

NASA Designated Countries List

The following countries and areas are designated as requiring additional guidance, review, and approval by NASA HQ due to concerns regarding potential technology transfer based either on a) technology transfer concerns by the Departments of Commerce and State; and/or b) other considerations such as political sensitivities. This list is a critical tool for ensuring NASA adherence with related requirements.

All Foreign National visitors require Center Export Administrator review and approval; in addition, Foreign National visitors to NASA born in, or citizens of, these countries or areas require review and approval by a NASA International Desk Officer and the Headquarters Export Administrator. Foreign National Visitors born in, or current citizens of, countries or areas designated by an “X” in Column II will generally be denied.

All NASA correspondence, including emails, to these countries or areas requires the concurrence of a NASA Center Export Administrator, in accordance with section 4.2 of NPR 1450.10E, NASA Correspondence Management and Communications Standards and Style.

Detailed descriptions of the NASA “Designated Country List” columns can be found in the key following the list.

ISO CODE	COUNTRY OR AREA	I	II	III	IV
BT	Bhutan	X			
TW	Taiwan	X			
<i>Note: Although Taiwan is not recognized as a country by the U.S. Department of State, it is considered a separate destination under the Export Administration Regulations and for the purposes of the NASA Designated Countries List. (see: 15 CFR Supplement No. 1 to Part 738 – Commerce Country Chart).</i>
