

MANUFACTURING SUPPORT AND FACILITY OPERATIONS CONTRACT (MSFOC) NNM09AA20C

ATTACHMENT J-2

FACILITIES PERFORMANCE WORK STATEMENT – Non-Fee Bearing

The purpose of the Michoud Assembly Facility (MAF) Manufacturing Support and Facilities Operations Contract (MSFOC) is to provide mission-focused integrated production and facility operation support to National Aeronautics and Space Administration (NASA) Projects and other on-site user(s)/tenant(s) during a period of time when MAF is transforming from a single project, single-prime contractor facility to a multi-project, multi-prime contractor facility. This support as described in this Attachment J-2, Facilities PWS includes providing the following activities on a non-fee bearing basis: procurement and rehabilitation of contractor acquired property, payment of utilities, construction of local projects, environmental compliance and restoration, construction of facilities, preliminary engineering reports and facility special studies.

The Contractor shall recognize that property furnished by the Government will be provided to the Contractor and the Contractor is accountable for that property. The Contractor will be reimbursed under this Attachment J-2 Facilities PWS for transporting, installing, modifying, repairing, or otherwise making the property ready for use.

NOTE: Effort in this Attachment J-2, Facilities PWS is not part of Mission Services and if determined appropriate, will be authorized by an IDIQ task.

1.0 CONTRACTOR ACQUIRED PROPERTY:

Scope :

The Contractor shall acquire, fabricate, and install such plant equipment entitled, "Contractor Acquired Property," (CAP) as identified in Attachment J-9, Contractor Acquired Property. All CAP in excess of \$25,000 will be approved by the Contracting Officer on an item-by-item basis, prior to any acquisition. The latest requirements for CAP will be reported quarterly. The NASA CO quarterly reports, which list equipment procurements by quarter, will be referenced in Attachment J-9. Contracting Officer approval of quarterly report requirements constitutes the authority to purchase those items.

2.0 REHABILITATION OF CAP:

Scope:

The Contractor shall rehabilitate CAP. Contractor Acquired Property rehabilitation projects shall be approved by the Contracting Officer prior to the start of each project.

3.0 PAYMENT OF UTILITIES:

Scope:

The Contractor shall provide for the direct payment of all utility expenses incurred at the MAF beginning upon completion of contract phase-in and with the assumption of full contract responsibilities. For those expenses in which MAF tenants are required to pay a portion of the expense (electricity, water, natural gas, and fuel) the Contractor will maintain accounting records that reflect the level of consumption for each tenant.

4.0 CONSTRUCTION OF LOCAL PROJECTS:

Scope:

The Contractor shall provide the services and supplies for the installation, modification, and additions to existing real property and installed property provided to the contractor at MAF needed to carry out the PWS as identified in Section 10, Attachment J-1, Performance Work Statement. These projects will be subcontracted and does not fit the CoF Construction criteria defined as a project with a value greater than \$500,000. Items so furnished shall be listed and reported as Modification and Construction of Real and Installed Property, pursuant to Section 7.1, Attachment J-1, Performance Work Statement.

5.0 ENVIRONMENTAL COMPLIANCE AND RESTORATION:

Scope:

The Contractor shall provide the services and supplies for the installation, modification and additions to existing environmental related real property needed to carry out the PWS as identified in Section 9.0, Attachment J-1 Performance Work Statement. These projects will be funded through the MSFC Environmental Office and does comply with the CoF funding criteria and limitations. Items so furnished shall be listed and reported as Modification and Construction of Real and Installed Property, pursuant to Section 8.0, Attachment J-1 Performance Work Statement.

6.0 CONSTRUCTION OF FACILITIES:

Scope:

The Contractor shall provide the services and supplies for the installation, modification and additions to existing real property and installed property provided to the Contractor needed to carry out the PWS as identified in Section 10.0, Attachment J-1 Performance Work Statement. These projects will be subcontracted and fits the CoF Construction criteria defined as a project with a value greater than \$500,000. Items so furnished shall be listed and reported as Modification and Construction of Real and Installed Property, pursuant to Section 7.1, Attachment J-1 Performance Work Statement.

7.0 PRELIMINARY ENGINEERING REPORTS (PER):

Scope:

The Contractor shall perform Preliminary Engineering Reports (PER) that are necessary, prior to the initiation of CoF design or site investigation of construction projects in order to further define (a) project requirements; (b) justification; (c) construction approach and (d) budgetary estimates.

8.0 FACILITY SUPPORT STUDIES:

Scope:

The Contractor shall perform those facility support studies that are identified by the government. Facility Support Studies are studies that must be performed prior to the initiation of design or site investigation of unusual construction/environmental projects in order to determine (a) the condition of MAF's infrastructure, (b) further define any facility project requirements, (c) provide higher fidelity budgetary estimates and/or (d) MAF project requirements driven by environmental law or regulations (environmental studies applicability only).

1.0 INTRODUCTION

1.1 Scope: Subject to the Rights in Data clause, this Data Procurement Document (DPD) sets forth the data requirements in each Data Requirements Description (DRD) and shall govern that data required by the DPD for the contract. The contractor shall furnish data defined by the DRD's listed on the Data Requirements List (DRL) by category of data, attached hereto, and made a part of this DPD. Such data shall be prepared, maintained, and delivered to NASA in accordance with the requirements set forth within this DPD. In cases where data requirements are covered by a Federal Acquisition Regulation (FAR) or NASA FAR Supplement (NFS) clause, that clause shall take precedence over the DPD, consistent with clause FAR 52.215-8.

1.2 DPD Description: This DPD consists of a Document Change Log, an Introduction, a Statement of General Requirements, DPD maintenance procedures, a DRL, and the DRD's.

1.2.1 General Requirements: The general requirements, as specified in paragraph 2.0 of this DPD, prescribe those requirements applicable to the preparation, maintenance, and delivery of data that are better defined in aggregate than in the individual DRD's.

1.2.2 Data Requirements List (DRL): Throughout the performance of the contract, the DRL provides a listing by data category of the data requirements of the DPD.

1.2.3 Data Requirements Descriptions (DRD's)

1.2.3.1 Each data requirement listed on the DRL is given complete definition by a DRD. The DRD prescribes content, format, maintenance instructions, and submittal requirements.

1.2.3.2 For the purpose of classification and control, DRD's of this DPD are grouped into the following broad functional data categories:

<u>CATEGORY SYMBOL</u>	<u>DESCRIPTION</u>
CD	Contractual Data
CM	Configuration Management
CS	Construction Services
EE	Environmental Engineering
LS	Logistics/Support
MA	Management
MS	Manufacturing Support
OM	Operations and Maintenance
QE	Quality Engineering
SA	Safety
SE	Sustaining Engineering

1.2.3.3 The symbols representing these data categories form part of the prefix of the DRD identification number. The first numerical characters reflect the DPD number.

1.2.3.4 To facilitate the usage and maintenance of the DPD, the DRD's have been sectionalized in accordance with the above data categories.

1.2.3.5 The DRD's are filed by data category and are in alpha-numeric sequence as listed on the DRL page (or pages) that precedes the DRD's.

1.2.4 Document Change Log (DCL): The Document Change Log chronologically records all revision actions that pertain to the DPD.

1.2.5 DPD Maintenance Procedures: Maintenance procedures define the detailed methods to be employed in maintaining the DPD. Detailed maintenance procedures are specified in paragraph 3.0 of this DPD.

Contract NNM09AA20C

- 1.3 Data Types for Contractual Efforts: The types of data and their contractually applicable requirements for approval and delivery are:

TYPE

DESCRIPTION

- 1* All issues and interim changes to those issues require written approval from the requiring organization before formal release for use or implementation.
 - 2* NASA reserves a time-limited right to disapprove in writing any issues and interim changes to those issues. The contractor shall submit the required data to NASA for review not less than 45 calendar days** prior to its release for use. The contractor shall clearly identify the release target date in the "submitted for review" transmittal***. If the data is unacceptable, NASA will notify the contractor within 45 calendar days** from the date of submission, regardless of the intended release date***. The contractor shall resubmit the information for reevaluation if disapproved. The submittal is considered approved if the contractor does not receive disapproval or an extension request from NASA within 45 calendar days**.
 - 3 These data shall be delivered by the contractor as required by the contract and do not require NASA approval. However, to be a satisfactory delivery, the data shall satisfy all applicable contractual requirements and be submitted on time.
 - 4 These data are produced or used during performance of the contract and are retained by the contractor. They shall be delivered only when NASA requests in writing and shall be delivered in accordance with the instructions in the request. The contractor shall maintain a list of these data and shall furnish copies of the list to NASA when requested to do so.
 - 5 These data are incidental to contract performance and are retained by the contractor in those cases where contracting parties have agreed that formal delivery is not required. However, the Contracting Officer or the Contracting Officer's Representative shall have access to and can inspect this data at its location in the contractor's or subcontractor's facilities, or in an electronic database accessible to the Government.
- * Note: Type 1 and Type 2 data may be placed under NASA configuration management control when designated by NASA. CM control requires the contractor to submit Type 1 and Type 2 data updates through Engineering Change Proposals (ECPs).
- ** Note: This time limit may be tailored for individual DPD's to meet the requirements of the procuring activity.
- *** Note: If the contractor does not identify a release target date or if the intended release date is shorter than 45 calendar days from the date of submission, the 45 calendar days review cycle stands (or the tailored Type 2 time limitation for the specific procurement).

2.0 STATEMENT OF GENERAL REQUIREMENTS

- 2.1 Applicable/Reference Documents: Documents included as applicable documents in this DPD are the issue specified in the Statement of Work, and form a part of the DPD to the extent specified herein. Applicable documents listed in Item 15.2 of a DRD are applicable only to the preparation of the deliverable documentation described by that DRD.

References to documents other than applicable documents in the data requirements of this DPD may sometimes be utilized, and shall be indicated in 13. Remarks of the DRD. These do not constitute a contractual obligation on the contractor. They are to be used only as a possible example or to provide related information to assist the contractor in developing a response to that particular data requirement.

Contract NNM09AA20C

2.2 Subcontractor Data Requirements

2.2.1 The contractor shall specify to subcontractors and vendors, if any, the availability source of all data required for the satisfactory accomplishment of their contracts. The contractor shall validate these requirements for documents when appropriate; where the requirement concerns other contractor data, the contractor shall provide his subcontractor or vendor with the necessary documents. All such requests shall be accomplished under the auspices of the contractor.

2.2.2 Reference to subcontractor data in the contractor's responses is permissible, providing the references are adequate and include such identification elements as title, number, revision, etc., and a copy of the referenced data is supplied with the response document at time of delivery to NASA.

2.3 Data Distribution, Format, Data Restriction Marking, and Transmittal

2.3.1 Distribution: Distribution of required documentation shall be in quantities determined by the Contracting Officer. Recipient names and email (if applicable) addresses shall be noted on a separate distribution list to be furnished by the Contracting Officer. The Contracting Officer's letter may include other information pertinent to delivery of data, as required.

2.3.2 Format

2.3.2.1 Electronic Format: Electronic submission of data deliverables is preferred. Electronic deliverables shall be printable. Data deliverables shall be delivered to NASA in the format specified below unless a specific format is required by a DRD. Data submittals shall consist of a single Adobe Acrobat PDF file and the native format electronic file(s). The preferred native formats include Microsoft Word, Excel, PowerPoint or CAD drawing plot file, as appropriate. Where a single native format file is not possible, multiple files may be integrated into a single ZIP file for submission. The organization of the contents of the integrated ZIP file shall be made readily apparent to the reader, and each file within the integrated product shall be clearly identifiable and traceable within the organization of the integrated product. If files are fragmented, file names shall be labeled logically and contiguously, and the files shall be easily reassembled or merged (e.g. 1 filename, 2 filename, 2a filename, etc.). The software versions shall be confirmed prior to submittals.

2.3.2.2 Hardcopy Format: In addition to the electronic submittal, one hardcopy package of specific data deliverables shall be delivered to the NASA Contracting Officer for the Government contract file. This requirement is indicated in Item 15.4, Format of each DRD. The hardcopy package shall consist of the contractor's Transmittal Memo and one copy of the data deliverable.

2.3.3 Data Restriction Marking

2.3.3.1 Data Restriction Determination and Marking Requirements: The contractor shall determine the data restriction that applies to each data deliverable and mark the data restriction on the data coversheet, or indicate the data restriction in the data transmittal package if the data format precludes identification of data restriction directly in the data. The contractor shall make a determination for each individual data deliverable item, and shall not apply a default or blanket data restriction marking to all data deliverables (e.g., "data may be export restricted"). If NASA does not agree with the contractor applied data restriction, the NASA Contracting Officer shall return the data to the contractor, cancel the markings, or ignore the markings consistent with the procedures set forth in the "data rights" clause(s) contained in the contract.

Contract NNM09AA20C

- 2.3.3.2 Data Restriction Categories and Marking Statements: The contractor shall consider the following data restriction categories, as a minimum, and utilize specified marking statements.

If data delivered under this contract is subject to the International Traffic in Arms Regulations (ITAR), the data shall contain an "ITAR Notice" as follows:

International Traffic in Arms Regulations (ITAR) Notice

This document contains information which falls under the purview of the U.S. Munitions List (USML), as defined in the International Traffic in Arms Regulations (ITAR), 22 CFR 120-130, and is export controlled. It shall not be transferred to foreign nationals, in the U.S. or abroad, without specific approval of a knowledgeable NASA export control official, and/or unless an export license/license exemption is obtained/available from the United States Department of State. Violations of these regulations are punishable by fine, imprisonment, or both.

If data delivered under this contract is subject to the Export Administration Regulations (EAR), the data shall contain the "EAR Notice" as follows:

Export Administration Regulations (EAR) Notice

This document contains information within the purview of the Export Administration Regulations (EAR), 15 CFR 730-774, and is export controlled. It may not be transferred to foreign nationals in the U.S. or abroad without specific approval of a knowledgeable NASA export control official, and/or unless an export license/license exception is obtained/available from the Bureau of Industry and Security, United States Department of Commerce. Violations of these regulations are punishable by fine, imprisonment, or both.

If the contract contains FAR 52.227-14 *Alternate II*, the "Limited Rights Notice" may be applicable to data (other than computer software) delivered under this contract.

If the contract contains FAR 52.227-14 *Alternate III*, the "Restricted Rights Notice" may be applicable to computer software delivered under this contract.

If the contract contains FAR 52.227-20, the "SBIR Rights Notice" may be applicable to SBIR data delivered under this contract.

If the contract contains NFS 1852.237-73, a sensitive information legend may be applicable to information delivered under this contract.

In accordance with the applicable data clause (e.g., FAR 52.227-14(c) or FAR 52.227-20(c)), the contractor may be able to assert a copyright claim in data delivered under this contract. When claim to copyright is made, the contractor shall affix the applicable copyright notices of 17 U.S.C. 401 or 402 and acknowledgment of Government sponsorship (including contract number) to the data when such data are delivered to the Government.

2.3.4 Transmittal

- 2.3.4.1 Data shall be transmitted to NASA by email, CD or DVD, hardcopy, or other mechanism agreed to by the Contracting Officer, COTR, and Project representatives who are responsible to receive, index, and store the data deliverables.

- 2.3.4.2 If email is used to transmit data deliverables, the email size shall be 10 Megabytes or less to ensure receipt by the NASA email servers. Encrypted email format shall be used to transmit data which has been judged sensitive by the contractor (e.g., export controlled, limited rights data, SBIR, restricted computer software, copyrighted, etc.).

Contract NNM09AA20C

- 2.3.4.3 Data Transmittal Package: Each data transmittal package shall include:
- a. Transmittal memorandum that specifies the meta-data below for each data transmittal:
 1. Contract number.
 2. Data Requirements Description (DRD) number.
 3. DRD data type (specified in Item 3 on the DRD).
 4. Submission date or milestone being satisfied.
 5. Document number and revision.
 6. Document title.
 7. File names of all files being delivered; file naming convention shall clearly identify the document being delivered.
 8. Distribution (as defined by the Contracting Officer's letter).
 9. Requested response date.
 10. Contractor assigned data restriction (export controlled, limited rights data, SBIR, restricted computer software, copyrighted, etc.) if not marked on data.
 11. NASA Records Retention Schedule (NRRS) number, if applicable. (See NPR 1441.1, NASA Records Retention Schedules)
 - b. Printable electronic files or hardcopy data.
- 2.3.5 Electronic data deliverables should be transmitted directly to the MSFC Repository through the Digital Asset Manager web interface. Instructions for electronic data submittals can be found at http://cio.msfc.nasa.gov/repository/repository_submittal.html. Document submitters must register for a Documentum user account through the NASA Account Management System (NAMS). Computer-Aided Design (CAD) drawings shall be submitted in the original native vector, Hewlett-Packard Graphic Language (HPGL), and raster image formats.
- 2.4 Printing: All printing, duplicating, or binding shall be in accordance with NFS 1852.208-81, Restrictions on Printing and Duplicating. Printing of formal reports and Type 1 and 2 data in book format shall be in accordance with the following general specifications:
- a. Method of reproduction – offset/xerography.
 - b. Finished size – 8 1/2" X 11".
 - c. Paper – 20-pound opaque bond.
 - d. Cover – Litho cover stock.
 - e. Pages shall be printed on both sides; blank pages shall be avoided when possible.
 - f. Oversize pages shall be avoided when possible, but if necessary shall be folded to 8 1/2" X 11".
 - g. Binding shall be the most economical method commensurate with the size of the report and its intended use.
- 2.5 Contractor's Internal Documents: The contractor's internal documents shall be used to meet the data requirements of this DPD unless a specific format is required by the applicable DRD.
- 2.6 Document Identification: Type 1 and 2 documents published by the contractor and submitted in response to the data requirements of this DPD shall be identified within an organized identification numbering system prescribed to NASA by the contractor and, if applicable, as approved by NASA. For all data types, the document number, change legend, date, and title constitute the minimum identification of the specific document and shall appear on the cover and title page. The contract number shall also appear on the cover and title page as separate markings. The originator and organization shall be included on the title page. The document number, change legend, and date shall appear on each page of the document. In the front matter of each document, identify the DPD number and applicable DRD number(s) required for document preparation. Successive issues or revisions of documents shall be identified in the same manner as the basic issue and shall have appropriate change identification. Drawings and ECP's are excluded from the marking provisions of this paragraph. All Type 1 documentation, excluding configuration management requirements, shall be marked "PRELIMINARY PENDING NASA APPROVAL," and once approved shall be reissued with "APPROVED BY NASA" and the date and approval authority annotated on the cover.
- 2.7 Reference to Other Documents and Data Deliverables in Data Submittals: All referenced documents shall be made readily available to the cognizant NASA organization upon request. The contractor should make sure that the references are available to NASA in a manner which does not incur delays in the use of the response document. Reference may be made, within one data submittal, to other data submittals delivered in response to

Contract NNM09AA20C

this DPD in those cases where the data required by one DRD may have been delivered by the contractor in response to another DRD. The reference to previously-submitted data shall include the applicable DRD number, data submittal version date, and location within the referenced document.

2.8 Maintenance of Type 1 Document Submittals

- 2.8.1 Revisions of Type 1 documentation may be accomplished either by individual page revision or by a complete reissue of the document identified in accordance with requirements of 2.7 above, with the exception of drawings (which shall be revised in accordance with contract configuration management requirements).
- 2.8.2 Individual page revisions shall be made as deemed necessary by the contractor or as directed by the Contracting Officer.
- 2.8.3 A Type 1 document shall be completely reissued when, in the opinion of the contractor and/or NASA, the document has been revised to the extent that it is unusable in its present state, or when directed by the Contracting Officer. When complete reissues are made, the entire contents of the document shall be brought up to date and shall incorporate revised pages. All revisions shall be recorded. A revision log shall identify complete reissues except for periodic reports and documents which are complete within themselves as final.
- 2.8.4 Changes of a minor nature to correct obvious typing errors, misspelled words, etc., shall only be made when a technical change is made, unless the accuracy of the document is affected.
- 2.8.5 All revised pages shall be identified by a revision symbol and a new date. Each document shall contain a log of revised pages that identify the revision status of each page with the revision symbol. This list shall follow the table of contents in each document. The line or lines revised on a given page shall be designated by the use of vertical line in the margin of the page, and the change authority shall be indicated adjacent to the change.
- 2.8.6 Contractor Type 1 documents shall not be submitted containing pen and ink markups which correct, add to, or change the text, unless schedule problems exist and approval is obtained in writing from the Contracting Officer. Such markups, however, shall not exceed 20 percent of the page content and shall be acceptable provided that the reproduced copies are legible. In addition, hand-drawn schematics, block diagrams, data curves, and similar charts may be used in original reports in lieu of formally prepared art work, as long as legibility of copies is not impaired. Acceptability shall be determined by the Contracting Officer.

3.0 DPD MAINTENANCE PROCEDURES

- 3.1 NASA-Initiated Change: New and/or revised data requirements shall be incorporated by contract modification to which the new or revised portion of the DPD shall be appended. The contractor shall notify the Contracting Officer in the event a deliverable data requirement is imposed and is not covered by a DRD, or when a DRD is changed by a contract modification and for which no revision to DPD is appended. In such cases, the contractor shall submit the requested changes to NASA for approval. See paragraph 3.3.1 for change procedures.
- 3.2 Contractor-Initiated Change: Contractor-proposed data requirements or proposed changes to existing requirements shall be submitted to NASA for approval.
- 3.3 DPD Change Procedures
 - 3.3.1 Changes to a contractual issue of this DPD shall be identified by NASA on the Document Change Log.
 - 3.3.2 The date of the DPD shall be entered under the "as of" block of the Document Change Log. The date that was in the "as of" block shall be entered in the "Superseding" block.
 - 3.3.3 The Document Change Log entitled "Incorporated Revisions" shall be changed to indicate the modification number, portions affected, and remarks. All changes to the DPD/DRDs shall be identified in the "Remarks" column.

Contract NNM09AA20C

3.4 DPD Reissues

- 3.4.1 The DPD shall be reissued by NASA for each contract modification that affects the DPD and shall supersede the existing DPD in its entirety. Reissues shall be issued by contractual direction. The issue symbol, which shall commence with "A" and progress through "Z," shall be entered in the DPD identification block of each DRD page of the DPD.

NPD 8500.1	<i>NASA Environmental Management</i>
MPD 8500.1	<i>MSFC Environmental Management Policy</i>
MPR 8500.1	<i>MSFC Environmental Management Program</i>
 - 15.3 **CONTENTS:** The Environmental Operations Plan shall meet the requirements of NPD 8500.1, MPD 8500.1, and MPR 8500.1. The plan shall address the entire MAF environmental program, implementation and compliance responsibilities. The plan shall also include a matrix of required actions for implementation. As a minimum, the plan shall contain the following information:
 1. Hazardous and Controlled Waste Operations, including inspection program that includes identifying new waste streams, tracking, issuing containers, container pickup, screening waste, sampling waste, characterizing waste, moving waste, segregating waste, maximizing storage efficiency, battery storage, used oil storage, empty container management, technical assistance, manifesting waste, transporting waste, training requirements, and a written plan to maintain compliance with Subpart CC emission standards.
 2. Pollution Prevention Operations, projects and opportunities.
 3. Hazardous Materials Operations, including collecting data, training, inspecting storage areas, inventorying, managing, tracking, controlling, and reporting hazardous material usage at MAF.
 4. Spill Response Operations, including spill response procedures, spill response equipment and supplies, team members listing, reporting, and training.
 5. Storm Water Management, including storm water inspection procedures, inspection records, reporting, and training.
 6. Air Management, including air management plans, environmental notifications, reporting, database management, environmental inspections, and training.
 - 15.4 **FORMAT:** Contractor format is acceptable.
 - 15.5 **MAINTENANCE:** Changes shall be incorporated by change page or complete reissue. Update as necessary to comply with regulations and operating changes.

8. **OPR:** AS10 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** Monthly, by 10th after assumption of full contract responsibility
12. **SUBMISSION FREQUENCY:** Monthly; by 10th
13. **REMARKS:** Provide to MAF Integration and Operations (MI&O) Office for review and signature. The existing DMR will be provided at contract award.
14. **INTERRELATIONSHIP:** PWS paragraph 9.3
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Discharge Monitoring Report (DMR) establishes the requirement for preparing monthly discharge monitoring report to Louisiana Department of Environmental Quality (LDEQ) based on MAF Louisiana Pollution Discharge Elimination System (LPDES) permit.
- 15.2 **APPLICABLE DOCUMENTS:**

LA0052256	<i>LDEQ CWA LPDES/Stormwater Permit</i>
Louisiana Administrative Code (LAC) 33:IX	<i>Water Quality</i>
40 CFR	<i>Clean Water Act</i>
- 15.3 **CONTENTS:** The Discharge Monitoring Report (DMR) shall comply with LPDES permit #LA0052256 monitoring sampling and reporting requirements.
- 15.4 **FORMAT:** Contractor format is acceptable or consistent with LDEQ requirements.
- 15.5 **MAINTENANCE:** None required

6. **TITLE:** Reproduction and Printing Management Reports
7. **DESCRIPTION/USE:** To provide statistical production data from MSFC and MAF in-house duplicating facility and, to provide mandatory data to the Joint Committee on Printing (JCP) and to the Office of Budget and Management (OMB).
8. **OPR:** IS30 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** 30 days after assumption of full contract responsibility
12. **SUBMISSION FREQUENCY:** Statistical Production Data - Monthly & Quarterly reports 10 days after close of previous month. Annual JCP Report – 30 days after the end of the fiscal year. Annual Printing Management Report - as requested by the NASA Printing Management Officer at the NASA Shared Services Center
13. **REMARKS:** The MSFC Printing Office has the authority from the JCP to establish and maintain any in-house duplicating facilities and shall provide oversight on production matters. Forms may change from year to year and will be supplied by NASA Printing Management Office at the NSSC or the Government Printing Office (GPO).
14. **INTERRELATIONSHIP:** PWS paragraph 5.6
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Reproduction and Printing Management Reports establishes the requirements for the preparation of a statistical report for the Agency. This data reflects the type of printing equipment at MSFC and MAF and printing production units/costs for the fiscal year.
- 15.2 **APPLICABLE DOCUMENTS:**
NPD 1490.1 *NASA Printing, Duplicating, and Copy Management*
MPR 1490.1 *Printing, Reproduction, and Self-Service Copying Services*
- 15.3 **CONTENTS:** The Reproduction and Printing Management Reports shall include the following:
 - a. The Statistical Production Data for in-house reproduction, commercial printing procurements and self-copying from multifunctional devices (MFD). This data shall be provided in accordance with MPR 1490.1 to the MSFC Printing Officer to include the following information: a current inventory of all reproduction, duplicating and copying equipment, machine production, and all associated costs (i.e.: lease/rental, maintenance, labor, and supplies). Reports for commercial printing procurement shall provide: printing requisitions, costs, and billing payments. Contractor's format may be acceptable but subject to change if necessary.
 - b. The Annual JCP Report shall be provided to the MSFC Printing Officer. The following forms specified can be found at the following website: <http://www.gpo.gov/forms/index.html>:
 1. JCP Form 1, Printing Plant Report.
 2. JCP Form 2, Commercial Printing Report.
 3. JCP Form 5, Annual Plant Inventory.
 4. JCP Form 7, Excess Equipment Disposal Report.
 - c. The Annual Printing Management Report shall be provided to the MSFC Printing Officer in accordance with NPD 1490.1. The format, statistical data, and delivery date of this report shall be determined each year by the NASA Printing Management Officer at the NASA Shared Services Center.

7. **DESCRIPTION/USE:** To report NASA property in the custody of contractors on an annual and monthly basis.
8. **OPR:** AS41/RS22 9. **DM:** MM01
10. **DISTRIBUTION:** NASA Form (NF) 1018 reports shall be submitted using the NF 1018 Electronic Submission System (NESS)* (<http://ness.gsfc.nasa.gov>). Monthly reports shall be electronically submitted using the Contractor-Held Asset Tracking System (CHATS) (<http://nasachats.gsfc.nasa.gov>). If CHATS is unavailable the report shall be submitted electronically via email to: nasacontractorproperty@nasa.gov
11. **INITIAL SUBMISSION:** See Item 12
12. **SUBMISSION FREQUENCY:** The due date for the annual submissions is November 30 per Procurement Information Circular (PIC) 04-12. The due dates for the monthly submittals per PIC 04-12 are as follows:
 - August 21 for the month ending July 31
 - September 21 for the month ending August 31
 - October 21 for the month ending September 30
13. **REMARKS:** *Access to the NASA Form 1018 Electronic Submission System (NESS) may be obtained by completing an Access Request Form which is available at: <https://ness.gsfc.nasa.gov/login/index.cfm>. NOTE: Notify the Center's Industrial Property Officer (IPO) for additional assistance once access has been granted.
14. **INTERRELATIONSHIP:** PWS paragraph 1.1.1
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The annual report fulfills the requirements of NASA FAR Supplement clause 1852.245-73, which requires Government Furnished Property (GFP) or Contractor Acquired Property (CAP) that are NASA assets in the custody of Contractors be reported on an annual basis. The monthly report fulfills the requirements of PIC 04-12, for contracts that have NASA property in excess of \$10 million as of June 30, 2004. Monthly reports are required with item level supporting data for the following classifications of property: real property, equipment, special test equipment, special tooling, agency peculiar property, material and work-in-process (WIP). This data shall be submitted for all items with an acquisition cost of \$100,000 or more in the contractor's and its subcontractors' possession.

15 DATA PREPARATION INFORMATION (CONTINUED):

3. Contractors shall have formal policies and procedures, which address the validation of the NF 1018 data, including data from subcontractors, and the identification and timely reporting of errors. The objective of this validation is to ensure that information reported is accurate and in compliance with the NASA FAR Supplement.
- b. Per PIC 04-12, monthly reporting shall meet the following requirements:
 1. All quarterly property financial reporting requirement is changed to monthly reporting, with additional data elements, for contracts with \$10 million or more in NASA property.
 2. Monthly reports shall be electronically submitted using the Contractor-Held Asset Tracking System (CHATS) (<http://nasachats.gsfc.nasa.gov>). If CHATS is unavailable the report shall be submitted electronically via email to: nasacontractorproperty@nasa.gov.
 3. Acquisition costs shall be developed using actual costs to the greatest extent possible, especially costs directly related to fabrication such as labor and materials. Supporting documentation shall be maintained and available for all amounts reported; including any amounts developed using estimating techniques.
 4. All adjustments shall be thoroughly explained and directly related to a specific fiscal year. If the fiscal year cannot be determined, the default shall be the previous fiscal year.
 5. Work Breakdown Structures (WBS) shall be provided for all CAP, WIP, and any new materials acquired. The format shall be a five digit numerical level, (i.e. 803-10). If the WBS is not identifiable, contact the NASA CFO Property Branch for further guidance.

15.4 **FORMAT:** Annual reports shall be provided using NASA Form 1018 (current revision) and shall be submitted electronically via NESS. Monthly reports shall be submitted using the format described in the CHATS user's manual or the electronic version from NASA Headquarters.

13. **REMARKS:**
14. **INTERRELATIONSHIP:** PWS paragraph 1.0
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Management Plan describes the contractor's concept plans, practice, and approach for accomplishing the requirements set forth in the contract, i.e., managing and controlling work, integration of manufacturing support tasks, risk management and management interfaces. The plan shall be in such detail as necessary to convey the contractor's internal procedures.
- 15.2 **APPLICABLE DOCUMENTS:** None
- 15.3 **CONTENTS:** The Management Plan shall include the following:
 - a. Description of the project tasks to be accomplished and an outline of methods by which the contractor proposes to accomplish each task down to the Level III WBS task level.
 - b. Description of management concepts, plans, project management and task/control systems, organizational approach, and communication channels between the contractor and the Government. This shall include descriptions, flow charts, schedules, and other documentation necessary to give a comprehensive plan of organization and accomplishment.
 - c. Description of receiving, processing, assigning, and scheduling of customer work orders through the centralized work control center.
 - d. Description of issuing, and controlling work done by subcontractor(s).
 - e. Description of process planning and integration of shared manufacturing support services (which includes scheduling and monitoring specialized resources, critical work loads, expediting hardware, and status of work orders).
 - f. Description of how outside/commercial work will be solicited, procured, managed, and scheduled. Description of how cost to customer is determined.
 - g. Description of how the Contractor proposes to manage and accept risk on all activities required to perform this contract; how the Contractor will identify, assess and mitigate/control risks as an integral part of the contractor's management and decision process; how the Contractor will document risk management activities (using the risk management procedures and guidelines specified in NPR 8000.4); and how the Contractor will communicate risk issues and concerns to the Government. As a minimum, provide a Monthly Risk Tracking Report to include the following:
 1. Prioritized Risk List that identifies risks with regards to schedule, cost, safety, quality, and technical.
 2. Risk evaluation data that analyzes the impact, probability and time frame for each risk.
 3. Status of all risks and risk metrics.

6. **TITLE:** Work Breakdown Structure (WBS) and Dictionary
7. **DESCRIPTION/USE:** To establish a service-oriented framework for reporting cost, schedule, and technical performance. To provide a basis for uniform planning, reporting status and assignment of responsibilities.
8. **OPR:** CS40 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** Draft WBS and Dictionary populated to WBS Level 3 with proposal
12. **SUBMISSION FREQUENCY:** 90 days after contract award, update as required to reflect all contractor WBS elements. Revised pages shall be submitted 10 calendar days after contract WBS changes (following Government approval).
13. **REMARKS:** Reference is made to NPD 7120.4 (Current Revision), *Program/Project Management*, and NPR 7120.5 (Current Revision), *NASA Program and Project Management Processes and Requirements*, and MIL-HDBK-881, *Department of Defense Handbook Work Breakdown Structure*, shall be used as guides in the preparation of the WBS and the WBS dictionary.
14. **INTERRELATIONSHIP:** PWS paragraph 1.0
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Work Breakdown Structure (WBS) establishes a service-oriented logical subdivision of activities that make up the total contract scope of work. The WBS Dictionary provides a narrative description of the tasks and effort to be performed in each WBS element.
- 15.2 **APPLICABLE DOCUMENTS:** None
- 15.3 **CONTENTS:** The WBS and WBS Dictionary are two distinct documents used for defining the approved scope of work. The contents of each document are detailed in the following paragraphs:
 - a. WBS - A logical, hierarchical display of the subdivision of all work to be completed. The WBS shall include the approved element title and element number.
 - b. WBS Dictionary - The WBS dictionary shall describe and document the work content of every WBS element and relevant efforts associated with each element (e.g., work control, safety and health, manufacturing support). The WBS dictionary shall be arranged in the same order as the contract WBS. The WBS dictionary shall include the following for each WBS element:
 1. WBS element title.
 2. WBS element code.
 3. WBS element content description (including quantities, relevant associated work, and contract end items where applicable).
 4. WBS Index.
 5. PWS paragraph number.
 6. Specification (number and title) associated with the WBS element (if applicable).
 7. Contract line item associated with the WBS element.
 8. Date, revision number, revision authorization and approved changes.
 9. Contract Identification Number.
 10. Budget and reporting number (i.e., Charge Code).

5. **PAGE:** 1/2
6. **TITLE:** Financial Management Report (533M and 533Q)
7. **DESCRIPTION/USE:** To provide quarterly and monthly financial reports for monitoring program costs. The 533M and 533Q reports are the official cost documents used at NASA for cost type, price redetermination, and fixed price incentive contracts.
8. **OPR:** CS40 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** An initial report in the 533Q format is required within 30 working days after Authority to Proceed. Initial 533M reporting shall begin no later than 30 days after the incurrence of cost.
12. **SUBMISSION FREQUENCY:** 533Q: Quarterly; no later than the 15th day of the month preceding the quarter being reported in columns 8a, 8b, and 8c. 533M: Monthly; no later than 10 working days following the close of the contractor's accounting month.
13. **REMARKS:** The data contained in the reports shall be auditable using Generally Accepted Accounting Principles.
14. **INTERRELATIONSHIP:** NFS 1852.242-73, *NASA Contractor Financial Management Reporting*, (November 2004). PWS paragraph 1.1.1
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Financial Management Report provides data on accumulated costs and funding projections for management of the contract.
- 15.2 **APPLICABLE DOCUMENTS:**
NPR 9501.2D *NASA Contractor Financial Management Reporting*
- 15.3 **CONTENTS:** The elements of cost for financial reporting shall be mutually agreed by the contractor and NASA project office. The Financial Management Reports (533M and 533Q) shall be prepared in accordance with the detailed instructions provided on the reverse side of the NASA Forms 533M and 533Q and the supplementary instructions set forth in NPR 9501.2D, Chapter 3.
 - a. 533Q Quarterly Report shall include actual cost and cost projections at the total contract level. The initial 533Q report shall reflect the original contract value detailed by negotiated reporting categories and serve as the original baseline plan.
 - b. 533M Monthly Report shall include actual cost and cost projections at the total contract level.

A summary level page reflecting cumulative total contract cost since inception shall be included. Reconciliation between the 533M/533Q and the Cost Performance Report (CPR) shall be submitted as an attachment to the 533M/533Q Report.
- 15.4 **FORMAT:** Contractor internal automated printout reports may be substituted for 533M/533Q forms (with NASA Contracting Officer's approval) provided that the contractor report contains all of the data elements required by NASA Forms 533M and 533Q. Electronic submission of contractor data is strongly encouraged (reference NPR 9501.2, paragraph 3.7).

MPD 1040.3	<i>MSFC Emergency Program</i>
NPR 1040.1	<i>NASA Continuity of Operations (COOP) Planning Procedural Requirements</i>
MPR 1040.4	<i>Continuity of Operations (COOP) Planning</i>
- 15.3 **CONTENTS:** The Continuity of Operations Plan shall satisfy the requirements of the documents listed in 15.2, and the contract. The Continuity of Operations Plan shall identify the approach and process the contractor will implement to (1) ensure the continuous performance of NASA's mission-essential operations and functions during an emergency situation; (2) protect mission-essential NASA facilities, equipment, vital records, and other assets; (3) reduce or mitigate disruptions to mission-essential operations; (4) reduce loss of life; (5) minimize damage and losses; and (6) resume full, normal essential operations to user(s)/tenant(s) through a timely and orderly recovery from an emergency.
 - a. At a minimum, the plan shall describe its interrelationship with MPD 1040.3, MSFC Emergency Program and MPR 1040.4, Continuity of Operations (COOP) Planning and also include the following:
 1. Identify MAF mission-essential operations and functions.
 2. Identify Contractor key leadership positions and the order of succession for these key leadership positions.
 3. Identify minimal communications capabilities required by the Contractor to support the COOP at MAF.
 4. Identify Contractor essential and vital records and databases required to support essential operations and functions at MAF, and include the steps necessary for protecting them as well as procedures for backup, storage, recycling, and retrieval.
 5. Describe the decision process for determining appropriate actions in implementing COOP procedures at MAF.
 6. Establish a roster of fully equipped and trained continuity team personnel that have the authority to perform mission-essential operations and functions. Include the type and frequency of this training.

6. **TITLE:** Advance Notification of Workforce Reductions Report
7. **DESCRIPTION/USE:** To provide advanced notification of planned or pending Contractor workforce reductions.
8. **OPR:** MM01 9. **DM:** MM01
10. **DISTRIBUTION:** Notify in writing the Labor Relations Officer (IRO), Code AS01, with one copy to the Contracting Officer.
11. **INITIAL SUBMISSION:** Fifteen (15) calendar days in advance of employee notification
12. **SUBMISSION FREQUENCY:** As required
13. **REMARKS:** NOTE: The Workforce Adjustment and Retraining Notification (WARN) Act notification is required, provide the information required by the WARN Act, section 639.7(c) and a listing of all organizations to be notified including those required by section 639.6(a), (c), and (d), at least five (5) days prior to issuance of the notification.
14. **INTERRELATIONSHIP:** PWS paragraph 1.0
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Advance Notification of Workforce Reductions Report will provide details of planned reduction(s) of permanent, full- time, and part-time employees that exceed 10% of the total contract workforce or 25 employees, whichever is less.
- 15.2 **APPLICABLE DOCUMENTS:** None
- 15.3 **CONTENTS:** The Advance Notification of Workforce Reductions Report shall include a reason for the reduction in workforce, the number of employees impacted, their labor classifications, their physical location, and their location within contract organizational structure. The notification shall also identify the expected date of the first separation and the anticipated schedule for making separations, as well as the name and telephone number of a company official to contact for further information.
- 15.4 **FORMAT:** Contractor format is acceptable.
- 15.5 **MAINTENANCE:** None required

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DPD NO.:** 1234 **ISSUE:** RFP
2. **DRD NO.:** 1234MS-001
3. **DATA TYPE:** 2
4. **DATE REVISED:**
5. **PAGE:** 1/1
6. **TITLE:** Integrated Manufacturing Support Schedule
7. **DESCRIPTION/USE:** To provide the Contractor's time-phased schedule detailing current status, key milestones, and task interdependencies necessary to accomplish the integration of manufacturing support services at MAF. This schedule will be used to actively coordinate and manage manufacturing support activities and identify potential scheduling conflicts needing mitigation and communication among user(s)/tenant(s).
8. **OPR:** MM01 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** 90 days after assumption of full contract responsibility
12. **SUBMISSION FREQUENCY:** Monthly, no later than the 10th day of the calendar month following the end of the contractor's accounting month.
13. **REMARKS:** The Integrated Manufacturing Support Schedule (IMSS) shall address activities in general manufacturing areas, common manufacturing areas, and dedicated manufacturing area construction activities. The IMSS is intended to address those inter-relationships among user(s)/tenant(s) that require shared manufacturing resources. The IMSS is not intended to include dedicated manufacturing area activities that are unique or specific to the user(s)/tenant(s) production processes, procedures, techniques or manufacturing operations. Submit baseline after contract phase-in but no later than 90 days after contract award.
14. **INTERRELATIONSHIP:** PWS paragraph 3.1.2
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Integrated Manufacturing Support Schedule provides data for the assessment of MAF manufacturing support, facilities allocation and logic network of the tasks to be performed.
- 15.2 **APPLICABLE DOCUMENTS:** None
- 15.3 **CONTENTS:** Integrated Manufacturing Support Schedule shall include user(s)/tenant(s) needs & manufacturing support tasks necessary to fully integrate MAF Manufacturing support services and resources as defined in paragraph 3.0 of the PWS. The Integrated schedule shall also include all logical relationships (interdependencies) between multiple production contractors and supporting work that is coordinated by the MSFOC. All key milestones shall be clearly identified and logically linked to related tasks. The integrated schedule shall be created and maintained in management software that is accessible and compatible with project user(s)/tenants(s) scheduling software and supports automated time phasing of tasks and schedule assessment capabilities. All data shall be consistent and statused monthly and based on the same cutoff date.
 - a. Summary Schedule – Gantt-type summary document arranged by capability or function that reflects milestones, and project phases (i.e., construction, facility prep, tooling modifications, integration, Operations Readiness Review, fabrication, cleaning, assembly, etc.).
 - b. Logic Network Database – an automated logic network database consisting of schedule data for paragraph 3.0 of PWS. The utilization of MAF manufacturing support services and resources shall be broken into schedule tasks and milestones at a consistent level of detail to allow discrete progress measurement and visibility into the integration of activities under MSFOC.

PAGE: 2/2

15. **DATA PREPARATION INFORMATION (CONTINUED):**

15.4 **FORMAT:** Submission of the deliverables in 15.3 shall be by standard hardcopy and electronic media. Electronic media submittals shall be in native file format utilizing schedule management software approved by the COTR. The COTR will provide a list of Government personnel that require real-time 24/7 access to the electronic version of the IMSS. A legend identifying the contractor's schedule symbols used and their meaning shall be provided.

15.5 **MAINTENANCE:** Changes shall be incorporated by change page or complete reissue.

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DPD NO.:** 1234 **ISSUE:** RFP
2. **DRD NO.:** 1234MS-002
3. **DATA TYPE:** 2
4. **DATE REVISED:**
5. **PAGE:** 1/2
6. **TITLE:** Foreign Object Damage/Debris (FOD) Prevention Plan
7. **DESCRIPTION/USE:** To provide a plan that describes the general and detailed practices for the prevention of FOD at all Michoud Operations facilities unless otherwise specified by contract or field site requirements.
8. **OPR:** MM01 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** 30 days after assumption of full contract responsibility
12. **SUBMISSION FREQUENCY:** Updated as required
13. **REMARKS:** The FOD Prevention Plan should be consistent with the Foreign Object Elimination Program (i.e., Michoud Standard Procedure 5-17 and the FOD Prevention Manual) currently being used at MAF in support of ET production.
14. **INTERRELATIONSHIP:** PWS paragraph 3.5
15. **DATA PREPARATION INFORMATION:**
 - 15.1 **SCOPE:** The Foreign Object Damage/Debris (FOD) Prevention Plan establishes the planning and processes to be used for the Michoud Operations Foreign Object Elimination (FOE) Program. The purpose of the program is to prevent Foreign Object Damage/Debris (FOD) by eliminating or controlling foreign objects in the workplace. This plan incorporates FOD preventive actions into MAF operations that will ensure design, build and delivery of FOD-free products.
 - 15.2 **APPLICABLE DOCUMENTS:** None
 - 15.3 **CONTENTS:** The Foreign Object Damage/Debris (FOD) Prevention Plan shall contain information consistent with current approved practices currently in place at MAF. The plan shall address as a minimum the following:
 - a. Designation of a responsible individual to serve as an overall MAF FOD point of contact
 - b. Establishment of a FOD Council to ensure communication of common concerns and lessons learned
 - c. Cross contamination potential for multiple programs using common manufacturing areas/facilities, laboratories, ground support equipment, and handling hardware.
 - d. Definition and/or establishment of cleanliness level acceptance limits and verification methods.
 - e. Cleaning, inspection, and re-certification methodology and frequency for FOD controlled areas.
 - f. Control of equipment capable of producing combustible products within a building.
 - g. Debris control during performance of work (maintenance, construction, etc.), to prevent debris from spreading into adjacent areas or accumulating in the work area itself.
 - h. Establishment and monitoring of FOD prevention controls for cranes and other transportation equipment used in multiple areas.
 - i. Retention of FOD control data.
 - j. Personnel and subcontractor training requirements.
 - 15.4 **FORMAT:** Contractor format is acceptable.
 - 15.5 **MAINTENANCE:** Changes shall be incorporated by change page or complete reissue

6. **TITLE:** Annual Work Plan
7. **DESCRIPTION/USE:** To assemble historical information in order to provide an accounting of work performed and emerging trends
8. **OPR:** MM01 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** 60 days after assumption of full contract responsibility, unless otherwise specified by the Contracting Officer
12. **SUBMISSION FREQUENCY:** Annually; by August 30 of each contract year, unless otherwise specified by the Contracting Officer
13. **REMARKS:** *Note to Data Type: The Government will review the plan within 10 working days of initial submittal. If there are no comments the Government will approve the plan. If the Government determines the plan to be unacceptable, a meeting will be held with the Contractor within the next 5 working days to resolve issues and make the plan acceptable to both parties. Note that obtaining utility, construction and capital investment data will require interfacing with other MAF Contractors.
14. **INTERRELATIONSHIP:** PWS paragraph 4.1.1
15. **DATA PREPARATION INFORMATION**
- 15.1 **SCOPE:** The Annual Work Plan assembles and evaluates data for the previous fiscal year and proposes recommendations based on the data and trends.
- 15.2 **APPLICABLE DOCUMENTS:**
NPR 8831.2 *Facilities Maintenance Management*
- 15.3 **CONTENTS:** The Annual Work Plan shall meet the requirements of NPR 8831.2 and provide:
 - a. Narrative of the Contractor's approach, analysis, and recommendations as related to the fiscal year data and emerging trends.
 - b. Graphical representation of funding by work type.
 - c. Spreadsheet for planning purposes that distributes cost by facility, structure, area, or other category by the following:
 1. Utilities (breakdown by each type of utility and the sum of all utilities).
 2. Lump sum maintenance cost (breakdown by work type and sum all work types).
 3. MSFOC maintenance performed by IDIQ (breakdown by work type and sum all types).
 4. Capital investment projects.
 5. Operational costs.
- 15.4 **FORMAT:** Electronic format is preferred and compatible with MAXIMO. Item 15.3c data shall be in spreadsheet format. Microsoft Excel is the preferred spreadsheet format.
- 15.5 **MAINTENANCE:** Changes shall be incorporated by change page or complete reissue.

8. **OPR:** AS20 9. **DM:** MM01

10. **DISTRIBUTION:** Per Contracting Officer's letter

11. **INITIAL SUBMISSION:** 30 days after assumption of full contract responsibility

12. **SUBMISSION FREQUENCY:** Update as required

13. **REMARKS:** *Note to Data Type: The Government will review the plan within 10 working days of initial submittal. If there are no comments the Government will approve the plan. If the Government determines the plan to be unacceptable, a meeting will be held with the Contractor within the next 5 working days to resolve issues and make the plan acceptable to both parties.

14. **INTERRELATIONSHIP:** PWS paragraph 4.2

15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Preventive Maintenance Plan represents the optimum preventive maintenance approach the Contractor considers appropriate for minimizing repair requirements while maximizing the life span and performance of MAF equipment and real property.
- 15.2 **APPLICABLE DOCUMENTS:** None
- 15.3 **CONTENTS:** The Preventive Maintenance Plan shall contain the Contractor's approach to preventive maintenance and predictive testing and inspection at MAF. The Preventive Maintenance Plan shall include:
 - a. An outline of the Contractor's approach, describing philosophy and techniques, to the application of existing preventive maintenance and predictive and testing inspection program data, manufacturer's recommendations, the Contractor's knowledge of best preventive maintenance practices, appropriate codes, engineering rationale, and the use of reliability centered maintenance.
 - b. The Contractor's rationale for all changes to the existing preventive maintenance, predictive testing and inspection and programmed maintenance tasks that are in place at contract award.
- 15.4 **FORMAT:** Contractor format is acceptable.
- 15.5 **MAINTENANCE:** Changes shall be incorporated by change page or complete reissue.

15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Five Year Maintenance Plan provides projected maintenance needs beyond those provided in the Annual Work Plans.
- 15.2 **APPLICABLE DOCUMENTS:**
NPR 8831.2 *Facilities Maintenance Management*
- 15.3 **CONTENTS:** The Five Year Maintenance Plan shall meet the requirements of NPR 8831. 2 and contain:
 - a. Approaches to control Backlog of Maintenance and Repair (BMAR) using the MAF master plan and budget information provided by the Government.
 - b. Proposed maintenance changes to shift from time based preventive maintenance to condition based predictive testing and inspection.
 - c. Proposed schedule for long-term replacement of obsolete equipment.
 - d. Budget requirements to meet all proposals in the plan.
- 15.4 **FORMAT:** Contractor format is acceptable.
- 15.5 **MAINTENANCE:** Changes shall be incorporated by change page or complete reissue.

6. **TITLE:** Annual Boiler Certification Plan
7. **DESCRIPTION/USE:** To document planned inspections and certification of all boilers and code related piping.
8. **OPR:** AS20 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** 60 days after assumption of full contract responsibility. Certifications will be completed per plan following completion of the boiler inspections and rework (if required).
12. **SUBMISSION FREQUENCY:** Annually; Boiler Certifications shall be completed following boiler inspections and rework (if required). A Roll-up Certification report shall also be submitted.
13. **REMARKS:** Boiler inspections are required to be performed by a NBIC certified boiler inspector not employed by the contractor.
14. **INTERRELATIONSHIP:** PWS paragraph 6.3
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Annual Boiler Certification Plan determines that boilers and piping meets or exceed all American National Standards Institute (ANSI/NBIC) standards and American Society of Mechanical Engineers (ASME) codes relating to this type equipment. Each inspection shall encompass the pertinent requirements of ANSI/ NBIC NB-23 and ASME CSD-1-200X standards and regulations.
- 15.2 **APPLICABLE DOCUMENTS:**

ANSI/NBIC NB-23	<i>National Board Inspection Code (Latest Revision)</i>
ASME CSD-1-200X	<i>Controls and Safety Devices for Automatically Fired Boilers (Latest Revision)</i>
- 15.3 **CONTENTS:** The Annual Boiler Certification Plan shall meet the following requirements:
 - a. Document the independent inspector's qualifications.
 - b. Provide a signed verification of certification for each piece of equipment which meets all requirements.
 - c. Provide signed inspection summary reports for all equipment not in compliance with all requirements listing all deficiencies and specify applicable code sections.
 - d. Provide verification of certification for equipment found deficient after deficiencies are corrected.
 - e. Provide index with page number, building and equipment number as part of the inspection report.
- 15.4 **FORMAT:** Contractor format is acceptable.
- 15.5 **MAINTENANCE:** Changes shall be incorporated by change page or complete reissue.

6. **TITLE:** Energy Management Control System Report
7. **DESCRIPTION/USE:** To report the number of pertinent alarms, failures in facilities, systems and utilities and energy consumption by building.
8. **OPR:** MM01 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** 120 days following assumption of full contract responsibility coincide with Monthly Management Status Review.
12. **SUBMISSION FREQUENCY:** Monthly; to coincide with the Monthly Management Status Review unless otherwise specified by the Contracting Officer.
13. **REMARKS:** October Monthly Report shall include a summary of the previous fiscal year reporting activities. **NOTE:** The contractor shall provide a Load Shedding Plan within 90 days of contract award. The plan will be approved by the Government prior to implementation and submitted with the Energy Management Control System Report.
14. **INTERRELATIONSHIP:** PWS paragraph 6.5
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Energy Management Control System Report provides information on the status of the energy management control system and of the equipment monitored by the system.
- 15.2 **APPLICABLE DOCUMENTS:** None
- 15.3 **CONTENTS:** The Energy Management Control System (EMCS) Report shall contain:
 - a. Type and number of significant central station hardware failures.
 - b. Number of significant alarms recognized by the EMCS, how many were nuisance, how many were corrected by the EMCS Operator, and how many required work order implementation.
 - c. Number of EMCS instrumentation and HVAC trouble calls to the EMCS, how many were corrected by the operator, and how many required work order implementation.
 - d. Host generated Failed Points Listing.
 - e. Listing of all open work orders (EMCS Repairs) and all work orders closed out during the reporting period. Data shall include building location, priority, status, date received and work description.
 - f. Listing of all significant activities involving chillers and boilers and recurring equipment failures, equipment repairs, scheduled outages, and other significant equipment concerns.
 - g. Provide a Load Shedding Plan that does not impact any production work schedules.
 - h. Read and log all consumptions meters on monthly basis for comparison with the utility bills payment in Attachment J-1-B.
 - i. Monthly Energy report including Natural Gas, Electricity, and Water consumed by building and the contractor's conservation results.
 - j. End of Fiscal Year Report identifying building by building energy cost and consumption.
- 15.4 **FORMAT:** Contractor format is acceptable.
- 15.5 **MAINTENANCE:** None required

b.	Unscheduled Repair Cost as a percentage of Total Maintenance Cost	%	
c.	FY06 Total Site CRV	\$B	
d.	Initial Operating Plan as a percentage of CRV	%	
e.	Maintenance and Repair Funding as a percentage of CRV	%	
f.	Cost of Deferred Maintenance as a percentage of CRV	%	
ENERGY/UTILITY USAGE METRICS (Generated through HQ Energy Manager)			
11	Energy Used/Consumed		
12	Water Used/Consumed		
13	Natural Gas and Oil Used/Consumed		
NOTES			
(1)	The unconstrained Center-level funding amount that represents a manager's reasonable estimate of the full annual requirement that would maintain the Center's facility inventory in a "good commercial" level of condition, while not allowing DM to grow further, and providing a level of reliability that the supported programs find acceptable for their missions. A minor amount of DM reduction could be included in this figure.		
(2)	Initial Operating Plan for annual center-level maintenance & repair funding consisting of PM, PT&I, ROI, PGM, non-CoF repair, and TC.		
(3)	Due to or influenced by constrained resources (includes direct repair costs and other Center cost impacts).		
(4)	Scheduled Work consisting of PM, PT&I, PRM, ROI, and PT&I "Finds" repair costs.		
(5)	Annual Center-level M&R funding including PGM, PM, PT&I, ROI TC, and non-CoF repair.		
(6)	Reportable Incident Rate during FY06 for O&M and support services contracts. RIR = (Total annual # of injuries incurred x 200,000)/(Total annual # of hours worked).		
(7)	Lost Workday Case Incident Rate during FY06 for O&M and support services contracts. LWCIR represents the number of injuries and illnesses per 100 full-time equivalent workers and calculated as: (N/EH) x 200,000, where N = the number of injuries and illnesses, EH = the total hours worked by all employees during the calendar year, and 200,000 is the base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year).		
*	Unitless measure

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DPD NO.:** 1234 **ISSUE:** RFP
2. **DRD NO.:** **1234OM-008**
3. **DATA TYPE:** 3
4. **DATE REVISED:**
5. **PAGE:** 1/2
6. **TITLE:** Facility Condition Assessment Schedule and Reports
7. **DESCRIPTION/USE:** To identify and quantify facility conditions in order to support annual and three year work plans.
8. **OPR:** AS20 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** Facility Condition Assessment (FCA) Schedule: 60 days after assumption of full contract responsibility, unless otherwise specified by the Contracting Officer. FCA Report: 30 days of the assessment completion date for the specific facility, as shown on the report schedule.
12. **SUBMISSION FREQUENCY:** FCA Schedule: Annually; update by August 30. FCA Report: 30 days following the assessment completion date for the specific facility, as shown on the report schedule.
13. **REMARKS:** Data to be obtained from 15 year plan and MAXIMO database.
14. **INTERRELATIONSHIP:** PWS paragraph 4.1.3
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Facility Condition Assessment Schedule and Reports provides individual facility condition assessment planned completion dates for all MAF facilities and the MAF infrastructure in such a way to insure a total assessment of MAF within three years. The FCA reports provide results of completed assessments.
- 15.2 **APPLICABLE DOCUMENTS:** None
- 15.3 **CONTENTS:** The Facility Condition Assessment Schedule and Reports shall contain:
 - a. The Facility Condition Assessment Schedule shall contain:
 1. Individual completion dates for all MAF facilities and infrastructure.
 2. Summary columns for BMAR using the system disciplines provided in the individual facility condition assessments.
 3. Annual updates based on the fiscal year that reflect current BMAR based on the facility condition assessments that were completed in the previous year.
 4. One-time BMAR inflation adjustment at the end of the Fiscal Year for facilities that were not assessed in the fiscal year that has ended. The Government will reference the source of the inflation adjustment after contract award.
 - b. The Facility Condition Assessments Reports shall contain:
 1. Narrative of the facility description and facility classification. Include a discussion of the components within the facility by discipline and group components by architectural, mechanical, heating, ventilation and air conditioning (HVAC), or electrical disciplines, as appropriate.
 2. Facility site plan.
 3. Facility floor plan.
 4. Narrative of the facility condition assessment procedure. This will include inspections and evaluations of available computerized maintenance management system data and the predictive testing and inspection data.
 5. Narrative of the assessment finding by component grouping with an overall adjective rating of those components. Components include, but not limited to, roofs, pumps, air conditioning, interior finishes, electrical devices and systems.

15. DATA PREPARATION INFORMATION (CONTINUED):

6. Overall average rating for the facility.
7. Evaluation for failure and failure consequences (risk assessment) to identify safety impacts for components rated as poor or replace. A safety impact (hazard to personnel or NASA property) must be identified to the COTR immediately for appropriate action to alleviate the hazard.
8. Summary BMAR estimate by discipline and a facility total BMAR for components rated as poor or replace.
9. Individual discipline BMAR estimates that list components and their associated BMAR.
10. List of discrepancies by discipline by location, discrepancy number, and recommendation.
11. Discipline assessment that includes component identifier, description, location, year installed, age, life expectancy, projected replacement year, adjective assessment, and discrepancy number if appropriate and estimated repair or replacement cost for all components with a poor or replace adjective rating.
12. Status of equipment barcodes. (missing, unreadable, etc)
13. Reliability centered maintenance (RCM) analysis for the facility which includes:
 - (a) RCM process description.
 - (b) Background information that includes failure criticality code and probability of failure code.
 - (c) Analysis by system by components within the system. This includes recommendations.
 - (d) A listing of all equipment analyzed including equipment identifier, description, failure criticality code, and probability of failure code.
14. Recommendations for new projects based on FCA findings for consideration by the Government. The list of recommendations may be revised based on continued FCA analysis and/or identification of specific Government needs.

15.4 **FORMAT:** Contractor format is acceptable.

15.5 **MAINTENANCE:** None required

DATA REQUIREMENTS DESCRIPTION (DRD)

1. **DPD NO.:** 1234 **ISSUE:** RFP
2. **DRD NO.:** 1234OM-009
3. **DATA TYPE:** 3
4. **DATE REVISED:**
5. **PAGE:** 1/2
6. **TITLE:** Reliability Centered Maintenance Report
7. **DESCRIPTION/USE:** To provide documentation associated with reliability centered maintenance for MAF equipment and Real Property.
8. **OPR:** AS20 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** 120 days following assumption of full contract responsibility to coincide with Monthly Management Status Review.
12. **SUBMISSION FREQUENCY:** Monthly; to coincide with the Monthly Management Status Review unless otherwise specified by the Contracting Officer.
13. **REMARKS:**
14. **INTERRELATIONSHIP:** PWS paragraph 4.4.1
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Reliability Centered Maintenance Report provides documentation of the contractor's effort on RCM activities that includes Failure Mode Effects Analysis (FMEA), root cause failure analysis, trend analysis, and the combined application of reactive, preventive, condition based, and proactive maintenance practice to achieve cost effective maintenance program.
- 15.2 **APPLICABLE DOCUMENTS:** None
- 15.3 **CONTENTS:** The Reliability Centered Maintenance Report shall:
 - a. Identify inherent reliability problems by performing root cause failure analysis for equipment that experiences 2 identical failure modes in a 12 month period. No more than four (4) root cause failure analyses are required per month.
 - b. Be based on the root cause failure analysis, propose changes in terms of maintenance practice, design/installation standard, or supplier improvements.
 - c. Propose changes shall include supporting technical rationale and/or statistical data and be reported by equipment type, manufacturer, location, and function as appropriate.
 - d. Perform Failure Mode Effect Analysis with respect to loss of system availability and facility availability for age exploration recommendations.
 - e. Identify trouble call trends: trend trouble calls by types of equipment (i.e. chillers, air compressors, pumps, etc) for duration of 24 months with illustrative diagram.
 - f. Identify equipment (by classification) percentage out of service time for repair maintenance.
 - g. Identify mean time between equipment overhauls and replacement.
 - h. Identify number of vibration-related work orders found and corrected per month.
 - i. Identify number of vibration-related work orders over 3 months old.
 - j. Identify aggregate vibration alert and alarm levels.
 - k. Identify mean time between failures.

15. DATA PREPARATION INFORMATION (CONTINUED):

1. Provide the following RCM metric data for all MAF non-collateral and collateral equipment on a monthly basis:

1. Percent of Facility Availability (Target = 100%):

% = Hours the Facility is Available to Run at Capacity/Total Hours during the Reporting Time Period

Note: Assume 24 hours per day, 7 days per week for critical production areas and support systems and buildings.

2. Percent of PM Completed (Target = 99%):

% = Number of PMs Completed/Number of PMs Scheduled

3. Percent of PM Completed on Schedule (Target = 99%):

% = (PMs Completed on Schedule – PMs Completed Outside Time Band)/ PMs Completed

4. Percent of PM/PT&I Work to Corrective Maintenance Work:

% = Hours of PM/PT&I Work/Hours of Corrective Maintenance + PM/PT&I Work

5. Percentage of Emergency Work:

% = Total Hours Worked on Emergency Jobs/ Total Hours Worked

6. Percent of Faults Found in Thermographic Survey:

% = Number of Faults Found/Number of Devices Surveyed

7. Percent of Faults Found in Steam Trap Survey (Target = 10% or less):

% = Number of Defective Steam Traps Found/Number of Steam Traps Surveyed

8. Percentage of Maintenance Overtime:

% Total Maintenance Overtime Hours/Total Regular Maintenance Hours

15.4 **FORMAT:** Contractor format is acceptable.

15.5 **MAINTENANCE:** None required

6. **TITLE:** Annual Elevator Inspection Report
7. **DESCRIPTION/USE:** To document elevator inspection and dumbwaiter inspections required by ANSI/ASME A17.1.
8. **OPR:** AS20 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** No later than October 10, 2009 following completion of the first annual elevator inspection performed after contract award.
12. **SUBMISSION FREQUENCY:** Annually; following completion of elevator inspection, but no later than October 10th.
13. **REMARKS:** The Annual Elevator Inspection is required to be performed by a certified inspector not employed by the contractor. Separate annual elevator inspection reports are not required when five-year elevator inspections are performed.
14. **INTERRELATIONSHIP:** PWS paragraph 4.6
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Annual Elevator Inspection Report documents the result of the inspections and test required to be performed as set forth in ANSI/ASME A17.1, A17.2 and A17.3.
- 15.2 **APPLICABLE DOCUMENTS:**

ANSI/ASME A17.1	<i>Safety Code for Elevators and Escalators</i>
ANSI/ASME A17.2	<i>Guide for Inspection of Elevators, Escalators, and Moving Walks</i>
ANSI/ASME A17.3	<i>Safety Code for Existing Elevators and Escalators</i>
ANSI/ASME QEI-1	<i>Standard for the Qualification of Elevators Inspectors</i>
- 15.3 **CONTENTS:** The Annual Elevator Inspection Report shall:
 - a. Document that the independent inspector performing the inspections is certified in accordance with ANSI/ASME QEI-1.
 - b. Provide a list of elevators and dumbwaiters in compliance with all provisions set forth in ANSI/ASME A17.1.
 - c. Provide a list of elevators and dumbwaiters requiring maintenance, repairs, replacement or adjustments necessary to meet ANSI/ASME A17.1 and specify specific applicable code section and rules of ANSI/ASME A17.1.
 - d. Provide a list of elevators and dumbwaiters requiring improvement to meet new code changes, including a detailed list of these recommendations with ANSI rule guidelines references.
 - e. Provide recommendations to improve overall elevator performance.
 - f. Provide 6 inch by 9 inch certificate of inspection for each elevator or dumbwaiter for display in the elevator performance.
 - g. Provide index with page number, building and equipment number as part of the inspection report.
- 15.4 **FORMAT:** Contractor format is acceptable.

7. **DESCRIPTION/USE:** To comply with requirements for strength and fatigue analysis, test and structural assessment for pressure vessels and associated equipment at the Michoud Assembly Facility.
8. **OPR:** MM01 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** Annual Pressure Vessel Inspection Plan: 60 days after assumption of full contract responsibility. Annual Pressure Vessel Inspection Report: August 1st.
12. **SUBMISSION FREQUENCY:** Annual Pressure Vessel Inspection Plan: Updated as required. Annual Pressure Vessel Inspection Report: Annually.
13. **REMARKS:** Pressure Vessel and associated equipment inspections are to be performed through out the fiscal year.
14. **INTERRELATIONSHIP:** SOW paragraphs 4.7
15. **DATA PREPARATION INFORMATION:**
 - 15.1 **SCOPE:** The Annual Pressure Vessel Inspection Plan describes the contractor compliance with requirements for strength and fatigue analyses, test, and structural assessment. All vessels must meet the appropriate AMSE/ANSI/AIAA codes.
 - 15.2 **APPLICABLE DOCUMENTS:**

NPD 8710.5	<i>Policy for Pressure Vessels and Pressurized Systems</i>
MPR 8823.2	<i>Pressure Systems Certification Requirements</i>
 - 15.3 **CONTENTS:** The Annual Pressure Vessel Inspection Plan and Report shall be prepared in accordance with the applicable documents defined in 15.2. The plan shall identify the organization responsible for structural analyses, test and assessment task; define satisfactory results; and include a schedule for inspections and repairs. The plan shall identify components that require test and frequency of that test, components that require design verification test and proof test, specify appropriate test levels and environments, and state the means for conducting those test. The annual inspection report shall document the Contractor's performance to schedule, the result of the inspections and test required to be performed in accordance with NPD 8710.5 and MPR 8823.2, including analysis of results and mitigation plans with cost estimates. The annual inspection report shall include a projection of costs for the following years tests.
 - 15.4 **FORMAT:** Electronic format. Data elements (Schedules, results of inspections, repairs, and all other data) used in this report shall be entered and maintained in the CMMS.

8. **OPR:** AS20 9. **DM:** MM01

10. **DISTRIBUTION:** Per Contracting Officer's letter

11. **INITIAL SUBMISSION:** 45 days after the end of the first quarter following assumption of full contract responsibility

12. **SUBMISSION FREQUENCY:** Quarterly; 45 days after the end of the quarter being reported

13. **REMARKS:**

14. **INTERRELATIONSHIP:** PWS paragraph 6.5

15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Quarterly Energy and Water Conservation Report details the energy and water conservation activities for the quarter.

- 15.2 **APPLICABLE DOCUMENTS:**
NPR 8570.1 *Energy Efficiency and Water Conservation*
NPD 8500.1 *NASA Environmental Management*

- 15.3 **CONTENTS:** The Quarterly Energy and Water Conservation Report shall summarize energy and water usage in the following categories: non-mission variable, energy intensive, and vehicles and others.

- 15.4 **FORMAT:** Shall be submitted into the NASA Environmental Tracking System (NETS) software program using the format provided.

- 15.5 **MAINTENANCE:** None required

6. **TITLE:** Quality Assurance Management Plan (QAMP) and QAMP Quarterly Summary Report
7. **DESCRIPTION/USE:** To provide description of how the contractor intends to monitor work quality during the life of the contract and to provide documentation of quality control activities.
8. **OPR:** AS20 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:** Quality Assurance Management Plan: Preliminary submittal as part of the Contractor's Technical Proposal submittal in response to the Request for Proposal. Approved QAMP provided within 45 calendar days after assumption of full contract responsibility. QAMP Quarterly Summary Report: Within 10 calendar days following the end of the first contract quarter after assumption of full contract responsibility .
12. **SUBMISSION FREQUENCY:** Quality Assurance Management Plan: Annually; update on contract anniversary date. QAMP Quarterly Summary Report: Quarterly; 10 calendar days after end of contract quarter being evaluated.
13. **REMARKS:**
14. **INTERRELATIONSHIP:** PWS paragraph 1.2.5
15. **DATA PREPARATION INFORMATION:**
- 15.1 **SCOPE:** The Quality Assurance Management Plan (QAMP) and QAMP Quarterly Summary Report identifies the methods or processes the Contractor will use to ensure quality requirements for each contract element are being met. The QAMP Quarterly Summary Report provides details of quality control activities for the reporting period.
- 15.2 **APPLICABLE DOCUMENTS:**
ANSI/ISO/ASQ Q9001-2000 *Quality Management Systems Requirements*
- 15.3 **CONTENTS:** The Quality Assurance Management Plan (QAMP) and QAMP Quarterly Summary Reports shall contain:
 - a. The Quality Assurance Management Plan (QAMP) shall:
 1. Describe the Contractor's approach to ensure a quality assurance management system that fully addresses all manufacturing support activities, operations and site services provided by the Contractor .
 2. Describe the Contractor's self-evaluation process for assuring the quality of the services and products provided.
 3. Describe the Contractor's approaches and processes to assure compliance with applicable sections of ANSI/ISO/ASQ Q9001:2000 and the Marshall Management System related to the PWS.
 4. Describe the Contractor's process for obtaining and utilizing feedback from MAF user(s)/tenant(s) to continuously evaluate the quality of services and products provided.
 5. Describe the operational and process verification reviews to assure all contract elements meet NASA/MSFC/MAF requirements.
 6. Describe the Contractor's approach and processes to assure that when any work performed by the Contractor in areas or on equipment / systems that interface with flight hardware; the work performed by the Contractor will not compromise the quality of the area or equipment/system that interfaces with flight hardware production.

15.3 **CONTENTS:** The contractor's Safety and Health Plan shall clearly describe their approach and methods for assuring compliance with the following MSFC SHE core program requirements and in accordance with the applicable documents listed in 15.2 that are applicable to the scope of work performed under this contracted effort.

a. Management leadership and employee involvement:

1. A description of the company's policy and managements commitment to (1) provide a safe and healthful workplace for personnel (i.e., employees, customers, and public), (2) protect the property, and (3) assure compliance with OSHA, NASA, MSFC MPR 8715.1 and all other MSFC SHE document requirements applicable to this contracted effort
2. A description of the contractor's motivational or innovative techniques implemented to assure management and employees are held accountable to perform their jobs/tasks in a safe and healthful manner..
3. A description of the actions taken by the contractor or the disciplinary program implemented when management or employees are discovered not performing their jobs/tasks in a safe and healthful manner.
4. A description of the contractor's safety, health and motivation programs and includes documented safety meetings and safety awareness training for employees. (NOTE: Onsite contractors shall document their safety meetings and safety awareness training in the MSFC Supervisors Safety Web page (SSWP).
5. A description of how the contractor performs and documents self evaluations of their safety and health program and provides the frequency of these self evaluations.
6. A description of how the contractor assures the MSFC safety and health requirements and responsibilities applicable to this contracted effort are flowed-down and passed between all company levels and to all subcontractors, when applicable.
7. A description of how the contractor assures that each contractor employee fully understands their roles and responsibilities in supporting the MSFC SHE program.
8. Provide the identification, by title, of the individual assigned by the contractor to be responsible for implementing the contractor's SHE program elements and will serve as the day-to-day SHE Point of Contact (POC) for this contracted effort.
9. A description of how the Safety and Health plan is assured to be reviewed annually and updated as necessary.

15. DATA PREPARATION INFORMATION (CONTINUED):

- b. System and worksite analysis:
 - 1. A description of how the contractor assures potentially hazardous conditions are identified in the work area and operations (e.g., hazard analysis, safety assessment, risk assessment and employee identified concerns).
 - 2. A description of the interrelationship between the applicable MSFC documented program and the OSHA programs that require documented program applicable to this contracted effort (e.g., Respiratory Protection, Hazard Communication, Confined Space, and Lockout/Tagout).
 - 3. A description of how each contractor supervisor performs and documents monthly safety visit of their assigned work area. (NOTE: Onsite safety visits shall be performed once per month per supervisor and documented in the MSFC SSWP.)
- c. Hazard prevention and control:
 - 1. A description of how the contractor assures potentially hazardous conditions is controlled in the work area or in an operation. This can include the generation of plans, procedures, and other working documents that clearly identify the hazardous conditions and the necessary cautions taken to mitigate the hazards. (NOTE: MSFC Safety Department concurrence is required for all onsite hazardous procedures and MSFC requires these procedures and plans to be reviewed annually.)
 - 2. A description of the contractor's emergency management program and a list of contractor emergency points of contact located onsite.
 - 3. A description of how the contractor assures all mishaps and close calls are investigated to the extent necessary to determine root cause and the reporting requirements are in accordance with MWI 8621.1. (Reference DRD 1234SA-MSR, *Mishap and Safety Statistics Report*).
 - 4. A description of how the contractor provides safety and health services applicable to this contracted effort. (e.g., industrial hygiene monitoring, emergency medical support, hearing conservation program, respiratory protection, and hazard communication).
 - 5. A description of how contractor employees are trained to and given the authority to suspend work where safety, health or environmental conditions warrant such action.
- d. Safety and health training:
 - 1. A description of how each contractor employee is (1) trained to recognize hazards, (2) avoid accidents, (3) know the hazards specific to their job, and (4) fully understands the contractor's disciplinary program.
 - 2. A description of how contractor employee training needs are determined that are specific to the job the employee is expected to perform. (NOTE: Onsite employee training assessments shall be performed using the SHE Training Assessment located on the MSFC SSWP.)
 - 3. A description of how the contractor provides and documents training for employees that are designated as (1) competent, or (2) qualified, or (3) authorized, or (4) certified to perform operations that require job specific training in accordance with 29 CFR 1910 or 29 CFR 1926.
 - 4. Provide a **list** of job categories performed by the contractor that require a MSFC Safety Certification under this contracted effort in accordance with MWI 3410.1, "Personnel Certification Program." (NOTE: Onsite contractor safety certifications required by MWI 3410.1 shall be tracked in the MSFC Certification Database (CERTRAK).
- e. Environmental compliance – A description of how the contractor assures compliance with environmental laws and regulations 40 CFR, Louisiana Department of Environmental Quality (LDEQ), and NPR 8500.1 under this contracted effort will be addressed in the Environmental Operations Plan. Environmental data submittals are addressed in the Environmental Engineering (EE) section of this DPD.

MPR 3410.1	<i>Training</i>
MWI 3410.1	<i>Personnel Certification Program</i>
NPR 8715.3	<i>NASA General Safety Program Requirements</i>
- 15.3 **CONTENTS:** The Personnel Certification Plan shall provide a description of how the contractor will implement and assure an effective training program in accordance with MPR 3410.1, certification program in accordance with NPR 8715.3 and the tracking of these certifications in accordance with MWI 3410.1. The plan shall include the following:
 - a. Certification program:
 1. General:
 - (a) Certification Program description.
 - (b) Method to select operations or classifications requiring a certification.
 2. Certification requirements/skills:
 - (a) Education, training, skills and other qualifications.
 - (b) Physical condition, if applicable.
 3. Certification process:
 - (a) Testing process (written and/or proficiency testing).
 - (b) On-Job-Training (OJT), if applicable.
 - (c) Documentation and training of the certification

15. DATA PREPARATION INFORMATION (CONTINUED):

- b. Documentation required for certification.
- c. List specific operations types or classifications requiring certification. This can be determined by the operations and processes identified in the PWS. Examples include the following:
 - 1. High pressure tubing fabrication and assembly.
 - 2. Welding:
 - (a) Carbon steel.
 - (b) Stainless steel.
 - (c) Aluminum.
 - 3. Control system operations.
 - 4. Schematic drawing comprehension.
 - 5. Other processes identified by the PWS.
- d. NPR 8715.3 and MWI 3410.1 provide a list of potentially hazardous operation and skills that require a NASA certification. Examples include the following:
 - 1. Forklift, crane and hoist operators.
 - 2. Cryogenic and other hazardous pressure system operators.
 - 3. Propellant & Explosive Handlers.
 - 4. Hazardous chemical/toxic material handling.
 - 5. Confined space entry.
 - 6. Electrical/instrumentation cable fabrication (including test articles):
 - (a) Crimping.
 - (b) Cabling, Harnessing, and Wiring.
 - (c) Soldering including Surface Mount Technology (SMT).
 - (d) Staking and Conformal Coating.
 - (e) ESD Control.
- e. Welding inspection and nondestructive evaluation (NDE).
 - 1. Penetrant Testing.
 - 2. Magnetic Particle Testing.
 - 3. Eddy Current Testing.
 - 4. Radiographic Testing.
 - 5. Thermal/Infrared Testing.
 - 6. Visual Testing.

8. **OPR:** QD12 9. **DM:** MM01
10. **DISTRIBUTION:** Per Contracting Officer's letter
11. **INITIAL SUBMISSION:**
 - a. **Safety Statistics** submitted by the 10th of each month after contract award.
 1. Safety statistics are reported using MSFC Form 4371, or an electronic notification system equivalent, or direct input to NASA Incident Reporting Information System (IRIS) database by the contractor designated IRIS administrator.
 2. Safety statistics reports shall include: contract number, subcontractors, NAISC codes, number of employees, number of supervisors, hours worked, and number of injuries including days away from work and/or first-aid cases.
 3. Access to IRIS database can be obtained from the MSFC IRIS administrator located in the MSFC Industrial Safety Branch (ISB) after contract award.
 - b. **Initial reporting for ALL mishaps (Type A, B, C and D mishaps and close calls)** for ALL contractors working onsite shall be reported to Industrial Safety Branch (ISB) as soon as possible, but **no later than 1 hour** of occurrence or awareness by:
 1. Direct input through the "SHE Report" located on the Safety, Health & Environmental (SHE) webpage located on "Inside Marshall." On the SHE webpage select the "Mishaps, Questions and Concerns" pull-down menu, then select "Report Mishaps/Close Calls/ Concerns"
 2. Calling the Safety Hotline (256) 544-0046 or 544-HELP (4357), option "safety," or
 3. Direct input into the NASA Incident Reporting Information System (IRIS) by the contractor designated IRIS administrator.
 - c. **Initial reporting for Type A and B mishaps and high visibility close calls** for contractors working offsite shall be reported to Industrial Safety Branch (ISB) as soon as possible, but **no later than 1 hour** of occurrence or awareness by either of the following methods in section b.2 or b.3.
 1. If a contractor employee has any type mishap while visiting a MSFC controlled site, they shall report immediately to their site sponsor in addition to other reporting requirements.
 - d. **Initial reporting for Type C and D and low visibility close calls** for contractors working offsite shall be reported via the Safety Statistics Report submitted monthly. Follow-up information for these type mishaps and close calls can be requested by MSFC ISB.
 - e. **Initial reports for all mishaps and close calls** shall provide as much information as possible, but at a minimum include the following: location and time of incident, number of fatalities, number hospitalized, type of damage, estimated cost, brief description, and contact person's name and phone number in accordance with MWI 8621.1 and NPR 8621.1.
 - f. **Reporting of a non-work-related fatality or serious injury or illnesses that occur to contractor employee while working onsite shall be within 24 hours** of occurrence or awareness of injury by:
 1. Notifying the Contracting Officer and MSFC ISB. (For contractors working offsite reporting of a non-work-related injury or illness notification is at the discretion of the family.)
 - g. **Follow-up reporting for ALL contractors:**
 1. **Type A or B mishaps, or high visibility mishaps or close calls:** Follow-up report **within 24 hours** through IRIS entry by the contractor designated IRIS administrator, or electronic submittal to ISB.
 2. **Type C or D mishaps, or non-high visibility close calls:** Follow-up report or update **within 6 days** through IRIS entry by the contractor designated IRIS administrator, or electronic submittal to MSFC ISB.

15.4 **FORMAT:** The following formats or electronic equivalent shall be submitted:

- a. MSFC Form 4371, "MSFC Contractor Accident and Safety Statistics."
- b. Mishap Board Report using the format provided in NPR 8621.1.
- c. Additional Information Submittal per MWI 8621.1.

15.5 **MAINTENANCE:** None required

15.6 **DEFINITIONS:**

NASA Mishap. An unplanned event that results in at least one of the following:

- a. Injury to non-NASA personnel, caused by NASA operations.
- b. Damage to public or private property (including foreign property), caused by NASA operations or NASA-funded development or research projects.
- c. Occupational injury or occupational illness to NASA personnel.
- d. NASA mission failure before the scheduled completion of the planned primary mission.
- e. Destruction of, or damage to, NASA property except for a malfunction or failure of component parts that are normally subject to fair wear and tear and have a fixed useful life that is less than the fixed useful life of the complete system or unit of equipment, provided that the following are true: 1) there was adequate preventative maintenance; and 2) the malfunction or failure was the only damage and the sole action is to replace or repair that component.

15. DATA PREPARATION INFORMATION (CONTINUED):

Close Call. An event in which there is no injury or only minor injury requiring first aid and/or no equipment/property damage or minor equipment/property damage (less than \$1000), but which possesses a potential to cause a mishap.

High Visibility (Mishaps or Close Calls). Those particular mishaps or close calls, regardless of the amount of property damage or personnel injury, that the Administrator, Chief/OSMA, CD, AA/OIA, or the Center SMA director judges to possess a high degree of programmatic impact or public, media, or political interest including, but not limited to, mishaps and close calls that impact flight hardware, flight software, or completion of critical mission milestones.

Type A Mishap. A mishap resulting in one or more of the following: (1) an occupational injury or illness resulting in a fatality, a permanent total disability, or the hospitalization for inpatient care of 3 or more people within 30 workdays of the mishap; (2) a total direct cost of mission failure and property damage of \$1 million or more; (3) a crewed aircraft hull loss; (4) an occurrence of an unexpected aircraft departure from controlled flight (except high performance jet/test aircraft such as F-15, F-16, F/A-18, T-38, OV-10, and T-34, when engaged in flight test activities).

Type B Mishap. A mishap that caused an occupational injury or illness that resulted in a permanent partial disability, the hospitalization for inpatient care of 1-2 people within 30 workdays of the mishap, or a total direct cost of mission failure and property damage of at least \$250,000 but less than \$1,000,000.

Type C Mishap. A mishap resulting in a nonfatal occupational injury or illness that caused any days away from work, restricted duty, or transfer to another job beyond the day or shift on which it occurred, or a total direct cost of mission failure and property damage of at least \$25,000 but less than \$250,000.

Type D Mishap. A mishap that caused any nonfatal OSHA recordable occupational injury and/or illness that does not meet the definition of a Type C mishap, or a total direct cost of mission failure and property damage of at least \$1,000 but less than \$25,000.

Offsite. A contractor that is not located on a NASA Center or NASA-owned facility.

Onsite. A contractor that is located on a NASA Center or NASA-owned facility.
