

Objectives:

- Outline readiness assessment process used for launches from KSC that do not follow NPR 7120.5 or a tailored version. It is intended to be used for Federal Aviation Administration licensed commercial launches from KSC, as described in KSC-PLN-5000_LL or as directed by the Director, KSC, to determine if KSC is ready to support the planned launch operations.
- Provide a forum to ensure support requests and technical requirements for a Launch Provider's mission have been or will be performed.
- Obtain the input of KSC organizations providing support to launch activities of the readiness of KSC's facilities, equipment, and infrastructure for launch.
- Ensure that all associated technical risks have been appropriately characterized and dispositioned by the appropriate organization.

SRR Coordinator
Spaceport Integration (SI)

Approved by _____
 Director, John F. Kennedy Space Center

***Customer Advocates** are responsible for coordinating activities to provide customers with products and services necessary to perform spacecraft and launch vehicle processing at KSC.

Note 1: The participation of the following organizations or representatives is required for the SRR:

- Director, KSC (AA)
