20 overpasses on Rideout Road, outside Gate 9.

Priority 2

All remaining roads and streets.

Priority 3

All parking lots.

Redstone Garrison is to clear Rideout Road, Martin Road, Morris Road, Neal Road, and Dodd Road to the Test Area entrance. This is in accordance with the Army/MSFC Agreement.

PM4200-AH0002	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4200-AH0003	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4200-AH0004	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4200-AH0005	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4200-AH0006	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4200-AH0007	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4200-AH0008	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4200-AH0009	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4200-ATS0001	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4200-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check battery
			Check connections and battery charger
			Check generator output
			Winterize system
			Verify continuity of generator ground, including the fuel tank ground
			Verify day tank's fuel level is topped off between float ranges, if applicable.
PM4200-HST0001	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4200-HUM0001	Preventive Maintenance - Humidifier	90-Day Humidifier, Electric Generator Type	Check operation and controls. If any problems are found issue work request
			Check canister for mineral build-up
			Check fill valve
			Check dump valve
			Inspect Vapor hoses
PM4200-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4200-KVHD0001	Preventive Maintenance - Vent Hood	90-Day: Vent Hood	Check for abnormal grease build-up, clean if necessary
PM4200LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4200-LTS0001	Preventive Maintenance - Aircraft Lights	30-Day: Aircraft/Aviation Lights	Verify operation
PM4200-LTS0002	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4200-LTS0003	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor (Post RCM)	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil and oil filter. Change as necessary.
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4201-ACMP0002	Preventive Maintenance - Air Compressor Control	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor (Post RCM)	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil and oil filter. Change as necessary.
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4201-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
			Lubricate condenser motor as necessary
		180-Day: Air Dryer, Refrigerant Type	Check operation and controls. If problem found then issue work request.
			Drain and flush
			Drain water separator
			Lubricate condenser motor as necessary
			Clean condenser coils
PM4201-ADRY0002	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
			Lubricate condenser motor as necessary
		180-Day: Air Dryer, Refrigerant Type	Check operation and controls. If problem found then issue work request.
			Drain and flush
			Drain water separator
			Lubricate condenser motor as necessary
			Clean condenser coils
PM4201-ATS0001	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4201-ATS0002	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4201-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4201-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4201-CHWP0003	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4201-CHWP0004	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4201-CHWP0005	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4201-CRU0005	Preventive Maintenance - Computer Room Unit	30-Day: Critical Computer Room Type Air Handling Unit, Chill Water or Water-Cooled Combination Type	Check operation and controls. If any problems found then issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Inspect drains for proper flow and clarity.
		90-Day: Critical Computer Room Type Air Handling Unit, Chill Water or Water-Cooled Combination Type	Check operation and controls. If any problems found then issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lubricate blower motor as necessary
			Check safety interlocks
			Clean drain pans, vacuum drains, and insure drain clarity
PM4201-DOOR0001	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure
			Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
PM4201-DOOR0002	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure
			Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
PM4201-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Critical Direct Expansion Unit Package, Water-Cooled	Check operation and controls. If any problems are found issue work request
			Lubricate blower motor as necessary
PM4201-DXAC0002	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven	Check operation and controls. If any problems are found issue work request.
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
		365-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
			Clean condenser and evaporator coils
			Check safety interlocks
PM4201-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4201-ELEV0001	Preventive Maintenance - Cable Elevator	30-Day: Cable Elevator with Computer Controls	Verify operation of all safety edges
			Verify operation of emergency telephone
			Check and clean all electrical panels

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Inspect and lubricate governors
			Check brushes on drive motors
			Check sensitivity of door closure pressure
			Inspect hoistways and car top
PM4201-ELEV0002	Preventive Maintenance - Cable Elevator	30-Day: Cable Elevator with Computer Controls	Verify operation of all safety edges
			Verify operation of emergency telephone
			Check and clean all electrical panels
			Inspect and lubricate governors
			Check brushes on drive motors
			Check sensitivity of door closure pressure
			Inspect hoistways and car top
PM4201-ELEV0003	Preventive Maintenance - Cable Elevator	30-Day: Cable Elevator with Computer Controls	Verify operation of all safety edges
			Verify operation of emergency telephone
			Check and clean all electrical panels
			Inspect and lubricate governors
			Check brushes on drive motors
			Check sensitivity of door closure pressure
			Inspect hoistways and car top
PM4201-ELEV0004	Preventive Maintenance - Hydraulic Elevator	30-Day: Hydraulic Elevator with Manual Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Inspect hoistways and car top
			Check oil reservoir
PM4201-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4201-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4201-EROOM0003	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4201-EROOM0004	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4201-EROOM0005	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4201-EROOM0006	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.

PM4201-FIRP0001	Preventive Maintenance - Fire Pump - Millwright	90-Day: Millwright PM for Fire Pump	Change oil after 50 hours of operation
			Change oil filter after 50 hours of operation
			Verify that shaft seals are dripping water properly (1 drop per second)
			Verify that the system is free of vibration or unusual noise
			Verify that the packing boxes, bearings, pump casing are free of overheating
PM4201-GEN0001	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request

PM4201-ROOF0003	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4201-RV0001	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4201-RV0002	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4201-SAF0001	Preventive Maintenance - Supply Air Fan	90-Day: Supply or Return Air Fan (Downtime)	Check operation and controls. If any problems are found issue work request
		180-Day: Supply or Return Air Fan (Downtime)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate as necessary
PM4201-SAF0002	Preventive Maintenance - Supply Air Fan	90-Day: Supply or Return Air Fan (Downtime)	Check operation and controls. If any problems are found issue work request
		180-Day: Supply or Return Air Fan (Downtime)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate as necessary
PM4201-SLPMP001A	Preventive Maintenance - Sewage Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
PM4201-SLPMP001B	Preventive Maintenance - Sewage Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
PM4201-SPMP001A	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4201-SPMP001B	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4201-SPR0001	Preventive Maintenance - Stand Pipes	30-Day Stand Pipe Inspection	Perform Inpection
		365-Day: Stand Pipe Inspection	Perform PM
PM4201-VSC0001	Preventive Maintenance - Variable Speed Drive	365-Day: Variable Speed Controller	Check for excessive heat, odors, noise and vibration.
			Clean and check the general condition of variable speed drive panel.
PM4201-VSC0002	Preventive Maintenance - Variable Speed Drive	365-Day: Variable Speed Controller	Check for excessive heat, odors, noise and vibration.
			Clean and check the general condition of variable speed drive panel.
PM4202-ACFLT0001	Preventive Maintenance - Air Compressor Filter Change	365-Day: Air Compressor Filter Change	Replace Filter(s) on air compressor unit.
PM4202-ACFLT0002	Preventive Maintenance - Air Compressor Filter Change	365-Day: Air Compressor Filter Change	Replace Filter(s) on air compressor unit.
PM4202-ACMP0001	Preventive Maintenance - Air Compressor Control	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor (Post RCM)	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil and oil filter. Change as necessary.
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4202-ACMP0002	Preventive Maintenance - Air Compressor Control	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor (Post RCM)	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil and oil filter. Change as necessary.
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4202-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
			Lubricate condenser motor as necessary
		180-Day: Air Dryer, Refrigerant Type	Check operation and controls. If problem found then issue work request.
			Drain and flush
			Drain water separator
			Lubricate condenser motor as necessary
			Clean condenser coils

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4202-ATS0001	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4202-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4202-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4202-DOOR0001	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure
			Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
PM4202-DOOR0002	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check emergency release mechanisms (where applicable)
			Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure
			Clean tracks and check for proper alignment
PM4202-DOOR0003	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
			Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure
PM4202-DOOR0004	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
			Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
PM4202-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven	Check door closure pressure
			Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
			Check operation and controls. If any problems are found issue work request.

PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
		365-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
			Clean condenser and evaporator coils
			Check safety interlocks
PM4202-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4202-ELEV0001	Preventive Maintenance - Cable Elevator	30-Day: Cable Elevator with Computer Controls	Verify operation of all safety edges
			Verify operation of emergency telephone
			Check and clean all electrical panels
			Inspect and lubricate governors
			Check brushes on drive motors
			Check sensitivity of door closure pressure
			Inspect hoistways and car top
PM4202-ELEV0002	Preventive Maintenance - Cable Elevator	30-Day: Cable Elevator with Computer Controls	Verify operation of all safety edges
			Verify operation of emergency telephone
			Check and clean all electrical panels
			Inspect and lubricate governors
			Check brushes on drive motors
			Check sensitivity of door closure pressure
			Inspect hoistways and car top
PM4202-ELEV0003	Preventive Maintenance - Cable Elevator	30-Day: Cable Elevator with Computer Controls	Verify operation of all safety edges
			Verify operation of emergency telephone
			Check and clean all electrical panels
			Inspect and lubricate governors
			Check brushes on drive motors
			Check sensitivity of door closure pressure
			Inspect hoistways and car top
PM4202-ELEV0004	Preventive Maintenance - Hydraulic Elevator	30-Day: Hydraulic Elevator with Manual Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Inspect hoistways and car top

PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check oil reservoir
PM4202-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System (Night Shift)	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
			Perorm all work after core hours.
PM4202-FID0001	Preventive Maintenance - Field Interface Device	90-Day Field Interface Device	Change filters if necessary
PM4202-FILT0001	Preventive Maintenance - Filters	90-Day Filter PM (Night-Shift)	Check filters, change if necessary
PM4202-FILT0002	Preventive Maintenance - Filters	90-Day Filter PM (Night-Shift)	Check filters, change if necessary
PM4202-FILT0003	Preventive Maintenance - Filters	90-Day Filter PM (Night-Shift)	Check filters, change if necessary
PM4202-FIRP0001	Preventive Maintenance - Fire Pump - Millwright	90-Day: Millwright PM for Fire Pump	Change oil after 50 hours of operation
			Change oil filter after 50 hours of operation
			Verify that shaft seals are dripping water properly (1 drop per second)
			Verify that the system is free of vibration or unusual noise
			Verify that the packing boxes, bearings, pump casing are free of overheating
PM4202-GEN0001	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts

			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		365-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Winterize system
			Verify continuity of generator ground, including the fuel tank ground
			Verify day tank's fuel level is topped off between float ranges, if applicable.
PM4202-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4202-HWP0002	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4202-ICE0001	Preventive Maintenance - Ice Machine	30-Day: Ice Machine	Check water filter
		90-Day: Ice Machine	Check water filter
			Check operation and controls. If any problems are found issue work request
			Check water pressure
			Lubricate condenser fan motor as necessary
		180-Day: Ice Machine	Check water filter
			Check operation and controls. If any problems are found issue work request

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4202-SLPMP001B	Preventive Maintenance - Sewage Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4202-SPMP001A	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4202-SPMP001B	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4202-SPR0001	Preventive Maintenance - Stand Pipes	30-Day Stand Pipe Inspection	Perform Inspection
		365-Day: Stand Pipe Inspection	Perform PM
PM4202-TANK0001	Preventive Maintenance -Underground Tank	365-Day: Underground Tank	Inspect Cathodic Protection on underground tank and all associated piping.
PM4202-VSC0001	Preventive Maintenance - Variable Speed Drive	365-Day: Variable Speed Controller	Check for excessive heat, odors, noise and vibration.
			Clean and check the general condition of variable speed drive panel.
PM4202-VSC0002	Preventive Maintenance - Variable Speed Drive	365-Day: Variable Speed Controller	Check for excessive heat, odors, noise and vibration.
			Clean and check the general condition of variable speed drive panel.
PM4203-AH0002	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4203-AH0003	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4203-AH0004	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4203-AH0005	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4203-AH0006	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4203-AH0007	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4203-AH00B1	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4203-AH00B2	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4203-AH00B3	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4203-ATS0001	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4203-ATS0002	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4203-BFP0001	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4203-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4203-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4203-CHWP0003	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4203-CPNL0001	Preventive Maintenance -Fire Pump Control Panel	30-Day Control Panel	Check Operations and Controls. If any problems found then issue work request.
PM4203-CRU0001	Preventive Maintenance - Computer Room Unit	30-Day: Critical Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		90-Day: Critical Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check safety interlocks
		180-Day: Critical Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls
			Check belts, change if necessary
			Lubricate condenser fan
			Lubricate blower motor
			Check and lubricate bearings
			Check suction and discharge pressure
			Check safety interlocks
			Clean condenser and evaporator coils
PM4203-CRU0002	Preventive Maintenance - Computer Room Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems are found issue work request
			Lubricate blower motor as necessary
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4203-DOOR0001	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure
			Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
PM4203-DOOR0002	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
PM4203-DOOR0003	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure
			Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
PM4203-DOOR0004	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure
			Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
PM4203-DPIP0001	Preventive Maintenance -Drain Pipe	30-Day Drain Pipe	Clean Drain
			Obtain Tri-Chem Orange solvent from dayshift ORG# 2320
			Pour Tri-Chem in floor drains and let activate for two hours
			Flush each drain with hot water using sewer sock for ten minutes
			Repeat entire process
PM4203-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			If any problems are found issue work request
PM4203-EAF0002	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4203-EAF0003	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			If any problems are found issue work request
PM4203-EAF0004	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			If any problems are found issue work request
PM4203-EAF0005	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			If any problems are found issue work request
PM4203-EAF0006	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4203-FSS0001	Preventive Maintenance - Fire Suppression System	30-Day: Dry/Wet Chemical Fire Suppression System	Perform PM per Dry/Wet Chemical Form
		180-Day: Wet/Dry Chemical Fire Suppression System	Perform PM per Dry/Wet Chemical Form
PM4203-FSS0002	Preventive Maintenance - Fire Suppression System	30-Day: Dry/Wet Chemical Fire Suppression System	Perform PM per Dry/Wet Chemical Form
		180-Day: Wet/Dry Chemical Fire Suppression System	Perform PM per Dry/Wet Chemical Form
PM4203-FSS0003	Preventive Maintenance - Fire Suppression System	30-Day: Dry/Wet Chemical Fire Suppression System	Perform PM per Dry/Wet Chemical Form
		180-Day: Wet/Dry Chemical Fire Suppression System	Perform PM per Dry/Wet Chemical Form
PM4203-GEN0001	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Verify day tank's fuel level is topped off between float ranges, if applicable.

ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
		365-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Winterize system
			Verify continuity of generator ground, including the fuel tank ground
			Verify day tank's fuel level is topped off between float ranges, if applicable.
PM4203-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4203-HWP0002	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4203-HWP0003	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4203HWTR0001	Preventive Maintenance - Hot Water Treatment	7-day Hot Water Treatment PM	Perform testing on hot water system
			Add chemicals if needed
PM4203HWTR0002	Preventive Maintenance - Hot Water Treatment (Off-season)	7-day Hot Water Treatment PM (Off-season)	Perform testing on hot water system
			Add chemicals if needed
PM4203HWTR0003	Preventive Maintenance - Hot Water Treatment (Off-season)	30-day Hot Water PM (Off-season)	Notify Water Treatment Tech when performing PM (4-1058, 4-6020)
			Open all necessary valves (Supply/Control/Makeup)
			Check to make sure makeup water is on
			Check to make sure system is filled

**NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Coordinate operation with UCS
			Turn on circulation pumps and run for 48 hours
			Shut down pumps and close all necessary valves
PM4203-ICE0001	Preventive Maintenance - Ice Machine	90-Day: Ice Machine	Check water filter
			Check operation and controls. If any problems are found issue work request
			Check water pressure
			Lubricate condenser fan motor as necessary
PM4203-KVHD0001	Preventive Maintenance - Vent Hood	90-Day: Vent Hood	Check for abnormal grease build-up, clean if necessary
PM4203-KVHD0002	Preventive Maintenance - Vent Hood	90-Day: Vent Hood	Check for abnormal grease build-up, clean if necessary
PM4203-KVHD0003	Preventive Maintenance - Vent Hood	90-Day: Vent Hood	Check for abnormal grease build-up, clean if necessary
PM4203-KVHD0004	Preventive Maintenance - Vent Hood	90-Day: Vent Hood	Check for abnormal grease build-up, clean if necessary
PM4203LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4203-LTS0001	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test
			Check condition of lamps
		365-Day: Emergency Lights - Fluorescent Type	Perform 1.5 hour light operational test
			Check condition of lamps
			Check condition of battery
PM4203-LTS0002	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4203-LTS0003	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test
			Check condition of lamps
		365-Day: Emergency Lights - Fluorescent Type	Perform 1.5 hour light operational test
			Check condition of lamps
			Check condition of battery
PM4203-LTS0004	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test
			Check condition of lamps
		365-Day: Emergency Lights - Fluorescent Type	Perform 1.5 hour light operational test
			Check condition of lamps
			Check condition of battery
PM4203-LTS0006	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test
			Check condition of lamps
		365-Day: Emergency Lights - Fluorescent Type	Perform 1.5 hour light operational test
			Check condition of lamps
			Check condition of battery

			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4205-AH0017	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4205-AH0018	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4205-AH0019	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4205-AH0020	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4205-ATS0001	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4205-ATS0002	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls

		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4205-BATB0003	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4205-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4205-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4205-CRN0001	Preventive Maintenance - Crane	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4205-CRN0002	Preventive Maintenance - Crane	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4205-CRN0003	Preventive Maintenance - Crane	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection

PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
		180-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4207-ADRY0003	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4207-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4207-AH0002	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4207-AH0003	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4207-AH0004	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4207-AH0005	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4207-AH0006	Preventive Maintenance - Air Handling Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems are found issue work request
			Lubricate blower motor as necessary
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4207-AH0008	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks

			Check air bleed valves for proper operation where applicable
PM4207-AH00B1	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4207-AH00B2	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4207-ATS0001	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4207-ATS0004	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4207-BATB0001	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4207-BATB0002	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4207-BATB0004	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4207-BFP0001	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4207-BFP0002	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4207-BFP0003	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4207-BLR0001	Preventive Maintenance - Hot Water Boiler	30-Day: Boiler in dry lay-up	Perform safety walk-through

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Clean boiler area, if necessary
PM4207-CC0001	Preventive Maintenance - Condenser Water	90-Day: Condenser Water	Check for corrosion
PM4207-CC0002	Preventive Maintenance - Condenser Water	90-Day: Condenser Water	Check for corrosion
PM4207-CCTWR0001	Preventive Maintenance - Cooling Tower	180-Day: Cooling Tower Cleaning	Contact HVAC Crew for Support.
			Clean and Inspect Hot Water Basin.
			clean inside of water tower using water hose, if required; scrape, brush and wipe as required;
PM4207-CFC0001	Preventive Maintenance - Condenser Water	30-Day: Condenser Water	Clean Conductivity Probes
PM4207-CHLR0002	Preventive Maintenance - Water Chiller	365-Day: Chiller, Centrifugal, Water-Cooled	Check unit's evaporator and condenser pressures, oil tank pressure, differential oil pressure, and discharge oil pressure.
			Check oil level in chiller oil sump.
			Check oil temperature
			Check dehydrator or purge system; replace purge filter and inspect sight glass, replace if needed.
			Run system control tests
			Check refrigerant charge/level, add as necessary.
			Check compressor for excessive noise/vibration.
			Check sensor and mechanical safety limits.
			Clean dehydrator float valve.
			Perform spectrochemical analysis of compressor oil.
			Replace oil and oil filter(s)
			Inspect cooler and condenser tubes for leaks.
			Inspect utility vessel vent piping and safety relief valve.
			Inspect/clean the economizer (vane), gas line damper valve, and actuator arm.
			Run an insulation test on the motor.
			Check (IR Scan) and tighten motor terminals.
			Service chiller starter and check all controls and terminations.
PM4207-CHLR0003	Preventive Maintenance - Water Chiller	365-Day: Chiller, Centrifugal, Water-Cooled	Check unit's evaporator and condenser pressures, oil tank pressure, differential oil pressure, and discharge oil pressure.
			Check oil level in chiller oil sump.
			Check oil temperature
			Check dehydrator or purge system; replace purge filter and inspect sight glass, replace if needed.
			Run system control tests
			Check refrigerant charge/level, add as necessary.
			Check compressor for excessive noise/vibration.
			Check sensor and mechanical safety limits.
			Clean dehydrator float valve.
			Perform spectrochemical analysis of compressor oil.
			Replace oil and oil filter(s)
			Inspect cooler and condenser tubes for leaks.
			Inspect utility vessel vent piping and safety relief valve.
			Inspect/clean the economizer (vane), gas line damper valve, and actuator arm.
			Run an insulation test on the motor.
			Check (IR Scan) and tighten motor terminals.
			Service chiller starter and check all controls and terminations.

			Verify day tank's fuel level is topped off between float ranges, if applicable.
PM4207-GEN0004	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		365-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.

			Clean and check the general condition of variable speed drive panel.
PM4207-WJET0001	Preventive Maintenance - Water Jet	30-Day: Water Jet PM	Check operation and controls. If any problems are found issue work request
PM4209-BLR0001	Preventive Maintenance - Steam Boiler	30-Day: Hot Water Boiler (w/HVAC Chemical Analysis, Gas-Fired)	Clean control box
			Lubricate as necessary
			Check for leaks
			Inspect and clean scanner, adjust if necessary
			Lift safety valves, check dampers and stack
			Check flow or limit switches
		365-Day: Hot Water Boiler (w/HVAC Chemical Analysis, Gas-Fired)	Clean control box
			Lubricate as necessary
			Check for leaks
			Inspect and clean scanner, adjust if necessary
			Lift safety valves, check dampers and stack
			Clean interior and exterior of boiler
			Check turbine flues and clean furnace
			Check flow or limit switches
PM4209-BLR0002	Preventive Maintenance - Steam Boiler	30-Day: Hot Water Boiler (w/HVAC Chemical Analysis, Gas-Fired)	Clean control box
			Lubricate as necessary
			Check for leaks
			Inspect and clean scanner, adjust if necessary
			Lift safety valves, check dampers and stack
			Check flow or limit switches
		365-Day: Hot Water Boiler (w/HVAC Chemical Analysis, Gas-Fired)	Clean control box
			Lubricate as necessary
			Check for leaks
			Inspect and clean scanner, adjust if necessary

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lift safety valves, check dampers and stack
			Clean interior and exterior of boiler
			Check turbine flues and clean furnace
			Check flow or limit switches
PM4209CWTR0001	Preventive Maintenance - Chilled Water Treatment	7-day Chilled Water Treatment PM	Perform testing on chilled water system
			Add chemicals if needed
PM4209-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4209-DOOR0002	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4209-DOOR0003	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4209-DOOR0004	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4209-DOOR0005	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4209-FIRP0001	Preventive Maintenance - Fire Pump - Millwright	90-Day: Millwright PM for Fire Pump	Change oil after 50 hours of operation
			Change oil filter after 50 hours of operation

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Verify that shaft seals are dripping water properly (1 drop per second)
			Verify that the system is free of vibration or unusual noise
			Verify that the packing boxes, bearings, pump casing are free of overheating
PM4209-GEN0001	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		365-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Winterize system
			Verify continuity of generator ground, including the fuel tank ground
			Verify day tank's fuel level is topped off between float ranges, if applicable.
PM4209-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4209-HWP0002	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4209HWTR0001	Preventive Maintenance - Hot Water Treatment	7-day Hot Water Treatment PM	Perform testing on hot water system
			Add chemicals if needed
PM4209-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4210-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4211-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Sliding/Roll-up Door, Manual	Lubricate tracks as necessary
			Check stops and tethers
			If any problems are found issue work request
PM4211-DOOR0002	Preventive Maintenance - Roll-Up Door	180-Day Sliding/Roll-up Door, Manual	Lubricate tracks as necessary
			Check stops and tethers
			If any problems are found issue work request
PM4211-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4211-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4211-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4211-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4241-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4241-AH0002	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4241-DOOR0001	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure
			Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
PM4241-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4241-ELEV0001	Preventive Maintenance - Hydraulic Elevator	30-Day: Hydraulic Elevator with Automatic Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Inspect hoistways and car top
			Check oil reservoir
			Check sensitivity of door closure pressure
PM4241-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.

**NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE**

PMNUM	PM DESCRIPTION		TASK DESCRIPTION
PM4241-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4241-EROOM0003	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4241-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4241-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4241-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4241-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4241-ICE0001	Preventive Maintenance - Ice Machine	30-Day: Ice Machine	Check water filter
		90-Day: Ice Machine	Check water filter
			Check operation and controls. If any problems are found issue work request
			Check water pressure
			Lubricate condenser fan motor as necessary
		180-Day: Ice Machine	Check water filter
			Check operation and controls. If any problems are found issue work request
			Check water pressure
			Lubricate condenser fan motor as necessary
			Clean condenser coils
PM4241LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4241-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4241-LTS0002	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test
			Check condition of lamps
		365-Day: Emergency Lights - Fluorescent Type	Perform 1.5 hour light operational test
			Check condition of lamps
			Check condition of battery
PM4241-LTS0003	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head

			Clean condenser and evaporator coils
			Check safety interlocks
PM4244-DXAC0003	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed Blower Motor)	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
		180-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit (W/ Sealed Blower Motor)	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
		365-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed Blower Motor)	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4244-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4244-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4244-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4244-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4244-FILT0004	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4244-FILT0005	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4244LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4244-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4244-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4244-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4244-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4244-PNL0003	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4244-PNL0004	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4244-PNL0005	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4244-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4244-ROOF0002	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4244-UPS0001	Preventive Maintenance - UPS Power System	90-Day: UPS System	Perform visual safety check
			Check amperage and voltage
		180-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
		365-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
			Check termination points
			Inspect and clean all modules
PM4249-ACFLT0001	Preventive Maintenance - Air Compressor Filter Change	365-Day: Air Compressor Filter Change	Replace Filter(s) on air compressor unit.
PM4249-ACMP0001	Preventive Maintenance - Air Compressor Control	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change as necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4249-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4249-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit W/ UV Lights	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
			Replace UV light bulbs
PM4249-AH0002	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit W/ UV Lights	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
			Replace UV light bulbs
PM4249-ATS0001	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4249-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			If any problems are found issue work request
PM4249-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4249-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check area for water leaks.
			Report all deficiencies.
PM4249-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4249-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4249-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4249-GEN0001	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		365-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.

			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Winterize system
			Verify continuity of generator ground, including the fuel tank ground
			Verify day tank's fuel level is topped off between float ranges, if applicable.
PM4249-ICE0001	Preventive Maintenance - Ice Machine	30-Day: Ice Machine	Check water filter
		90-Day: Ice Machine	Check water filter
			Check operation and controls. If any problems are found issue work request
			Check water pressure
			Lubricate condenser fan motor as necessary
		180-Day: Ice Machine	Check water filter
			Check operation and controls. If any problems are found issue work request
			Check water pressure
			Lubricate condenser fan motor as necessary
			Clean condenser coils
PM4249LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4249-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4249-PMP0001	Preventive Maintenance - Circulating Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4249-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Install knockout hole plugs as necessary
PM4250-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4250-RV0001	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4250-SPR0001	Preventive Maintenance - Sprinkler System	30-Day: Wet Sprinkler System PM	Perform PM
		90-Day: Wet Sprinkler System PM	Perform PM
		365-Day: Wet Sprinkler System PM	Perform PM
PM4250-UPS0001	Preventive Maintenance - UPS Power System	90-Day: UPS System	Perform visual safety check
			Check amperage and voltage
		180-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
		365-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
			Check termination points
			Inspect and clean all modules
PM4250-VSC0001	Preventive Maintenance - Variable Speed Drive	365-Day: Variable Speed Controller	Check for excessive heat, odors, noise and vibration.
			Clean and check the general condition of variable speed drive panel.
PM4251-ACFLT0001	Preventive Maintenance - Air Compressor Filter Change	365-Day: Air Compressor Filter Change	Replace Filter(s) on air compressor unit.
PM4251-ACMP0001	Preventive Maintenance - Air Compressor	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor (Post RCM)	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil and oil filter. Change as necessary.
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4251-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Clean condenser and evaporator coils
			Check safety interlocks

		365-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Clean condenser and evaporator coils
			Check safety interlocks
PM4251-EW0001	Preventive Maintenance - EyeWash	30-Day: Portable Eyewash Station	Check fluid levels.
			Check spray heads for cleanliness.
			Clean unit as necessary.
			Date and initial inspection tag
		180-Day: Portable Eyewash Station	Change saline solution.
			Check spray heads for cleanliness.
			Clean unit as necessary.
			Date and initial inspection tag
PM4251-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4251-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4251-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4251-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4251LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4251-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals

PM4312-ATS0001	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4312-BATB0001	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4312-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4312-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		180-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		365-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Clean condenser and evaporator coils
			Check safety interlocks
PM4312-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			If any problems are found issue work request
PM4312-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4312-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4312-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4312-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4312-GEN0001	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		365-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.

ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check battery
			Check connections and battery charger
			Check generator output
			Winterize system
			Verify continuity of generator ground, including the fuel tank ground
			Verify day tank's fuel level is topped off between float ranges, if applicable.
PM4312LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4312-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4312-LTS0002	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4312-LTS0003	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test

			Report Findings to Electrical Supervisor
PM4319-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4319-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4319-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4319-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4346-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4346-DXAC0002	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary

PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lubricate blower motor as necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4346-DXAC0003	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4346-DXAC0004	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4346-DXAC0005	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request

PREVENTIVE MAINTENANCE**

PMNUM	PM DESCRIPTION		TASK DESCRIPTION
PM4346-HUM0001	Preventive Maintenance - Dehumidifier	90-Day Humidifier, Ionic Bed Type	Check operation and controls. If any problems are found issue work request
			Check/Clean make-up water filter (prefilter).
			Perform diagnostic test.
			Inspect vapor hoses.
			Inspect ionic bed door gasket for leakage.
			Inspect ionic bed filters and replace as necessary.
			Inspect tank for excess scale.
			Check terminals.
			Report any deficiencies that were unable to be corrected.
PM4346-LP0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4346-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4346-LTS0002	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4346-LTS0003	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4346-LTS0004	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test
			Check condition of lamps
		365-Day: Emergency Lights - Fluorescent Type	Perform 1.5 hour light operational test
			Check condition of lamps
			Check condition of battery
PM4346-LTS0005	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test

		365-Day: Wet Sprinkler System PM	Perform PM
PM4347-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		180-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		365-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Clean condenser and evaporator coils
			Check safety interlocks
PM4347-DXAC0002	Preventive Maintenance - Direct Expansion AC Unit	90-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		180-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		365-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Clean condenser and evaporator coils
			Check safety interlocks
PM4347-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4347-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4347-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4347-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4347-FILT0004	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4347-HP0001	Preventive Maintenance - Heat Pump	90-Day: Heat Pump	Check operation and controls. If any problems are found issue work request
			Lubricate blower motor as necessary
		180-Day: Heat Pump	Check operation and controls. If any problems are found issue work request
			Lubricate blower motor as necessary
		365-Day: Heat Pump	Check operation and controls. If any problems are found issue work request
			Lubricate blower motor as necessary
			Clean coils
			Check safety interlocks
PM4347-HP0002	Preventive Maintenance - Heat Pump	90-Day: Heat Pump	Check operation and controls. If any problems are found issue work request
			Lubricate blower motor as necessary
		180-Day: Heat Pump	Check operation and controls. If any problems are found issue work request
			Lubricate blower motor as necessary
		365-Day: Heat Pump	Check operation and controls. If any problems are found issue work request
			Lubricate blower motor as necessary
			Clean coils
			Check safety interlocks
PM4347LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4347-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4347-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4347-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4347-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4347-ROOF0002	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4348-ACFLT0001	Preventive Maintenance - Air Compressor Filter Change	365-Day: Air Compressor Filter Change	Replace Filter(s) on air compressor unit.
PM4348-ACMP0001	Preventive Maintenance - Air Compressor	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4353-AH0005	Preventive Maintenance - Air Handling Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems are found issue work request
			Lubricate blower motor as necessary
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4353-BFP0001	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4353-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4353-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4353-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM	Inspect lifting cables
			Inspect drive mechanism
			Inspect brake settings if applicable.
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4353-DOOR0002	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM	Inspect lifting cables
			Inspect drive mechanism
			Inspect brake settings if applicable.
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4353-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			If any problems are found issue work request
PM4353-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4353-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4353-EROOM0003	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.

			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4353-EW0001	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4353-EW0002	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4353-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4353-FID0001	Preventive Maintenance - Field Interface Device	90-Day Field Interface Device	Change filters if necessary
PM4353-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4353-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4353-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4353-FILT0004	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4353-FILT0005	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4353-HUM0001	Preventive Maintenance - Humidifier	90-Day Humidifier, Electric Generator Type	Check operation and controls. If any problems are found issue work request
			Check canister for mineral build-up
			Check fill valve
			Check dump valve
			Inspect Vapor hoses
PM4353-HUM0002	Preventive Maintenance - Humidifier	90-Day Humidifier, Electric Generator Type	Check operation and controls. If any problems are found issue work request
			Check canister for mineral build-up
			Check fill valve
			Check dump valve
			Inspect Vapor hoses
PM4353-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.;
			make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4353HWTR0001	Preventive Maintenance - Hot Water Treatment	7-day Hot Water Treatment PM	Perform testing on hot water system
			Add chemicals if needed
PM4353LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4353-LTS0002	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals

PREVENTIVE MAINTENANCE

PMNUM	PM DESCRIPTION		TASK DESCRIPTION
			Lubricate blower motor as necessary
			Check safety interlocks
			Clean drain pans, vacuum drains, and insure drain clarity
PM4436-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Sliding/Roll-up Door, Manual	Lubricate tracks as necessary
			Check stops and tethers
			If any problems are found issue work request
PM4436-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4436-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4436-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4436-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4436-FILT0002	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4436-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4436-FILT0004	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4436-FILT0005	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4436-FILT0006	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4436-FILT0007	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4436-FILT0008	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4436-GEN0001	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.

PM4464-VSC0001	Preventive Maintenance - Variable Speed Drive	365-Day: Variable Speed Controller	Check for excessive heat, odors, noise and vibration. Clean and check the general condition of variable speed drive panel.
PM4465-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism Inspect brake settings if applicable Check master link on chains Visually inspect alignment of tracks Lubricate tracks as necessary Inspect Mounts to ensure that they are sufficiently sized Inspect chain drive adjustments If any problems are found issue work request
PM4465-DOOR0002	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM	Inspect lifting cables Inspect drive mechanism Inspect brake settings if applicable. Check master link on chains Visually inspect alignment of tracks Lubricate tracks as necessary Inspect chain drive adjustments If any problems are found issue work request
PM4465-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		180-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		365-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Clean condenser and evaporator coils Check safety interlocks
PM4465-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4465LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting Inspect all Parking Lot Lighting Report Findings to Electrical Supervisor
PM4465-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects. Apply insecticides or poisons as required. Complete chemical applications records.
PM4465-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times Install knockout hole plugs as necessary
PM4465-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times Install knockout hole plugs as necessary
PM4465-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4465-SPR0001	Preventive Maintenance - Sprinkler System	30-Day: Wet Sprinkler System PM 90-Day: Wet Sprinkler System PM 365-Day: Wet Sprinkler System PM	Perform PM Perform PM Perform PM
PM4466-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Sliding/Roll-up Door, Manual	Lubricate tracks as necessary Check stops and tethers

**NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			If any problems are found issue work request
PM4466-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4466-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4466-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4466-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4466LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4466-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4466-LTS0002	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head

			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4471-BFP0002	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4471-CHLR0001	Preventive Maintenance - Water Chiller	365-Day: DX Chiller Water Cooled	Check unit's evaporator and condenser pressures.
			Check oil temperature.
			Check compressor oil level.
			Run system control tests.
			Perform refrigerant leak check.
			Check refrigerant charge/level, add as necessary
			Check compressor for excessive noise/vibration.
			Check sensor and mechanical safety limits.
			Replace oil.
			Inspect cooler and condenser tubes for leaks.
			Inspect safety relief valve.
			Run an insulation test on the motor.
			Clean condenser tubes.
			Clean evaporator tubes if applicable.
PM4471-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4471-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4471-CHWP0003	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4471-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4471-DOOR0002	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4471-DOOR0003	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4471-DOOR0004	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4471-DOOR0005	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism

			Clean and Inspect Hot Water Basin.
			clean inside of water tower using water hose, if required; scrape, brush and wipe as required;
PM4473-CHEM0001	Preventive Maintenance - Chemical Feed Drum (East Open Loop)	7-day Chemical Drum Inspection PM	Check level of chemical in feed drums
			Add chemicals if needed
PM4473-CHEM0002	Preventive Maintenance - Chemical Feed Drum (West Open Loop)	7-day Chemical Drum Inspection PM	Check level of chemical in feed drums
			Add chemicals if needed
PM4473-CHEM0003	Preventive Maintenance - Chemical Feed Drum (Closed Loop)	7-day Chemical Drum Inspection PM	Check level of chemical in feed drums
			Add chemicals if needed
PM4473-CHLR0001	Preventive Maintenance - Water Chiller	90-Day: Chiller, Water-Cooled	Check unit's evaporator and condenser pressures, oil tank pressure, differential oil pressure, and discharge oil pressure.
			Check oil level in chiller oil sump, add as necessary
			Check oil temperature.
			Check dehydrator or purge system; remove water if observed in sight glass.
			Run system control tests.
			Check refrigerant charge/level, add as necessary
			Check compressor for excessive noise/vibration.
		180-Day: Chiller, Water-Cooled	Check unit's evaporator and condenser pressures, oil tank pressure, differential oil pressure, and discharge oil pressure.
			Check oil level in chiller oil sump, add as necessary
			Check oil temperature.
			Check dehydrator or purge system; remove water if observed in sight glass.
			Run system control tests.
			Check refrigerant charge/level, add as necessary
			Check compressor for excessive noise/vibration.
			Clean sensor and mechanical safety limits
			Check (IR Scan) and tighten motor terminals.
			Service chiller starter and check all controls and terminations.
		365-Day: Chiller, Centrifugal, Water-Cooled	Check unit's evaporator and condenser pressures, oil tank pressure, differential oil pressure, and discharge oil pressure.
			Check oil level in chiller oil sump.
			Check oil temperature
			Check dehydrator or purge system; replace purge filter and inspect sight glass, replace if needed.
			Run system control tests
			Check refrigerant charge/level, add as necessary.
			Check compressor for excessive noise/vibration.
			Check sensor and mechanical safety limits.
			Clean dehydrator float valve.
			Perform spectrochemical analysis of compressor oil.
			Replace oil and oil filter(s)

PM4473-CTWR0005	Preventive Maintenance - Cooling Tower	180-Day: Cooling Tower	Check operation of unit for water leaks, noise or vibration. If any problems found issue work request.
			Check electrical wiring and connections; make appropriate adjustments.
			Drain and flush could water sump and clean strainers; if required.
			Refill with water, check make-up water assembly for leakage, adjust electronic level controls if necessary.
			Remove clean and reinstall conductivity and ph electrodes in chemical water treatment system.
PM4473-CWP0001	Preventive Maintenance -Condenser Water Pump	180-Day: Condenser Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4473-CWP0002	Preventive Maintenance -Condenser Water Pump	180-Day: Condenser Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4473-CWP0003	Preventive Maintenance -Condenser Water Pump	180-Day: Condenser Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4473-CWP0004	Preventive Maintenance -Condenser Water Pump	180-Day: Condenser Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4473-CWP0005	Preventive Maintenance -Condenser Water Pump	180-Day: Condenser Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4473-CWP0006	Preventive Maintenance -Condenser Water Pump	180-Day: Condenser Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4473-EAF0001	Preventive Maintenance - Exhaust Fan Vent	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4473-EAF0002	Preventive Maintenance - Exhaust Fan Vent	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4473-EAF0003	Preventive Maintenance - Exhaust Fan Vent	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4473-EAF0004	Preventive Maintenance - Exhaust Fan Vent	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4473-EAF0005	Preventive Maintenance - Exhaust Fan Vent	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.

			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4475-ATS0001	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4475-BATB0001	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Sealed	Check connections
			Clean and lubricate terminals
			Clean battery if necessary
PM4475-BFP0001	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4475-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4475-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4475-CRU0001	Preventive Maintenance - Computer Room Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems found then issue work request.
			Lubricate blower motor as necessary
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4475-CRU0002	Preventive Maintenance - Computer Room Unit	90-Day: Critical Computer Room Type Air Handling Unit, Chill Water or Water-Cooled Combination Type	Check operation and controls. If any problems found then issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate blower motor as necessary
			Check safety interlocks
			Clean drain pans, vacuum drains, and insure drain clarity
PM4475-CRU0003	Preventive Maintenance - Computer Room Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems found then issue work request.
			Lubricate blower motor as necessary
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4475-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

PMNUM	PM DESCRIPTION		TASK DESCRIPTION
PM4475-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4475-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4475-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0004	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0005	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0006	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0007	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0008	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0009	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0010	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0011	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0012	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0013	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0014	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-FILT0015	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4475-GEN0001	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request

NNM08AA54C

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		365-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Winterize system
			Verify continuity of generator ground, including the fuel tank ground
			Verify day tank's fuel level is topped off between float ranges, if applicable.
PM4475-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4475-HWP0002	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4475LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4476-ACFLT0001	Preventive Maintenance - Air Compressor Filter Change	365-Day: Air Compressor Filter Change	Replace Filter(s) on air compressor unit.
PM4476-ACMP0001	Preventive Maintenance - Air Compressor Control	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor (Post RCM)	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil and oil filter. Change as necessary.
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4476-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems are found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4476-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4476-AH0002	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4476-AH0003	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation

			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
		365-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
			Clean condenser and evaporator coils
			Check safety interlocks
PM4476-EAF0003	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			If any problems are found issue work request
PM4476-EAF0004	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			If any problems are found issue work request
PM4476-EAF0005	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			If any problems are found issue work request
PM4476-ELEV0001	Preventive Maintenance - Cable Elevator	30-Day: Cable Elevator with Computer Controls	Verify operation of all safety edges
			Verify operation of emergency telephone
			Check and clean all electrical panels
			Inspect and lubricate governors

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check brushes on drive motors
			Check sensitivity of door closure pressure
			Inspect hoistways and car top
PM4476-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4476-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4476-EROOM0003	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4476-EROOM0004	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4476-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4476-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4476-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4476-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4476-FILT0004	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary

PM4476-FILT0008	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4476-FILT0009	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4476-FILT0010	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4476-FILT0011	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4476-FILT0012	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4476-FILT0013	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4476-FILT0014	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4476-FILT0015	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4476-GEN0001	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>	<u>TASK DESCRIPTION</u>
		Check coolant if applicable, add or change if necessary.
		Check stop switch and emergency alarm bell.
		Lubricate as necessary
		Tighten all bolts
		Check oil, add or change if necessary
		Check voltage.
		Check battery
		Check connections and battery charger
		Verify day tank's fuel level is topped off between float ranges, if applicable.
	90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
		Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
		Check operation and controls. If any problems are found issue work request
		Check filters if applicable, change if necessary
		Check belts if applicable, change if necessary.
		Check coolant if applicable, add or change if necessary.
		Check stop switch and emergency alarm bell.
		Lubricate as necessary
		Tighten all bolts
		Check oil, add or change if necessary
		Check voltage.
		Check battery
		Check connections and battery charger
		Check generator output
		Verify day tank's fuel level is topped off between float ranges, if applicable.
	365-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
		Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
		Check operation and controls. If any problems are found issue work request
		Check filters if applicable, change if necessary
		Check belts if applicable, change if necessary.
		Check coolant if applicable, add or change if necessary.
		Check stop switch and emergency alarm bell.
		Lubricate as necessary
		Tighten all bolts
		Check oil, add or change if necessary
		Check voltage.
		Check battery
		Check connections and battery charger
		Check generator output
		Winterize system
		Verify continuity of generator ground, including the fuel tank ground

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Verify day tank's fuel level is topped off between float ranges, if applicable.
PM4476-HST0002	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4476-HST0003	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4476-HST0004	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4476-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4476-HWP0002	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4476HWTR0001	Preventive Maintenance - Hot Water Treatment	7-day Hot Water Treatment PM	Perform testing on hot water system
			Add chemicals if needed
PM4476LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4476-LROD0001	Preventive Maintenance - Lightning Protection System	365 Day: Lightning Protection System	Measure and record resistance readings
			Inspect rods, cables, and fasteners
			Attach and turn in ground readings with PM sheet
PM4476-LTS0001	Preventive Maintenance - Aircraft Lights	30-Day: Aircraft/Aviation Lights	Verify operation

PMNUM	PM DESCRIPTION		TASK DESCRIPTION
PM4476-ROOF0003	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4476-ROOF0004	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4476-RV0001	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4476-SPMP001	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4476-SPR0001	Preventive Maintenance - Sprinkler System	30-Day: Wet Sprinkler System PM	Perform PM
		90-Day: Wet Sprinkler System PM	Perform PM
		365-Day: Wet Sprinkler System PM	Perform PM
PM4476-UPS0001	Preventive Maintenance - UPS Power System	90-Day: UPS System	Perform visual safety check
			Check amperage and voltage
		180-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
		365-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
			Check termination points
			Inspect and clean all modules
PM4477-AH0001	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4477-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4477-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
		30-Day: Fire Alarm System	Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4477-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4477LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4477-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals

		365-Day: Wet Sprinkler System PM	Perform PM
PM4478LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4478-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4478-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4479-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4479-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4480-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM	Inspect lifting cables
			Inspect drive mechanism
			Inspect brake settings if applicable.
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4480-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4480LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4480-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4481-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4481HWTR0001	Preventive Maintenance - Hot Water Treatment	7-day Hot Water Treatment PM	Perform testing on hot water system
			Add chemicals if needed
PM4481HWTR0003	Preventive Maintenance - Hot Water Treatment (Off-season)	7-day Hot Water Treatment PM (Off-season)	Perform testing on hot water system
			Add chemicals if needed
PM4481HWTR0004	Preventive Maintenance - Hot Water Treatment (Off-season)	30-day Hot Water PM (Off-season)	Notify Water Treatment Tech when performing PM (4-1058, 4-6020)
			Open all necessary valves (Supply/Control/Makeup)
			Check to make sure makeup water is on
			Check to make sure system is filled
			Coordinate operation with UCS
			Turn on circulation pumps and run for 48 hours
			Shut down pumps and close all necessary valves
PM4481LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4481-LTS0015	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4481-LTS0016	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test
			Check condition of lamps
		365-Day: Emergency Lights - Fluorescent Type	Perform 1.5 hour light operational test
			Check condition of lamps
			Check condition of battery
PM4481-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4481-PNL0015	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary

PMNUM	PM DESCRIPTION		TASK DESCRIPTION
PM4483-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4483-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			If any problems are found issue work request
PM4483-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4483-EW0001	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4483-EW0002	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4483-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4483-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4483LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4483-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4483-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary

			Check oil and oil filter. Change as necessary.
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4485-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4485-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4485-AH0002	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4485-AH001A	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4485-AH002A	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4485-BFP0001	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4485-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4485-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.

			Check drive coupling
PM4485-CHWP0003	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4485-DOOR0001	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure
			Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
PM4485-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4485-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4485-EROOM0004	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4485-EROOM0005	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4485-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check oil and oil filter. Change as necessary.
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4487A-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4487A-ADRY0002	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4487A-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487A-AH0002	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487A-AH0003	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487A-AH0004	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487A-AH0005	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487A-AH0006	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487A-AH0010	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487A-AH0019A	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487A-AH0019B	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487A-AH0019C	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487A-AH0022	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487A-AH0027	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487AB-ACFLT0002	Preventive Maintenance - Air Compressor Filter Change	365-Day: Air Compressor Filter Change	Replace Filter(s) on air compressor unit.
PM4487AB-ACMP0002	Preventive Maintenance - Air Compressor Control	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor (Post RCM)	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil and oil filter. Change as necessary.
			Lubricate as necessary
			Check belts, change if necessary

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check filters, change if necessary
PM4487AB-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems are found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4487AB-AH0001	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487AB-AH0002	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487AB-AH0020	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487AB-AH0021	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487AB-AH0022	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487A-BATB0001	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4487A-BATB0002	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings

			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4487AB-BFP0001	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4487AB-CHWP0003	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4487AB-CRU0015	Preventive Maintenance - Computer Room Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems found then issue work request.
			Lubricate blower motor as necessary
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4487AB-CRU0016	Preventive Maintenance - Computer Room Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems found then issue work request.
			Lubricate blower motor as necessary
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4487AB-CRU0017	Preventive Maintenance - Computer Room Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems found then issue work request.
			Lubricate blower motor as necessary
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4487AB-CRU0018	Preventive Maintenance - Computer Room Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems found then issue work request.
			Lubricate blower motor as necessary
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4487AB-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan, Direct-Drive	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			If any problems are found issue work request
PM4487AB-EAF0002	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.

			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4487A-HST0003	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4487A-HST0004	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4487A-HUM0001	Preventive Maintenance - Humidifier	90-Day Humidifier, Electric Generator Type	Check operation and controls. If any problems are found issue work request
			Check canister for mineral build-up
			Check fill valve
			Check dump valve
			Inspect Vapor hoses
PM4487A-HUM0002	Preventive Maintenance - Humidifier	90-Day Humidifier, Electric Generator Type	Check operation and controls. If any problems are found issue work request
			Check canister for mineral build-up
			Check fill valve
			Check dump valve
			Inspect Vapor hoses
PM4487A-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4487A-HWP0002	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4487A-HWP0003	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change as necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4487B-ACMP0004	Preventive Maintenance - Air Compressor Control	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change as necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4487B-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems are found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4487B-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487B-AH0002	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487B-AH0003	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487B-AH0004	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487B-AH0005	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487B-AH0006	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487B-AH0007	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487B-AH0008	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487B-AH0009	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487B-AH0010	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487B-AH0014	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487B-AH0015	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487B-AH0016	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487B-AH0020	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487B-AH0021	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487B-AH020A	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4487B-BATB0002	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4487B-BFP0001	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4487BC-ACFLT0001	Preventive Maintenance - Air Compressor Filter Change	365-Day: Air Compressor Filter Change	Replace Filter(s) on air compressor unit.
PM4487BC-ACMP0001	Preventive Maintenance - Air Compressor Control	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change as necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4487BC-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4487BC-AH0001	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487BC-AH0002	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487BC-AH0003	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487BC-AH0004	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487BC-AH0007	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4487BC-CRN0001	Preventive Maintenance - Crane	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4487BC-CRN0002	Preventive Maintenance - Crane	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4487BC-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Sliding/Roll-up Door, Manual	Lubricate tracks as necessary
			Check stops and tethers
			If any problems are found issue work request
PM4487BC-ELEV0001	Preventive Maintenance - Hydraulic Elevator	30-Day: Hydraulic Elevator with Automatic Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Inspect hoistways and car top
			Check oil reservoir
			Check sensitivity of door closure pressure

NNM08AA54C

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4487BC-HST0001	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4487BC-HST0002	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4487B-CHWP0003	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4487BC-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4487BC-LTS0002	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4487BC-LTS0008	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test

ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems are found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4491-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4491-AH0003	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4491-AH0004	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4491-BATB0001	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Sealed	Check connections
			Clean and lubricate terminals
			Clean battery if necessary
PM4491-BLR0001	Preventive Maintenance - Steam Boiler	30-Day: Boiler in dry lay-up	Perform safety walk-through
			Clean boiler area, if necessary
PM4491-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4491-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4491-CRU0001	Preventive Maintenance - Computer Room Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems found then issue work request.
			Lubricate blower motor as necessary
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4491-CRU0002	Preventive Maintenance - Computer Room Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems found then issue work request.
			Lubricate blower motor as necessary
			Check belts, change if necessary

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4491-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4491-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4491-EROOM0003	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4491-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4491-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4491-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4491-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4491-FILT0004	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4491-FILT0005	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4491-FWP0001	Preventive Maintenance -Feed Water Pump	30-Day: Feed Water Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Feed WaterPump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4491LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4491-LTS0001	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test
			Check condition of lamps
		365-Day: Emergency Lights - Fluorescent Type	Perform 1.5 hour light operational test
			Check condition of lamps
			Check condition of battery
PM4491-LTS0002	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test
			Check condition of lamps
		365-Day: Emergency Lights - Fluorescent Type	Perform 1.5 hour light operational test
			Check condition of lamps
			Check condition of battery
PM4491-LTS0003	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test

			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4493-AH0008	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4493-AH0009	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4493-ATS0001	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4493-BATB0001	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4493-CHWP0001	Preventive Maintenance - Water Chiller	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4493-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling

PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4493-CHWP0003	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4493-CRN0001	Preventive Maintenance - Crane	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4493-CRU0001	Preventive Maintenance - Computer Room Unit	90-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems found then issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems are found issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
		365-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems are found issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
			Check safety interlocks
			Clean condenser and evaporator coils
PM4493-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4493-DOOR0002	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary

			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4493-DOOR0003	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4493-DOOR0004	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure
			Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
PM4493-DOOR0005	Preventive Maintenance - Electric Personnel Door	30-Day Personnel Doors, Electric	Check operation and controls. If any problems are found issue work request.
			Clean photocells and check range
			Check door closure pressure
			Clean tracks and check for proper alignment
			Check tolerances on locking mechanisms
			Check emergency release mechanisms (where applicable)
PM4493-DOOR0006	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4493-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		180-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		365-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Clean condenser and evaporator coils
			Check safety interlocks
PM4493-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4493-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.

			Report all deficiencies.
PM4493-EROOM0006	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4493-EROOM0007	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4493-EROOM0008	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4493-EW0001	Preventive Maintenance - EyeWash	30-Day: Portable Eyewash Station	Check fluid levels.
			Check spray heads for cleanliness.
			Clean unit as necessary.
			Date and initial inspection tag
		180-Day: Portable Eyewash Station	Change saline solution.
			Check spray heads for cleanliness.
			Clean unit as necessary.
			Date and initial inspection tag
PM4493-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4493-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4493-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4493-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary

PM4493-FILT0010	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4493-FILT0011	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4493-FILT0012	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4493-GEN0001	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		365-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Winterize system
			Verify continuity of generator ground, including the fuel tank ground
			Verify day tank's fuel level is topped off between float ranges, if applicable.
PM4493-HST0001	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4493-HUM0001	Preventive Maintenance - Humidifier	90-Day Humidifier, Electric Generator Type	Check operation and controls. If any problems are found issue work request
			Check canister for mineral build-up
			Check fill valve
			Check dump valve
			Inspect Vapor hoses
PM4493-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4493-HWP0002	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4493-HWP0003	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4493LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check filters, change if necessary
PM4494-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4494-CHWP0001	Preventive Maintenance - Water Chiller	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4494-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4494-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4494-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4494-FILT0001	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4494LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4494-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
		365-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change as necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4524-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit (Day Shift)	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4524-CHLR0001	Preventive Maintenance - Water Chiller	365-Day: Chiller, Air-Cooled	Check unit's evaporator and condenser pressures.
			Check fan motor if applicable for excessive noise and vibration.
			Check oil temperature
			Check compressor oil level.
			Lubricate condenser fan motors as necessary
			Run system control tests.
			Perform refrigerant leak check.
			Check refrigerant charge/level, add as necessary
			Check compressor for excessive noise/vibration.
			Check sensor and mechanical safety limits.
			Replace oil and oil filters(s).
			Inspect safety relief valve.
			Run an insulation test on the motor.
			Check (IR Scan) and tighten motor terminals.
			Service chiller starter and check all controls and terminations.
			Clean condenser
			Clean evaporator tubes if available
PM4524-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump (Day-Shift)	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4524-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump (Day-Shift)	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4524-COND0001	Preventive Maintenance - Air-cooled Condenser	90-Day: Air-Cooled Condenser (Direct-drive w/ sealed condenser fan)	Check operation and controls
		180 Day Air-Cooled Condenser (Direct-drive w/ sealed condenser fan)	Check operation and controls
			Check suction and discharge pressure
			Check and lubricate bearings
		365-Day: Air-Cooled Condenser (Direct-drive w/ sealed condenser fan)	Check operation and controls
			Check suction and discharge pressure
			Check and lubricate bearings

			Clean condenser and evaporator coil
			Check safety interlocks
PM4524-COND0002	Preventive Maintenance - Air-cooled Condenser	90-Day: Air-Cooled Condenser (Direct-drive w/ sealed condenser fan)	Check operation and controls
		180 Day Air-Cooled Condenser (Direct-drive w/ sealed condenser fan)	Check operation and controls
			Check suction and discharge pressure
			Check and lubricate bearings
		365-Day: Air-Cooled Condenser (Direct-drive w/ sealed condenser fan)	Check operation and controls
			Check suction and discharge pressure
			Check and lubricate bearings
			Clean condenser and evaporator coil
			Check safety interlocks
PM4524-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4524-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4524LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4524-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4524-PMP0001	Preventive Maintenance - Hydraulic Pump	90-Day: Pump PM (Day-shift)	Check operation and controls. If any problems are found issue work request
		180-Day Pump PM (Day-Shift)	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4524-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4524-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4524-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4524-RV0001	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4524-SPMP0001	Preventive Maintenance - Sump Pump	30-Day: Sump Pump (Day-Shift)	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump (Day-Shift)	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4525LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting

			Report Findings to Electrical Supervisor
PM4525-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4525-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4525-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4525-SHEW0001	Preventive Maintenance - Safety Shower and Eyewash Station	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4526-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4526-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4527LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4527-SHEW0001	Preventive Maintenance - Safety Shower and Eyewash Station	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4530-AH0001	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4530-BATB0001	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Sealed	Check connections
			Clean and lubricate terminals
			Clean battery if necessary
PM4530-CNDP0001	Preventive Maintenance -Condensate Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4530-CNDP0002	Preventive Maintenance -Condensate Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4530-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Sliding/Roll-up Door, Manual	Lubricate tracks as necessary

			Check stops and tethers
			If any problems are found issue work request
PM4530-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven	Check operation and controls. If any problems are found issue work request.
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
		365-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
			Clean condenser and evaporator coils
			Check safety interlocks
PM4530-DXAC0002	Preventive Maintenance - DXAC Unit	90-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven	Check operation and controls. If any problems are found issue work request.
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
		365-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
			Clean condenser and evaporator coils
			Check safety interlocks
PM4530-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4530-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4530-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary

PM4531-ACFLT0001	Preventive Maintenance - Air Compressor Filter Change	365-Day: Air Compressor Filter Change	Replace Filter(s) on air compressor unit.
PM4531-ACFLT0002	Preventive Maintenance - Air Compressor Filter Change	365-Day: Air Compressor Filter Change	Replace Filter(s) on air compressor unit.
PM4531-ACMP0001	Preventive Maintenance - Air Compressor	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change as necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4531-ACMP0002	Preventive Maintenance - Air Compressor	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change as necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4531-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems are found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4531-AH0001	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4531-CHLR0001	Preventive Maintenance - Water Chiller	365-Day: Chiller, Air-Cooled	Check unit's evaporator and condenser pressures.

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check fan motor if applicable for excessive noise and vibration.
			Check oil temperature
			Check compressor oil level.
			Lubricate condenser fan motors as necessary
			Run system control tests.
			Perform refrigerant leak check.
			Check refrigerant charge/level, add as necessary
			Check compressor for excessive noise/vibration.
			Check sensor and mechanical safety limits.
			Replace oil and oil filters(s).
			Inspect safety relief valve.
			Run an insulation test on the motor.
			Check (IR Scan) and tighten motor terminals.
			Service chiller starter and check all controls and terminations.
			Clean condenser
			Clean evaporator tubes if available
PM4531-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4531-CNDP0001	Preventive Maintenance -Condensate Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4531-CNDP0002	Preventive Maintenance -Condensate Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4531-COND0001	Preventive Maintenance - Air-cooled Condenser	90-Day: Air-Cooled Condenser	Check operation and controls. If any problems found then issue work request.
			Check Belts, change if necessary
			Lubricate condenser fan as necessary
		180 Day Air-Cooled Condenser	Check operation and controls. If any problems are found then issue work request
			Check Belts, change if necessary
			Lubricate condenser fan as necessary
			Check and lubricate bearings as necessary
		365-Day: Air-Cooled Condenser	Check operation and controls. If any problems are found then issue work request
			Check Belts, change if necessary
			Lubricate condenser fan as necessary

			Check and lubricate bearings as necessary
			Clean condenser and evaporator coil
			Check safety interlocks
PM4531-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4531-DOOR0002	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4531-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4531-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4531-HST0001	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4531LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4531-ODT0001	Preventive Maintenance - Oxygen Detection System	30-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Verify ODT is required at this location. If unit is not needed issue work request to remove unit
		180-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Calibrate system
			Check all alarm points
			Verify ODT is still required at this location. If unit is not needed issue work request to remove unit
PM4531-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.

ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check oil, add or change as necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4539-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems are found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4539-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate blower motor as necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate blower motor as necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4539-DXAC0002	Preventive Maintenance - Direct Expansion AC Unit	90-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		180-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		365-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Clean condenser and evaporator coils
			Check safety interlocks
PM4539-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4539-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4539-HST0001	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4539LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4539-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4539-ODT0001	Preventive Maintenance - Oxygen Detection System	30-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Verify ODT is required at this location. If unit is not needed issue work request to remove unit
		180-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Calibrate system
			Check all alarm points
			Verify ODT is still required at this location. If unit is not needed issue work request to remove unit
PM4539-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4539-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4539-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4539-PNL0003	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4539-PNL0004	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4539-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4539-RV0001	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4539-SHEW0001	Preventive Maintenance - Safety Shower and Eyewash Station	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4539-SHEW0002	Preventive Maintenance - Safety Shower and Eyewash Station	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum

ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4550-DERK0002	Preventive Maintenance - Derrick Stiffleg	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4550-ELEV0001	Preventive Maintenance - Cable Elevator	30-Day: Cable Elevator with Computer Controls	Verify operation of all safety edges
			Verify operation of emergency telephone
			Check and clean all electrical panels
			Inspect and lubricate governors
			Check brushes on drive motors
			Check sensitivity of door closure pressure
			Inspect hoistways and car top
PM4550-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4550-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4550-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4550-FILT0004	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4550-FILT0005	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4550LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4550-LROD0001	Preventive Maintenance - Lightning Protection System	365 Day: Lightning Protection System	Measure and record resistance readings
			Inspect rods, cables, and fasteners
			Attach and turn in ground readings with PM sheet
PM4550-LTS0001	Preventive Maintenance - Emergency Lights	30-Day: Aircraft/Aviation Lights	Verify operation
PM4550-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4550-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4550-PNL0003	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4550-PNL0004	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4550-PNL0005	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times

PMNUM	PM DESCRIPTION		TASK DESCRIPTION
PM4551-DXAC0002	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4551-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4551-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4551-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4551-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4551-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4551LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4551-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4551-ODT0001	Preventive Maintenance - Oxygen Detection System	30-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection

PM4551-PNL0013	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4551-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4551-RV0001	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4551-SGND0001	Preventive Maintenance -Static Ground System	365-Day: Static Ground System	Check and record resistance readings
			Attach and turn in ground readings with PM sheet
PM4551-SPMP001	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4553-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4553-BATB0002	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Sealed	Check connections
			Clean and lubricate terminals
			Clean battery if necessary
PM4553-CHLR0001	Preventive Maintenance - Water Chiller	365-Day: DX Chiller Water Cooled	Check unit's evaporator and condenser pressures.
			Check oil temperature.
			Check compressor oil level.
			Run system control tests.
			Perform refrigerant leak check.
			Check refrigerant charge/level, add as necessary
			Check compressor for excessive noise/vibration.
			Check sensor and mechanical safety limits.
			Replace oil.
			Inspect cooler and condenser tubes for leaks.
			Inspect safety relief valve.
			Run an insulation test on the motor.
			Clean condenser tubes.
			Clean evaporator tubes if applicable.
PM4553-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4553-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4553-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4553-HDT0001	Preventive Maintenance - Hydrogen Detection System	30-Day: Hydrogen Detection System	Perform visual inspection

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4554-BATB0001	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Sealed	Check connections
			Clean and lubricate terminals
			Clean battery if necessary
PM4554-BATB0002	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4554-CNDP0001	Preventive Maintenance -Condensate Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4554-CNDP0002	Preventive Maintenance -Condensate Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4554-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4554-DXAC0002	Preventive Maintenance - Direct Expansion AC Unit	90-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		180-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request

ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
		365-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Clean condenser and evaporator coils
			Check safety interlocks
PM4554-DXAC0003	Preventive Maintenance - Direct Expansion AC Unit	90-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		180-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		365-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Clean condenser and evaporator coils
			Check safety interlocks
PM4554-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4554-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4554-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4554-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4554-FILT0001	Preventive Maintenance - Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4554-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4554-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4554-FILT0004	Preventive Maintenance - Filters	180-Day Filter PM	Check filters, change if necessary
PM4554-HST0001	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4554-HST0002	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4554-HV0001	Preventive Maintenance - Heating Vent Unit	180-Day Heating/Ventilating Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust as necessary.
PM4554-ICE0001	Preventive Maintenance - Ice Machine	30-Day: Ice Machine	Check water filter
		90-Day: Ice Machine	Check water filter
			Check operation and controls. If any problems are found issue work request
			Check water pressure
			Lubricate condenser fan motor as necessary
		180-Day: Ice Machine	Check water filter
			Check operation and controls. If any problems are found issue work request
			Check water pressure
			Lubricate condenser fan motor as necessary
			Clean condenser coils
PM4554LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4554-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4554-MTS0001	Preventive Maintenance - Manual Transfer Switch	180-Day: Manual Transfer Switch	Exercise transfer switch
		365-Day: Manual Transfer Switch	Exercise transfer switch
			Clean equipment
			Check all contacts and connections
PM4554-ODT0001	Preventive Maintenance - Oxygen Detection System	30-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Verify ODT is required at this location. If unit is not needed issue work request to remove unit
		180-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Calibrate system
			Check all alarm points

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Verify ODT is still required at this location. If unit is not needed issue work request to remove unit
PM4554-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4554-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0003	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0004	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0005	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0006	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0007	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0008	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0009	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0010	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0011	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0012	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0013	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-PNL0014	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4554-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system

NNM08AA54C

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4554-ROOF0002	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4554-ROOF0003	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4554-ROOF0004	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4554-RV0001	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4554-RV0002	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4554-SPMP002	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4554-UPS0001	Preventive Maintenance - UPS Power System	90-Day: UPS System	Perform visual safety check
			Check amperage and voltage
		180-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
		365-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
			Check termination points
			Inspect and clean all modules
PM4555-CRN0001	Preventive Maintenance - Crane	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4555-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4555-DOOR0002	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4555-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request

**NNM08AA54C

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change as necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4561-ACMP0002	Preventive Maintenance - Air Compressor Control	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change as necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4561-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems are found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4561-AH0001	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4561-AH0002	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4561-AH0003	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4561-AH0004	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4561-BATB0001	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Sealed	Check connections
			Clean and lubricate terminals
			Clean battery if necessary
PM4561-BATB0003	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4561-BFP0001	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4561-BFP0002	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4561-CC0001	Preventive Maintenance - Condenser Water	90-Day: Condenser Water	Check for corrosion
PM4561-CC0002	Preventive Maintenance - Condenser Water	90-Day: Condenser Water	Check for corrosion
PM4561-CCTWR0001	Preventive Maintenance - Cooling Tower	180-Day: Cooling Tower Cleaning	Contact HVAC Crew for Support.
			Clean and Inspect Hot Water Basin.
			clean inside of water tower using water hose, if required; scrape, brush and wipe as required;
PM4561-CFC0001	Preventive Maintenance - Condenser Water	30-Day: Condenser Water	Clean Conductivity Probes
PM4561-CHLR0001	Preventive Maintenance - Water Chiller	365-Day: Chiller, Water-Cooled (York)	Check units evaporator and condenser pressures, oil tank pressure.
			Check oil level in chiller oil sump.
			Check oil temperature
			Check dehydrator or purge system; replace purge filter and inspect sight glass, replace if needed.
			Run system control tests.
			Check refrigerant charge/level, add as necessary.
			Check compressor for excessive noise/vibration.
			Check sensor and mechanical safety limits.
			Clean dehydrator float valve.
			Perform spectrochemical analysis of compressor oil.
			Replace oil and oil filter(s).
			Inspect cooler and condenser tubes for leaks.
			Inspect utility vessels vent piping and safety relief valve.
			Inspect/clean the economizer (vane), gas line damper valve, and actuator.
			Run an insulation test on the motor.
			Check (IR Scan) and tighten motor terminals.
			Service chiller starter and check all controls and terminations.
			Rod & clean condensor.
			Rod & clean evaporator.
			Check hot gas by-pass operation.
PM4561-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request

ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4561-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4561-CNDP0001	Preventive Maintenance -Condensate Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4561-CNDP0002	Preventive Maintenance -Condensate Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4561-CRN0001	Preventive Maintenance - Crane	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4561CTTR0001	Preventive Maintenance - Cooling Tower Water Treatment	7-day Cooling Tower Water Treatment PM	Perform testing on Cooling tower water system
			Add chemicals if needed
PM4561-CTWR0001	Preventive Maintenance - Cooling Tower	90-Day: Cooling Tower	Lubricate as necessary
			Check oil, add or change if necessary
			Check coupling and drives
		180-Day: Cooling Tower	Check operation of unit for water leaks, noise or vibration. If any problems found issue work request.
			Check electrical wiring and connections; make appropriate adjustments.
			Drain and flush could water sump and clean strainers; if required.
			Refill with water, check make-up water assembly for leakage, adjust electronic level controls if necessary.
			Remove clean and reinstall conductivity and ph electrodes in chemical water treatment system.
PM4561-CTWRC0001	Preventive Maintenance - Cooling Tower Controls	90-Day: Cooling Tower Controls	Inspect and calibrate controls
			Clean controls if necessary

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4561-CWP0001	Preventive Maintenance -Condenser Water Pump	365-Day Condenser Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling.
PM4561-CWP0002	Preventive Maintenance -Condenser Water Pump	365-Day Condenser Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling.
PM4561CWTR0001	Preventive Maintenance - Chilled Water Treatment	7-day Chilled Water Treatment PM	Perform testing on chilled water system
			Add chemicals if needed
PM4561-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4561-DOOR0002	Preventive Maintenance - Roll-Up Door	180-Day Sliding/Roll-up Door, Manual	Lubricate tracks as necessary
			Check stops and tethers
			If any problems are found issue work request
PM4561-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4561-EAF0002	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4561-EAF0003	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4561-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4561-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4561-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4561-FILT0001	Preventive Maintenance -Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4561-FILT0002	Preventive Maintenance -Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4561-FILT0003	Preventive Maintenance -Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4561-FILT0004	Preventive Maintenance -Filters	30-Day: Filter PM	Check Filters, change if necessary
PM4561-FILT0005	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4561-HST0001	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4561-HST0002	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4561-HST0003	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4561-HST0004	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4561-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4561HWTR0001	Preventive Maintenance - Hot Water Treatment	7-day Hot Water Treatment PM	Perform testing on hot water system
			Add chemicals if needed
PM4561HWTR0002	Preventive Maintenance - Hot Water Treatment (Off-season)	7-day Hot Water Treatment PM (Off-season)	Perform testing on hot water system
			Add chemicals if needed
PM4561-HWTR0003	Preventive Maintenance - Hot Water Treatment (Off-season)	30-day Hot Water PM (Off-season)	Notify Water Treatment Tech when performing PM (4-1058, 4-6020)
			Open all necessary valves (Supply/Control/Makeup)
			Check to make sure makeup water is on
			Check to make sure system is filled
			Coordinate operation with UCS
			Turn on circulation pumps and run for 48 hours
			Shut down pumps and close all necessary valves
PM4561LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4561-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4561-LTS0002	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4561-LTS0003	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4561-LTS0004	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4561-LTS0005	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4561-LTS0006	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4561-LTS0007	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4561-LTS0008	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4561-LTS0009	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head

			Check condition of lamps
			Check condition of battery
PM4561-MTS0001	Preventive Maintenance - Manual Transfer Switch	180-Day: Manual Transfer Switch	Exercise transfer switch
		365-Day: Manual Transfer Switch	Exercise transfer switch
			Clean equipment

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check all contacts and connections
PM4561-ODT0001	Preventive Maintenance - Oxygen Detection System	30-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Verify ODT is required at this location. If unit is not needed issue work request to remove unit
		180-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Calibrate system
			Check all alarm points
			Verify ODT is still required at this location. If unit is not needed issue work request to remove unit
PM4561-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4561-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4561-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary

PM4561-ROOF0005	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4561-RV0001	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4561-RV0002	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4561-SAF0001	Preventive Maintenance - Supply Air Fan	90-Day: Supply or Return Air Fan (Night-Shift)	Check operation and controls
		180-Day: Supply or Return Air Fan (Night-Shift)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate as necessary
PM4561-SAF0002	Preventive Maintenance - Supply Air Fan	90-Day: Supply or Return Air Fan (Night-Shift)	Check operation and controls
		180-Day: Supply or Return Air Fan (Night-Shift)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate as necessary
PM4561-SHEW0001	Preventive Maintenance - Safety Shower and Eyewash Station	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4561-UPS0001	Preventive Maintenance - UPS Power System	90-Day: UPS System	Perform visual safety check
			Check amperage and voltage
		180-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
		365-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
			Check termination points
			Inspect and clean all modules
PM4563-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4563-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4563-DXAC0002	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4563-EW0001	Preventive Maintenance - Safety Shower and Eyewash Station	30-Day: Safety Shower & Eyewash Station (Air-charged)	Check operation and controls. If any problems are found issue work request
			Check saline solution level, add as necessary
			Verify proper air pressure
			Date and initial inspection tag
		180-Day: Safety Shower & Eyewash Station (Air-charged)	Check operation and controls. If any problems are found issue work request
			Change saline solution
			Repressurize tank
			Date and initial inspection tag

			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4564-AH0003	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4564-AH0004	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4564-AH0005	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4564-AH0006	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4564-CHLR0001	Preventive Maintenance - Water Chiller	365-Day: Chiller, Air-Cooled	Check unit's evaporator and condenser pressures.
			Check fan motor if applicable for excessive noise and vibration.
			Check oil temperature
			Check compressor oil level.
			Lubricate condenser fan motors as necessary
			Run system control tests.
			Perform refrigerant leak check.
			Check refrigerant charge/level, add as necessary
			Check compressor for excessive noise/vibration.
			Check sensor and mechanical safety limits.
			Replace oil and oil filters(s).
			Inspect safety relief valve.
			Run an insulation test on the motor.
			Check (IR Scan) and tighten motor terminals.
			Service chiller starter and check all controls and terminations.
			Clean condenser
			Clean evaporator tubes if available
PM4564-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4564-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4567-SPMP001	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4567-SPMP002	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4570-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4570-HST0001	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4570-ODT0001	Preventive Maintenance - Oxygen Detection System	30-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Verify ODT is required at this location. If unit is not needed issue work request to remove unit
		180-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Calibrate system
			Check all alarm points
			Verify ODT is still required at this location. If unit is not needed issue work request to remove unit
PM4570-ODT0002	Preventive Maintenance - Oxygen Detection System	30-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Verify ODT is required at this location. If unit is not needed issue work request to remove unit
		180-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Calibrate system
			Check all alarm points
			Verify ODT is still required at this location. If unit is not needed issue work request to remove unit
PM4570-RMON0001	Preventive Maintenance - Refrigerant Monitoring System	90-Day: HCFC Refrigerant Monitoring System	Notify UCS that system will be under test before performing maintenance on system
			Check Calibration of each sensor, Recalibrate as necessary

**NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check/Verify operation of safety equipment (audio/visual warning equipment, exhaust ventilation equipment)
			Note any sensors that required adjustment
PM4570-SHEW0001	Preventive Maintenance - Safety Shower and Eyewash	30-Day: Safety Shower & Eyewash Station (Air-charged)	Check operation and controls. If any problems are found issue work request
			Check saline solution level, add as necessary
			Verify proper air pressure
			Date and initial inspection tag
		180-Day: Safety Shower & Eyewash Station (Air-charged)	Check operation and controls. If any problems are found issue work request
			Change saline solution
			Repressurize tank
			Date and initial inspection tag
PM4570-SHEW0002	Preventive Maintenance - Safety Shower	30-Day: Safety Shower & Eyewash Station (Air-charged)	Check operation and controls. If any problems are found issue work request
			Check saline solution level, add as necessary
			Verify proper air pressure
			Date and initial inspection tag
		180-Day: Safety Shower & Eyewash Station (Air-charged)	Check operation and controls. If any problems are found issue work request
			Change saline solution
			Repressurize tank
			Date and initial inspection tag
PM4571-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4571-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4571-LTS0001	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test
			Check condition of lamps
		365-Day: Emergency Lights - Fluorescent Type	Perform 1.5 hour light operational test
			Check condition of lamps
			Check condition of battery
PM4571-LTS0002	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Fluorescent Type	Perform 30 second light operational test
			Check condition of lamps

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
		365-Day: Emergency Lights - Fluorescent Type	Perform 1.5 hour light operational test
			Check condition of lamps
			Check condition of battery
PM4571-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4571-SGND0001	Preventive Maintenance -Static Ground System	365-Day: Static Ground System	Check and record resistance readings
			Attach and turn in ground readings with PM sheet
PM4572-BATB0001	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4572-CRU0002	Preventive Maintenance - Computer Room Unit	90-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems found then issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems are found issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
		365-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems are found issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
			Check safety interlocks
			Clean condenser and evaporator coils
PM4572-CRU0004	Preventive Maintenance - Computer Room Unit	90-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems found then issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems are found issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure

		365-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Clean condenser and evaporator coils
			Check safety interlocks
PM4572-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4572-ELEV0001	Preventive Maintenance - Hydraulic Elevator	30-Day: Hydraulic Elevator with Automatic Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Inspect hoistways and car top
			Check oil reservoir
			Check sensitivity of door closure pressure
PM4572-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4572-EW0001	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4572-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4572-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4572-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4572-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary

			Install knockout hole plugs as necessary
PM4572-PNL0015	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4572-PNL0016	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4572-PNL0017	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4572-PNL0018	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4572-PNL0019	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4572-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4572-ROOF0002	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4572-ROOF0003	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4572-ROOF0004	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4572-SHEW0001	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4572-SHEW0002	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4572-SPMP001A	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4572-SPMP001B	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4572-SPR0001	Preventive Maintenance - Sprinkler System	30-Day: Dry Sprinkler System PM	Perform PM
		90-Day: Dry Sprinkler System PM	Perform PM
		365-Day: Dry Sprinkler System PM	Perform PM
PM4574-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4574-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4581LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4581-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4581-SPMP001A	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4581-SPMP001B	Preventive Maintenance - Sump Pump	30-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Sump Pump	Check operation and controls. If any problems are found issue work request
			Lubricate as necessary
			Check coupling and drives
PM4582-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven	Check operation and controls. If any problems are found issue work request.

**NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
		365-Day: Direct Expansion Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven	Check operation and controls. If any problems are found issue work request
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
			Clean condenser and evaporator coils
			Check safety interlocks
PM4582-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4582-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4582LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4582-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4582-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4582-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4582-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4582-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4582-ROOF0002	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4583-ACFLT0001	Preventive Maintenance - Air Compressor Filter Change	365-Day: Air Compressor Filter Change	Replace Filter(s) on air compressor unit.

PM4583-ADRY0001	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/ sealed condenser motor)	Check operation and controls. If any problems are found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4583-ADRY0002	Preventive Maintenance - Air Dryer	60-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
		180-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
			Clean condenser coils
PM4583-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4583-AH0003	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4583-AH0004	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4583-AH0005	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4583-AH0006	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4583-AH0008	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4583A-LROD0001	Preventive Maintenance - Lightning Protection System	365 Day: Lightning Protection System	Measure and record resistance readings
			Inspect rods, cables, and fasteners
			Attach and turn in ground readings with PM sheet
PM4583A-SHEW0001	Preventive Maintenance - Safety Shower and Eyewash Station	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4583A-SHEW0002	Preventive Maintenance - Safety Shower and Eyewash Station	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4583-BATB0001	Preventive Maintenance - Battery Bank	30-Day: Battery Bank, Wet Cell (UPS)	Check and refill battery
			Check connections
			Clean and lubricate terminals
			Clean battery if necessary
			Check operation and controls
			Take specific gravity and voltage readings
			Check pilot cell temperature
PM4583-BFP0001	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4583-BFP0002	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4583-CC0001	Preventive Maintenance - Condenser Water	90-Day: Condenser Water	Check for corrosion
PM4583-CC0002	Preventive Maintenance - Condenser Water	90-Day: Condenser Water	Check for corrosion
PM4583-CCTWR0001	Preventive Maintenance - Cooling Tower	180-Day: Cooling Tower Cleaning	Contact HVAC Crew for Support.
			Clean and Inspect Hot Water Basin.
			clean inside of water tower using water hose, if required; scrape, brush and wipe as required;
PM4583-CFC0001	Preventive Maintenance - Condenser Water	30-Day: Condenser Water	Clean Conductivity Probes
PM4583-CHLR0001	Preventive Maintenance - Water Chiller	365-Day: Chiller, Water-Cooled (York)	Check units evaporator and condenser pressures, oil tank pressure.
			Check oil level in chiller oil sump.
			Check oil temperature
			Check dehydrator or purge system; replace purge filter and inspect sight glass, replace if needed.
			Run system control tests.
			Check refrigerant charge/level, add as necessary.
			Check compressor for excessive noise/vibration.
			Check sensor and mechanical safety limits.
			Clean dehydrator float valve.
			Perform spectrochemical analysis of compressor oil.
			Replace oil and oil filter(s).
			Inspect cooler and condenser tubes for leaks.
			Inspect utility vessels vent piping and safety relief valve.
			Inspect/clean the economizer (vane), gas line damper valve, and actuator.
			Run an insulation test on the motor.
			Check (IR Scan) and tighten motor terminals.
			Service chiller starter and check all controls and terminations.
			Rod & clean condensor.
			Rod & clean evaporator.
			Check hot gas by-pass operation.
PM4583-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4583-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4583-CNDP0001	Preventive Maintenance -Condensate Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.

NNM08AA54C
ATTACHMENT J-24

			Lubricate pump and motor as necessary
PM4583-CNDP0002	Preventive Maintenance -Condensate Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
PM4583-CODT0001	Preventive Maintenance - Carbon Monoxide Detection System	30-Day Carbon Monoxide Detection System	Inspect system and calibrate
			Check water levels, add if necessary
PM4583-CRU0001	Preventive Maintenance - Computer Room Unit	90-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems found then issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems are found issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
		365-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems are found issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
			Check safety interlocks
			Clean condenser and evaporator coils
PM4583-CRU0002	Preventive Maintenance - Computer Room Unit	90-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems found then issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems are found issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
		365-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems are found issue work request.

PM4583-CRU0003	Preventive Maintenance - Computer Room Unit	90-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems found then issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
		180-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems are found issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
		365-Day: Computer Room Type, Direct Expansion and Combination Unit	Check operation and controls. If any problems are found issue work request.
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Lubricate condenser fan as necessary
			Lubricate blower motor as necessary
			Check suction and discharge pressure
			Check safety interlocks
			Clean condenser and evaporator coils
PM4583CTTR0001	Preventive Maintenance - Cooling Tower Water Treatment	7-day Cooling Tower Water Treatment PM	Perform testing on Cooling tower water system
			Add chemicals if needed
PM4583-CTWR0001	Preventive Maintenance - Cooling Tower	90-Day: Cooling Tower	Lubricate as necessary
			Check oil, add or change if necessary
			Check coupling and drives
		180-Day: Cooling Tower	Check operation of unit for water leaks, noise or vibration. If any problems found issue work request.
			Check electrical wiring and connections; make appropriate adjustments.
			Drain and flush could water sump and clean strainers; if required.
			Refill with water, check make-up water assembly for leakage, adjust electronic level controls if necessary.
			Remove clean and reinstall conductivity and ph electrodes in chemical water treatment system.
PM4583-CTWRC0001	Preventive Maintenance - Cooling Tower Controls	90-Day: Cooling Tower Controls	Inspect and calibrate controls
			Clean controls if necessary
PM4583-CWP0001	Preventive Maintenance -Condenser Water Pump	365-Day Condenser Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.

			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling.
PM4583-CWP0003	Preventive Maintenance -Condenser Water Pump	365-Day Condenser Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling.
PM4583-CWP0004	Preventive Maintenance -Condenser Water Pump	365-Day Condenser Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling.
PM4583CWTR0001	Preventive Maintenance - Chilled Water Treatment	7-day Chilled Water Treatment PM	Perform testing on chilled water system
			Add chemicals if needed
PM4583-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Sliding/Roll-up Door, Manual	Lubricate tracks as necessary
			Check stops and tethers
			If any problems are found issue work request
PM4583-DOOR0002	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments
			If any problems are found issue work request
PM4583-DOOR0003	Preventive Maintenance - Roll-Up Door	180-Day Sliding/Roll-up Door, Manual	Lubricate tracks as necessary
			Check stops and tethers
			If any problems are found issue work request
PM4583-DOOR0004	Preventive Maintenance - Roll-Up Door	180-Day Roll-Up Door PM (w/o lifting cables)	Inspect drive mechanism
			Inspect brake settings if applicable
			Check master link on chains
			Visually inspect alignment of tracks
			Lubricate tracks as necessary
			Inspect Mounts to ensure that they are sufficiently sized
			Inspect chain drive adjustments

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4583-EW0002	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4583-EW0003	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4583-FAN0001	Preventive Maintenance - Booster Fan	90-Day: Supply or Return Air Fan (Night-Shift)	Check operation and controls
		180-Day: Supply or Return Air Fan (Night-Shift)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate as necessary
PM4583-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4583-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4583-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4583-FILT0004	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary

PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4583-HST0002	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4583-HST0003	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4583-HST0004	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4583-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4583HWTR0001	Preventive Maintenance - Hot Water Treatment	7-day Hot Water Treatment PM	Perform testing on hot water system
			Add chemicals if needed
PM4583-ICE0001	Preventive Maintenance - Ice Machine	30-Day: Ice Machine	Check water filter
		90-Day: Ice Machine	Check water filter
			Check operation and controls. If any problems are found issue work request
			Check water pressure
			Lubricate condenser fan motor as necessary
		180-Day: Ice Machine	Check water filter
			Check operation and controls. If any problems are found issue work request
			Check water pressure
			Lubricate condenser fan motor as necessary
			Clean condenser coils
PM4583LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4583-LROD0001	Preventive Maintenance - Lightning Protection System	365 Day: Lightning Protection System	Measure and record resistance readings

NNM08AA54C
ATTACHMENT J-24

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Install knockout hole plugs as necessary
PM4583-PNL0037	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0038	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0039	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0040	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0041	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0042	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0043	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0044	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0045	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0046	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0047	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0048	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0050	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0051	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0052	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0053	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times

PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Install knockout hole plugs as necessary
PM4583-PNL0054	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0055	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0056	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-PNL0057	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4583-RAF0004	Preventive Maintenance - Return Air Fan	90-Day: Supply or Return Air Fan (Night-Shift)	Check operation and controls
		180-Day: Supply or Return Air Fan (Night-Shift)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Lubricate as necessary
PM4583-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4583-ROOF0002	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4583-ROOF0003	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4583-ROOF0004	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4583-ROOF0005	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4583-ROOF0006	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4583-ROOF0007	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4583-ROOF0008	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4583-ROOF0009	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4583-RV0001	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4583-RV0002	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4583-RV0004	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4583-RV0005	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4583-RV0006	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4583-SH0002	Preventive Maintenance - Safety Shower and Eyewash Station	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4583-SH0003	Preventive Maintenance - Safety Shower and Eyewash Station	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4583-UPS0001	Preventive Maintenance - UPS Power System	90-Day: UPS System	Perform visual safety check
			Check amperage and voltage
		180-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
		365-Day: UPS System	Perform visual safety check
			Check amperage and voltage

**NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check operation and controls
			Check termination points
			Inspect and clean all modules
PM4583-UPS0002	Preventive Maintenance - UPS Power System	90-Day: UPS System	Perform visual safety check
			Check amperage and voltage
		180-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
		365-Day: UPS System	Perform visual safety check
			Check amperage and voltage
			Check operation and controls
			Check termination points
			Inspect and clean all modules
PM4584LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4584-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4584-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4584-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4585-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Sliding/Roll-up Door, Manual	Lubricate tracks as necessary
			Check stops and tethers
			If any problems are found issue work request
PM4585-DOOR0002	Preventive Maintenance - Roll-Up Door	180-Day Sliding/Roll-up Door, Manual	Lubricate tracks as necessary
			Check stops and tethers
			If any problems are found issue work request
PM4585-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4585-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells

**NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Clean, test, and calibrate smoke detectors if applicable
PM4585-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4585LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4585-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4585-LTS0002	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4585-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4585-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4585-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4585-PNL0003	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4585-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4586-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Water-Cooled	Check operation and controls. If any problems are found issue work request
			Lubricate blower motor as necessary
		180-Day: Direct Expansion Unit Package, Water-Cooled	Check operation and controls. If any problems are found issue work request
			Lubricate blower motor as necessary
PM4586-ODT0001	Preventive Maintenance - Oxygen Detection System	30-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection
			Verify ODT is required at this location. If unit is not needed issue work request to remove unit
		180-Day: Oxygen Detection System, Dry Cell Type	Perform visual inspection

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Calibrate system
			Check all alarm points
			Verify ODT is still required at this location. If unit is not needed issue work request to remove unit
PM4586-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4588-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4588-DXAC0002	Preventive Maintenance - Direct Expansion AC Unit	90-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
		180-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
		365-Day: Direct Expansion Unit Package, Split-Type, Air-Cooled, Belt-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Check belts, change if necessary
			Clean condenser and evaporator coils
			Check safety interlocks
PM4588-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4588-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4588LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4588-LTS0001	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4588-LTS0002	Preventive Maintenance - Emergency Lights	180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
		30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
PM4588-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4588-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4588-PNL0003	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4588-PNL0004	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4588-PNL0005	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4588-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4596-ACFLT0001	Preventive Maintenance - Air Compressor Filter Change	365-Day: Air Compressor Filter Change	Replace Filter(s) on air compressor unit.
PM4596-ACMP0001	Preventive Maintenance - Air Compressor	90-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check Belts. Change if necessary.
		180-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change if necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
		365-Day: Air Compressor	Drain Tank. If unit has automatic drain then cycle drain.
			Check oil, add or change as necessary
			Lubricate as necessary
			Check belts, change if necessary
			Check filters, change if necessary
PM4596-DOOR0001	Preventive Maintenance - Roll-Up Door	180-Day Sliding/Roll-up Door, Manual	Lubricate tracks as necessary
			Check stops and tethers
			If any problems are found issue work request
PM4596-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		180-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
		365-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Clean condenser and evaporator coils
			Check safety interlocks
PM4596-EAF0001	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4596-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4596LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4596-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4596-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (John Davis)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4596-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4596-RV0001	Preventive Maintenance - Relief Valves	365-Day: Relief Valve PM	Service and Tag Relief Valve
PM4598LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4600-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4600-AH0002	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4600-AH0003	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4600-AH0004	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4600-AH0005	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4600-ATS0001	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4600-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4600-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4600DRAIN	Preventive Maintenance - Storm Drain Inspection	365-day Storm Drain	Clean-out all storm drains in the area
PM4600-ELEV0001	Preventive Maintenance - Hydraulic Elevator	30-Day: Hydraulic Elevator with Automatic Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Inspect hoistways and car top
			Check oil reservoir
			Check sensitivity of door closure pressure
		180-Day: Hydraulic Elevator with Automatic Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Check hoistway terminal limits
			Inspect hoistways and car top
			Check oil reservoir
			Check sensitivity of door closure pressure
PM4600-ELEV0002	Preventive Maintenance - Hydraulic Elevator	30-Day: Hydraulic Elevator with Automatic Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Inspect hoistways and car top
			Check oil reservoir
			Check sensitivity of door closure pressure
		180-Day: Hydraulic Elevator with Automatic Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Check hoistway terminal limits
			Inspect hoistways and car top
			Check oil reservoir
			Check sensitivity of door closure pressure

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4600-ELEV0003	Preventive Maintenance - Hydraulic Elevator	30-Day: Hydraulic Elevator with Automatic Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Inspect hoistways and car top
			Check oil reservoir
			Check sensitivity of door closure pressure
		180-Day: Hydraulic Elevator with Automatic Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Check hoistway terminal limits
			Inspect hoistways and car top
			Check oil reservoir
			Check sensitivity of door closure pressure
PM4600-ELEV0004	Preventive Maintenance - Hydraulic Elevator	30-Day: Hydraulic Elevator with Automatic Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Inspect hoistways and car top
			Check oil reservoir
			Check sensitivity of door closure pressure
		180-Day: Hydraulic Elevator with Automatic Gate	Check and clean all electrical panels
			Verify operation of emergency telephone
			Check hoistway terminal limits
			Inspect hoistways and car top
			Check oil reservoir
			Check sensitivity of door closure pressure
PM4600-EROOM0001	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4600-EROOM0002	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4600-EROOM0003	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4600-EROOM0004	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4600-EROOM0005	Preventive Maintenance - Equipment Room Cleaning	180-Day: Equipment Room Cleaning	Thoroughly clean room and area around equipment.
			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.

			Check area for control air leaks.
			Check area for water leaks.
			Report all deficiencies.
PM4600-ERU0001	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4600-ERU0002	Preventive Maintenance - Air Handling Unit	180-Day: Air Handling Unit	Check controls and unit for proper operation. If any problems are found issue work request
			Lubricate shaft and motor bearings as necessary
			Check belts for wear, proper tension, and alignment; adjust/replace as necessary.
PM4600-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System (Night Shift)	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
			Perorm all work after core hours.
PM4600-FILT0001	Preventive Maintenance - Filters	90-Day Filter PM (Night-Shift)	Check filters, change if necessary
PM4600-FILT0002	Preventive Maintenance - Filters	90-Day Filter PM (Night-Shift)	Check filters, change if necessary
PM4600-FILT0003	Preventive Maintenance - Filters	90-Day Filter PM (Night-Shift)	Check filters, change if necessary
PM4600-FILT0004	Preventive Maintenance - Filters	90-Day Filter PM (Night-Shift)	Check filters, change if necessary
PM4600-FILT0005	Preventive Maintenance - Filters	90-Day Filter PM (Night-Shift)	Check filters, change if necessary
PM4600-FILT0006	Preventive Maintenance - Filters	90-Day Filter PM (Night-Shift)	Check filters, change if necessary
PM4600-FILT0007	Preventive Maintenance - Filters	90-Day Filter PM (Night-Shift)	Check filters, change if necessary
PM4600-FIRP0001	Preventive Maintenance - Fire Pump - Millwright	90-Day: Millwright PM for Fire Pump	Change oil after 50 hours of operation
			Change oil filter after 50 hours of operation
			Verify that shaft seals are dripping water properly (1 drop per second)
			Verify that the system is free of vibration or unusual noise
			Verify that the packing boxes, bearings, pump casing are free of overheating

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
PM4600-GEN0001	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		365-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts

ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Winterize system
			Verify continuity of generator ground, including the fuel tank ground
			Verify day tank's fuel level is topped off between float ranges, if applicable.
PM4600-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4600-HWP0002	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4600-HWP0003	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4600HWTR0001	Preventive Maintenance - Hot Water Treatment	7-day Hot Water Treatment PM	Perform testing on hot water system
			Add chemicals if needed
PM4600LIGHTS	Preventive Maintenance - Exterior Lighting	90-Day Exterior Lighting Inspection	Inspect all Exterior Building Lighting
			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4600-LP0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (Bobby Collier)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4600-LP0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (Bobby Collier)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary

			Inspect all Parking Lot Lighting
			Report Findings to Electrical Supervisor
PM4604-LTS0001	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
		180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
PM4604-LTS0002	Preventive Maintenance - Emergency Lights	30-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Perform 30 second light operational test
		180-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Clean interior of light housing, check battery terminals
			Perform 30 second light operational test
		365-Day: Emergency Lights - Dry Cell	Clean exterior of emergency light and lamp head
			Check condition of battery and replace if necessary
			Perform 1.5 hour operational test
			Clean interior of light housing, check battery terminals
PM4604-PEST0001	Preventive Maintenance - Pest Control	365-Day Pest Control	Inspect for rodents, pest, and insects.
			Apply insecticides or poisons as required.
			Complete chemical applications records.
PM4604-PNL0001	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (Bobby Collier)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4604-PNL0002	Preventive Maintenance - Panel Board	1095-Day Breaker Exercising Maintenance (Bobby Collier)	Exercise all breakers in distribution panels 3-4 times
			Install knockout hole plugs as necessary
PM4604-ROOF0001	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4604-ROOF0002	Preventive Maintenance - Roof	180-Day: Roof Inspection	Perform preventive and corrective maintenance to roof system
PM4605-ADRY0001	Preventive Maintenance - Air Dryer	180-Day: Air Dryer, Desiccant Type	Check humidity alarm operation
			Change all filters
			Check compressor pressure switch set point
			Check back pressure regulator set point
		60-Day: Air Dryer, Refrigerant Type (w/o Condenser Fan)	Check operation and controls. If any problems found then issue work request.
			Drain and flush
			Drain water separator
PM4605-AH0001	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4605-AH0002	Preventive Maintenance - Air Handling Unit	365-Day: Air Handling Unit	Check controls and unit for proper operation
			Inspect interior of unit for loose debris (pest, loose filters, etc.)

NNM08AA54C
ATTACHMENT J-24
PREVENTIVE MAINTENANCE

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Vacuum out condensate drain/pan of unit as applicable
			Check exterior coil connections for leaks
			Check air bleed valves for proper operation where applicable
PM4605-ATS0001	Preventive Maintenance - Auto Transfer Switch	180-Day: Auto Transfer Switch	Check automatic operation and controls
		365-Day: Auto Transfer Switch	Check automatic operation and controls
			Clean equipment
			Perform Infrared Inspection to check all contacts and connections
			If temperatures of over 121 degrees F noticed, connection must be repaired/tightened.
PM4605-BFP0001	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4605-BFP0002	Preventive Maintenance - Back Flow Preventer	90-Day: Back Flow Preventer	Check Operations
PM4605-BLR0001	Preventive Maintenance - Electric Boiler	30-Day: Boiler in dry lay-up	Perform safety walk-through
			Clean boiler area, if necessary
PM4605-CHLR0001	Preventive Maintenance - Water Chiller	365-Day: Chiller, Air-Cooled	Check unit's evaporator and condenser pressures.
			Check fan motor if applicable for excessive noise and vibration.
			Check oil temperature
			Check compressor oil level.
			Lubricate condenser fan motors as necessary
			Run system control tests.
			Perform refrigerant leak check.
			Check refrigerant charge/level, add as necessary
			Check compressor for excessive noise/vibration.
			Check sensor and mechanical safety limits.
			Replace oil and oil filters(s).
			Inspect safety relief valve.
			Run an insulation test on the motor.
			Check (IR Scan) and tighten motor terminals.
			Service chiller starter and check all controls and terminations.
			Clean condenser
			Clean evaporator tubes if available
PM4605-CHWP0001	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4605-CHWP0002	Preventive Maintenance - Chill Water Pump	365-Day Chilled Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands; make minor repairs as necessary.
			Lubricate pump and motor as necessary.
			Check drive coupling
PM4605-CNDP0001	Preventive Maintenance -Condensate Pump	90-Day: Pump	Check operation and controls. If any problems are found issue work request
		180-Day: Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.

PREVENTIVE MAINTENANCE**

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Lubricate pump and motor as necessary
PM4605-CRU0001	Preventive Maintenance - Computer Room Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems found then issue work request.
			Lubricate blower motor as necessary
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4605-CRU0002	Preventive Maintenance - Computer Room Unit	90-Day Computer Room Type Air Handling Unit, Chill Water	Check operation and controls. If any problems found then issue work request.
			Lubricate blower motor as necessary
			Check belts, change if necessary
			Check and lubricate bearings as necessary
			Check safety interlocks
PM4605CWTR0001	Preventive Maintenance - Chilled Water Treatment	7-day Chilled Water Treatment PM	Perform testing on chilled water system
			Add chemicals if needed
PM4605-DXAC0001	Preventive Maintenance - Direct Expansion AC Unit	90-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		180-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Thru The Wall Unit (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
		365-Day: DX Unit Package, Stand-Alone or Split-Type, Air-Cooled, Direct-Driven (W/ Sealed condenser fan and blower motor)	Check operation and controls. If any problems are found issue work request
			Clean condenser and evaporator coils
			Check safety interlocks
PM4605-EW0001	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4605-EW0002	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4605-EW0003	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4605-EW0004	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4605-EW0005	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request
			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4605-EW0006	Preventive Maintenance - EyeWash	30-Day Safety Shower and/or Eyewash Station	Check operation and controls. If any problems are found issue work request

			Flush system for 2 minute minimum
			Date and initial inspection tag
PM4605-FAS0001	Preventive Maintenance - Fire Alarm System	30-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
		180-Day: Fire Alarm System	Inspect panel
			Inspect smoke detectors for damage and obstructions
			Verify operation of all pull stations and bells
			Clean, test, and calibrate smoke detectors if applicable
PM4605-FILT0001	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4605-FILT0002	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4605-FILT0003	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4605-FILT0004	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4605-FILT0005	Preventive Maintenance - Filters	90-Day: Filter PM	Check filters, change if necessary
PM4605-GEN0001	Preventive Maintenance - Emergency Generator	30-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		90-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output

<u>PMNUM</u>	<u>PM DESCRIPTION</u>		<u>TASK DESCRIPTION</u>
			Verify day tank's fuel level is topped off between float ranges, if applicable.
		365-Day: Generator	Notify building manager of intent to perform generator maintenance prior to operating generator.
			Seal off all necessary components of building ventilation system in order to prevent entry of fumes into building.
			Check operation and controls. If any problems are found issue work request
			Check filters if applicable, change if necessary
			Check belts if applicable, change if necessary.
			Check coolant if applicable, add or change if necessary.
			Check stop switch and emergency alarm bell.
			Lubricate as necessary
			Tighten all bolts
			Check oil, add or change if necessary
			Check voltage.
			Check battery
			Check connections and battery charger
			Check generator output
			Winterize system
			Verify continuity of generator ground, including the fuel tank ground
			Verify day tank's fuel level is topped off between float ranges, if applicable.
PM4605-HST0001	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4605-HST0002	Preventive Maintenance - Cranes and Hoists	30-Day: Cranes and Hoists (Mechanical Tasks)	Inspect trolley lugs, rails and stops.
			Check operation and controls. If any problems found then issue work request.
			Lubricate as necessary
			Verify that hand signal and warning labels are attached properly
			Perform hook and wire rope inspection
			Complete and sign mechanical inspection form
PM4605-HWP0001	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.
			Lubricate pump and motor as necessary
			Check drive coupling
PM4605-HWP0002	Preventive Maintenance - Hot Water Pump	365-Day: Hot Water Pump	Check for proper operation of pump. If any problems are found issue work request
			Check for leaks on suction and discharge piping, seals, packing glands etc.; make minor repairs as necessary.

			If any problems are found issue work request
PM4607-EAF0009	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4607-EAF0010	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4607-EAF0011	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4607-EAF0012	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4607-EAF0013	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4607-EAF0014	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4607-EAF0015	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
			Check motor and fan shaft bearings for noise, vibration, overheating; lubricate as necessary.
			Check belts for wear, tension, and alignment, if applicable; adjust as required.
			If any problems are found issue work request
PM4607-EAF0016	Preventive Maintenance - Exhaust Blower Fan	180-Day Exhaust Fan	Start and stop fan with local switch.
